

LCFF Budget Overview for Parents

Local Educational Agency (LEA) Name: Lennox School District
CDS Code: 19647090000000
School Year: 2025-26
LEA contact information:
Becki Blanco
Assistant Superintendent of Instructional Services
becki_blanco@lennoxk12.org
(310) 695-4000

School districts receive funding from different sources: state funds under the Local Control Funding Formula (LCFF), other state funds, local funds, and federal funds. LCFF funds include a base level of funding for all LEAs and extra funding - called "supplemental and concentration" grants - to LEAs based on the enrollment of high needs students (foster youth, English learners, and low-income students).

Budget Overview for the 2025-26 School Year

This chart shows the total general purpose revenue Lennox School District expects to receive in the coming year from all sources.

The text description for the above chart is as follows: The total revenue projected for Lennox School District is \$85,347,000, of which \$60,211,142 is Local Control Funding Formula (LCFF), \$19,231,497 is other state funds, \$2,055,724 is local funds, and \$3,848,637 is federal funds. Of the \$60,211,142 in LCFF Funds, \$18,477,244 is generated based on the enrollment of high needs students (foster youth, English learner, and low-income students).

LCFF Budget Overview for Parents

The LCFF gives school districts more flexibility in deciding how to use state funds. In exchange, school districts must work with parents, educators, students, and the community to develop a Local Control and Accountability Plan (LCAP) that shows how they will use these funds to serve students.

This chart provides a quick summary of how much Lennox School District plans to spend for 2025-26. It shows how much of the total is tied to planned actions and services in the LCAP.

The text description of the above chart is as follows: Lennox School District plans to spend \$94,414,783 for the 2025-26 school year. Of that amount, \$60,473,983 is tied to actions/services in the LCAP and \$33,940,800 is not included in the LCAP. The budgeted expenditures that are not included in the LCAP will be used for the following:

"The budgeted expenditures that are not included in the LCAP will be used for the following:

Significant general fund expenditures that are not included in the LCAP include facilities, maintenance and operations, custodial services, utilities, legal expenses, student transportation and special education cost. Additional funds including Prop 28, Title I, II, III and IV, Learning Recovery Block Grant, Educator Effectiveness Grant, and Literacy Coaches and Training Specialists Grant are not included in the LCAP."

Increased or Improved Services for High Needs Students in the LCAP for the 2025-26 School Year

In 2025-26, Lennox School District is projecting it will receive \$18,477,244 based on the enrollment of foster youth, English learner, and low-income students. Lennox School District must describe how it intends to increase or improve services for high needs students in the LCAP. Lennox School District plans to spend \$22,378,802 towards meeting this requirement, as described in the LCAP.

LCFF Budget Overview for Parents

Update on Increased or Improved Services for High Needs Students in 2024-25

This chart compares what Lennox School District budgeted last year in the LCAP for actions and services that contribute to increasing or improving services for high needs students with what Lennox School District estimates it has spent on actions and services that contribute to increasing or improving services for high needs students in the current year.

The text description of the above chart is as follows: In 2024-25, Lennox School District's LCAP budgeted \$21,227,587 for planned actions to increase or improve services for high needs students. Lennox School District actually spent \$20,631,685 for actions to increase or improve services for high needs students in 2024-25.

The difference between the budgeted and actual expenditures of \$595,902 had the following impact on Lennox School District's ability to increase or improve services for high needs students:

"There is a difference in what the Lennox School District budgeted and actually spent on services for our high needs students with the use of LCFF funds. Despite this, all services identified in the LCAP as enhanced and improved were delivered as planned. Additional funding has been made available over the past few years, which has been utilized to support these actions. Consequently, the District has been able to offer more services than originally anticipated. For instance, tutoring services have been accessible to any high-needs student requiring them. Another example is the intervention support, where every school currently has one reading intervention teacher funded by LCFF, another through Title 1 funds, and a math intervention teacher supported by ESSER funds. This increased intervention support has enhanced the District's capacity to address students' learning losses due to the pandemic.

With the ESSER 3 and Learning Recovery Emergency Block Grant funds, Lennox has boosted the social and emotional supports for high-needs students. LCFF funding has enabled the District to provide counselors at each school. Additionally, the extra funds have allowed the hiring of a social/emotional wellness coordinator who supports students, staff, and parents, and provides valuable connections and resources to the community. The combination of these funds has also allowed the District to increase staff implementing Play Works on each campus, offering our high-needs students more opportunities for meaningful adult/student connections."

Local Control and Accountability Plan

The instructions for completing the Local Control and Accountability Plan (LCAP) follow the template.

Plan Summary [2025-26]

General Information

A description of the LEA, its schools, and its students in grades transitional kindergarten–12, as applicable to the LEA. LEAs may also provide information about their strategic plan, vision, etc.

The Lennox School District, located just two miles from LAX Airport, is a vibrant and dedicated educational community serving approximately 3,900 students from preschool through eighth grade across five elementary schools and one middle school. With a talented and committed staff, we strive to ensure that every student is "On the Flight Path to Success" by providing high-quality, student-centered education.

Lennox prioritizes the development of the whole child through a comprehensive Multi-Tiered System of Supports (MTSS), which ensures all students receive the academic, behavioral, and social-emotional support they need to thrive. Through early intervention, data-driven practices, and strong tiered support systems, we are committed to meeting the diverse needs of every learner.

Leadership development is a cornerstone of our district culture. We have proudly implemented The Leader in Me model, which fosters a culture of empowerment and equips students with essential 21st-century skills such as communication, collaboration, critical thinking, and self-management. The integration of The 7 Habits of Happy Kids reinforces social-emotional learning and personal growth, enabling students to lead their own learning and contribute positively to their school communities.

Our commitment to building safe, inclusive, and supportive learning environments is further strengthened by the integration of restorative practices throughout our schools. These practices focus on relationship-building, accountability, and repairing harm, creating a strong foundation for positive school climate and student well-being.

Additionally, our elementary schools benefit from the Playworks program, which enhances leadership, cooperation, and conflict resolution during recess, reinforcing the academic and social learning that occurs in the classroom.

Each school has also implemented a daily, non-negotiable 50-minute intervention block. This dedicated time provides targeted academic support or enrichment based on student needs, ensuring that no learner is left behind.

Lennox is proud to offer a wide array of wraparound services including School Counselors, Parent Centers, Before and After-School programs, Dual Language Immersion, and Engineering Academies. These offerings reflect our unwavering commitment to nurturing the whole child and preparing every student for lifelong success.

Reflections: Annual Performance

A reflection on annual performance based on a review of the California School Dashboard (Dashboard) and local data.

2024 Dashboard and Local Data

Based on the California School Dashboard data for 2024, the Lennox School District has experienced both progress and ongoing challenges across key educational indicators. In the 2023-24 academic year, the Lennox School District demonstrated consistency in English Language Arts (ELA) performance, with all schools except Dolores Huerta Elementary, either slightly increasing or maintaining their scores compared to 2022-23. This stability reflects the district's continued investment in literacy supports and teacher development. In Mathematics, the district experienced slightly greater gains, signaling that recent math-focused interventions and curriculum enhancements are beginning to show results. However, similar to ELA, Dolores Huerta Elementary did not follow this positive trend.

Statewide data indicates that approximately 46% of English learners are making progress toward English language proficiency, a slight decrease from previous years. Long-term English learners, in particular, continue to struggle, often scoring significantly below standard in both ELA and Mathematics.

Additionally, in 2024 Suspension rates declined across all student groups from 2.7% to 1.8% of students suspended at least one day, reflecting the district's efforts to create a more supportive and inclusive school environment. There was also a 5.5% decrease in chronic absenteeism which suggests that initiatives aimed at improving attendance, such as outreach programs and enhanced student support services, are having a positive impact. However, the current rate remains higher than pre-pandemic levels, indicating that further efforts are needed to engage students and address barriers to consistent attendance.

We also observed positive trends on our local STAR Renaissance Assessments, with student performance improving from the Beginning of the Year (BOY) to the Middle of the Year (MOY). These mid-year gains indicate that our instructional strategies and interventions are having a measurable impact on student learning and growth across grade levels.

2024 Successes

One of the accomplishments our district is most proud of is the significant decrease in suspension rates. In 2023, the California School Dashboard placed Lennox School District at the orange performance level for suspensions. This year, we are proud to report that we have moved up to the green performance level. All of our elementary schools are now performing at the blue level, the highest performance band, with a notable improvement at Dolores Huerta Elementary School, which moved from orange to blue. Lennox Middle School also made a substantial gain, improving from orange to green. In terms of student groups, our African American student group improved from red to orange, and the majority of our other student groups advanced from orange to green. These gains are a testament to the district's commitment to restorative practices, equitable discipline, and fostering safe, supportive learning environments for all students.

Although our district remained in the yellow performance band for chronic absenteeism on the 2024 California School Dashboard, we are encouraged by the notable progress made in this area. In 2023, 27.5% of our students were identified as chronically absent. By 2024, that number had decreased to 22%, representing a 5.5% improvement. According to the 5x5 placement grid, all of our school sites demonstrated a status of "declined significantly," indicating meaningful reductions in chronic absenteeism across the district. This positive trend reflects the impact of our ongoing efforts to engage families, provide targeted supports, and remove barriers to regular school attendance. In 2023, Buford Elementary School had several student groups at the red performance level for chronic absenteeism on the California School Dashboard, including English Learners, Socioeconomically Disadvantaged Students, and Students with Disabilities. By 2024, both the English Learner and Socioeconomically Disadvantaged student groups advanced to the yellow performance level, while Students with Disabilities moved from red to orange. Similarly, at Lennox Middle School in 2023, English Learners, Homeless Students, Socioeconomically Disadvantaged Students, Students with Disabilities, and Hispanic Students were all performing at the red level. In 2024, all of these student groups showed significant improvement, advancing to the yellow performance band.

Although the majority of our schools either maintained or showed slight growth in their CAASPP English Language Arts (ELA) and Mathematics scores, several sites demonstrated notable progress in math. Buford Elementary School led with a 7% point increase in students meeting or exceeding math standards, while Moffett Elementary School followed closely with a 4% point gain. At the middle school level, our CAASPP results were particularly encouraging. In Mathematics, Lennox Middle School saw a 3% increase, with the percentage of students meeting or exceeding standards rising from 21% in 2023 to 24% in 2024. At Lennox Middle School CAASPP English Language Arts (ELA) also showed a positive trend, increasing from 38% in 2023 to 41% in 2024. Additionally at the middle school level, we observed meaningful progress among our English learner student group. According to the California School Dashboard, English learners were performing at the red performance level in both English Language Arts (ELA) and Mathematics in 2023. By 2024, this group advanced to the yellow performance level in both subject areas.

2024 Challenges

According to the 2024 California School Dashboard, Students with Disabilities across the Lennox School District are performing at the red performance level in both English Language Arts (ELA) and Mathematics. When disaggregated by school site, this student group continues to face significant challenges, particularly in Mathematics, where they are performing at the red level across all schools. In ELA, both Felton Elementary School and Lennox Middle School also remain at the red performance level for Students with Disabilities. These results highlight the ongoing need for intensified academic support, specialized instructional strategies, and greater access to inclusive learning environments to help close the achievement gap for this student population.

Although we are making gains as a district in Mathematics, overall performance remains an area of concern, with only 30% of students meeting or exceeding grade-level standards. While English Language Arts (ELA) scores are slightly higher, with 41.5% of students meeting or exceeding standards, they still fall below the state average. These scores highlight the need for continued focus on strengthening core instruction, expanding access to academic interventions, and providing professional development that equips educators with the tools to meet diverse student needs.

Although 46% of our English Learners are making progress toward English language proficiency, the 2024 California School Dashboard reflects a 4.5% point decrease compared to 2023. Additionally, both Huerta Elementary School and Moffett Elementary School are performing at the red performance level on the English Learner Progress Indicator. Our Long-Term English Learners, who are primarily at the middle school level, are also a group of concern, having received a red performance level in Mathematics. These data points underscore the continued importance of implementing more differentiated instruction, language-integrated content strategies, and ongoing monitoring to accelerate progress for our English Learner population.

Although we are making substantial gains in reducing chronic absenteeism district-wide, challenges remain for specific student groups. At Jefferson Elementary, students identified as Homeless are performing at the red level on the California School Dashboard's Chronic Absenteeism indicator.

Learning Recovery Emergency Block Grant (LREGB)

The District will have unexpended LREGB Funds for the 2025-26 year. Based on a needs assessment that was conducted and shared with the District School Leadership Team, The District will use these funds for the following:

Goal 2, Action 7 - Math intervention teachers will be provided at school to address learning loss and achievement gap in mathematics. Math intervention teachers are a critical component of the district's Multi-Tiered System of Supports (MTSS), delivering Tier 2 and Tier 3 interventions that are essential for addressing persistent achievement gaps, especially among unduplicated students. Metrics, rationale, and expenditure are included in the action

Goal 2, Action 12 - Students performing below grade level will have the opportunity to attend a three week of summer academy. This program is designed to address learning loss and accelerate student progress by focusing on essential grade-level standards identified by the district as critical for academic success. Metrics, rationale, and expenditure are included in the action

Goal 3, Action 10 - A District Social and Emotional Wellness Coordinator will provide outreach to foster youth and families to ensure that these students are receiving the supports needed to be successful in school. Metrics, rationale, and expenditures are included in the action.

2023 Dashboard Lowest Performance Level (Red) Indicators

Based on an examination of state data from the 2023 California Dashboard, alongside an analysis of local data from the 2023/2024 school year and input from educational partners, the following areas of success, progress, and improvement have been identified.

State Indicators:

Mathematics Indicator - . As reported on the CA Dashboard, our Students with Disabilities are currently performing within the red performance level. Additionally, at Lennox Middle School, both our English Learner (EL) students and Students with Disabilities are exhibiting performance levels in mathematics that fall within the red performance level.

English Language Arts Indicator - Particularly concerning is the performance of English Learners and Students with Disabilities at Lennox Middle School, who are both performing at the red performance level. Moreover, district-wide, Students with Disabilities are also performing at the red level in English Language Arts. In addition to the challenges faced at the middle school level, two elementary schools, Huerta and Felton Elementary School, have also received a red performance level in English language arts for Students with Disabilities.

Suspension Indicator - Our African American students are performing at the very high red performance level district wide.

Chronic Absenteeism Indicator - There was an increase in the rate of chronically absent students at both Lennox Middle School and Buford Elementary, resulting in both schools being at the red performance level in this area. Additionally, there are significant challenges in chronic absenteeism faced by various student groups. At Buford Elementary School, English Learners, Socioeconomically Disadvantaged Students, and Students with Disabilities are performing at the red level. At Lennox Middle School, English Learners, Homeless Students, Socioeconomically Disadvantaged Students, Students with Disabilities, and Hispanic Students are all performing at the red level.

In order to address our highest needs identified in the analysis above, the following actions provide support for school and student groups performing at the lowest level:

Students with Disabilities continue to demonstrate slower than expected growth in both mathematics and ELA. To address this need the District continues to recruit special education staff and support personnel. Furthermore, there is a pressing need to enhance academic performance for all students in grades 6-8, with a particular emphasis on our Students with Disabilities. To address the needs of Students with Disabilities, the ELA and Math Intervention programs will continue, reinforced by small class sizes and supplementary materials tailored to support student learning. Students performing below grade level, including Students with Disabilities, will be invited to participate in after school tutoring. Professional development opportunities and coaching support will also be extended to teachers. These actions are addressed in Goal 1 Actions 1, 7, 11, 15, and 18 and Goal 2 actions 6, 7 and 9.

The District is dedicated to offering targeted support to improve the performance of English Learners at Lennox Middle School. We will partner with Club VR to provide after-school reclassification tutoring for our Long-Term English Learners (LTELs). Furthermore, we will assist newcomers by offering after-school and summer English Language Development (ELD) classes. The needs of our English Learner students will be addressed through small group instruction, facilitated by reduced class sizes, supplementary materials, and teacher professional development and coaching. These actions are addressed in Goal 1 Actions 1, 6, 7, 8, 11 and 13 and Goal 2 Action 8.

To address the suspension rate among our African American students, the District is committed to offering tiered behavior and social-emotional supports tailored to their specific needs. These supports will be promptly provided to ensure the success of this student group. Services such as counseling, wrap-around services, and mentoring will be offered. Furthermore, the District will continue implementing the Leader in Me program and Playworks across all schools as a preventative measure. These actions are addressed in Goal 2 Actions 3 and 5 and Goal 3 Actions 3, 10, 11, and 13 and disaggregated outcomes are included in our measuring and reporting results table in goals 2 and 3.

While the chronic absentee rate has seen a decline, it remains higher than anticipated at two schools and among various student groups. To address this need, we will engage students and families in returning to regular attendance in school. The District will provide celebrations and include community partners in helping incentivize students and families to attend school regularly. Parent liaisons, attendance clerks, and counselors will work with families to address the needs of identified students. These actions are addressed in Goal 2 Action 3, Goal 3 Actions 2 and 6, and Goal 4 action 6.

Local Indicators:

Priority 1 - Basic: The District has fulfilled all indicators in this domain, except for achieving full teacher credentialing. Three special education teachers currently lack full credentials due to staffing shortages. 100% of students have access to instructional materials aligned with standards and District facilities are maintained at a high standard of cleanliness.

Priority 2 - State Academic Standards: Across math, English language arts, social studies, science and English language development, the District fully implements instructional materials and professional development in accordance with state standards. Professional development on a new science adoption was provided to all elementary and middle school science department teachers during the summer of 2023 and ongoing throughout the academic year.

Priority 3 - Parent and Community Involvement: The District places significant emphasis on fostering parent and community involvement. Each school has dedicated Parent Liaisons and operational Parent Centers. Parents actively participate in leadership roles and in various committees. Opportunities to attend workshops and English classes will continue to be provided to parents.

Priority 6 - Climate: The District is dedicated to creating a safe and supportive learning environment that enhances student engagement. Results from the LCAP Survey indicate that a majority of parents, students, and staff feel highly safe and connected while at school. Social and emotional learning remains a key focus. Providing additional staff, such as social workers, offers intensified counseling and community support to identified students. Each school also employs a full-time counselor to promote the well-being of students and families. The Leader in Me program has been adopted district-wide, with all teachers and certificated support staff receiving training.

Priority 7 - Access to a Broad Course of Study: All students, including English learners and Students with Disabilities, have access to a diverse range of courses. The District has established procedures to monitor this access, including regular review of master schedules, teaching schedules, report cards, and Individualized Education Programs (IEPs). At the middle school level, numerous elective options are available and a heritage program assists newcomers in English language acquisition. Special education services are provided in the least

restrictive environment and the District will continue implementing Multi-Tiered Systems of Support (MTSS) to ensure comprehensive access to a broad course of study for all students.

According to feedback from educational partners and the findings of our LCAP surveys, our district continues to enhance the involvement and capacity of our parents and families. We have fostered valuable partnerships with local community colleges, enabling them to provide English classes directly on our campuses. As a result, our parents remain closely connected to their children's schools. Our Parent Centers and Parent Liaisons play a pivotal role in this effort, offering volunteering opportunities and a wealth of resources covering various topics such as health, community services, and parenting workshops.

Additionally, our educational partners have expressed appreciation for the tutoring and intervention programs aimed at narrowing achievement gaps among students. Our intervention teachers play a crucial role in tailoring interventions to address the unique needs of individual students. They utilize a data-driven approach to monitor student progress closely, identifying areas where additional support is warranted.

Furthermore, our educational partners commend the expansion of counseling services, which are instrumental in addressing the heightened social-emotional needs of our students. This concerted effort underscores our commitment to providing comprehensive support to our school community.

There remains a critical need to recruit teachers possessing the required credentials and skills, particularly for challenging positions like special education. Furthermore, it is imperative that we sustain efforts to implement a comprehensive tiered support system for students, addressing academic, behavioral, and social-emotional needs. Ensuring the safety of our students and staff remains a priority, particularly with the surge in crime and violence in the community.

Reflections: Technical Assistance

As applicable, a summary of the work underway as part of technical assistance.

N/A

Comprehensive Support and Improvement

An LEA with a school or schools eligible for comprehensive support and improvement must respond to the following prompts.

Schools Identified

A list of the schools in the LEA that are eligible for comprehensive support and improvement.

N/A

Support for Identified Schools

A description of how the LEA has or will support its eligible schools in developing comprehensive support and improvement plans.

N/A

Monitoring and Evaluating Effectiveness

A description of how the LEA will monitor and evaluate the plan to support student and school improvement.

N/A

Engaging Educational Partners

A summary of the process used to engage educational partners in the development of the LCAP.

School districts and county offices of education must, at a minimum, consult with teachers, principals, administrators, other school personnel, local bargaining units, parents, and students in the development of the LCAP.

Charter schools must, at a minimum, consult with teachers, principals, administrators, other school personnel, parents, and students in the development of the LCAP.

An LEA receiving Equity Multiplier funds must also consult with educational partners at schools generating Equity Multiplier funds in the development of the LCAP, specifically, in the development of the required focus goal for each applicable school.

Educational Partner(s)	Process for Engagement
District School Leadership Team 11/20/24, 1/29/25, 3/26/25, 5/28/25	Four meetings were held with the District School Leadership Team, which includes site and district administrators, parent representatives from each school, union leaders, teachers, classified staff, and community partners. The committee also included representation from families and educators of English learners and students with disabilities. Participants received updates on LCAP goals, reviewed student data and survey results, and provided recommendations for actions and services. A draft of the 2025 LCAP update was presented, and the committee offered thoughtful feedback to inform final revisions. A key topic of discussion this year was the impact of declining enrollment. A presentation was given on how enrollment trends affect the district’s Local Control Funding Formula (LCFF) revenue and, in turn, the LCAP. The group engaged in a meaningful discussion on how to prioritize resources given these fiscal constraints. Teachers, administrators, and classified staff shared valuable insights on how LCAP actions have impacted students and identified areas for refinement. Additional input from the committee ensured that whole-child supports, wellness, and family engagement remained a central focus of the plan.

Educational Partner(s)	Process for Engagement
Board of Education	District staff provided regular updates during scheduled board meetings, with presentations highlighting student achievement data, progress on LCAP implementation, and alignment with accountability metrics. Board members received comprehensive information on state and local assessment results, as well as updates on performance indicators from the California School Dashboard. In addition, survey results from students, families, and staff were shared with the Board of Education to provide insight into the perspectives and experiences of educational partners related to LCAP goals and services. On February 11, 2025, a presentation on the Mid-Year LCAP was delivered to the Board of Education providing further insights into the ongoing progress and adjustments within the plan.
District English Advisory Council & Parent Advisory Council	Staff presented data illustrating the district's progress toward LCAP goals, along with a breakdown of the actions and services supporting those outcomes. While the presentations offered a broad overview of all LCAP components, particular attention was given to actions and services supporting English learners. Committee members were invited to examine related goals, metrics, and resource allocations, and were encouraged to provide input based on current student data and program outcomes. The committees were in strong support of continuing actions for tutoring, counseling, parent centers and campus supervision. Attendees reviewed a draft of the 2025-2026 LCAP and were given the opportunity to ask questions and offer recommendations to refine the plan. Although no questions or comments were raised during the meetings, the district ensured that all stakeholders had a clear opportunity to engage in the review process. As no feedback was submitted, no written response from the Superintendent was required.
All Lennox Staff LCAP Engagement Meetings	At the request of the District School Leadership Team (DSLTL), district staff presented the "LCAP Road Show" at staff meetings across each

Educational Partner(s)	Process for Engagement
	school. The presentation provided a comprehensive overview of the LCAP, detailing its goals, actions, and services, and included time for staff questions and discussion. This session also addressed the impact of declining enrollment on LCFF funding, with a specific focus on how it affects supplemental and concentration funding. Following the presentation, staff participated in an action prioritization exercise, where they identified top priority actions for the district based on their insights and the district's needs. The input gathered during this exercise was instrumental in shaping the continued development and refinement of the LCAP, ensuring that the plan remains aligned with the needs of our students and maximizes support for their success. During the meeting a feedback/question form was distributed among the staff in attendance and made available on the District's website allowing staff to submit written comments to further contribute to the discussion.
Parent and Community LCAP Meetings	The district hosted a parent and community meeting designed to promote broad participation. Parents and community members were invited to share their perspectives on district priorities and provide feedback on current LCAP actions. The meeting was conducted in both English and Spanish, with presentations featuring visual aids such as slides and charts to help communicate key information and gather insights. Attendees had the opportunity to engage in discussions regarding academic support, student well-being, and resource allocation. In addition to the in-person meeting, an LCAP feedback form was made available on the district website, allowing parents and staff to submit comments and suggestions at their convenience.

Educational Partner(s)	Process for Engagement
SELPA Consultation	A meeting was held with the Southwest SELPA Coordinator to discuss how the district is supporting special education students within the plan. During the meeting, it was concluded by the SELPA that there were sufficient actions in place to meet the needs of students with disabilities within the LCAP.
Parent, Student and Staff Survey	To gather comprehensive input for the LCAP, a survey was distributed to parents via email, available in both English and Spanish to ensure broad participation across our community. The district was pleased to see a significant increase in parent survey responses, thanks in large part to the support of our parent liaisons. In addition to the parent survey, 5th and 7th-grade students completed surveys during school hours to capture their feedback. Both certificated and classified staff were also invited to provide input through a separate staff survey. The results from all surveys were analyzed and presented at the March District School Leadership Team (DSLT) meeting. These findings provided important data points to guide discussions on the alignment and effectiveness of services and actions outlined in the LCAP, ensuring that the perspectives of parents, students, and staff were considered in the plan's ongoing development.
Notification of Public Hearing	In spring of 2025, parents were informed through local media, District staff, and at LCAP related meetings about the opportunity to review the draft LCAP and provide feedback prior to its approval, and take part in a public hearing. Additionally, the public was informed about the public hearing and that written comments would be welcomed.
Public Hearing	The Board of Education received a presentation on June 10, 2025 on the LCAP and the Local Indicators. No questions regarding the LCAP were raised during the hearing. The LCAP draft was made available on June 6, 2025 for educational partners to review before the public hearing. They were encouraged to offer comments to both the Board and staff during this period.

Educational Partner(s)	Process for Engagement

A description of how the adopted LCAP was influenced by the feedback provided by educational partners.

Through a variety of engagement strategies, the Lennox School District made sure that its LCAP incorporates the voices of all educational stakeholders. Students, parents, teachers, district staff, and community members were provided with multiple opportunities to participate in discussions, ask questions, and share feedback on the LCAP. The valuable input from these educational partners played a key role in shaping the LCAP, ensuring that the actions and services included are both comprehensive and sustained.

During the LCAP Road Show presentations held at staff meetings across all school sites, Lennox staff had the opportunity to reflect on current initiatives and provide input. As a result, the following actions emerged as top priorities identified by our educators:

Small Group Instruction (Goal 1, Action 1) - Teachers emphasized that smaller class sizes would allow for more focused, rigorous instruction aligned to state standards and increase opportunities for meaningful student engagement. They also shared that students, particularly those from low-income backgrounds, are facing persistent challenges in English language arts and mathematics. By reducing class sizes teachers can implement small group instruction more effectively, tailor lessons to student needs, and provide timely interventions to address learning gaps. At the middle school level, staff noted that reduced class sizes supports the integration of more project-based learning, helping students connect academic concepts to real-world issues. Elementary teachers reported that smaller class sizes allows them to more quickly identify academic deficiencies and provide personalized support in core subject areas, strengthening foundational skills and overall student outcomes.

Data Analysis During Collaboration Time: (Goal 1, Actions 2 & 3) - Middle school teachers expressed strong support for maintaining daily collaboration time with their instructional teams, highlighting its importance for lesson planning, analyzing formative assessment data, and responding promptly to student learning needs. At the elementary level, teachers also stressed the critical value of structured collaboration time built into the school day. While students participate in physical education, elementary classroom teachers meet weekly to examine student performance data and adjust instruction to better support the diverse needs of their learners, including low-income students, English learners, and foster youth. This ongoing collaboration allows teachers to refine their strategies and provide more targeted, responsive instruction across all classrooms.

Administrative Support (Goal 2, Action 2) - Staff highlighted the essential role assistant principals play in supporting unduplicated students and their families. Their responsibilities span a variety of critical functions, such as analyzing student data, tracking attendance trends, and closely monitoring engagement especially for students experiencing chronic absenteeism. In addition, assistant principals lead the coordination of academic and behavioral intervention programs and actively support the use of restorative practices to promote a safe and inclusive school environment.

Counseling (Goal 2, Action 3) - Staff consistently emphasized the critical importance of counseling services in supporting the growing number of students affected by trauma. They noted that the demand for social-emotional support on campuses remains exceptionally high.

Teachers also shared that access to counseling not only benefits students directly, but also provides valuable support in helping educators manage student behavior and emotional well-being in the classroom.

Intervention Teachers (Goal 2, Action 1 & 7) - Staff stated that intervention teachers play a vital role in supporting Tier 2 and Tier 3 students as part of the district's Multi-Tiered System of Supports (MTSS) initiative. Each elementary school has implemented a daily, non-negotiable 50-minute intervention block, during which intervention teachers deliver targeted instruction tailored to students' specific academic needs. When addressing addressing skill gaps, intervention teachers ensure that instruction is data-driven and responsive, helping to close achievement gaps and promote academic growth for all learners.

Tutoring (Goal 2, Action 9) - Staff expressed support for tutoring services offered before and after school stating that it serves as a critical extension of the district's academic support system. These sessions provide students with additional time to reinforce essential skills, receive individualized instruction, and build confidence in core subject areas. Aligned with our MTSS framework, teachers felt strongly that tutoring is especially valuable for students requiring Tier 2 or Tier 3 interventions, ensuring they have ongoing opportunities to make academic progress beyond the regular school day. The DELAC and SAC also expressed strong support for after school tutoring.

Campus Supervision (Goal 3, Action 1 & 11) - Staff highlighted that campus supervisors and Playworks staff are an essential part of the district's efforts to ensure student safety and well-being. Teachers strongly advocate for using Lennox's own staff to fulfill these roles, emphasizing the value of having trusted adults on campus who understand the unique needs of the school community. These supervisors build meaningful relationships with students and families, which not only fosters a stronger sense of belonging but also enhances campus safety.

Health and Attendance Staff (Goal 3, Action 2) - Staff stated that health and attendance clerks play a crucial role in supporting the well-being of students, particularly those identified as chronically absent. They work closely with these students and their families to address health-related barriers that may contribute to absenteeism, ensuring that students are receiving the necessary care and resources to improve attendance. In addition, health clerks support low-income students struggling with chronic health conditions such as obesity, diabetes, and asthma. By providing direct health services, coordinating with families, and connecting students with appropriate resources, health clerks help mitigate health challenges that can impact academic success, fostering a healthier school community overall.

Parent Liaisons and Parent Centers (Goal 4, Action 6) - Teachers continue to emphasize the importance of parent centers and the role of parent liaisons in facilitating meaningful communication between families and schools. They highlighted that liaisons are instrumental in connecting parents to resources, supporting involvement in school activities, and enhancing overall family engagement. The DELAC and SAC also expressed strong support for the continuation of parent classes offered through our parent centers, as they provide valuable information and tools to help families support their children's academic success.

Additionally, parent feedback gathered through surveys, DSLT representation, and LCAP meetings consistently demonstrated strong support for continued investment in technology and digital learning (Goal 1, Action 4). Families highlighted the critical role that district-issued devices and instructional technology support staff play in ensuring equitable access to learning, particularly for students from low-income households. Parents expressed appreciation for the availability of Chromebooks, hotspots, and technical support personnel who help students stay connected and engaged both during and beyond the regular school day. They emphasized that maintaining these resources is vital for student success in an increasingly digital learning environment.

The SAC and DELAC committee also voiced clear support for sustaining investments in campus supervision and student safety initiatives. They consistently shared that having familiar, trusted adults such as campus supervisors and Playworks staff on school grounds not only fosters a safe and welcoming environment but also strengthens the social-emotional well-being of students. Parents emphasized that these staff members help build strong relationships with students, encourage positive behavior, and provide a consistent adult presence during high-traffic times such as arrival, lunch, and dismissal.

Tutoring services also emerged as a top priority among families and the DELAC committee. Many parents shared that before- and after-school tutoring provides their children with much-needed academic reinforcement, particularly in reading and math. They praised the small-group and individualized nature of these sessions, stating that the additional support has helped their children build confidence and close learning gaps. Families encouraged the district to continue offering flexible tutoring options that are accessible to students across all grade levels.

Similarly, parents and the SAC committee recognized the importance of school-based counseling services and expressed gratitude for the increased mental health support available to students. They acknowledged the emotional and behavioral challenges many students are facing and stressed the need for schools to continue offering access to counselors, social workers, and mental health professionals. Parents reported that these services not only benefit students directly but also create a more supportive school climate for all learners.

The District Site Leadership Team (DSLTL) voiced strong support for the continued use of supplemental learning materials (Goal 1, Actions 7 & 8), including digital learning apps and platforms. DSLTL members emphasized that these tools enhance student engagement, support personalized learning, and provide valuable data to inform instruction. They advocated for maintaining access to high-quality, research-based educational apps that align with grade-level standards and address the diverse academic needs of Lennox students.

Finally, the District Site Leadership Team (DSLTL) conducted a comprehensive needs assessment and determined that the remaining LREGB funds would be allocated to support the following priorities: continued funding for math intervention teachers (Goal 2, Action 7), implementation of the Summer Academy to address learning gaps for students performing below grade level (Goal 2, Action 12), and support for the District Social and Emotional Wellness Coordinator, who provides outreach and services to students and families.

Goals and Actions

Goal

Goal #	Description	Type of Goal
1	The Lennox School District will provide a high quality educational system to increase the academic achievement for all students. The metrics to support this goal measures student achievement on state and local assessments, EL progress, reclassification rate, student and staff surveys, local indicators for implementation of state standards and basic services.	Broad Goal

State Priorities addressed by this goal.

Priority 1: Basic (Conditions of Learning)
Priority 2: State Standards (Conditions of Learning)
Priority 4: Pupil Achievement (Pupil Outcomes)
Priority 7: Course Access (Conditions of Learning)

An explanation of why the LEA has developed this goal.

The Lennox School District is deeply committed to ensuring that every student has access to a high-quality educational system. This commitment is rooted in the belief that all students should be prepared for success in both college and career pathways upon entering high school. To achieve this objective, the District and its community partners prioritize the delivery of a rigorous, standards-based instructional program across all academic core subjects. Additionally Educational Partner feedback indicated strong support to continue this goal from the prior LCAP. The actions to support this goal will provide additional support and access and ensure equitable outcomes for all students. The metrics to support this goal measures student achievement on state and local assessments, EL progress, reclassification rate, student and staff surveys, local indicators for implementation of state standards and basic services. We are continuing with this goal based on the 2024 CA Dashboard, as we have made progress in closing the outcome disparities, a significant gap remains between the performance of our low income, English learners, and foster youth students compared to all students, and our educational partners have emphasized the need to remedy the disparity.

Goal Analysis [2024-25]

An analysis of how this goal was carried out in the previous year.

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

Action 1 - Provide low income students with increased opportunities for small group instruction and personalized learning: This action remains a key priority and has been fully implemented during the 2024–2025 school year. The District has maintained reduced class sizes across all grade levels to support more individualized instruction. Current class size averages are 20:1 in grades K–1, 24:1 in grades 2–3, 27:1 in grades 4–5, and 29:1 in grades 6–8. These smaller class sizes continue to provide teachers with the opportunity to deliver more targeted, small group instruction, particularly in core academic subjects, allowing for better differentiation and responsiveness to student needs.

Action 2 - Students in grades 6-8 will receive instruction based on analysis of formative and summative data: This action continues to be fully implemented. Teachers in grades 6–8 are provided with dedicated daily collaboration time, which they use to examine both formative and summative assessment data. This structured time allows teams to identify trends, share effective teaching strategies, and ensure consistency in academic expectations across classrooms. The collaborative process has also strengthened home-school communication, enabling teachers to engage families more directly in supporting student progress and addressing individual learning needs.

Action 3 - Students in grades TK-5 will receive standards based instruction using a variety of strategies based on the analysis of current data: This action has been successfully implemented. To support data-driven and differentiated instruction, the District has continued deploying three dedicated PE teacher teams. These teams provide physical education twice weekly, allowing classroom teachers uninterrupted time for collaborative planning. During these sessions, teachers review formative and summative assessment data, refine instructional strategies, and adjust lesson plans to meet the diverse academic needs of their students. This structure ensures that students receive both high-quality instruction and consistent physical education, while also maximizing teacher effectiveness through meaningful collaboration.

Action 4 - Students will have continuous access to technology by having technology support staff available at the school and district levels: This action has been fully implemented. The District has assigned dedicated technology support staff at each school site and district office to promptly address any technology-related issues. These professionals are responsible for ensuring that both hardware and software are regularly updated, providing students, staff, and parents with seamless access to the necessary tools for learning. Additionally, the technology staff actively monitor the "Line Wize" app, a cyber safety software, to track and address any student safety concerns online, ensuring that our approach to technology use remains proactive and focused on student well-being.

Action 5 - Provide students in grades 5-8 with the opportunity to participate in the Engineering Program: This action continues to be fully implemented, providing students in grades 5–8 with access to hands-on, standards-aligned engineering instruction. Each school site is equipped with the necessary materials and equipment to maintain a robust engineering program. The District has retained four engineers to support the program: one full-time engineer is assigned to the middle school, another serves one of the larger elementary schools, and the remaining two engineers rotate support among the other campuses.

Action 6 - Provide English learners with an after school reclassification academy: This non-contributing action has been implemented by delivering intensive after-school support to English learners, specifically addressing areas of need identified through the ELPAC assessment.

Action 7 - Students will have access to supplementary materials: This action has been successfully implemented through the continued investment in high-quality supplemental resources that support instruction in both Mathematics and English Language Arts (ELA). To reinforce math learning at home, take-home materials were distributed to help students strengthen key skills outside the classroom. In support of ELA, the District acquired additional classroom resources aligned with the Science of Reading to support explicit instruction in phonemic awareness, fluency, vocabulary, and comprehension. Intervention teachers were also equipped with materials that align with evidence-based practices, ensuring they have the tools necessary to effectively support struggling readers and enhance academic outcomes.

Action 8 - Students will have selected software applications available to support learning goals: This action has been fully implemented, with the District continuing to invest in a variety of educational software tools designed to reinforce and enrich student learning. Licenses have

been maintained for platforms such as IXL, Happy Numbers, Reading A-Z, Mystery Science, Zoom, Nearpod, BrainPOP, and Seesaw. These programs are strategically used throughout the instructional day to provide students with individualized learning opportunities, particularly while teachers deliver small group instruction. In addition to supporting classroom engagement, many of these digital tools offer students meaningful practice both at school and at home, extending learning beyond the traditional classroom setting.

Action 9 - Monitor the progress of Low Income students, English learners and foster youth in Math and English Language Arts: This action has been fully implemented. The District continues to use the STAR Renaissance suite, which serves as the universal screener for both Mathematics and English Language Arts in grades K–8. This assessment tool provides valuable data to inform instruction and monitor student progress throughout the year. In addition, the suite includes access to the MyOn Digital Library and the Accelerated Reader program, both of which support literacy development by promoting independent reading and tracking student engagement with text.

Action 10 - Students in grades K-8 will benefit from participation in the AVID program: This action has been effectively implemented through an ongoing partnership with AVID. All schools in the District maintain active AVID memberships and are consistently integrating AVID strategies into daily instruction across all grade levels. To further strengthen implementation, teachers participated in the AVID Summer Institute, where they engaged in professional learning focused on WICOR (Writing, Inquiry, Collaboration, Organization, and Reading) strategies. This professional development has helped deepen the use of AVID methodologies in classrooms and continues to enhance instructional practices that promote student readiness for future academic success.

Action 11- Increase teacher capacity for providing students with differentiated instruction based on data: This action has been fully implemented, reflecting the District's continued commitment to high-quality professional learning for educators. Elementary teachers received ongoing coaching in the SWUN Math program to strengthen math instruction and alignment. In support of our Science of Reading efforts, all teachers were trained on the mCLASS progress monitoring tool to better track early literacy skills. The District also continued its focus on writing and critical thinking by offering professional development on Thinking Maps and the Write from the Beginning program for all K-8 teachers. Additionally, all K–5 teachers received training in Multi-Tiered System of Supports (MTSS) and restorative practices to foster both academic and social-emotional growth. New teachers were supported through a dedicated monthly after school series, led by District TOSAs, which focused on instructional strategies and classroom best practices.

Action 12 - Ensure all low income students have access to technology: This action has been fully implemented. In the 2024–2025 school year, each student received a Chromebook for use during the school day, as well each students in grades 3rd-8th received an additional Chromebook issued for use at home to support homework and extended learning. To further bridge the digital divide, the District also provided Wi-Fi hotspots to students who lacked reliable internet access at home. Furthermore, infrastructure upgrades were made to ensure high-speed wireless connectivity, enabling students in need to stay connected and engaged with their learning beyond the school day.

Action 13 - Provide support for English learners who are identified as newcomers: This action has been successfully implemented. The District has continued to provide targeted instructional tools to support the language development and academic success of newcomer students. Programs such as Lexia English, BrainPOP ELL, and Istation have been consistently utilized to enhance English language acquisition. In addition to in-class support, the District extended learning opportunities through Club VR, an after-school intervention program specifically designed to offer additional academic assistance to newcomers beyond the regular school day. These combined efforts ensure that newcomer students receive the resources and support they need to thrive.

Action 14 - Provide low income students and English learners with an evidence based supplemental reading program: This action has been effectively carried out through the continued acquisition of licenses for the Lexia Supplemental Reading Program. The program plays a vital role in both the classroom and intervention settings, as it is used during differentiated instruction to support all students and also by intervention teachers to provide additional assistance to students with more significant literacy needs. This dual approach ensures that students receive personalized reading support, helping to accelerate their progress and close learning gaps.

Action 15 - Fully credentialed and appropriately assigned teachers and administrators: This action has been partially implemented. Currently, one special education teaching position remains unfilled by a teacher who meets the "fully credentialed" requirements.

Action 16 - All students will have standards aligned instructional materials for core instruction: This action has been implemented. All students have standards aligned core instructional materials in all subjects.

Action 17- Low income students and English learners will be able to participate in a dual language program: This action has been successfully implemented. Students in the Dual Immersion Program continue to receive access to high-quality instructional materials in both English and Spanish. In its second year, the District's Dual Language Leadership Team has played a key role in guiding program improvements. Based on the team's recommendations, the program is set to transition to a 90:10 model in the upcoming school year. To ensure a smooth transition, the leadership team visited other 90:10 model programs, attended the CAFE conference, and provided kindergarten teachers with professional development and dedicated planning time. Additionally, to further support the Dual Immersion Spanish core curriculum, students have been provided with supplemental materials and resources in Spanish, enhancing their language acquisition and academic success in both languages.

Action 18 - Teachers on Special Assignment (TOSA) will provide support for the implementation of small group instruction, differentiated instruction, English language development education and educational technology: This action has been fully implemented. TOSAs played a crucial role in supporting TK–8 teachers throughout the district by offering professional development focused on strategies for differentiated instruction. In addition to leading training sessions on best practices for differentiation and scaffolding, TOSAs assisted teachers with data analysis to identify student needs and determine appropriate intervention levels. They also collaborated closely with the MTSS team, helping to ensure effective implementation of the mCLASS progress monitoring tool, further enhancing the District's ability to provide targeted support and track student progress.

Action 19 - - Library techs will provide students with increased access to libraries: This action has been successfully implemented across all schools. Each school is supported by a dedicated library technician who ensures that library services are accessible to both students and staff throughout the school day and beyond. In addition to managing day-to-day library operations, our library technicians integrate 21st-century learning and literacy initiatives such as Accelerated Reader and MyOn into the library environment by organizing virtual author readings, motivational events, and reading challenges. These activities help foster a love of reading and engage students in interactive learning experiences.

Action 20- Support for school sites to implement LCAP goals: This action has been implemented. Schools received funding based on their description of need for unduplicated students at their schools. Funding was used for additional supplemental learning Apps for EL students, additional tutoring and after school intervention, counseling and social emotional supports and materials and hands on materials for english learners such as picture cards and math manipulatives.

Action 21 - Provide supplemental early childhood learning materials: This action has been successfully implemented. As our TK program grows and serves younger students, we continue to invest in age-appropriate and developmentally suitable materials. These include resources for dramatic play, center-based activities, and materials designed to support oral language development in English. These tools foster enriching and engaging learning experiences, promoting both social-emotional and language development for our youngest learners.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Action 4 - Students will have continuous access to technology by having technology support staff available at the school and district levels: There is a material difference between budgeted expenditures and the estimated actual expenditure for this action, as several of the positions associated with this action were not in place for the entire school year.

Action 5 - Provide students in grades 5-8 with the opportunity to participate in the Engineering Program: There is a material difference between budgeted expenditures and the estimated actual expenditure for this action. There has been an increase in the expenditures from the budgeted amount due to additional needs that arose, including the purchase of extra materials to support projects and expanded resources for coding and 3D printing.

Action 7 - Students will have access to supplementary materials: There is a material difference between budgeted expenditures and the estimated actual expenditure. The district over budgeted for this action and did not take into account declining enrollment and the need for less consumable books.

Action 10 - Students in grades K-8 will benefit from participation in the AVID program: There is a material difference for this action. There has been an increase in the expenditures from the budgeted amount due to a continued high interest from teachers to attend the AVID Summer Institute as well as an increase the cost of materials.

Action 11 - Increase teacher capacity for providing students with differentiated instruction based on data: There is a material difference for this action. There has been an increase in the expenditures from the budgeted amount to the estimated actuals. There was a need and additional professional development and coaching for teachers and due to over-budgeting in Actions 4 and 7 we were able to leverage additional resources towards more professional development for teachers.

Action 12 - Ensure all low income students have access to technology: There is a material difference between the budgeted expenditures and the estimated actual expenditures for this action. The district slightly overestimated the number of repairs and device replacements required to support the take-home device initiative.

Action 17 - Low income students and English learners will be able to participate in a dual language program: There is a material difference between the budgeted expenditures and the estimated actual expenditures for this action. This difference is due to an analysis of dual language materials, with the Dual Language Cadre determining that no new materials were needed at this time.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

Action 1 - Provide low income students with increased opportunities for small group instruction and personalized learning: This action remained effective in 2024–25. Smaller class sizes (20:1 in K–1, 24:1 in grades 2–3, 27:1 in 4–5, and 29:1 in 6–8) continued to support more individualized instruction. Although there was a slight decrease in CAASPP ELA (all students from 43.82% to 42.5%) in grades 3rd through 5th, our middle school grades 6th through 8th saw an increase in CAASPP ELA (from 37.95% to 40.36%). In CAASPP math we saw an increase in grades 3rd through 5th (from 35.69% to 37%) and in grades grade 6th-8th there was also an increase from (20.63% to 23.96%) When reviewing student group data, we recognize that there is more work to be done to accelerate growth for English Learners and low-income students. Additionally, on the 3rd -5th grade CASSPP ELA 9.76% of English Learners and 42.31% of low income students met or exceed standards. In 6th -8th grade CAASPP ELA 7.32% of English Learners and 40.36% of low income students met or exceed standards. In CAASPP math 11.47% of English Learners and 35.1% of low income students met or exceed standards. In 6th -8th grade CAASPP math 3.71% of English Learners and 24.18% of low income students met or exceed standards. In addition, frequent walkthroughs by District office staff confirm that students are benefiting from small group instruction that is thoughtfully differentiated to address their specific learning needs.

Action 2 - Students in grades 6-8 will receive instruction based on analysis of formative and summative data: This action has proven to be effective, resulting in notable improvements in student achievement at the middle school level. Dedicated daily collaboration time allowed teachers to refine instructional practices, contributing to an increase in the number of students meeting or exceeding standards on CAASPP ELA (from 37.95% to 40.36%) and in Math from (20.63% to 23.96%). Additionally in ELA 7.32% of English Learners and 40.36% of low income students met or exceed standards. In math 3.71% of English Learners and 24.18% of low income students met or exceed standards.

Action 3 - Students in grades TK-5 will receive standards based instruction using a variety of strategies based on the analysis of current data: This action remained effective. Focused professional development, including Thinking Maps, Science of Reading, MTSS and SWUN coaching, helped support language development and literacy. Although there was a slight decrease in CAASPP ELA (from 43.82% to 42.5%) in grades 3rd through 5th our CAASPP math in grades 3rd through 5th increased (from 35.69% to 37%). Additionally, on the 3rd -5th grade CASSPP ELA 9.76% of English Learners and 42.31% of low income students met or exceed standards. In CAASPP math 11.47% of English Learners and 35.1% of low income students met or exceed standards. Additionally over 51.57% of our English learners made annual progress towards English proficiency.

Action 4 - Students will have continuous access to technology by having technology support staff available at the school and district levels: This action has proven highly effective in ensuring that technology is functional and safe for student use. Student survey results showed 98% satisfaction with device access, maintaining high technology availability. Additionally, an increase in overall student performance supports the idea that technology correlates to an increase in academic achievement. On the 3rd -5th grade CASSPP ELA 9.76% of English Learners and 42.31% of low income students met or exceed standards. In 6th -8th grade CASSPP ELA 19% of English Learners and 47% of low income students met or exceed standards. In 6-8th grade, there was an increase in the number of students meeting or exceeding standards on CAASPP ELA (from 37.95% to 40.36%) and in CAASPP Math from (20.63% to 23.96%). Additionally in CAASPP ELA 7.32% of English Learners and 40.36% of low income students met or exceed standards. In math 3.71% of English Learners and 24.18% of low income students met or exceed standards

Action 5 - Provide students in grades 5-8 with the opportunity to participate in the Engineering Program: This action has proven to be effective in providing students with opportunities to engage in complex tasks that foster higher-level thinking skills. Although CAST scores dipped slightly from 20.92% to 19.75% for all students and from 20.73% to 18.88% for low income students, project-based learning remained a strong contributor to critical thinking development, supported by CAASPP math gains. In CAASPP math we saw an increase in the number of students meeting or exceeding standards in grades 3rd through 5th (from 35.69% to 37%) and in grades grade 6th-8th there was also an increase from (20.63% to 23.96%). Additionally in 3rd-5th grade math 35.1% of low income students met or exceed standards while in 6th - 8th grade 24.18% of low income students met or exceed standards.

Action 6 - Provide English learners with an after school reclassification academy: Funded through federal resources, the implementation of this action has been effective in delivering intensive after-school support to English learners, specifically addressing areas of need identified through the ELPAC assessment as evident by 51.57% of English learners making annual progress towards English Proficiency on the ELPAC. The reclassification rate remained at 17%.

Action 7 - Students will have access to supplementary materials: This action has proven effective in enhancing student learning through the provision of supplemental materials. The integration of additional resources, such as SWUN Math materials, has strengthened math practice both in school and at home, contributing to students' mathematical proficiency. Furthermore, a range of other supports — including the use of mCLASS for ELA progress monitoring and supplemental materials aligned with the district's Science of Reading initiative — were strategically implemented to bolster early literacy efforts. Although there was a slight decrease in CAASPP ELA (all students from 43.82% to 42.5%) in grades 3rd through 5th, our middle school grades 6th through 8th saw an increase in CAASPP ELA (from 37.95% to 40.36%). In CAASPP math we saw an increase in grades 3rd through 5th (from 35.69% to 37%) and in grades grade 6th-8th there was also an increase from (20.63% to 23.96%) In addition to gains observed on the CAASPP assessments, STAR Reading results show that 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. Similarly, STAR Math assessments reveal that 56.54% of all students, 42.31% of English learners, and 55.92% of low income students K–5 are meeting grade level expectations. 49.68% of all students, 19% of English learners and 47.77% of low income students in grades 6th-8th are meeting grade-level expectations.

Action 8 - Students will have selected software applications available to support learning goals: The use of software applications has been highly effective in supporting student learning. These programs offer students varied and interactive ways to practice skills and reinforce key concepts, complementing core instructional materials and increasing student engagement. By providing diverse learning experiences, the software has helped strengthen students' fluency and mastery of academic skills. Teacher feedback from the LCAP survey further confirms the success of this approach, with 88% of teachers reporting that students have sufficient technology to effectively access the curriculum. Additionally, 98% of students expressed satisfaction with their access to technology. Although there was a decrease in our results in the CAASPP ELA (all students from 43.82% to 42.5%) in grades 3rd through 5th, our middle school grades 6th through 8th saw an increase in CAASPP ELA (from 37.95% to 40.36%). In CAASPP math we saw an increase in grades 3rd through 5th (from 35.69% to 37%) and in grades grade 6th-8th there was also an increase from (20.63% to 23.96%)

Action 9 - Monitor the progress of Low Income students, English learners, and foster youth in Math and English Language Arts: This action continues to be effective in supporting student progress monitoring and the formation of small instructional groups, leading to more targeted lesson planning and delivery. Through the use of STAR Reading and Math assessments, teachers are able to pinpoint individual student

strengths and areas in need of growth, allowing for more strategic interventions and differentiated instruction. STAR Reading results show that 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. Similarly, STAR Math assessments reveal that 56.54% of all students, 42.31% of English learners, and 55.92% of low income students K–5 are meeting grade level expectations. 49.68% of all students, 19% of English learners and 47.77% of low income students in grades 6th–8th are meeting grade-level expectations. Foster youth student data is too small of a group to provide benchmark percentages.

Action 10 - Students in grades K-8 will benefit from participation in the AVID program: The implementation of AVID strategies districtwide has continued to show positive impacts on student outcomes. A strong emphasis on fostering a college-going culture and promoting a growth mindset has significantly influenced student achievement. STAR Reading results show that 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. Similarly, STAR Math assessments reveal that 56.54% of all students, 42.31% of English learners, and 55.92% of low income students K–5 are meeting grade level expectations. 49.68% of all students, 19% of English learners and 47.77% of low income students in grades 6th–8th are meeting grade-level expectations. Although there was a slight decrease in CAASPP ELA (all students from 43.82% to 42.5%) in grades 3rd through 5th, our middle school grades 6th through 8th saw an increase in CAASPP ELA (from 37.95% to 40.36%). In CAASPP math we saw an increase in grades 3rd through 5th (from 35.69% to 37%) and in grades grade 6th–8th there was also an increase from (20.63% to 23.96%) When reviewing student group data, we recognize that there is more work to be done to accelerate growth for English Learners and low-income students. Additionally, on the 3rd -5th grade CASSPP ELA 9.76% of English Learners and 42.31% of low income students met or exceed standards. In 6th -8th grade ELA 7.32% of English Learners and 40.36% of low income students met or exceed standards. In CAASPP math 11.47% of English Learners and 35.1% of low income students met or exceed standards. In 6th -8th grade CAASPP math 4% of English Learners and 24.18% of low income students met or exceed standards. Classroom walkthroughs and principal observations further validate the successful integration of AVID practices across campuses. Key strategies — such as the use of planners and binders for organization, "marking the text" as a writing strategy, and conducting Socratic Seminars to enhance critical thinking — are widely evident in classrooms. These instructional practices have contributed to strengthening students' comprehension, communication, and analytical skills, supporting the district's broader goals for college and career readiness.

Action 11 - Increase teacher capacity for providing students with differentiated instruction based on data: This action has continued to be effective in building teacher capacity to meet diverse student needs. Evidence of success is seen both in classroom implementation and in positive feedback from teachers. According to the latest LCAP teacher survey, 90% of teachers agreed that the District effectively supports their professional development, and 91% indicated they can access coaching and/or support from a district TOSA when needed. Professional development opportunities provided throughout the year focused on equipping teachers with strategies to use assessment data for differentiation and targeted instruction, Science of Reading implementation, MTSS and restorative practices, and writing using Thinking Maps. Observations during classroom walkthroughs and feedback from instructional staff further confirm that teachers are applying these practices, resulting in greater student engagement and improved instructional delivery. Additionally, STAR Reading results show that 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. Similarly, STAR Math assessments reveal that 56.54% of all students, 42.31% of English learners, and 55.92% of low income students K–5 are meeting grade level expectations. 49.68% of all students, 19% of English learners and 47.77% of low income students in grades 6th–8th are meeting grade-level expectations.

Action 12 - Ensure all low income students have access to technology: This action has been effective. This year, in addition to the Chromebook devices students use at school, 3rd-8th grade students were also issued a second device for home use to support continuous learning. Student engagement with digital resources has remained strong, reflected by the use of school-approved educational applications. According to the student survey, 98% of students confirmed they received a district-provided device for school use, ensuring equitable access to technology. On the staff survey, 88% of teachers expressed confidence that students have the necessary technology tools to effectively implement the curriculum. Although this reflects a slight decrease compared to the previous year, it is important to note that the lower percentage was likely influenced by districtwide internet outages that occurred during the LCAP survey window, an issue that has since been resolved. STAR Reading results show that 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. Similarly, STAR Math assessments reveal that 56.54% of all students, 42.31% of English learners, and 55.92% of low income students K–5 are meeting grade level expectations. 49.68% of all students, 19% of English learners and 47.77% of low income students in grades 6th-8th are meeting grade-level expectations.

Action 13 - Provide support for English learners who are identified as newcomers: This non-contributing action has been effective. Newcomers received dedicated instruction and practice in functional English vocabulary, which has significantly contributed to their growth in English proficiency. 51.57% of English learners made annual progress towards English Proficiency on the ELPAC indicating clear progress in both language development and academic achievement.

Action 14 - Provide low income students and English learners with an evidence based supplemental reading program: This action has been effective in supporting early literacy development at the primary grade levels. The positive impact of the supplemental reading program is clearly reflected in STAR Early Literacy results, where the percentage of K–1 students performing at grade level increased (from 44.23% to 50.07%). Students are demonstrating steady growth in foundational reading skills, highlighting the success of targeted early interventions and the use of Science of Reading instructional strategies. In addition, STAR Reading results show that 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. Our ELA CAASPP results show that in grades 3rd-5th 42.5% of all students, 9.76% of English Learners and 42.31% of low income students met or exceed standards. In 6th - 8th grade CAASPP ELA 40.6% of all students 7.32% of English Learners and 40.36% of low income students met or exceed standards.

Action 15 - Fully credentialed and appropriately assigned teachers and administrators: While this non-contributing action has not yet fully met expectations, it continues to demonstrate positive outcomes. Currently, 87.5% of teachers in the Lennox School District are fully credentialed and appropriately assigned. Despite the staffing challenges, teachers have remained instrumental in advancing student success, particularly for unduplicated student groups. Classroom walkthroughs conducted with principals and district staff show that the majority of teachers are effectively applying strategies acquired through professional development to support both academic achievement and students' social-emotional needs. In addition, many teachers are actively engaging with teachers on special assignment (TOSAs) to receive coaching and enhance their instructional practices. Teachers have also made noticeable progress in using classroom data to form small groups and deliver differentiated instruction, reflecting a strong commitment to continuous growth and improvement.

Action 16 - All students will have standards aligned instructional materials for core instruction: This non-contributing action has been effective in supporting student learning. All students now have access to standards-aligned instructional materials across all core subject areas, both

for use at school and at home. Teachers are leveraging these resources to deliver grade-level instruction, contributing to ongoing progress in both math and ELA achievement. Additionally, results from the LCAP student survey show that 95% of students feel adequately supported by their school in having the textbooks and learning materials they need for academic success.

Action 17 - Low income students and English learners will be able to participate in a dual language program: This action has continued to be effective in strengthening the district's dual immersion program. Teachers are successfully applying best practices, such as transference techniques, to support bilingual language development. The recent acquisition of additional Spanish instructional materials has further enhanced program implementation and classroom instruction. Importantly, CAASPP results show that dual immersion students are consistently outperforming their peers across all grade levels, demonstrating the success of the program in promoting both academic achievement and bi-literacy. Looking ahead, the district will begin a gradual transition to a 90/10 dual language model next year, which will provide even greater opportunities to deepen students' Spanish language proficiency while maintaining strong academic outcomes. Although there was a slight decrease in CAASPP ELA (all students from 43.82% to 42.5%) in grades 3rd through 5th, our middle school grades 6th through 8th saw an increase in CAASPP ELA (from 37.95% to 40.36%). When reviewing student group data, we recognize that there is more work to be done to accelerate growth for English Learners and low-income students. Additionally, on the 3rd -5th grade CASSPP ELA 9.76% of English Learners and 42.31% of low income students met or exceed standards. In 6th -8th grade CAASPP ELA 7.32% of English Learners and 40.36% of low income students met or exceed standards. STAR Reading results show that 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. On the STAR Early Literacy, K–1 students performing at grade level increased (from 44.23% to 50.07%). STAR Math assessments reveal that 56.54% of all students, 42.31% of English learners, and 55.92% of low income students K–5 are meeting grade level expectations. 49.68% of all students, 19% of English learners and 47.77% of low income students in grades 6th-8th are meeting grade-level expectations. Foster youth student data is too small of a group to provide benchmark percentages.

Action 18 - Teachers on Special Assignment will provide support for the implementation of small group instruction, differentiated instruction, English language development education, and educational technology and intervention: This action has been effective in strengthening teacher capacity and instructional practices. Staff survey results show an increase in satisfaction with professional development, rising from 81% to 90% of teachers reporting that the District effectively supports their growth. Additionally, the percentage of teachers who indicated they can access coaching support from a TOSA rose from 85% to 91%. The impact of these efforts is evident during classroom walkthroughs, where teachers are applying strategies learned through professional development and coaching. This sustained focus on staff support is leading to improved classroom practices and contributing to positive gains in student learning outcomes. STAR Reading results show that 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. On the STAR Early Literacy, K–1 students performing at grade level increased (from 44.23% to 50.07%). Similarly, STAR Math assessments reveal that 56.54% of all students, 42.31% of English learners, and 55.92% of low income students K–5 are meeting grade level expectations. 49.68% of all students, 19% of English learners and 47.77% of low income students in grades 6th-8th are meeting grade-level expectations.

Action 19 - Library techs will provide students with increased access to libraries: This action has proven effective in improving library services and increasing student engagement. Libraries across the district remain open and accessible throughout the day, providing students with valuable opportunities such as author visits, reading challenges, and research support. The positive impact of these enhanced services is reflected in the growth seen on the STAR Reading assessments. The percentage of students performing at grade level increased from

42.25% to 51.28% in grades 2–5, and from 26.42.31% to 45.33% in grades 6–8. STAR Reading results for sub groups showed 26.19% of English Learners and 50.39% of low income students in grades 2–5 are performing at grade level, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency and K–1 students performing at grade level increased from 44.23% to 50.07%. These results demonstrate that expanded library programs are playing an important role in fostering literacy development and supporting overall academic achievement.

Action 20 - Support for school sites to implement LCAP goals: This expanded support has contributed to improvements in student achievement, as reflected in CAASPP results. Although a slight decline was observed in CAASPP ELA proficiency for grades 3–5 (from 43.82% to 42.5%), middle school grades 6–8 demonstrated an increase in ELA proficiency (from 37.95% to 40.36%). Math proficiency improved across both elementary and middle school levels, with grades 3–5 increasing from 35.69% to 37% and grades 6–8 improving from 20.63% to 23.96%. STAR Reading results show that 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. K–1 students performing at grade level increased from 44.23% to 50.07%, K-1 English Learners that met or exceeded standards was 35.14% and low income students were 49.06%. STAR Math assessments reveal that 56.54% of all students, 42.31% of English learners, and 55.92% of low income students K–5 are meeting grade level expectations. 49.68% of all students, 19% of English learners and 47.77% of low income students in grades 6th-8th are meeting grade-level expectations. Foster youth student data is too small of a group to provide benchmark percentages. These outcomes highlight the positive impact of site-level supports and strategic resource allocation in advancing student learning.

Action 21 - Provide supplemental early childhood learning materials: This action has been highly effective in promoting foundational skills among our youngest learners. A play-based, developmentally appropriate curriculum has supported substantial growth in communication, social-emotional development, and academic readiness in both reading and math. TK students, in particular, have thrived under this play based approach, which emphasizes exploration, creativity, and age-appropriate learning experiences aligned with early childhood education best practices. Academic gains are also evident in the early grades. STAR Early Literacy assessment results show that the percentage of K–1 students performing at grade level rose from 44% to 50.39%. 35.14% of English Learners and 49.06% of low income students met or exceeded standards, reflecting significant progress in early literacy skills.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

This goal will remain the same for the 2024-25 school year. However the District is exploring the possibility of discontinuing the use of the STAR Early Literacy Assessment in grades K-1 and replacing that assessment with the new mClass assessment that is used to progress monitor student achievement in reading. Additionally the District is exploring making changes to the 6th-8th grade District Benchmark assessment and replacing it with a CAASPP IAB.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Actions

Action #	Title	Description	Total Funds	Contributing
1.1	Provide low income and EL students with increased opportunities for small group instruction and personalized learning	By allocating additional teachers across all schools, low-income students in grades TK-8 will benefit from enhanced opportunities for small group instruction and increased feedback on their learning progress. These students will also receive personalized instructional strategies tailored to address their specific needs, with the aim of narrowing the achievement gap in math and English language arts. Personalized learning, which involves targeted instruction in small groups based on students' similar needs, will become a standard practice each week. As students master a skill or concept, they will transition to new groups to tackle another concept. At the middle school level, alongside small group instruction and heightened feedback, there will be a concentrated effort to ensure that instruction is both relevant and rigorous, preparing students for college and career pathways. This includes the integration of AVID strategies such as fostering a growth mindset, text annotation, and peer editing, as well as promoting high-level questioning and providing increased opportunities for writing and speaking during daily instruction. This action provides support for special education and English learners performing at the lowest level on the academic state indicators.	\$3,689,418.00	Yes
1.2	Students in grades 6-8 will receive instruction based on analysis of formative and summative data	Low income students and English learners are performing below grade level standards. To ensure that these students receive rigorous, standards-based instruction tailored to their specific needs and achievement levels, middle school teachers will have weekly collaborative sessions. During these sessions, teachers will work together to design learning experiences that are relevant and grounded in the analysis of current data, with a focus on addressing the unique challenges faced by low-income students and English learners.	\$1,574,281.00	Yes

Action #	Title	Description	Total Funds	Contributing
1.3	Students in grades TK-5 will receive standards based instruction using a variety of strategies based on the analysis of current data	Weekly collaboration among grade-level teams will enable teachers to provide standards-based instruction tailored to the needs of low-income students and English learners, informed by ongoing data analysis. Within these collaborative sessions, teachers will identify students who require additional support and personalized learning through small group instruction. Concurrently, while teachers collaborate, students will engage in physical education activities led by PE teacher teams. This structure ensures that instructional planning and student engagement are maximized to address the diverse needs of all learners.	\$710,704.00	Yes
1.4	Students will have continuous access to technology by having technology support staff available at the school and district levels	The use of technology has become an essential element of implementing a high quality educational program. Unduplicated students will need support to use technology at home and at school to be able to benefit from the improved methods of providing information. To support the diverse needs of unduplicated students to access devices and applications without interruption, the District will provide technology support staff at each school and at the District office. Technology support will ensure that students' access to technology is uninterrupted, that devices are well maintained and that families using technology at home while working with their students have support.	\$663,124.00	Yes
1.5	Provide students in grades 5-8 with the opportunity to participate in the Engineering Program	Engagement in learning activities is heightened among low-income students when they have access to relevant and hands-on experiential learning opportunities. Offering such experiences not only enhances their engagement but also improves their access to rigorous, standards-based instruction. The Engineering Program specifically caters to this need by providing students with opportunities in science, technology, engineering, and math (STEM), thereby enriching their educational experience and fostering a deeper understanding of these subjects.	\$514,408.00	Yes
1.6	Provide Long Term English learners (LTEs) with an after school reclassification academy	To support long term English learners (LTEs) who have not reclassified, the District will offer extended learning time to provide a reclassification academy to target those skills students need to reclassify to fluent English speaker. This action provides support for English learners at Lennox Middle School performing at the lowest level on the ELA academic state indicator.	\$10,000.00	Yes

Action #	Title	Description	Total Funds	Contributing
1.7	Students will have access to supplementary materials	Unduplicated students will have access to supplementary and consumable math materials and other instructional materials for intervention support. The school district is taking proactive steps to ensure that all students, particularly those from low-income backgrounds, have access to essential supplementary materials for their education. Recognizing the challenges faced by students who lack consistent access to technology and the internet at home, the district is providing additional math materials in non-electronic formats. This ensures that all students, regardless of their home environment, have the resources they need to support their learning. The District is also investing in supplementary materials for intervention and small group instruction in both math and English language arts. These materials will be utilized during targeted intervention sessions, further enhancing support for students who may be struggling academically. By providing a variety of materials tailored to different learning needs and circumstances, the district aims to narrow achievement gaps and foster academic success. Providing a supplementary materials will provide an increased opportunity for unduplicated students to have alternative materials to support closing the achievement gaps. Additionally, This action provides support for Special Education students and English learners particularly at Lennox Middle School performing at the lowest level on the academic state indicators.	\$275,715.00	Yes
1.8	Students will have selected software applications available to support learning goals	The District will purchase licenses for software applications such as Reading A-Z, Brain Pop EL, IXL Math and SeeSaw. Low income students will have access to these applications both at school and at home. These applications will provide low income students and English learners with opportunities to have content provided in a variety of ways. Brain Pop EL, specifically provides English learners with increased opportunities to practice English through a variety of multimedia experiences. This action provides support for Special Education students and English learners particularly at Lennox Middle School performing at the lowest level.	\$338,922.00	Yes

Action #	Title	Description	Total Funds	Contributing
1.9	Monitor the progress of low Income students, English learners and foster youth in math and English language arts	The STAR Renaissance package includes math and English language arts screeners and progress monitoring assessments that the District will use to monitor progress and identify the need for additional academic support for unduplicated students. The package also includes Accelerated Reader to support increased reading comprehension and MyOn, which provides thousands of pieces of digital fiction and non-fiction reading selections. This increased service provides opportunities for low income students, foster youth and English learners to have access to these selections, software that will allow a check on comprehension and a tool that will help to create an incentive for students to increase their time reading.	\$175,000.00	Yes
1.10	Students in grades K-8 will benefit from participation in the AVID program	The AVID program provides crucial support to low-income students with aspirations of becoming the first in their family to attend college. To facilitate the implementation of the AVID program, the district will engage in a contract with AVID to access materials, training, and additional support necessary for the program's success. Part of this collaboration involves professional development sessions conducted by AVID Center, scheduled to take place during the summer of 2024 at the Summer AVID Institute. This professional development opportunity will equip teachers with the knowledge and skills needed to effectively implement the AVID program and support participating students.	\$122,347.00	Yes
1.11	Increase teacher and staff capacity for providing professional development in areas of MTSS, writing, social emotional learning, science of reading and ELD strategies for LTELs.	Professional development will be provided in areas of MTSS, writing, social emotional learning, science of reading and ELD strategies for LTELs. These professional development opportunities will equip teachers with the necessary skills and knowledge to implement evidence-based practices effectively. Emphasis will be placed on differentiated and small group instruction, recognizing the diverse needs of students. By incorporating these strategies into their teaching methodologies teachers can better support the academic growth and development of low-income students, foster youth, and English learners. Additionally these professional development opportunities will facilitate collaboration among teachers, enabling them to share best practices, develop common lessons, and learn from one another's experiences.	\$436,047.00	Yes

Action #	Title	Description	Total Funds	Contributing
		This action provides support for Special Education students and English learners particularly at Lennox Middle School performing at the lowest level on the academic state indicators.		
1.12	Ensure all low income students have access to technology	Many of the low income students in Lennox do not have access to technology at home and would not have it at school if it were not provided. Additionally many of these students are transient and computers are not well maintained or returned. To continue to provide the increased service of having devices available to low income students at home so that they can have full access to all of the applications that are available, the District will implement a plan to replace a portion of the devices annually. Doing this will ensure that low income students have consistent access to technology. Additionally the District will plan for purchasing and implementing classroom technology throughout the District that will increase student engagement.	\$190,467.00	Yes
1.13	Provide support for English learners who are identified as newcomers	English learners who are new to being educated in the United States will have supplementary materials provided and extended learning time after school that will focus on increasing their English fluency. This action provides support for English learners at Lennox Middle School performing at the lowest level on the ELA academic state indicator.	\$23,400.00	No
1.14	Provide low income students and English learners with an evidence-based supplemental reading program	The District will contract with Lexia, a supplemental reading program, to provide leveled reading passages and comprehension questions. This program enables students to read at their individual proficiency levels while also holding them accountable through comprehension assessments.	\$65,000.00	Yes

Action #	Title	Description	Total Funds	Contributing
1.15	Fully credential and appropriately assigned teachers and administrators	Every student will be placed in classrooms with a fully credentialed and appropriately assigned teacher and every school will have a fully credentialed principal. This action provides support for Special Education performing at the lowest level on the academic state indicators.	\$25,482,266.00	No
1.16	All students will have standards aligned instructional materials for core instruction	All students in Lennox will receive standards aligned instructional materials to support learning in all core instructional areas	\$149,832.00	No
1.17	Low income students and English learners will be able to participate a dual immersion program	A dual immersion program will be offered in grades K-8; this program is available to low income students and English learners. To effectively implement this program students must receive materials in English and in Spanish. The increased service for this program will be to provide the students with Spanish supplemental materials which include Spanish classroom libraries.	\$32,408.00	Yes
1.18	Teachers on special assignment will provide support for the implementation of small group instruction, differentiated instruction at the middle school, English language development, educational technology and intervention.	Teachers on special assignment will be maintained to support District efforts with English learners, technology, math, ELA and use of data. All teachers on special assignment will be engaged with supporting teachers in planning and implementing instruction that is differentiated and can be provided in both whole and small group instruction. TOSAs will assist staff in enhancing their proficiency in data analysis, enabling them to craft tailored learning experiences. All TOSAs will support teachers with developing a greater understanding of the purpose and importance of language objectives and thinking maps that will assist English learners with growth in vocabulary development and English language conventions. Specifically, the EL TOSA will concentrate on advancing integrated English Language Development (ELD) with elementary and middle school content	\$840,595.00	Yes

Action #	Title	Description	Total Funds	Contributing
		teachers. The Technology TOSA will guide teachers in utilizing diverse software applications to enhance learning opportunities for unduplicated students. A middle school curriculum TOSA will offer coaching and professional development aimed at improving outcomes for middle school students. Moreover, an intervention TOSA will support the implementation of academic support across all tiers. This action provides support for Special Education students and English learners particularly at Lennox Middle School performing at the lowest level on the academic state indicators.		
1.19	Library techs will provide students increased access to libraries	The District will provide library techs at each school to support the functions of the school libraries; libraries are important to maintain to support literacy, research and student collaboration. Libraries will be available to students beyond the traditional hours during the school day.	\$482,941.00	Yes
1.20	Support for school sites to implement LCAP goals	Provide support to schools for the following priorities reflected in the District's LCAP: before/after school academic support, software and applications, technology for student access, supplemental materials. The following describes what is currently in each approved School Plan: Buford - software applications and supplemental materials - to support low income students throughout the day both during core instruction and intervention Felton - Supplemental materials and (1)intervention aide - to support low income students and English learners; supplemental materials will be used both during core instruction and intervention and the intervention aide will provide support during personalized learning time Jefferson- (1)intervention aide and after school academic support for low income students - both actions target low income students; the intervention aide will provide support for students during personalized learning time; after school academic support will be provided both in reading and math based on needs determined by grade level data	\$220,696.00	Yes

Action #	Title	Description	Total Funds	Contributing
		Huerta - before and after school academic support for low income students - after school support will be provided in math and reading based on needs determine by grade level data Moffett - technology software applications for student access - low income students- ensure that all low income students have a working one to one device for both at home and school use Lennox Middle School - supplemental materials and technology software applications for student access - to support low income students and English learners - supplemental materials will be used both in core instruction and in intervention The Assistant Superintendent or designee has reviewed each of the School Plans to determine 1. if the identified need is accurate, 2. if the service/action related to the need is aligned to the LCAP priority and meets the identified need and 3. if the action is able to be reasonably be implemented as planned. When the annual update for the LCAP is completed schools will be expected to complete their School Plan evaluation and submit that evaluation to the Assistant Superintendent or designee to ensure that the action has met the intended outcome.		
1.21	Provide supplemental early childhood learning materials	The district will continue to implement Universal Transitional Kindergarten Programs for ages 4-5. These programs prioritize play-based learning, social/emotional development, and language enhancement for low-income, English Learners, and Foster Youth. The district will provide these young students with supplementary materials such as dress up costumes, puppets, and various creative play materials. These resources aim to enrich the learning environment and facilitate holistic development among transitional kindergarten students.	\$15,000.00	Yes

Goals and Actions

Goal

Goal #	Description	Type of Goal
2	The Lennox School District will provide a multi-tiered system of support for students that will address the educational, behavioral and social/emotional needs of students to reduce the achievement gap.	Broad Goal

State Priorities addressed by this goal.

- Priority 2: State Standards (Conditions of Learning)
- Priority 4: Pupil Achievement (Pupil Outcomes)
- Priority 5: Pupil Engagement (Engagement)
- Priority 7: Course Access (Conditions of Learning)
- Priority 8: Other Pupil Outcomes (Pupil Outcomes)

An explanation of why the LEA has developed this goal.

The Lennox School District serves a diverse student population of which 98% of the students are identified as low income, 13 % are identified as students with disabilities and 37% are identified as an English learner. These students require a wide range of supports academically, behaviorally and social/emotional to be successful in attaining grade level standards. The District will provide a cohesive system of support for students that will address all of these areas by providing support that will differ in frequency, intensity and duration based on students' needs as determined by data.

Educational Partner feedback indicated strong support to continue this goal from the prior LCAP. The actions to support this goal will provide core program support such as counseling services, tutoring, supports for EL students to ensure that all students are provided with an appropriate environment and rigorous curriculum that allows them to have multiple experiences and opportunities for academic and social emotional growth.

A variety of metrics will be used to measure the outcomes actions. These metrics are aligned to state priorities of pupil outcomes, engagement, conditions of learning, and course access.

We are continuing with this goal based on the 2024 CA Dashboard, as we have made progress in closing the outcome disparities, a significant gap remains between the performance of our low income, English learners, and foster youth students compared to all students, and our educational partners have emphasized the need to remedy the disparity.

Goal Analysis [2024-25]

An analysis of how this goal was carried out in the previous year.

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

Action 1- Provide academic intervention and support: This action has been successfully implemented. At each elementary school, two reading intervention teachers have been assigned, with one position funded through federal funds. Additionally, the middle school offers intervention classes led by extra-funded teachers. These intervention educators concentrate on supporting students identified as having the greatest reading challenges, ensuring targeted assistance for those with the most intensive needs.

Action 2 - Provide administrative and classified support to ensure students receive intervention and other support services: This action has been fully implemented, with each school having a dedicated full-time assistant principal. These assistant principals regularly collaborate with grade-level teams to ensure that students receive the academic and behavioral support they need. They also play a key role in fostering and maintaining a positive school culture. Additionally, each school is supported by a Categorical Program Assistant, who provides essential data and information for reclassification processes, helping to ensure that students' academic progress is appropriately tracked and monitored.

Action 3 - Provide counseling services for students at all schools: This action has been successfully implemented across all schools. Each elementary school is staffed with one counselor, while the middle school is staffed with three counselors. These counselors offer crucial social and emotional support to students, while also helping connect families to community services when necessary. They provide both group and individual counseling sessions and make referrals to community resources for students and their families. Counselors continue to play a key role in supporting students and families impacted by chronic absenteeism, ensuring that those students receive the necessary interventions and guidance.

Action 4- Low income students identified as Gifted and Talented (GATE) or high achieving will be provided with extended learning opportunities: This action has been effectively implemented. We remain committed to identifying and addressing the unique needs and interests of our GATE students. This year, identified GATE students had the opportunity to engage in enriched learning experiences, including a GATE spring program that centered on coding and visual arts, providing them with challenging and engaging activities to further their academic and creative development.

Action 5- Provide low income students and foster youth with a social and emotional curriculum: This action has been successfully implemented. The Leader in Me curriculum, along with the 7 Habits for Success, has been fully integrated into all school sites, with teachers consistently incorporating the curriculum into their instructional practices throughout the year. Each school's Light House Team met regularly to share strategies, insights, and best practices for effective implementation while planning next steps. As part of the program, every classroom has developed a mission statement and students have assigned leadership roles. Looking ahead, we are excited to expand the Leader in Me program by incorporating additional goal-setting activities for students.

Action 6 - Provide students an inclusive learning environment through the implementation of a co-teaching model: This action has been successfully implemented. The district hosted professional development sessions on the co-teaching model for K-8 SAI teachers and instructional aides, facilitated by 2 Teach Global. These sessions included embedded planning time, allowing special education and general education teachers to collaborate and develop co-teaching strategies. Teachers also received training on the Sonday curriculum to enhance

differentiated instruction, as well as on TouchMath to support student learning. Additionally, instructional aides participated in monthly professional development focused on behavior support and classroom management, further improving their ability to effectively assist students in the classroom.

Action 7 - Math Intervention Teachers: This non-contributing action has been successfully implemented and is funded through LREGB. The district has established a math intervention program, where dedicated math intervention teachers provide targeted support to students performing below grade level. This initiative has demonstrated positive results, contributing to a measurable increase in overall math achievement throughout the year.

Action 8 - English learners will receive effective designated English language development: This non-contributing action has been implemented. Over the course of the school year, our EL TOSA delivered continuous professional development and coaching focused on ELD strategies, which proved valuable for teachers. The goal of this support was to strengthen instructional practices and better equip educators to meet the needs of English Learners. In addition, teachers had access to optional training sessions on various supplemental ELD programs, expanding their toolkit with additional resources to promote language development and academic achievement for EL students.

Action 9 - Provide students with after school tutoring: This action has been successfully implemented across all schools. Each school has designated teachers at each grade level to offer after-school tutoring. Students eligible for tutoring are selected based on specific criteria, ensuring that those who need the most support receive targeted assistance. This initiative aims to provide additional academic help beyond regular school hours to enhance student success. However, a challenge faced in the implementation was securing sufficient teacher participation, as some teachers were reluctant to stay after school for extra duty pay to tutor students performing below grade level.

Action 10 - Classroom Management and behavior support: This action has been effectively implemented. The district has dedicated behavior personnel who provide support for the implementation of behavior plans, both during instructional time and non-instructional periods. These paraprofessionals have undergone extensive training in behavior management and de-escalation techniques to address student needs effectively. The district's behavior specialist oversees this team, ensuring that support is consistent and coordinated across all schools. This year, there has been an increase in behavioral challenges, particularly among primary grade students. As a result, the district is considering expanding its behavior support staff to better meet the needs of students.

Action 11 - Provide Educational Field Trips: The district successfully implemented educationally relevant field trips, offering students valuable opportunities to enhance their vocabulary, background knowledge, and overall learning experience. These trips serve to deepen students' understanding and engagement with the curriculum. Additionally, they have had a positive impact on attendance by sparking greater interest and enthusiasm for learning.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Action 1- Provide academic intervention and support: There is a material difference between budgeted expenditures and the estimated actual expenditure for this action as a result of an intervention teacher vacancy at Moffett Elementary School for the entire school year.

Action 6 - Provide students an inclusive learning environment through the implementation of a co-teaching model: There is a material difference for this action. There has been an increase in the expenditures from the budgeted amount due to a need for an additional planning time for new co-teaching teacher teams.

Action 9 - Provide students with after school tutoring: There is a material difference for this action. While all teachers were invited and budgeted to provide after-school tutoring, participation was lower than anticipated. Many teachers declined the opportunity, as they were not interested in working beyond their contracted hours.

Action 11 - Provide Educational Field Trips: There is a material difference between the budgeted expenditures and the estimated actual expenditures for this action. Although field trips did take place, some were funded through alternative funding sources rather than the budgeted allocation for this action.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

Action 1 - Provide academic intervention and support: This action has been effective. Reading intervention teachers provided Tier 2 and Tier 3 supports across all elementary schools, while middle school students received intervention classes. As a result, STAR Reading (2–5) showed a significant increase. 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. K–1 students performing at grade level increased from 44.23% to 50.07%. The number of English Learners that met or exceeded standards was 35.14% and Low Income students were 49.06%.

Action 2 - Provide administrative and classified support to ensure students receive intervention and other support services: This action has been effective. Assistant principals and Categorical Program Assistants played a pivotal role in coordinating intervention, monitoring progress, and fostering school culture. This support structure contributed to improved attendance and a reduction in chronic absenteeism, with the overall chronic absenteeism rate dropping from 27.5% to 22%. with 21% for English learners and 21.8% for low income students. Our Suspension Rate for our English learners 1.4% and 1.8% for low income students. Notably, the district's suspension rate decreased from 2.7% to 1.8%. All elementary schools earned the highest blue rating and the middle school a green rating for suspension rates on the California School Dashboard, reflecting a systemwide emphasis on restorative practices and proactive behavior supports. STAR Reading results show that 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. K–1 students performing at grade level increased from 44.23% to 50.07%. The number of English Learners that met or exceeded standards was 35.14% and Low Income students were 49.06%. STAR Math assessments reveal that 56.54% of all students, 42.1% of English learners, and 55.92% of low income students K–5 are meeting grade level expectations. 49.68% of all students, 19% of English

learners and 47.77% of low income students in grades 6th-8th are meeting grade-level expectations. Foster youth student data is too small of a group to provide benchmark percentages.

Action 3 - Provide counseling services for students at all schools: This action has been effective. The district's counseling services remained a cornerstone of our support strategy, particularly for students facing trauma and chronic absenteeism. With dedicated counselors at each site, social-emotional learning and mental health supports were seamlessly integrated, contributing to a lower chronic absenteeism rate from 27.5% to 22% of all students, as well as 20.6% of English Learners, 21.8% of Low Income and 8.7% of Foster Youth. The district suspension rate decreased from 2.7% to 1.8% and decreases were seen across the groups to 1.4% of English Learners, 1.8% of Low Income, 0% of Foster Youth and 6.7% of African American students. The counselor collaboration with site administrators and student support teams has strengthened early intervention systems, helping to prevent behavioral escalation and improve student engagement.

Action 4 - Low income students identified as Gifted and Talented (GATE) or high achieving will be provided with extended learning opportunities: This action has been effective. Low-income GATE students participated in enrichment activities, including a spring session focused on coding and visual arts. GATE students continued to outperform peers on both local and state assessments, demonstrating the program's value in extending learning and engaging advanced learners. Although there was a slight decrease in CAASPP ELA (from 43.82% to 42.5%) in grades 3rd through 5th, our middle school grades 6th through 8th saw an increase in CAASPP ELA (from 37.95% to 40.36%). Our In CAASPP mathematics we saw an increase in grades 3rd through 5th (from 35.69% to 37%) and in grades grade 6th-8th there was also an increase from (20.63% to 23.96%). 42.1% of low income students grades 3-5 met or exceed standards in CAASPP ELA and 40.36% in grades 6-8 met or exceed standards. In CASPP math, 35.1% of low income students grades 3-5 met or exceeded standards and 24.18% of low income students grades 6-8 met or exceeded standards.

Action 5 - Provide Low income students and foster youth with a social and emotional curriculum: This action has been effective. The Leader in Me program has been fully adopted at all sites, reinforcing leadership skills and social-emotional competencies. Classrooms now have student-led mission statements and student leadership roles. This contributed to positive shifts in school culture and supported a decrease in the chronic absenteeism rate from 27.5% to 22% of all students, as well as 21.8% of Low Income and 8.7% of Foster Youth. The district suspension rate decreased from 2.7% to 1.8%, and decreases were seen across the groups to 1.8% of Low Income, 0% of Foster Youth and 6.7% of African American students.

Action 6 - Provide students an inclusive learning environment through the implementation of a co-teaching model: This action has been effective. Co-teaching strategies, supported by PD through 2Teach Global, helped create inclusive environments, particularly benefiting students with disabilities. STAR Reading results show that 51.28% of all students and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. K–1 students performing at grade level increased from 44.23% to 50.07%. The number of Low Income students were 49.06%. STAR Math assessments reveal that 56.54% of all students and 55.92% of low income students K–5 are meeting grade level expectations. 49.68% of all students and 47.77% of low income students in grades 6th-8th are meeting grade-level expectations.

Action 7 - Math Intervention Teachers: This non-contributing action has been effective. In CAASPP mathematics we saw an increase in grades 3rd through 5th (from 35.69% to 37%) and in grades grade 6th through 8th there was also an increase from (20.63% to 23.96%)

Action 8 - English learners will receive effective designated English language development: This non-contributing action has been effective. ELD professional development and coaching has supported outcomes for English learners where 51.57% of our English learners made annual progress towards English proficiency on the ELPAC assessment.

Action 9 - Provide students with after school tutoring: This action has been effective. After-school tutoring remained a key academic support. Identified students received targeted instruction, contributing to the increases in STAR Assessment results. STAR Reading results show that 51.28% of all students, 26.19% of English Learners, and 50.39% of low income students in grades 2–5 are performing at grade level. 45.33% of all students, 7.67% of English Learners, and 43.13% of low income students in grades 6–8 have achieved grade-level proficiency. K–1 students performing at grade level increased from 44.23% to 50.07%. The number of English Learners that met or exceeded standards was 35.14% and Low Income students were 49.06%. STAR Math assessments reveal that 56.54% of all students, 42.1% of English learners, and 55.92% of low income students K–5 are meeting grade level expectations. 49.68% of all students, 19% of English learners and 47.77% of low income students in grades 6th–8th are meeting grade-level expectations. Foster youth student data is too small of a group to provide benchmark percentages.

Action 10 - Classroom Management and behavior support: This action has proven to be effective. Behavior teams continued to provide Tier 2 and Tier 3 support. With suspension rates dropping district-wide from 2.7% to 1.8%, this initiative has proven vital in maintaining safe and supportive environments, particularly for primary grade students facing behavioral challenges. We also saw suspension rates declining in all student groups with 1.4% of English Learners, 2.4% of Special Ed., 1.8% of Low Income, 0% of Foster Youth, 6.7% of African American students being suspended.

Action 11 - Provide Educational Field Trips: This action has been effective. Educational field trips enriched students' learning experiences and positively influenced attendance and engagement. Our attendance improved with a 93.59% attendance rate at P2 for all students and the same rate for low income students. Students in Lennox also have access to a rich array of educational programs and services. Field trips also supported our metric of access to a broad course of study, especially for unduplicated students.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

This goal will remain the same for the 2025-26 school year. However based on our needs assessment Action 12 (Summer Academy) has been added and identified as a LREGB action and expenditure. This action will be measure through our local ELA Star assessment (Goal 2 Metric 2, 3, 7)

Action 2.7 (math intervention teachers) was already included in the LCAP as a non contributing action. It has been identified as a LREGB action and expenditure. This action will be measured through our local Math Star Assessment (Goal 2, Metric 8 & 9).

Research consistently supports the need for summer school programs and targeted math intervention teachers as effective strategies to address learning gaps, particularly for students from underserved communities. Studies show that students can lose up to two to three months of math skills over the summer, this is known as summer learning loss, with the greatest impact on low-income students. High-quality summer programs help mitigate this loss, accelerate learning, and support readiness for the next grade level.

Additionally, math intervention teachers provide focused, data-driven instruction that is responsive to individual student needs. Research highlights that early, targeted math support improves student achievement, builds confidence, and increases long-term success in math.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Actions

Action #	Title	Description	Total Funds	Contributing
2.1	Provide academic intervention and support	Unduplicated students have gaps in achievement. To address these gaps, the District will continue to provide intervention teachers (reading) for each elementary school to provide tiers 2 and 3 intervention for students in grades K-8	\$635,605.00	Yes
2.2	Provide administrative and classified support to ensure students receive intervention and other support services	To provide a cohesive multi-tiered system of support at each school and to ensure that low income students, English learners and foster youth receive the appropriate level of support, each school will continue to have an assistant principal and a categorical program assistant assigned to support data gather and monitoring the reclassification process. The assistant principals' primary role will be to meet with each grade/department levels weekly, review the analysis of data, identify specific students' needs, and ensure that a plan for adapting instruction, placing students in the appropriate level of support to maximize students' success with academics, behavior and social/emotional learning is implemented. Lennox Middle School is a large school therefore one assistant principal is not included in this action and will be primarily responsible for participating in IEP meetings and to address school discipline issues.	\$2,536,907.00	Yes

Action #	Title	Description	Total Funds	Contributing
2.3	Provide counseling services for students at all schools	Low income, English Learners and Foster Youth students disproportionately face trauma, necessitating specialized support. To address this, each school will have dedicated counselors offering tier 2 and 3 support for social and emotional learning needs. This increased service is particularly beneficial for low-income students, English learners, and foster youth, who may require more intensive assistance than what a classroom teacher can provide. This action provides support for the African American student group performing at the lowest level on the state suspension indicator. As well as for Buford Elementary School, Lennox Middle School, and various student groups that are performing at the lowest level on the state chronic absenteeism indicator.	\$1,337,014.00	Yes
2.4	Low income students identified as Gifted and Talented or high achieving will be provided with extended learning opportunities	To address the under-identification of gifted and talented low-income students, the district will offer increased services for this GATE and high achieving students to participate in extended learning opportunities. The Gifted and Talented Education (GATE) program will offer activities focused on problem-solving, creativity, and real-world applications. These opportunities will be available after school or during intercessions, providing access to experts, field trips (both in-person and virtual), and necessary materials for enrichment. This action aims to ensure that gifted and talented low-income students receive the support and opportunities they deserve to reach their full potential.	\$24,341.00	Yes
2.5	Provide Low income students and foster youth with a social and emotional curriculum	To provide low income students and foster youth with a social/emotional curriculum, the District is implementing the Leader in Me Program as their social/emotional learning supplemental curriculum at all schools. This program has been successfully implemented over the past few years. This action includes annual membership, professional development, materials and coaching. This action provides support for the African American student group performing at the lowest level on the state suspension indicator.	\$134,976.00	Yes

Action #	Title	Description	Total Funds	Contributing
2.6	Provide planning time and professional development to improve inclusive learning environments for low income students through improved implementation of a co-teaching model.	Co-teaching is an evidence based strategy that will be used to support diverse learners in successfully learning and accessing the core instructional program. As part of the support for low income students and English learners during "first instruction", teachers will receive training in implementing co-teaching models. This action provides support for Special Education students particularly at Lennox Middle School performing in ELA and math at the lowest level.	\$37,061.00	Yes
2.7	Math Intervention Teachers	Each elementary school will continue to receive one additional math intervention teacher and the middle school will receive 2 math intervention teachers to address learning loss and achievement gap in mathematics. Services from the math intervention specialists will be provided within the school day. Schedules will be created at each elementary school to ensure students do not miss core instruction. At the middle school, students will be scheduled for math intervention classes. Math intervention teachers are a critical component of the district's Multi-Tiered System of Supports (MTSS), delivering Tier 2 and Tier 3 interventions that are essential for addressing persistent achievement gaps, especially among unduplicated students. Furthermore, RTI-based (Response to Intervention) frameworks have shown that early, targeted intervention in mathematics can prevent long-term academic difficulties. Based on our needs assessment, this action has been identified as an LREBG funded action. \$875,501.00 of LREBG funds will be used to support this action. We will monitor this action through the growth of low-income, English learners and all students on local STAR ELA assessments (Goal 2, Metric 8 & 9).	\$875,501.00	No

Action #	Title	Description	Total Funds	Contributing
2.8	English learners will receive effective designated English language development	The District will continue to provide professional development for teachers focusing on effective practices for implementing designated English language development and integrated ELD, including the use of Specially Designed Academic Instruction strategies, thinking maps and language objectives. There will also be professional development that will focus on strategies to address the language acquisition of Long Term, English Learners (LTELs) This action provides support for English learners particularly at Lennox Middle School performing at the lowest level on the academic state indicators.	\$0.00	No
2.9	Provide students with after school tutoring	In an effort to provide a variety of services to support English learners, foster youth and low income students ,the District will provide low-income, English learners, and foster youth students with access to either in person or on -line tutoring based on student need. Tutoring services will be available at each school. This action provides support for Special Education students and English learners particularly at Lennox Middle School performing at the lowest level in ELA and math.	\$11,777.00	Yes
2.10	Classroom Management and behavior support	Based on current data (office discipline referrals) and observational data provided by the assistant principals related to low income students there is an identified need to provide these students with the support of a behavior team to assist in the implementation of behavior plans both in classes and during non-instructional time. This team, led by the District's behavior specialist, will provide para-educators, who are trained in a variety of behavior management and de-escalation strategies, to provide services to identified low income students.	\$235,619.00	Yes

Action #	Title	Description	Total Funds	Contributing
2.11	Provide Educational Field Trips	Low income students, foster youth and English learners experience limited opportunities that are necessary to provide background knowledge that make learning more relevant and successful. Students in each grade level will have the opportunity to experience at least one educationally related field trip each year. As a result of participating in these field trips, student engagement will increase, achievement and attendance will increase.	\$125,000.00	Yes
2.12	Summer Academy	At each school will have three weeks of Summer Academy in order to provide targeted academic intervention for students performing below grade level in English Language Arts (ELA) and mathematics. Designed to address learning loss and accelerate student progress, the Summer Academy focuses on essential grade-level standards identified by the district as critical for academic success. Through small group instruction and individualized support, students receive intensive intervention aimed at closing learning gaps and reinforcing foundational skills. The program is led by classroom teachers who use data-driven strategies and engaging instructional materials to help students build confidence, improve performance, and prepare for the upcoming school year. Summer Academy supports the district's MTSS model by offering Tier 2 and Tier 3 interventions in a smaller, more focused learning environment. Furthermore, research finds that students who do not engage in academic activities during the summer lose, on average, one to two months of grade-level equivalency in math and reading. This "summer slide" is address by offering engaging and meaningful small group instruction in the summer. Based on our needs assessment, this action has been identified as an LREBG funded action. \$250,000.00 of LREBG funds will be used to support this action. We will monitor this action through the growth of low-income, English learners and all students on local STAR ELA assessments (Goal 2 Metric 2, 3, 7,).	\$250,000.00	No

Goals and Actions

Goal

Goal #	Description	Type of Goal
3	Provide a safe and secure learning environment that increases student connections and student engagement in school. The metrics for this goal will measure student engagement and school climate through attendance, suspension, and expulsion data and school climate surveys.	Broad Goal

State Priorities addressed by this goal.

Priority 1: Basic (Conditions of Learning) Priority 5: Pupil Engagement (Engagement) Priority 6: School Climate (Engagement)
--

An explanation of why the LEA has developed this goal.

The Lennox School District is committed to providing a safe and secure learning and work environment for all students and staff. Lennox is a community that is a dense urban area with high incidents of crime and gang activity. It is critical for schools to be safe and orderly so that students can create positive relationships with other students and adults on campus. Relationships are important for students to be engaged and remain engaged in school. Feedback from our educational partners indicate that safety, relationships, engagement and attendance are essential for students learning and thriving. Additionally, Educational Partner feedback also indicated strong support to continue this goal from the prior LCAP. This goal includes actions and tiered supports that address the needs, circumstances, and conditions of Low- Income, English Learners, and Foster Youth students, so that all students can experience a safe and secure, positive school culture that supports their personal and academic growth. The metrics will measure student engagement through attendance, suspension, and expulsion data and will include local indicators for climate and basic services. We are continuing with this goal based on the 2024 CA Dashboard, as we have made progress in closing the outcome disparities, a significant gap remains between the performance of our low income, English learners, and foster youth students compared to all students, and our educational partners have emphasized the need to remedy the disparity.
--

Goal Analysis [2024-25]

An analysis of how this goal was carried out in the previous year.

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

Action 1 - Campus supervisors will engage with students to increase positive student/adult relationships and to ensure students are involved in physical activities: This action has been successfully implemented. Each campus maintains a team of dedicated campus supervisors and supervision aides. These staff members have undergone extensive training in Playworks principles and conflict resolution strategies. As a result, they are well-prepared to create safe, inclusive, and supportive environments for students during recess and other non-instructional times.

Action 2 - Students will receive support and follow up through the Health and Attendance staff: This action has been successfully implemented. The District's Director of Student Support Services is leading efforts to tackle chronic absenteeism and oversee daily attendance monitoring. In addition to this role, the Director is responsible for coordinating anti-bullying initiatives and managing tier 2 and tier3 social/emotional support programs. Each school is supported by attendance and health clerks, who work diligently to address students' health needs and monitor their attendance. These clerks regularly track attendance, with a particular focus on chronic absenteeism, and provide follow-up support, including referrals to external resources for families when attendance challenges are unrelated to school.

Action 3 - The Director of Student Support Services will provide and/or coordinate multiple services for low income students and foster youth: This action has been effectively implemented. The District's Director of Student Support Services plays an integral role in addressing chronic absenteeism and closely monitoring daily attendance patterns. In addition to these responsibilities, the Director oversees the implementation

of anti-bullying initiatives and leads the district's restorative practices efforts. This role also includes the management of tier 2 and tier3 social/emotional programs, ensuring that students receive the necessary support for their well-being. Through this leadership, the district is able to take a holistic approach to improving student outcomes and maintaining a positive school environment.

Action 4 - Provide students with safe passage to and from school: This action has been successfully carried out. The District has contracted crossing guards to ensure the safe arrival and departure of students, providing secure pathways to and from school.

Action 5 - Low income 5th grade students will participate in Outdoor School: This action has been successfully carried out. For the second consecutive year, all 5th graders had the opportunity to attend Outdoor School at Camp Pali in the San Bernardino Mountains. The feedback from students, teachers, and staff has been overwhelmingly positive, reflecting a highly successful and enjoyable experience for all participants.

Action 6 - Provide frequent opportunities to celebrate and recognize students' achievements and growth: This action has been effectively carried out. Schools organized several events and celebrations designed to engage students and strengthen their connection to the school community. These initiatives included attendance incentive programs to encourage regular school attendance, participation in Read Across America to celebrate the love of reading, monthly Student of the Month awards, and special recognition for students who meet or exceed grade-level standards on the CASSPP assessment and reclassify as fluent in English.

Actions 7-9 - District operations, Administrative Staff and Classified, non-instructional staff: All actions were implemented. These non-contributing actions include the general operations of the district, the administrative positions for both schools and the District, and non-instructional classified staff.

Action 10 - Provide outreach for Foster Youth: This non-contributing action has been successfully implemented and is funded through LREGB. The Social/Emotional Wellness Coordinator has been instrumental in coordinating district-wide social and emotional support for students. Their work has involved building partnerships with community organizations to expand available support services and offering continuous professional development for counselors on social and emotional learning strategies. Additionally, the coordinator supervises a team of social work interns, who have made a meaningful impact on the overall well-being and development of students throughout the district.

Action 11 - Implement Play Works at all schools: This action has been successfully carried out. The district has contracted Playworks to implement their program at each school site. Supervision aides have received extensive training and are now actively applying the Playworks framework to enhance student engagement, conflict resolution and create a positive playground environment.

Action 12 - Provide a cyber bully free zone: This is a non-contributing action. This action has been carried out and includes the implementation of a system that allows for cell phones to be controlled during the school day. To reduce cyber bullying and inappropriate use of social media, cell phones are only available to students for emergencies during the school day.

Action 13 - Reduce the health risks related to vaping: This action has been successfully implemented. All middle school students took part in an anti-drug education designed to raise awareness and educate them on the risks of substance abuse. The district has also established a contract for random K9 searches throughout the year to ensure campus safety. Counselors have been actively engaged in supporting and

monitoring students who display signs of vaping behavior, offering the necessary guidance and interventions. Additionally, the district has partnered with Southern California Crossroads to provide mentoring opportunities, with students being referred for extra support and guidance when needed.

Action 14- Support for SEL and Academic Intervention: This action has been partially implemented. All schools have put in place a tracking system to monitor students' movements when they are not in the classroom. This system records the frequency and duration of student absences from class, allowing educators to identify patterns and trends. By accurately tracking where students are, the system ensures they receive the necessary interventions and support, whether in or outside the classroom. This proactive approach helps tailor interventions to better address individual student needs. Assemblies that were planned were not implemented due to scheduling conflicts with the vendor.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Action 13 - Reduce the health risks related to vaping: There is a material difference for this action. The district over estimated the cost of this action and some of the events and activities that were originally budgeted in this action were not implemented.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

Action 1 - Campus supervisors will engage with students to increase positive student/adult relationships and to ensure students are involved in physical activities: This action has been effective. All schools maintained trained campus supervisors and supervision aides, who received professional development in Play Works principles and conflict resolution. Their proactive engagement with students during non-instructional times has helped reduce disciplinary issues and foster positive adult-student relationships. These efforts supported a drop in suspension rates from 2.7% to 1.8% for all students as well as low income students, a clear indication of a safer and more supportive school environment. Additionally on the LCAP Survey, 77% of students indicated that they felt safe at school and 95% of parents indicated that their child's school is a safe place.

Action 2 - Students will receive support and follow up through the Health and Attendance staff: This action has been effective. This action contributed directly to improved daily attendance monitoring and a decline in chronic absenteeism. Health and attendance clerks worked closely with students and families to address barriers to attendance and connected them with outside services when necessary. As a result, the district's chronic absenteeism rate dropped from 27.5% in 2022–23 to 22% in 2023–24 for all students and for low income students. We also saw a decrease in our chronic absenteeism rate with English learners who dropped from 26.7% to 20.6%.

Action 3 - Action 3 - The Director of Student Support Services has successfully provided and coordinated multiple services for low-income students and foster youth. Their role in supporting counselors to address students' social, emotional, attendance, and bullying concerns has been vital. They ensure the implementation of attendance systems district-wide and oversee the provision and celebration of attendance incentives. This commitment has resulted in a notable decrease in chronic absenteeism, evidenced by the current rate of 22% according to the California Dashboard, marking a decline of 5.5% for all students and our low income student group. We also saw a decrease in our chronic absenteeism rate with English learners who dropped from 26.7% to 20.6%. Additionally, the effectiveness of this action is demonstrated by our P2 attendance rate of 94%.

Action 4 - Provide students with safe passage to and from school: This action has been effective. Additional contracted crossing guards ensured safe routes for students traveling to and from school, particularly benefiting younger students and families without transportation. The strategic placement of additional crossing guards at key intersections in Lennox has contributed significantly to ensuring student safety during arrival and departure times. As a result, there have been no major incidents concerning student safety reported. This success is further highlighted by the notable increase in our attendance rate, now standing at 93.59% for all students, 93.86% for English Learners, 93.63% for low income students, and 82.46% for foster youth.

Action 5 - Low income 5th grade students will participate in Outdoor School: This action has been effective in expanding student access to enriching learning experiences beyond the classroom. All 5th grade students had the opportunity to attend Outdoor School at Camp Pali, where they engaged in hands-on environmental learning and team-building activities. These experiences not only supported academic content but also enhanced student engagement and social-emotional development. The positive impact of this program is reflected in two key metrics. First, the Local Indicator: Access to a Broad Course of Study confirms that 100% of 5th grade students, including English learners and students with disabilities, were invited to participate in this extended learning opportunity, reinforcing equity in access. Second, the district's attendance rate increased to almost 94% for all students and low income students, suggesting that programs like Outdoor School help motivate students to attend and feel more connected to their school community.

Action 6 - Provide frequent opportunities to celebrate and recognize students' achievements and growth: This action has been effective in fostering a positive school climate and increasing student motivation. District-wide recognition efforts such as Student of the Month, attendance awards, Read Across America, and CAASPP celebration events have helped strengthen student-school connections. These initiatives have contributed to the improved chronic absenteeism rate of 22% for all students and 21.8% for low income students. Additionally, according to our LCAP survey results, 79% of students stated that they are encouraged by staff members and 91% of students agree that staff has high expectations for students.

Action 7 - District operations: This non-contributing action has been effective. The action encompasses the basic operations of the school district. In general, the District has operated successfully this year. Students and teachers have been provided with adequate classroom supplies and clean and safe facilities. Included in this action is the requirement to have an auditor, legal services, and insurance.

Action 8 - Administrative Staff: This non-contributing action has been effective. This action includes both district and school administrators, who have been consistently present throughout the entire school year. Each school has had stable leadership with a principal in place for the duration of the year and district staff necessary for operations have also remained consistent. These administrators have demonstrated a clear commitment to prioritizing students' needs above all else. They have effectively steered the academic program, fostering an environment that encourages and supports every student's learning success. Furthermore, district and school administrators have taken the lead in establishing a safe and nurturing learning environment for all students, as evidenced by our William Facilities in Good Repair report.

Action 9 - Classified, non-instructional staff: This non-contributing action has been effective. This action includes all District non-instructional classified staff. These employees have been effective in ensuring that such things as maintenance and operations run smoothly. There are also custodians who provide clean classrooms and other facilities for our students and staff, as evidenced by our William Facilities in Good Repair report. Additionally, our clerical staff successfully supports the communications between schools and the district and within each school. They have also been successful in ensuring that reporting requirements are met at all levels of the organization.

Action 10 - Provide outreach for Foster Youth: This non-contributing action has been effective. This action includes a Social/Emotional Learning Coordinator, whose role has proven to be highly impactful. The coordinator plays a crucial role in ensuring that students receive the necessary social and emotional support, both within the classroom and through counseling services. By collaborating effectively with counselors, she ensures that equity in service provision is maintained across all schools. Additionally, she has taken the lead in developing and training staff on restorative practices and the Multi-Tiered System of Support (MTSS) plan for behavior and social-emotional learning. As a result of these efforts, our schools are able to identify successful outcomes for students engaged in counseling, as well as those benefiting from classroom social and emotional support, thereby enhancing our overall school climate. This action has proven to be effective as evident through our LCAP student survey in which 73% of students reported looking forward to coming to school on most days and 95% of parents reported that students looked forward to attending school.

Action 11 - Implement Play Works at all schools: This action has been effective in fostering a safe, inclusive, and engaging environment during recess and other non-instructional times. Through the Playworks program, campus supervisors and supervision aides received professional development in structured play, conflict resolution, and inclusive game facilitation. These skills have helped staff proactively engage students in physical activity while promoting teamwork, respect, and problem-solving. The impact of this action is reflected in improved school climate indicators, including a reduction in the district's suspension rate from 2.7% to 1.8% for all students as well as for our low income student group. By minimizing recess-related conflicts and increasing positive peer interactions, the Playworks program has contributed to a more supportive and respectful campus culture.

Action 12: Cyber Bully Free Zone - This non-contributing action has been effective . This action includes the implementation of a system that assists the school administration at Lennox Middle School in controlling the amount of time students have access to their phones and social media during the school day. With this system in place, students have access to their cell phones for emergencies but are restricted to their use during the day, therefore greatly decreasing the amount of cyber bullying and other inappropriate uses of the internet. The principal and other administrators have indicated that the amount of time that they have had to address these issues has greatly decreased. This gives staff the opportunity to address the use of social media in a proactive fashion. This action has been effective as evident by the district's suspension rate decreased from 2.7% to 1.8%.

Action 13 - Reduce the health risks related to vaping: This action has been effective in addressing student health and safety by increasing awareness of the risks associated with vaping. The district implemented targeted prevention strategies that included student education, staff training, and parent outreach. The district's suspension rate decreased from 2.7% to 1.8% for all students and our low income students reflecting a shift from punitive discipline to proactive prevention and student engagement. Additionally, middle school administrators reported fewer repeated incidents, suggesting that students are responding positively to increased awareness and intervention. We also saw a 5.5% decrease in our chronic absenteeism rate for all students and a 5.7% decrease for our low income students.

Action 14 - Support for SEL and Academic Intervention: This action has been effective in strengthening both the social-emotional and academic support systems available to students across the district. Through the integration of SEL strategies within intervention programs, students who require additional academic support are also receiving guidance to build resilience, self-regulation, and positive peer relationships. The success of this action is evident in our surveys, where 77% of students express feeling safe at school, and an overwhelming 95% of parents agree that their child's school is a safe place. These findings highlight the positive impact of the tracking system on students' sense of security and well-being, reinforcing the importance of such initiatives in fostering a conducive learning environment. In addition, the district's suspension rate decreased from 2.7% to 1.8% for all students as well for the low income student group

with all elementary schools performing on the blue level and the middle school on the green level of the Suspension indicator on the CA Dashboard.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

This goal will remain the same for the 2025-26 school year. Action 3.10 (Social Emotional Wellness Coordinator) was already included in the LCAP as a non contributing action. It has been identified as a LREGB action and expenditure. This action will be measured through student surveys (Goal 3, Metric 10).

Research show that SEL programs lead to improved academic performance, better emotional regulation, increased positive behavior, and reduced disciplinary incidents. A dedicated SEL Coordinator ensures consistent implementation of evidence-based practices, provides professional development for staff, and supports a whole-child approach to learning. By coordinating efforts across the district, an SEL Coordinator helps create safe, inclusive, and supportive learning environments, which are essential for student well-being and academic growth.

A report of the Total Estimated Actual Expenditures for last year’s actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year’s actions may be found in the Contributing Actions Annual Update Table.

Actions

Action #	Title	Description	Total Funds	Contributing
3.1	Campus supervisors will engage with students to increase positive student/adult relationships and to ensure students are involved in physical activities	Campus supervisors and supervision aides will be provided at each school to increase student engagement especially during more unstructured times during the day. Campus supervisors will encourage students to be physically active using structured play activities when they are out of class. Campus supervisors and supervision aides frequently have well developed relationships with students that supports this increased engagement. When low income students are engaged throughout the school day, there is an increase in attendance, a decrease in discipline and reduction in suspension and chronic absenteeism.	\$1,406,318.00	Yes

Action #	Title	Description	Total Funds	Contributing
3.2	Students will receive support and follow up through the Health and Attendance staff	Low income students and foster youth are experiencing increased health issues and chronic absenteeism. The District will continue to provide additional health clerk hours to address the increased health needs of low income and foster youth at each school; provide an attendance clerk for each school with primary responsibility to focus on those students who are chronically absent or at risk to be chronically absent. The attendance clerk will work closely with the assistant principal and counselors to monitor the needs of foster youth. The District will implement Powerschool Attendance Intervention and Communication Program to improve tracking attendance issues and the successful implementation of any intervention. This action provides support for Buford Elementary School, Lennox Middle School, and various student groups that are performing at the lowest level on the state chronic absenteeism indicator.	\$804,447.00	Yes
3.3	The Director of Student Support Services will provide and/or coordinate multiple services for low income students and foster youth	The Director of Student Support Services will have the primary responsibility for supporting district wide activities related to foster youth and low income students identified as chronic absentee, and coordinating services for low income students within the district and with community partners. This action provides support for the African American student group performing at the lowest level on the state suspension indicator.	\$116,369.00	Yes
3.4	Provide students with safe passage to and from school	The district will collaborate with Los Angeles County to secure additional crossing guards due to the densely populated urban environment surrounding the schools. While student safety is prioritized on campus, the partnership with LA County to ensure safe passage to and from school promotes increased student attendance.	\$171,662.00	Yes
3.5	Low income 5th grade students will participate in Outdoor School	Low income students would not have the opportunity to participate in outdoor school due to prohibitive costs, therefore the district will provide each 5th grade student with the opportunity to attend Outdoor School; this includes a contract with the facility, instructional materials and district staff support.	\$238,302.00	Yes

Action #	Title	Description	Total Funds	Contributing
3.6	Provide frequent opportunities to celebrate and recognize students' achievements and growth	To provide a positive and safe school climate the District will continue to celebrate and recognize the accomplishments of our low income students, foster youth and English learners. This action provides support for Buford Elementary School, Lennox Middle School, and various student groups that are performing at the lowest level on the state chronic absenteeism indicator.	\$25,000.00	Yes
3.7	District operations	To successfully operate the District, the district will contract for services and purchase supplies and equipment. This action includes base funded operational costs such as legal, insurance, Maintenance and Operations, operational contract costs, and auditors.	\$7,076,240.00	No
3.8	Administrative Staff	To support the operations of the district, the district will employ classified and certificated administrators to oversee the operations of the district and schools.	\$2,016,426.00	No
3.9	Classified, non-instructional staff	To support the operations of the District and schools, classified, non-instruction staff will be employed. The staff included are: classified staff providing custodial, clerical, maintenance and grounds	\$5,685,329.00	No
3.10	Provide outreach for Foster Youth	A District Social and Emotional Wellness Coordinator will provide outreach to foster youth and families to ensure that these students are receiving the supports needed to be successful in school. Research shows that students' academic success is closely linked to their social-emotional well-being. Our Social Emotional Wellness Coordinator plays a critical role in designing, implementing, and coordinating SEL programs and mental health supports across the district. This action provides support for the African American student group performing at the lowest level on the state suspension indicator. As well as for Buford Elementary and Lennox Middle and various student groups that	\$166,009.00	No

Action #	Title	Description	Total Funds	Contributing
		are performing at the lowest level on the state chronic absenteeism indicator. Based on our needs assessment, this action has been identified as an LREBG funded action. We will monitor this action through the growth of student reporting they look forward to coming to school on most days on student surveys (Goal 3, Metric 10). \$166,009.00 of LREBG funds will be spent to support this action.		
3.11	Implement Play Works at all schools	The District will contract with Play Works to provide age appropriate structured play activities at all schools. Providing structured play will increase students' success during non-instructional time. This will result in lower office discipline referrals and suspensions and an increase in student leadership. This action provides support for the African American student group performing at the lowest level on the state suspension indicator.	\$274,000.00	Yes
3.12	Provide a cyber bully free zone	Low income students have experienced challenges with inappropriate social media postings at the middle school. Families have expressed that they have a challenge monitoring low income student's social media accounts. To address this need the middle school will implement protocols for limiting the access to social media while students are on campus. This action will result in a decrease in the number of office discipline referrals among low income students and increase a more positive school climate.	\$7,000.00	No
3.13	Reduce the health risks related to vaping	Over the past two years there has been a dramatic increase in the number of students and the frequency of incidents involving vaping. Low income students have access to vaping but do not have adequate information regarding the short and long term health implications as a result of vaping. The impact of this action is 1. to inform students of the health implications of vaping, 2. provide counselors and other staff with tools and information that can be used to support and monitor students patterns of vaping behavior.	\$5,000.00	Yes

Action #	Title	Description	Total Funds	Contributing
		This action provides support for the African American student group performing at the lowest level on the state suspension indicator.		
3.14	Support for SEL and Academic Intervention	The Lennox School District is located in an area of high density and crime. Student safety is a high priority for all educational partners. The past several years has seen an increase in the amount of criminal activity that has caused our schools to have increased lock downs on a regular basis. Due to the conditions of poverty in this community there is frequent police/sheriff activity. To address the safety concern for low income students at all of our schools when they are participating in supplemental academic and SEL support groups, the District has determined that a system for providing immediate information on each students' whereabouts was critical. All schools implement a system of being able to track students when they are not in the classroom and the frequency each student is out of the classroom. The system will report students' locations to the assistant principals who will monitor students' activity. If a particular student(s) need to be seen by the behavior team or counselors, the assistant principal will ensure that students will be directed to the appropriate staff member for intervention. The impact of this action is to ensure that students are receiving the appropriate level of intervention or support they may need if they are both in and out of class.. This will result in the decrease of incidents creating safety concerns outside of classrooms and addressing low income students' needs more immediately. As a result of this action being implemented low income students will receive appropriate interventions and student survey results will demonstrate an increase that students are encouraged by staff.	\$24,278.00	Yes

Goals and Actions

Goal

Goal #	Description	Type of Goal
4	Increase parent and community involvement to support student achievement.	Broad Goal

State Priorities addressed by this goal.

Priority 3: Parental Involvement (Engagement) Priority 4: Pupil Achievement (Pupil Outcomes) Priority 5: Pupil Engagement (Engagement)
--

An explanation of why the LEA has developed this goal.

Parent and community involvement within our District and schools is highly valued in our community and is recognized as a very important to student success. Educational Partner feedback indicated strong support to continue this goal from the prior LCAP. Education partners strongly expressed that families need to be provided with access to understanding their role in creating change and having a voice within their school sites. This goal is supported with actions that offer increased and improved services for parents and community partners to ensure equitable outcomes for all students. The metrics used to measure the effectiveness of this goal include parent surveys, parent participation and chronic absenteeism rate. We are continuing with this goal based on the 2024 CA Dashboard, as we have made progress in closing the outcome disparities, a significant gap remains between the performance of our low income, English learners, and foster youth students compared to all students, and our educational partners have emphasized the need to remedy the disparity.

Measuring and Reporting Results

Goal Analysis [2024-25]

An analysis of how this goal was carried out in the previous year.

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

Action 1 - Provide opportunities for Parent/Staff collaboration and for parents to assume leadership and decision making roles in the District: This action has been implemented. Parents and staff continued to work in partnership through meaningful participation on key district and school-based committees such as the District School Leadership Team, DELAC, ELACs, and SSCs. These collaborative groups have supported two-way communication and fostered strong parent engagement, ensuring that school decisions reflect the input and priorities of both families and educators.

Action 2 - Provide parent workshops and classes: This action has been implemented. Throughout the year, a variety of parent classes and workshops were made available to support families and strengthen the home-school connection. The district continued its focus on sessions centered around the Leader in Me's habits for success, equipping parents with strategies to reinforce leadership and academic growth at home. In addition, partnerships with local colleges remained in place, allowing parents to conveniently participate in on-campus ESL courses designed to improve English language skills and promote lifelong learning.

Action 3 - Provide a Health Fair for parents and students: This action has been carried out successfully. In partnership with UCLA, the district hosted a Health Fair in June that provided comprehensive health-related services to the community. Attendees had access to various offerings such as immunizations, general health screenings, and vision and hearing checks. The event also featured guest speakers and informational resources aimed at promoting overall wellness and increasing awareness around important health topics.

Action 4 - Provide translating services to ensure non-English speaking parents are engaged in their children's schools: This action has been successfully implemented. The District continues to employ a full-time translator and has supplemented language support by contracting additional translation services. These efforts have enhanced communication and encouraged greater parent participation in both school site and district-wide events and initiatives.

Action 5 - Provide opportunities for parents to attend conferences: This action has been implemented. Parent leaders had the opportunity to participate in the CAFE conference, further building their capacity to support multilingual learners. Additionally, the district hosted its 2nd annual Parent Summit, designed as a mini-conference experience. The event featured a keynote address focused on promoting social-emotional wellness at home and included a community resource fair that connected families with local services and supports. Attendance and engagement at the summit were strong, reflecting its value to our parent community.

Action 6 - Provide School Site Parent Liaisons: This action has been implemented. Every school site continues to have a designated Parent Liaison responsible for managing the Parent Center. These liaisons play a key role in fostering meaningful communication between the school and families by sharing important updates, distributing resources, and providing assistance. The Parent Centers function as welcoming spaces where parents can stay informed, connect with staff, and receive the support needed to remain actively involved in their child's education.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Action 2 - Provide parent workshops and classes: There is a material difference between budgeted expenditures and the estimated actual expenditure for this action. There has been an increase in the expenditures from the budgeted amount due to the addition of additional workshops provided by an outside provider at the request of parents.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

Action 1 - Provide opportunities for Parent/Staff collaboration and for parents to assume leadership and decision making roles in the District: This action has been effective. Parents remained actively involved in key decision-making bodies such as the District School Leadership Team (DSLTL), DELAC, ELAC, and School Site Councils (SSC). These forums enabled meaningful two-way communication and collaboration, fostering a culture of shared governance. This year, 95% of parents reported satisfaction with opportunities for involvement in decision-making, an increase from 93% last year. Additionally, 85% of parents indicated that they are actively involved at their child's school an increase from 77% last year. Also important to note is a 5.5% decrease in our chronic absenteeism rate for all students and a 5.7% decrease for our low income students.

Action 2 - Provide parent workshops and classes: This action has been effective. The district expanded its offerings to include sessions on Leader in Me habits, supporting SEL and academic growth at home. In partnership with local colleges, ESL classes were again hosted at school sites, helping parents improve English skills. These efforts contributed to an 85% active parent participation rate, up from 77% the prior year, a strong sign of deeper school-community connections. Additionally, 95% of parents feel comfortable participating in school activities for parents. We also had a decrease in our chronic absenteeism rate decreasing 5.5% for all students, 5.7% for low income students, 0.8% for English learners. Our chronic absenteeism rate for foster youth remained the same.

Action 3 - Provide a Health Fair for parents and students: This action has been effective. Partnering with UCLA, the district held a well-attended Health Fair in June, offering immunizations, vision and hearing screenings, and wellness resources. The event fostered community engagement around health, which is essential for student learning and attendance. This was evident through the reduction of our chronic absenteeism rate by 5.5% for all students and a 5.7% decrease for our low income students.

Action 4 - Provide translating services to ensure non-English speaking parents are engaged in their children's schools: This action has been effective and essential in ensuring equitable parent participation. Translation services supported nearly all district and school-based parent events and meetings. The result was a 95% parent comfort rate with participating in school activities—a 2% increase from the previous year. Additionally, LCAP survey results indicated that 96% of parents indicated that their school values and encourages parent participation. This underscores how language access removes barriers and strengthens inclusivity. Also important to note is a 5.5% decrease in our chronic absenteeism rate for all students and a 5.7% decrease for our low income students.

Action 5 - Provide opportunities for parents to attend conferences: This action was effective. The district's 2nd annual Parent Summit was a notable success. The event featured a keynote speaker and a resource fair. Feedback was overwhelmingly positive, and the district plans to continue this model to support leadership development. Per the LCAP survey, 95% of parents reported satisfaction with opportunities for involvement in decision-making, an increase from 93% last year. Additionally, 85% of parents indicated that they are actively involved at their child's school, an increase from 77% last year. We also had a decrease in our chronic absenteeism rate decreasing 5.5% for all students, 5.7% for low income students.

Action 6 - Provide School Site Parent Liaisons: This action proved highly effective in increasing parent involvement. Parent Liaisons at each school led the coordination of Parent Centers, creating hubs for volunteering, accessing resources, and attending meetings. Survey data showed that 85% of parents are actively involved in their child's school and that 95% of parents feel comfortable participating in school activities for parents. We also had a decrease in our chronic absenteeism rate decreasing 5.5% for all students, 5.7% for low income students.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

This goal will remain the same for the 2025-26 school year. There are no changes planned for this goal.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Actions

Action #	Title	Description	Total Funds	Contributing
4.1	Provide opportunities for Parent/Staff collaboration and for parents to assume leadership and decision-making roles in the District	Teachers will participate with parents in regular meetings of the District's District School Leadership Team. This team has the primary responsibility for developing and monitoring the LCAP. Parents will assume a leadership role on this team with each parent participating in this meeting representing their school's School Site Council	\$7,577.00	Yes
4.2	Provide parent workshops and classes	When unduplicated students' parents receiving training and information on strategies to support their children, these students become more connected to school and frequently there is a correlation to increased achievement and attendance. The District will provide a variety of parent workshops and classes for parents including meeting the social/emotional needs of students, use of technology, supporting students in math and English language arts, etc.	\$11,879.00	Yes
4.3	Provide a Health Fair for parents and students	The Lennox School District in coordination with UCLA will provide an annual health fair for parents and families.	\$6,000.00	Yes
4.4	Provide translating services to ensure non-English speaking parents are engaged in their children's schools	Many of our parents of unduplicated students do not speak English. To increase parent engagement and involvement, the District will provide translation. Translators will be used specifically to support parents with access to parent workshops and classes.	\$142,735.00	Yes
4.5	Provide opportunities for parents to attend conferences	The District will provide opportunities for parents to participate in conferences that are designed for parents, conferences, such as CABE, will be available for their participation. The opportunity for parents to participate in this type of activity, increases parent leadership.	\$26,517.00	Yes

Action #	Title	Description	Total Funds	Contributing
4.6	Provide School Site Parent Liaisons	Each school will operate a parent center that will become the hub of parent activities at each school. Parent Liaisons will coordinate parent centers and parent activities at each school site to ensure that parents needs are addressed and the communication between th school and parents is increased and improved. This action provides support for Buford Elementary School, Lennox Middle School, and various student groups that are performing at the lowest level on the state chronic absenteeism indicator.	\$296,523.00	Yes

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students [2025-26]

Total Projected LCFF Supplemental and/or Concentration Grants	Projected Additional 15 percent LCFF Concentration Grant
\$18477244	\$2465885

Required Percentage to Increase or Improve Services for the LCAP Year

Projected Percentage to Increase or Improve Services for the Coming School Year	LCFF Carryover — Percentage	LCFF Carryover — Dollar	Total Percentage to Increase or Improve Services for the Coming School Year
44.594%	0.000%	\$0.00	44.594%

The Budgeted Expenditures for Actions identified as Contributing may be found in the Contributing Actions Table.

Required Descriptions

LEA-wide and Schoolwide Actions

For each action being provided to an entire LEA or school, provide an explanation of (1) the unique identified need(s) of the unduplicated student group(s) for whom the action is principally directed, (2) how the action is designed to address the identified need(s) and why it is being provided on an LEA or schoolwide basis, and (3) the metric(s) used to measure the effectiveness of the action in improving outcomes for the unduplicated student group(s).

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
1.1	Action: Provide low income and EL students with increased opportunities for small group instruction and personalized learning Need: Our latest achievement data reveals that low-income students are consistently performing below grade level standards. According to 3rd-5th CAASPP ELA results, 57% of our low-	To address this need, the District will provide additional teachers for all schools with an expectation that low income and EL students in grades TK-8 will receive increased opportunities to receive small group instruction and to receive frequent feedback. A second expectation of this action will be that students will receive differentiated instructional strategies based on the analysis of current data. A third expectation for implementing this action will be the implementation of personalized learning several times weekly at	We will monitor the growth of low income, English learners, and all students on our annual ELA CAASPP results. (Goal 1 Metric 6, 7, 8, 9)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	income students and 83% of our English learners are not meeting standards. Teachers have highlighted the need for smaller class sizes, noting that students are more engaged and participate more actively in smaller classes. They also mentioned that with fewer students, they can monitor progress more closely and provide targeted support. Parents have also expressed their support for smaller class sizes, stating that teachers can offer more personalized instruction and immediate feedback when there are fewer students. Based on this feedback from parents and teachers, it is clear that low-income students and English learners would greatly benefit from increased opportunities to learn in small instructional groups. This would enable them to receive more frequent and personalized feedback in both math and English language arts, ultimately helping to improve their academic performance. CAASPP 2024 English Language Arts results show that 42% of low-income students and 10% of English learners in grades 3–5 are meeting standards. During the February 2025 LCAP input sessions, teachers identified small class sizes as a top priority, emphasizing that low-income students and English learners benefit from small-group instruction and personalized	the elementary level. Personalized learning is when students are working in a small group with students that have a similar academic need. At the middle school level in addition to small group instruction and increased feedback, a focus on ensuring instruction is relevant and rigorous for college and career readiness will be an expectation. To address this there will be an expectation for AVID strategies to be integrated into all classes, a focus on implementing higher level questions and increased opportunities for students to write and speak. This action is being provided at an LEA- wide basis because all of our students can benefit from small group, differentiated and personalized instruction in order to achieve grade level proficiency.	

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	feedback in both math and English Language Arts to improve academic outcomes. Scope: LEA-wide		
1.2	Action: Students in grades 6-8 will receive instruction based on analysis of formative and summative data Need: After reviewing the local and state assessment data of low-income students and English learners, and discussions with staff related to middle school students' needs, the District identified a need for middle school students to receive highly targeted instruction based on data that is relevant and engaging. According to our CAASPP results, 62% of middle school students are not meeting standards on ELA and 79% are not meeting standards on math. Furthermore 63% of low income student and 95% of English learners in 6th-8th grade are not meeting standards in ELA. 79% of low income student and 98% of English learners in 6th-8th grade are not meeting standards in math. While the district's 2024 CAASPP results showed gains in achievement for grades 6–8, only 24% of middle school low-income students and 4% of English learners are meeting standards in math. In English Language Arts, 40% of low-income students	For this need to be met, teachers will have regular opportunities to collaborate weekly within grade levels and departments to carefully analyze a variety of data related to grade level standards and design lessons that are targeted, relevant and engaging. Through this collaboration, teachers will also design instruction identifying language strategies to integrate English language development in all core and elective classes. Another outcome of this action is to encourage cross curricular planning which, when accomplished, will support the goal to increase the relevancy of designed lessons. Lessons, combining strategies to achieve language outcomes and grade level content will build fluency and literacy while supporting access to learning across content areas. This action is being provided schoolwide at Lennox Middle School because state and local test scores show that our middle school students are scoring below the state average. Additionally all of our Middle School students can benefit from instruction that is based on the analysis of formative and summative data.	We will monitor the growth of low income, English learners, and all students on our annual ELA and Math CAASPP results. (Goal 1 Metric 7 & 9)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	and 7% of English learners are meeting standards. Scope: Schoolwide		
1.3	Action: Students in grades TK-5 will receive standards based instruction using a variety of strategies based on the analysis of current data Need: After reviewing local and state data in reading and math of low income students and English learners, the District determined that there is a need for teachers to frequently analyze current formative and summative data, to be able to plan for small group instruction and personalized learning experiences for students. Teachers expressed a strong need for students to experience differentiated instructional strategies that will help them to be successful in attaining achievement with grade level standards. They also expressed a strong desire to continue weekly collaboration with grade level teams in order integrate language objectives across content areas. Additionally, English learners have a need to have language development integrated throughout the day to increase English proficiency. According to our 3rd- 5th ELA CAASPP results, 57% of our low income elementary students and 83% of our elementary English learners are not meeting standards.	To address this need, the District will provide a physical education team which will include teachers and para-educators. This team will provide physical education weekly to a grade level allowing teachers to have a weekly opportunity to collaborate with each other, analyze current data and plan for differentiated small group instruction. There is an expectation that lessons will include the implementation of language objectives. This action is being provided on an a LEA-wide basis because all of our students can benefit from standards based instruction using a variety of engaging strategies.	We will monitor the growth of low income, English learners, and all students on our annual ELA & Math CAASPP results. (Goal 1 Metric 6, 8) We will also monitor the progress of English learners towards attaining English proficiency on the ELPAC (Goal 1 Metric 10)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	CAASPP 2024 English Language Arts results show that 42% of low-income students and 10% of English learners in grades 3–5 are meeting standards. Additionally, 52% of English learners are making annual progress toward English proficiency, as measured by the ELPAC. During 2025 LCAP input sessions, teachers emphasized the importance of weekly grade-level collaboration to integrate language objectives across content areas and the importance of weekly grade-level collaboration to integrate language objectives across content areas. Scope: LEA-wide		
1.4	Action: Students will have continuous access to technology by having technology support staff available at the school and district levels Need: As a result of the poverty level of students, many students do not have consistent access to the internet or devices at home. Low income students and foster youth primarily have access to technology and technology support if it is provided by the school. According to our 3rd-5th grade CAASPP results, 57% of our low income students and 88% of our English learners are not meeting standards in ELA. In 6th-8th grade, 63% of low income student and	To address this need technology support will be available at each school and additional support will be provided through the District to ensure that the technology and access to software applications is uninterrupted. Support for parents and home connectivity will also be provided by district technology staff. This action is being provided on an LEA-wide basis because all students can benefit from continuous non interrupted access to technology and software applications.	Consistent access to technology will be monitored through the student LCAP survey. (Goal 1 Metric 17) We will monitor the growth of low income, English learners, and all students on our annual ELA CAASPP results. (Goal 1 Metric 6 & 7)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	95% of English learners are not meeting standards in ELA. According to our LCAP survey 93% of teachers agree or strongly agree that the district provides adequate technology for the effective implementation of curriculum. CAASPP 2024 English Language Arts results show that 42% of low-income students and 10% of English learners in grades 3–5 are meeting standards. At the middle school level, 40% of low-income students and 7% of English learners are meeting ELA standards. Additionally, 98% of students reported having access to a technology device, according to the 2025 LCAP Survey Scope: LEA-wide		
1.5	Action: Provide students in grades 5-8 with the opportunity to participate in the Engineering Program Need: There is a need for low income students to have "real life" experiences with college and career readiness skills. Through outreach with low income parents, the District determined that low income students are often not familiar with college and career possibilities. As part of	This action addresses the needs of low income students because professional engineers will collaboratively work with Lennox teachers to involve students in "hands on" engineering experiences that will engage them in higher level thinking while applying science, math and English language arts standards to projects. Additionally, this action begins the preparation for college and career readiness. This action is being provided on an LEA-wide basis because all students can benefit from	We will continue to monitor the growth of low-income and all students on annual Math and science CAASPP results. (Goal1 Metrics 5, 8 & 16)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	the District's effort to provide college and career readiness for high poverty K-8 students the career pathway of engineering will continue to be provided. 2024 CAST results indicate that only 18.88% of students are meeting science standards. Scope: LEA-wide	college and career readiness and engineering career pathways.	
1.6	Action: Provide Long Term English learners (LTELs) with an after school reclassification academy Need: The District has identified as a need for Long Term English Learners (LTEL) to receive additional support on specific skills needed for them to reclassify. This year we have reclassified 24% of our English learners but have 351 identified Long Term English Learners in need of being reclassified as fluent in English. Our DELAC has expressed a concern with the high number of LTEL's and requested extended time be provided with a focus on language instruction. A closer look at our data reveled that the writing domain on CAASPP is the greatest area of need. Through goal setting students also asked for additional support in the area of writing and vocabulary development in order to better complete grade level writing assignments.	To address the needs of English learners who have not reclassified, the District will contract with a provider who offers extended learning time to provide a reclassification academy to target those skills students need to reclassify to fluent English speaker. This academy will be offered throughout the year. This action provides support for English learners at Lennox Middle School performing at the lowest level on the ELA academic state indicator.	We will monitor the effectiveness of of this action through our reclassification rate. (Goal 1 Metric 18)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	There is a clear need for an after-school reclassification academy to support Long-Term English Learners (LTELs). While LTELs are performing at the 'Yellow' level on the 2025 English Learner Progress Indicator of the California Dashboard, they continue to face significant challenges in meeting grade-level English Language Arts (ELA) standards, as reflected by a 'Red' rating—the lowest level—on the ELA Indicator. Scope: LEA-wide		
1.7	Action: Students will have access to supplementary materials Need: Many low income students and English learners are performing below grade level standards. The District's adopted core materials are not adequate for supporting these students' understanding of key concepts. Teachers and administrators stated that low income students and English learners often respond to having a variety of approaches provided for learning grade level content. they feel strongly that the supplemental materials will provide a multi-media approach, and in other cases, the materials provide steps to learning content in a strategic manner.	To address this need, supplemental materials related to the grade level standards and for use during reading and math intervention will be purchased, and teachers will receive training if appropriate. Using supplemental instructional materials and programs will contribute to increased student achievement for unduplicated students. These resources will address learning gaps by providing additional practice and reinforcing foundational skills in literacy, writing, and number sense. Additionally, they will offer realia, visuals, and hands-on learning opportunities for our English learners. This action is being provided on an LEA-wide basis because all students can benefit from having supplemental materials that provide a multi-media approach including manipulatives, charts, and intervention materials.	We will monitor the growth of low income, English learners, and all students on our annual ELA and Math CAASPP results. (Goal 1 Metric 6-9) We will also monitor this action through the growth of low-income and all students on local STAR ELA and Math assessments (Goal 1 Metric 1-5)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	CAASPP 2024 results show that 42% of low-income students and 10% of English learners in grades 3–5 are meeting standards in English Language Arts (ELA). At the middle school level, 40% of low-income students and 7% of English learners are meeting ELA standards. In CAASPP mathematics, 35.1% of low-income students and 11.47% of English learners in grades 3–5 are meeting standards. In grades 6–8, only 24% of low-income students and 4% of English learners are meeting math standards. Additional during 2025 LCAP input sessions teachers expressed the need for students to have access to supplementary materials to provide additional practice, support differentiated instruction, and reinforce grade-level content, particularly for students who need targeted intervention or enrichment Scope: LEA-wide		
1.8	Action: Students will have selected software applications available to support learning goals Need: The District has observed, and our teacher DSLT representatives have stated, that low income students and English learners were more engaged in learning and that some	The District will purchase specific software licenses that have proven to provide successful alternative pathways for learning content standards while increasing student engagement. The software applications that will be purchased will increase the engagement in learning for low income students and English learners. By offering students the opportunity to practice at home, we aim to build a sense of success and confidence in	We will monitor the effectiveness of our software applications through the growth of low income, English learners and all students on our annual ELA CAASPP results. (Goal 1 Metric 6-7)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	students excel in part as a result of the use of specific software applications. During our community LCAP input sessions parents also stated the need for students to continue practicing skills at home through Apps provided by the school district. Our data supports this need; according to our ELA CAASPP results, 57% of our low-income elementary students and 83% of our elementary English learners are not meeting standards. CAASPP 2024 results show that 42% of low-income students and 10% of English learners in grades 3–5 are meeting standards in English Language Arts (ELA). At the middle school level, 40% of low-income students and 7% of English learners are meeting ELA standards. Additionally our LCAP 2025 Survey indicates that 88% of teachers agree that students have adequate technology for the effective implementation of curriculum. Scope: LEA-wide	both language and content areas. The software programs are designed to increase engagement and offer tailored learning experiences that meet their unique needs. The use of these resources will not only address learning gaps but also empower students by providing them with tools that enhance their understanding and mastery of key concepts. This action is being provided on an LEA-wide basis because all students can benefit from having specific software applications such as IXL, Brain Pop, Nearpod, Happy Numbers, Reflex Math & Ed Puzzles	We will also monitor the effectiveness of these software through teacher surveys. (Goal 1 Metric 19)
1.9	Action: Monitor the progress of low Income students, English learners and foster youth in math and English language arts Need:	To address these needs, the District determined they will continue to purchase and implement the STAR Renaissance Package which includes universal screening, progress monitoring tools and a variety of data reports for English language arts and math.	We will monitor this action through the growth of low-income and all students on local STAR ELA and Math assessments (Goal 1 Metric 1-5)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	The District identified a continuing need to have consistent and accurate data to support planning and progress monitoring of student growth for low income students, foster youth and English learners. The District has successfully implemented STAR Renaissance in grades K-8 and determined there is a critical and continual need to have common data across the District for making a variety of decisions. Another area of need for low income students, foster youth and English learners is a lack of access to reading material, both fiction and nonfiction. The data supports this need, as only 42% of 2nd-5th grade students and 26% of 6th-8th grade students are performing at or above benchmark on our local STAR reading Renaissance test. Based on our MOY 2024-25 STAR data only 51% of students in grades 2nd–5th met the benchmark in reading. Middle school reading outcomes were lower, with just 45% of all students meeting the benchmark. Early literacy results for K–1 showed 50% of all students at benchmark, In math MOY STAR data , 56.5% of students in grades K–5 met the benchmark. Middle school math results showed that fewer than half 49.6% of students met the benchmark.	The full STAR Renaissance Package also includes Accelerated Reader and MyOn. These two parts of the program meet our needs by providing thousands of online fiction and non-fiction selections at all reading levels (MyOn). It also includes Accelerated Reader which provides software to monitor students' comprehension. MyOn will provide low income students, foster youth and English learners with digital access to reading materials, and Accelerated Reader will provide students and teachers with comprehension checks on students' reading. The District expectation is that teachers and other staff use the STAR Renaissance data results for collaboration and planning student learning. STAR Renaissance will be administered three times a year to low income students, foster youth and English learners. This data will be used in part to identify students' placement in intervention. This action is being provided on an LEA-wide basis because all students can benefit from common ELA and Math assessments as well as additional digital access to fiction and nonfiction reading materials.	

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Although we observed growth this year on our STAR Assessments, our community partners including our DLST committee shared that there is an ongoing need for consistent assessments through STAR across the district, as well as increased access to digital reading materials for students. Scope: LEA-wide		
1.10	Action: Students in grades K-8 will benefit from participation in the AVID program Need: District and community partners such as teachers and parents have identified the need for low income students to learn more about college readiness skills such as organization, study skills, communication, and self-advocacy starting in the primary grades. Community partners such as parents and teachers have indicated that AVID has been a successful program and supports the goal of preparing students in Lennox to be college ready. AVID continues to be the most requested elective course at the middle school. The data supports this need, as only 42% of 2nd-5th grade students and 26% of 6th-8th grade students are performing at or above benchmark on our local STAR reading Renaissance test. Furthermore, according to our ELA CAASPP results, 57% of our low-	This action addresses our need because students from predominately low income communities frequently have parents and guardians who have not attended college. AVID is an evidence-based program that is intended to provide these students with skills and strategies that will help them to successfully reach the level of rigor in learning that is necessary to attend college. AVID also supports students' understanding of the possibilities of attending college and what that entails. The District will continue to implement AVID in grades K-8 to support a college going culture. Elementary students will experience AVID through their classroom teachers' implementation of Writing, Inquiry, Collaboration, Organization and Reading (WICOR) strategies. Middle school students will also receive WICOR strategies in their content classes and will also have the additional support through an AVID elective which will provide more complex strategies to support higher level thinking. This action is being provided on an LEA-wide basis because all students can benefit from	We will monitor the effectiveness of this action through the growth of low income students, English learners, and all students on our annual ELA and Math CAASPP results. (Goal 1 Metric 6-9) We will also monitor this action through the growth of low-income, English learners and all students on local STAR ELA and Math assessments (Goal 1 Metric 1-5)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	income elementary students and 83% of our elementary English learners are not meeting standards. Based on our achievement data there is a continued need for our AVID program. CAASPP 2024 results show that 42% of low-income students and 10% of English learners in grades 3–5 are meeting standards in English Language Arts (ELA). At the middle school level, 40% of low-income students and 7% of English learners are meeting ELA standards. In mathematics, 35% of low-income students and 11.47% of English learners in grades 3–5 are meeting standards. In grades 6–8, only 24% of low-income students and 4% of English learners are meeting math standards. Based on our MOY 2024-25 STAR data only 50% of low income students in grades 2–5 met the benchmark in reading. Middle school reading outcomes were lower, with just 43% of low income students meeting the benchmark. Early literacy results for K–1 showed 49% of low income at benchmark, In math MOY STAR data , 56% of low income students in grades K–5 met the benchmark. Middle school math results showed that fewer than half 48% of low income students met the benchmark.	college readiness skills including study skills, self-advocacy and WICOR strategies.	

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Scope: LEA-wide		
1.11	Action: Increase teacher and staff capacity for providing professional development in areas of MTSS, writing, social emotional learning, science of reading and ELD strategies for LTELs. Need: Through outreach with our teacher union representatives and teachers on the DSLT committee, the District has identified a continued need to focus on effective, targeted, and differentiated instruction to address the diverse learning needs of our students. Our data further underscores this necessity; according to our 3rd-5th CAASPP results, 57% of our low-income students and 88% of our English learners are not meeting standards in ELA. In 6th-8th grade, 63% of low income student and 95% of English learners are not meeting standards in ELA. There remains a continued need to enhance teacher capacity district-wide in MTSS, writing, literacy, and mathematics strategies. According to our 2025 LCAP survey, 91% of teachers agree that they can access coaching and/or support from a district TOSA if needed. However, the 2024 CAASPP results highlight that only 42% of low-income students and 10% of English learners in grades 3-5 are meeting English Language Arts (ELA)	In order to address this need, teachers will continue to participate in professional learning provided by teacher leaders and district TOSAs at the beginning of the school year and throughout the school year. Teachers will also have the opportunity to collaborate on how to support the needs of our low income students and English learners. Teachers will continue to collaborate throughout the school year around instructional practices, scaffolds, differentiation, assessments and data analysis for these targeted populations. Classified staff that work directly with students as paraprofessionals or instructional aides will receive professional development opportunities. Staff members will receive professional development connected to the professional development that is being offered to teachers. Professional development will focus on understanding the unique needs of low income pupils and English learners and their role in supporting these needs. This action is being provided on an LEA-wide basis because all students can benefit from increased staff capacity and instructional strategies tailored to address specific learning needs.	The effectiveness of this action will be measured through teacher surveys (Goal 1 Metric 19) We will also monitor the the effectiveness of professional development through our implementation of state standards local indicator. (Goal 1 Metric 15) Additionally, we will monitor the growth of low income, English learner, and all students on our annual ELA CAASPP results. (Goal 1 Metric 6, 7, 8, 9)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	standards. At the middle school level, these figures are 40% for low-income students and 7% for English learners. Scope: LEA-wide		
1.12	Action: Ensure all low income students have access to technology Need: The District has identified as a continuing need for low income students to have access to technology both at school and at home. Most low income students do not have access to technology, especially at home. Many of the District's adopted curriculum have on-line components included in the programs; having technology available for students both at school and home will allow for students to have continuous access to these materials and applications. Additionally, many of our low income students are transient and computers are not well maintained or returned. Various parent groups have emphasized the critical need for the District to provide technology to low-income students. These parents understand that access to technology is not just a convenience but a necessity for their children's education and future opportunities. By addressing this need, the District can support student learning, reduce educational disparities, and respond to the	To address this need of ensuring that low income students have continual access to technology both at home and school, the District will continue to purchase replacement computers and other technology and equipment to ensure that low income students have uninterrupted access. This action is being provided on an LEA-wide basis because all students can benefit from having access to technology both at school and at home.	We will monitor this action through student and teacher surveys. (Goal 1 Metrics 17 & 19) We will also monitor this action through the growth of low-income and all students on local STAR ELA and Math assessments (Goal 1 Metric 1-5)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	expressed concerns of parents advocating for their children's success. The data supports this need, as only 42% of 2nd-5th grade students and 26% of 6th-8th grade students are performing at or above benchmark on our local STAR reading Renaissance test. Furthermore, according to our ELA CAASPP results, 57% of our low-income elementary students and 83% of our elementary English learners are not meeting standards. There continues to be a need to ensure that low-income students have consistent access to technology. According to our 2025 LCAP surveys, 98% of students agree that their school provides them with a technology device, and 88% of teachers agree that students have adequate technology to effectively implement the curriculum. However, based on our 2024-25 mid-year (MOY) STAR data, only 51% of students in grades 2–5 met the reading benchmark, with middle school outcomes even lower at 45%. Early literacy results for kindergarten and first grade showed 50% of students meeting the benchmark. In math, MOY STAR data showed 56.54% of students in grades K–5 met the benchmark, while middle school math outcomes were lower, with only 49.68% of students meeting the benchmark.		

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Scope: LEA-wide		
1.14	Action: Provide low income students and English learners with an evidence-based supplemental reading program Need: The District has identified a continuing need for low income students and English learners to increase their reading performance on STAR Renaissance and CAASPP. Many low income students and English learners, although improving in reading achievement, continue to perform below grade level. Parent groups such as DELAC have stated that low income students and English learners in Lennox have limited support for literacy at home. Many of these unduplicated students have parents who are not fluent in English, therefore literacy in English is delayed until students attend school. They have also stated a concern that there is limited access to reading materials to read outside of school. English learners who have increased in their language proficiency continue to not be able to read at grade level preventing them, in some cases, from being able to be reclassified as English proficient. There continues to be a need for the Lexia supplemental reading program to support the literacy needs of our students through explicit and adaptive learning. CAASPP 2024 results	To address this need the District will continue to implement LEXIA, a supplemental reading program, that has been successfully implemented for the past several years. This program helps address this need by providing individual explicit, systematic and adaptive learning. The program provides direct instruction, scaffolds and guided practice. This action is being provided on an LEA-wide basis because all students can benefit from LEXIA an explicit, systematic and adaptive learning program.	We will monitor the effectiveness of this action through the growth of low income, English learners, and all students on our annual ELA CAASPP results. (Goal 1 Metric 6 &7) We will also monitor this action through the growth of low-income, English learners and all students on local STAR ELA assessments (Goal 1 Metric 1-3)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	indicate that only 42% of low-income students and 10% of English learners in grades 3–5 are meeting standards in English Language Arts (ELA). At the middle school level, 40% of low-income students and 7% of English learners are meeting ELA standards. Similarly, 2024–25 mid-year (MOY) STAR data shows that only 51% of students in grades 2–5 met the reading benchmark, with middle school outcomes even lower at 45%. Early literacy results for kindergarten and first grade show 50% of students meeting the benchmark. Scope: LEA-wide		
1.17	Action: Low income students and English learners will be able to participate a dual immersion program Need: Our community partners such as parents and teachers have expressed very strong support for our Dual language program. There is a need to continue to provide supplemental materials for Spanish Language Arts in the Dual Immersion program. Core materials do not provide adequate opportunities for students to practice newly learned skills and concepts in Spanish language arts. Additionally, some low income	To address this need, the District will continue to implement a dual language immersion program to accelerate English language fluency while supporting students in maintaining their first language. Students participating in the Dual Immersion program will have access to supplemental materials in Spanish to provide extended opportunities for students to practice Spanish reading and writing. These materials will present information using different strategies than the core program. Additionally, Dual language teachers will have access to professional development on transference. The District along with the Dual language Cadre will explore shifting to a 90/10 model for the 2025-26 school year.	We will monitor the effectiveness of this action through the growth of low income, English learners and all students on our annual ELA CAASPP results. (Goal 1 Metric 6 &7) We will also monitor this action through the growth of low-income, English learners, and all students on local STAR ELA assessments (Goal 1 Metric 1-3)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	students and English learners need materials that present information in different ways from the core materials to develop a better understanding of the skills needed to be fluent readers and writers in Spanish. Additionally, our Dual Language Cadre which is made up of teachers and administrators have expressed a need for additional professional development in the area of transference. They have also shared a strong interest in exploring moving from a 50/50 program to a 90/10 program model. Through our 2025 LCAP input sessions There is a clear need for a Dual Language program to support bilingualism, biliteracy, and cultural competence among our students. This program would provide English learners and native English speakers with the opportunity to develop academic proficiency in both English and a second language, while promoting high levels of academic achievement. Parents, particularly those in the District English Learner Advisory Committee (DELAC), have expressed strong support for the implementation of a Dual Language program. They view it as a critical step toward ensuring equitable access to high-quality instruction that values and builds upon students' home languages and cultures. There continues to be a need for the Dual Language program to support the literacy needs of our students through explicit and	This action is being provided on an LEA-wide basis because all students can benefit from participating in a dual language program that promote bi-literacy.	

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	adaptive learning. CAASPP 2024 results indicate that only 42% of low-income students and 10% of English learners in grades 3–5 are meeting standards in English Language Arts (ELA). At the middle school level, 40% of low-income students and 7% of English learners are meeting ELA standards. Similarly, 2024–25 mid-year (MOY) STAR data shows that only 51% of students in grades 2–5 met the reading benchmark, with middle school outcomes even lower at 45%. Early literacy results for kindergarten and first grade show 50% of students meeting the benchmark. Scope: LEA-wide		
1.18	Action: Teachers on special assignment will provide support for the implementation of small group instruction, differentiated instruction at the middle school, English language development, educational technology and intervention. Need: Due to low income students, English learners, and foster youth in Lennox performing below grade level in math and English language arts based on Star Renaissance assessments, the district has identified a need to provide regular and intensive professional development with follow up coaching on addressing the barriers in learning for these students. Based on input	To address this need, the TOSAs will provide professional development and coaching services to teachers. All TOSAs will also support the staff's increased understanding of data and how to use data to create differentiated learning experiences. To continue to meet the needs of the teachers and low-income, English learners, and foster youth, the District will continue to provide TOSAs for math, English language learners, educational technology, Response to Intervention and assessment and data to provide targeted professional development and coaching to teachers working with unduplicated students. This action is being provided on an LEA-wide basis because all teachers can benefit from high	We will monitor the effectiveness of this action through teacher responses on the LCAP survey regarding the availability of of PD and coaching support from TOSAs. (Goal 1 Metric 20) We will also monitor this action through the growth of low-income, English Learners, Foster Youth and all students on local STAR ELA and Math assessments

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	from community partners, classroom walkthroughs, observations at professional learning community meetings and a review of Star Renaissance data, some teachers in Lennox continue to need support to implement many of the strategies and ideas presented during professional development. Feedback from our teachers state that in order for students to improve, teachers need to be confident in implementing new ideas and strategies to support and differentiate instruction for low income students, foster youth and English learners. Additionally, the District has new teachers annually who require additional professional development and coaching. There is an ongoing need to maintain and expand the support provided by district TOSAs to improve instructional practices and student outcomes, particularly in literacy. According to our 2025 LCAP survey, 91% of teachers agree that they can access coaching and support from a district TOSA when needed, demonstrating that this resource is valued and utilized by staff. Despite this support, student achievement data highlights persistent challenges. The 2024–25 mid-year (MOY) STAR data shows that only 51% of students in grades 2–5 met the reading benchmark, with middle school outcomes even lower at 45%. Early literacy results for kindergarten and first grade show that just 50% of students are meeting the benchmark.	quality professional development and coaching sessions in order to improve their instruction and ensure the needs of all students are met.	(Goal 1 Metric 1-5)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	In math, MOY STAR data showed 56.54% of students in grades K–5 met the benchmark, while middle school math outcomes were lower, with only 49.68% of students meeting the benchmark. These outcomes point to the critical role TOSAs play in providing targeted coaching, professional development, and instructional support to help teachers implement effective literacy strategies and close achievement gaps. Scope: LEA-wide		
1.19	Action: Library techs will provide students increased access to libraries Need: Through outreach with parents of low-income, English learners, and foster youth students, the District learned that low income students, foster youth and English learners have limited or no access to either to a public or school library. These students may not have a location other than the classroom to conduct research and collaborate with other students. Our teachers have also indicated that low income students, foster youth and English learners have limited access to books at home. The school libraries also offer additional support for students to meet their literacy	To address these needs, the school libraries will be open throughout the day so that students may have frequent access to conduct research, extend and support their literacy goals and collaborate with other students. School libraries will be open before school, during recess and lunch. In order for this to occur a library technician will be provided for each school's library. Additionally, this action provides our students with increased access to books for independent and leisure reading and offers additional support for students to meet their literacy goals. This action is being provided on an LEA-wide basis because all student can benefit from extended access to libraries, additional reading books and a space and tools for research.	We will also monitor this action through the growth of low-income students, English learners, and all students on local STAR ELA and Math assessments Goal 1 Metric 1-4)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	goals. Additionally, the data supports this need as only 42% of 2nd-5th grade students and 26% of 6th-8th grade are performing at or above benchmark on our local reading STAR Renaissance test . 2025 LCAP input session indicate that there is a clear need for dedicated library technicians across the district to support student literacy, access to resources, and information literacy skills. Library technicians play a vital role in maintaining organized, accessible, and engaging library spaces that foster a love of reading and support academic achievement. Currently, literacy data shows significant room for growth: 2024–25 mid-year (MOY) STAR results indicate that only 51% of students in grades 2–5 met the reading benchmark, with middle school outcomes even lower at 45%. Early literacy results for kindergarten and first grade show 50% of students meeting the benchmark. By staffing libraries with trained technicians, students will have increased access to curated reading materials, targeted literacy support, and guidance in selecting books that match their reading levels and interests. In addition, library technicians can collaborate with teachers to reinforce literacy instruction, support research projects, and integrate technology resources. Their presence helps create equitable access to high-quality learning materials and foster lifelong learning habits among all students.		

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Scope: LEA-wide		
1.20	Action: Support for school sites to implement LCAP goals Need: Each school has unique needs related to serving low income students and English learners. Our local STAR assessment data supports this needs: In reading 44% of 2nd-5th grade EL student are performing at or above grade level 2% of 6th-8th grade EL students are performing at or above grade level 42% of 2nd-5th grade low income students are performing at or above grade level 26% of 6th-8th grade low income students are performing at or above grade level In Math 50% of K-5th grade EL student are performing at or above grade level 15% of 6th-8th grade EL students are performing at or above grade level 62% of K-5th grade low income students are performing at or above grade level 37% of 6th-8th grade low income students are performing at or above grade level Each school during the need assessment portion of the school plan development has	Each school, during the needs assessment portion of the School Plan development has analyzed their data to determine their needs. The following are what schools have determined will address the need identified in their School Plan: Buford - software applications and supplemental materials - to support low income students throughout the day both during core instruction and intervention Felton - Supplemental materials and (1)intervention aide to support low income students and English learners; supplemental materials will be used both during core instruction and intervention and the intervention aide will provide support during personalized learning time Jefferson- (1)intervention aide and after school academic support for low income students - both actions target low income students; the intervention aide will provide support for students during personalized learning time; after school academic support will be provided both in reading and math based on needs determined by grade level data Huerta - before and after school academic support for low income students - after school support will	We will also monitor this action through the growth of low-income, English learners, and all students on local STAR ELA and Math assessments (Goal 1 Metric 1-5)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	analyzed their data to determine needs. In addition, their community partners are requesting that they continue this action so that additional support can be provided after school and additional materials and software be purchased to support students and families at home. There continues to be a need for this action to address the unique needs of each school. Based on our 2024-25 mid-year (MOY) STAR data, only 51% of students in grades 2–5 met the reading benchmark, with middle school outcomes even lower at 45%. Early literacy results for kindergarten and first grade showed 50% of students meeting the benchmark. In math, MOY STAR data showed 56.54% of students in grades K–5 met the benchmark, while middle school math outcomes were lower, with only 49.68% of students meeting the benchmark. Scope: LEA-wide	be provided in math and reading based on needs determine by grade level data Moffett - software applications for student access - before and after school academic support for low income students - after school support will be provided in math and reading based on needs determine by grade level data Lennox Middle School - supplemental materials and software applications for student access - to support low income students and English learners - supplemental materials will be used both in core instruction and in intervention This action is being provided on an LEA-wide basis because all students can benefit from identified additional services such as supplemental materials, software application, and before and after school academic support.	
1.21	Action: Provide supplemental early childhood learning materials Need: Based on a review of the local transitional kindergarten data of our low income and English learner students there is a need to	To address this need, the district will purchase additional play-based materials for TK classrooms. As a result of providing these materials, low income and English learner students will have access to engaging and vocabulary building activities and greater success for a strong foundation for future learning.	To measure the effectiveness of this action, the District will monitor language development through ELPAC scores (Goal 1 Metric 10)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	provide students with a variety of programs and materials that will support play-based learning. Many of our students come from families who do not speak English. Due to poverty, many of our students have limited language skills. TK teachers have expressed that there is a need for our young learners to learn English as well as to develop vocabulary for learning. Low income students, foster youth and English learners who are 4 years old do not have access to materials that allow for children to develop critical thinking and language. There continues to be a need for supplementary early childhood learning materials to support foundational literacy and language development for our youngest learners. on 2025 MOY STAR Early literacy results for kindergarten and first grade show that only 50% of students are meeting the benchmark, highlighting a significant opportunity to strengthen early reading skills. Additionally, only 52% of English learners are making annual progress toward English proficiency, as measured by the ELPAC. These outcomes indicate that many students particularly English learners would benefit from additional, targeted instructional resources designed to build early literacy, oral language, and vocabulary skills Scope:	This action is being provided on an LEA-wide basis because all student can benefit from play-based materials that are engaging and build vocabulary.	Additionally, we will monitor the growth of low income, English learner students on our STAR Early Literacy Assessment (Goal 1 Metric 1.3)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	LEA-wide		
2.1	Action: Provide academic intervention and support Need: After examining STAR reading assessments, conducting classroom observations, and gathering feedback from teachers, it's evident that students require extra and focused assistance in reading. Teachers have noted varying levels of achievement among students, with many displaying skill gaps that stem from the disruptions caused by the 2020-2021 pandemic-related school closures. Concerns from parents echo these sentiments, with requests for further aid to bridge learning disparities. Particularly, low-income students continue to struggle with fundamental reading skills and comprehension due to pandemic-related disruptions. While the District has allocated one reading intervention teacher per school using federal funds, there's a pressing need for an additional teacher at each school to effectively address these challenges. This additional support will ensure that students receive the personalized attention required to close reading gaps and excel academically, aligning with the District's educational objectives. There is a clear and ongoing need to continue providing intervention teachers and support to address the academic needs of students performing below grade level. During the 2025 LCAP input sessions, teachers	Students will receive small group instruction 4 - 5 days per week using evidence-based strategies and instructional programs. As a result of providing a second reading intervention teacher at each elementary school, an increased number of low income students will be able to receive intensive intervention. This action is being provided on an LEA-wide basis because all student can benefit from interventions provided by an additional intervention teacher.	We will also monitor this action through the growth of low-income, English learners and all students on local STAR ELA assessments (Goal 2 Metric 2, 3, 7,)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	overwhelmingly identified intervention support as a top priority action to help close achievement gaps and ensure all students receive the targeted instruction they need to succeed. Student performance data reinforces this need. The 2024–25 mid-year (MOY) STAR results show that only 51% of students in grades 2–5 met the reading benchmark, with middle school outcomes even lower at 45%. Early literacy results for kindergarten and first grade show that just 50% of students are meeting the benchmark. Additionally, only 52% of English learners are making annual progress toward English proficiency, as measured by the ELPAC. Intervention teachers play a critical role in providing small-group and individualized instruction to address these gaps, support struggling learners, and build foundational skills in literacy Scope: LEA-wide		
2.2	Action: Provide administrative and classified support to ensure students receive intervention and other support services Need: Based on a review of local data indicators and the anecdotal records of counselors and	To ensure a cohesive multi-tiered support system at each school, particularly for low-income students, English learners, and foster youth, each school will have an assistant principal and a categorical program assistant dedicated to data gathering and monitoring the reclassification process. The assistant principals will meet weekly with each grade or department level to review data	We will monitor the effectiveness of this action through the growth of low income students, English learners, and all students on our annual ELA and Math CAASPP results. (Goal 2 Metric 1,2,4,5,6)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	administrators, there is a need to provide a Multitiered System of Support for low income students, foster youth and English learners that support their academic, behavior and social/emotional needs. Low income students continue to demonstrate achievement gaps in English language arts and math. According to our 3rd-5th ELA CAASPP results, 57% of our low income students and 88% of our English learners are not meeting standards. In 6th-8th grade, 63% of low income student and 95% of English learners are not meeting standards in ELA. Our 3rd-5th grade Math CAASPP results show that 64% of low income and 64% of English learners are meeting standards. In 6th-8th grade, 79% of low income student and 98% of English learners are not meeting standards in math. In some cases, these gaps stem from behavioral and/or social and emotional needs of students. There is a need to continue this action to ensure a cohesive multi-tiered system of support (MTSS) at each school, with a dedicated focus on improving outcomes for low-income students, English learners, and foster youth. The latest data highlights significant achievement gaps that require targeted intervention and consistent monitoring. CAASPP 2024 results show that in grades 3–5, only 42% of low-income students and 10% of English learners are meeting standards in English Language Arts, while just 35% of low-income students and 11.47% of English	analysis, identify specific student needs, and implement plans for adapting instruction and placing students in the appropriate support levels. This approach aims to maximize students' success in academics, behavior, and social/emotional learning. At Lennox Middle School, due to its large size, one assistant principal will be excluded from these duties and instead focus on participating in IEP meetings and addressing school discipline issues. As a result of the implementation of this LEA-wide action, unduplicated students will receive appropriate services, and data and programs will be regularly monitored. This action is being provided on an LEA-wide basis because all student can benefit from appropriate levels of support.	In addition, the District will monitor the suspension and chronic absentee rate of all students on the CA Dashboard. (Goal 2 Metric 10 & 11)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	learners are meeting standards in mathematics. At the middle school level, outcomes are even more concerning: only 40% of low-income students and 7% of English learners are meeting standards in English Language Arts, and just 24% of low-income students and 4% of English learners are meeting standards in math. To address these persistent gaps, it is essential to maintain assistant principals and categorical program assistants at every school site, tasked with gathering and monitoring data, tracking reclassification progress, and supporting targeted interventions. Through weekly data-driven meetings with grade-level or department teams, assistant principals will help identify student needs, guide instructional adjustments, and ensure students are placed in the appropriate supports. Our Chronic Absenteeism was 21% for English learners and 28% for low income students. Our Suspension Rate for our English learners 1.4% and 1.8% for low income students. These indicators show that this action is working to decrease these percentages as planned and need to continue in the coming year. Scope: LEA-wide		

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
2.3	Action: Provide counseling services for students at all schools Need: After reviewing feedback from our community partners which consists primarily of teachers, parents and administrators, there is a need to provide counseling services to low income, English learners, and foster youth student. Many of these students have experienced some level of trauma. For some students, this includes living in homes with multiple families, homelessness, abusive situations and in some cases, a lack of basic needs being met. Our community partners have shared that these challenges have resulted in some students struggling with executive functioning skills (such as organization, managing emotions, impulse control, etc.) and social skills. There is a clear and ongoing need to continue funding counselors at each school site to support students' social-emotional learning (SEL), attendance, and overall well-being. The 2024 CA Dashboard data shows improvement in key indicators, but significant challenges remain that require sustained, targeted support. Chronic absenteeism decreased to 22% for all students, with notable reductions among English learners from 26.7% to 20.6%, low-income students from 27.5% to 21.8%, and foster youth from 24% to 8.7%.	To address this need, each school will continue to be staffed with counselors to provide social/emotional support to students and their families. Counselors at each school will provide small group and individual counseling as well as parent outreach. Counselors will be the primary resource to support the schools' MTSS in the area of social/emotional support. This action is being provided on an LEA-wide basis because all students can benefit from social emotional supports including small group and individual counseling.	To measure the effectiveness of this action, the District will monitor the suspension and chronic absentee rate of Low income, English learners, foster youth and all students on the CA Dashboard. (Goal 2 Metric 10 & 11)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Suspension rates also declined to 1.8% for all students, including reductions for English learners from 2.2% to 1.4% and low-income students from 2.7% to 1.8%. Despite these positive trends, chronic absenteeism and suspension rates remain disproportionately high among certain groups, including students with disabilities and African American students. Scope: LEA-wide		
2.4	Action: Low income students identified as Gifted and Talented or high achieving will be provided with extended learning opportunities Need: Ensuring high achieving and/or gifted students in districts that primarily serve low income students can be a challenge due to the time and attention given to closing the achievement gap. Furthermore, low income students in Lennox may have limited access to enrichment activities outside of school. Through outreach with low income parents, the district learned of the strong desire from parents to ensure that students that were identified as gifted or exceeding standards were challenged through a GATE and high achievers program.	To address this continuing need, the District will provide GATE/high achieving students with extended and expanded learning opportunities (i.e. project based learning opportunities, virtual or live field trips). This service will be provided after school and during intercessions. This action is being provided on an LEA-wide basis because all students can benefit from extended and expanded learning opportunities.	We will continue to monitor the growth of low-income and all students on annual ELA & Math CAASPP results. (Goal 2 Metric 1, 4, 5, 6)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Through our LCAP 2025 parent input sessions, parents shared there is a need to continue providing targeted extended learning opportunities for low-income students identified as Gifted and Talented or high-achieving to ensure equitable access to enrichment and advanced academic experiences. While these students have demonstrated high potential, they often face barriers to participating in supplemental programs that nurture their talents and challenge them academically. Without intentional support, low-income gifted and high-achieving students risk underachieving or not reaching their full potential due to limited access to rigorous learning opportunities outside the core curriculum. CAASPP 2024 results indicate that only 42% of low-income students in grades 3–5 are meeting standards in English Language Arts (ELA). At the middle school level, 40% of low-income students are meeting standards. Scope: LEA-wide		
2.5	Action: Provide Low income students and foster youth with a social and emotional curriculum Need: Through outreach with low income parents, the District learned that a large number of low-income students are experiencing some level of trauma. The District determined a	The District will continue to expand and grow the Leader in Me Program at all schools in the District. As a result of the implementation of the program our school cultures will change in a positive direction. Having a curriculum and supplemental SEL materials will help to ensure that unduplicated students will receive access to a systematic way of acquiring social skills. Providing a curriculum and an established time for social and emotional	The effectiveness of this action will be measured through a decrease in our chronic attendance rate and a decrease in the suspension rate for foster youth and all students. (Goal 2 Metric 10 & 11)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	need to have a social skills curriculum and supplementary SEL materials that can be used by all teachers. Additionally, community partners such as teachers and administrators expressed that students in Lennox need to have leadership opportunities that help them to become effective problem solvers and communicators. There is a continued need to implement and sustain the Leader in Me social-emotional learning (SEL) curriculum to promote student well-being, leadership, and positive school culture. 2024 CA Dashboard data shows encouraging progress. Chronic absenteeism decreased to 22% for all students, with notable reductions among English learners from 26.7% to 20.6%, low-income students from 27.5% to 21.8%, and foster youth from 24% to 8.7%. Suspension rates also declined to 1.8% for all students, including reductions for English learners from 2.2% to 1.4% and low-income students from 2.7% to 1.8%. Sustaining the Leader in Me curriculum is critical to building on this progress by fostering leadership skills, resilience, and social-emotional competence in all students. Scope: LEA-wide	learning will reduce the referrals of unduplicated students needing increased social/emotional support from counselors or other staff. Additionally, students who develop leadership and social emotional skills are more likely to experience success in school and be able to self-advocate and are more self-directed. This action is being provided on an LEA-wide basis because all students can benefit from leadership and opportunities to increase social skills.	
2.6	Action:	The district will provide professional development and planning time for teachers engaged in co-	We will monitor the growth of low income and all

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Provide planning time and professional development to improve inclusive learning environments for low income students through improved implementation of a co-teaching model. Need: The District is implementing Multi-tiered System of Support throughout the District. When considering the number of low income students who are performing below grade level standards on local assessments, the District identified that there is a need to explore different options to provide services for students. The District has implemented co-teaching models in the past with both certificated and classified staff to provide additional support to address learning gaps of individual students. Our educational partners have reflected on the co-teaching model and feel that it has allowed for the implementation of more small group instruction and more frequent feedback to students. There is a need to continue providing planning time and professional development for co-teaching which provides an inclusive instructional approach that leverages the expertise of general education and specialist teachers to deliver differentiated, targeted support within the classroom. This collaborative model fosters greater access to grade-level content, individualized interventions, and small-group instruction, all of which are essential to accelerating learning and closing achievement gaps for students.	teaching. This time will enable teachers to collaborate on lesson design, student engagement activities, and progress monitoring. As a result, low-income students will receive high-quality instruction that includes targeted small group interventions on key grade-level standards and more frequent feedback. This action is being provided on an LEA-wide basis because all students can benefit from small group co-teaching instruction and immediate feedback as well as multi-modal approach by two teachers.	students on local STAR ELA and Math assessments. (Goal 2 Metric 2, 3, 7, 8)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Based on our MOY 2024-25 STAR data only 50% of low income students in grades 2–5 met the benchmark in reading. Middle school reading outcomes were lower, with just 43% of low income students meeting the benchmark. Early literacy results for K–1 showed 49% of low income at benchmark, In math MOY STAR data, 56% of low income students in grades K–5 met the benchmark. Middle school math results showed that fewer than half 48% of low income students met the benchmark. Scope: LEA-wide		
2.9	Action: Provide students with after school tutoring Need: Based on a comprehensive review of local and state academic indicators and detailed feedback from parents, the District has identified a significant need for additional after-school support for low-income students, English learners, and foster youth. The aim is to extend learning time and provide targeted support aligned with grade-level standards to help these students succeed. The data clearly supports this need: only 42% of 2nd-5th grade students and 26% of 6th-8th grade students are performing at or above benchmark on our local STAR Renaissance test.	Schools will offer tutoring to unduplicated students based on specific criteria such as test scores, progress towards standards, and teacher recommendations. Tutoring will address the needs of our students by differentiating and reviewing grade level skills in small groups or one-to-one for mastery. Tutoring services will be provided before, after school. or during intersessions and can be provided in-person or virtually to accommodate students' and families' needs. This action is being provided on an LEA-wide basis because all eligible students can benefit from small group or one to one tutoring.	We will also monitor this action through the growth of low-income, English learners, and all students on local STAR ELA and Math assessments (Goal 2 Metric 2, 3, 7, 8)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Teachers have expressed that many students require individualized attention to address specific learning gaps. They have noticed that smaller, more focused group settings after school lead to increased student engagement and participation, which are crucial for academic growth. Additionally, with after-school tutoring, teachers can closely monitor student progress and provide immediate feedback, helping to keep students on track and motivated. Parents have highlighted the need for additional learning time beyond the regular school hours to help their children catch up and stay on pace with grade-level standards. They appreciate that after-school tutoring can provide targeted support that is directly aligned with what their children are learning in class, ensuring consistency and reinforcement of key concepts. Many parents have also observed that their children gain confidence in their academic abilities when they receive extra help, leading to better performance and a more positive attitude toward school. There is a strong need to continue offering after-school tutoring to provide targeted academic support for students performing below grade level. During the 2025 LCAP parent input sessions, families expressed high interest in maintaining this action, emphasizing the importance of additional learning time outside of the regular school day. Similarly, the DELAC voiced strong support for continuing		

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	after-school tutoring, particularly to assist English learners in closing academic gaps. Student performance data reinforces this need. According to the 2024–25 mid-year STAR assessments, only 51% of students in grades 2–5 met the reading benchmark, while middle school outcomes were lower at 45%. In math, 56.54% of students in grades K–5 met the benchmark, but only about half (49.68%) of middle school students achieved proficiency. Continuing after-school tutoring will provide students especially low-income students and English learners with extended opportunities to receive personalized instruction, reinforce foundational skills, and improve achievement in both English Language Arts and math. Scope: LEA-wide		
2.10	Action: Classroom Management and behavior support Need: Based on a review of office discipline referrals and suspension data of low income students, the District has identified a need to provide students with additional support in the area of behavior management. To ensure that students remain in class and while in class remain engaged, the District will provide a behavior team specifically addressing the	To address these needs, the District will implement a behavior team. The team will be led by a Behavior Specialist assisted by two highly qualified assistants. The team will be deployed to schools to work with identified low income students needing greater behavioral support. Also, professional development will be provided to classroom teachers that will increase their skills in positively managing students' behavior. This action is being provided on an LEA-wide basis because all students can benefit from	The effectiveness of this action will be measured through a decrease in our suspension rate for low income and all students. (Goal 2 Metric 11)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	needs of low income students while in the classroom. Teachers have stated that some students may require the development of a behavior plan with staff available to implement the behavior plan successfully. For other students, teachers will need to implement specific classroom management procedures that are in alignment with PBIS but add to the staff's ability to manage students in a positive manner. There is a pressing need to continuing implementing a district-wide behavior support team to address the ongoing behavioral challenges faced by low-income students. The 2024 California School Dashboard indicates that while suspension rates have declined to 1.8% for all students. English Learners decreased from 2.2% to 1.4%. Low Income students declined from 2.7% to 1.8%. All though we saw a decrease in these student groups, they continue to experience disproportionately high suspension rates. Scope: LEA-wide	behavior supports provided by a trained behavior team.	
2.11	Action: Provide Educational Field Trips Need: According to our parents and teachers low income students in Lennox do not have opportunities to have experiences that other students have. Teachers have stated that	As a result of implementing this action, low income students will be able to participate in at least one educational field trip annually and therefore increase their opportunity to develop important background knowledge that will increase their achievement performance and increase their engagement.	We will also monitor this action through increased engagement as evident in our attendance rate for low income and all students. (Action 2 Metric 12)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	these experiences are important in supporting the development of background knowledge and academic vocabulary with students. According to our data only 17% of English learners in grades 3rd-5th and 5% in grades 6th-8th are meeting or exceeding standards on the ELA CAASPP. There is a critical need to continue providing educational field trips to ensure equitable learning opportunities for low-income students in Lennox. Educational field trips help engage students, increase motivation to attend school, and expose them to real-world learning experiences that build the background knowledge and language skills necessary to access academic content. Continuing to fund field trips is essential to support equitable learning, improve academic outcomes, and foster greater school connectedness. Student performance data further highlights this need. According to the 2024 CAASPP results, only 10% of English learners in grades 3–5 and 7% in grades 6–8 are meeting or exceeding standards in English Language Arts. Further reason to continue The 2024 California School Dashboard shows that chronic absenteeism remains high at 22% for all students even though it decreased from 27.5%. Furthermore there was increased attendance from 93% to 93.63% with Low Income students, but an increase in attendance correlates with an increase in student success.	This action is being provided on an LEA-wide basis because all eligible students can benefit from the opportunity to broaden their background knowledge through field trips.	

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Scope: LEA-wide		
3.1	Action: Campus supervisors will engage with students to increase positive student/adult relationships and to ensure students are involved in physical activities Need: Based on a review of office discipline referrals and suspension data of low income students, the District has identified a need for low income students to develop positive adult/student relationships and to be involved in physical activity during recess and lunch. Low income students continue to be challenged in managing their behavior in unstructured settings. Students also have been challenged to maintain healthy positive relationships with adults and students in unstructured settings. On the CA Dashboard, our low income students received an orange performance level on the suspension rate indicator. Parents of low income students have also expressed serious concerns with the increase in school shootings that their children are safe while at school. There is a continued need to maintain campus supervision to support a safe, positive, and well-managed school environment for all students. According to our 2025 LCAP Survey	To address these needs, the District will provide campus supervisors and supervision aides at each school to increase student engagement especially during more unstructured times during the day. Campus supervisors will encourage low income students to be physically active when they are out of class. Campus supervisors and supervision aides frequently have well developed relationships with low income students that will support this increased engagement. When low income students are engaged throughout the school day, there is an increase in attendance, a decrease in discipline and reduction in suspension and chronic absenteeism. This action is being provided on an LEA-wide basis because all students can benefit from the opportunity to increase their engagement during unstructured times during the day.	The effectiveness of this action will be measured through a decrease in our suspension rate for low income and all students. (Goal 3 Metric 1) The effectiveness of this action will also be measured through student and parent surveys (Goal 3 Metric 6 and 10)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	results, 77% of students report feeling safe at school, and 95% of parents agree that their child's school is a safe place. Additionally, the 2024 California School Dashboard shows that the district has achieved a green rating for suspension rates, with suspensions declining to 1.8%. Low income students saw a decrease from 2.7% to 1.8%. These positive outcomes reflect the impact of proactive supervision and adult presence on campus. Scope: LEA-wide		
3.2	Action: Students will receive support and follow up through the Health and Attendance staff Need: Since the pandemic there has been an increase in low income students not attending school regularly, being engaged in learning and an increase in chronic absenteeism. As a result of the pandemic, low income students and their families continue to be concerned with ensuring that the health needs of students are addressed in a timely manner. There is a continuing increase in the number of low income students in Lennox who are affected by intensive health needs such as diabetes, obesity and anxiety. On the CA Dashboard, our foster youth received orange performance level and our low income and English learners	To address this need, the District will continue to provide health and attendance clerks for each school. These clerks will provide follow up with parents and guardians when low income students are not in school and will support certificated staff in tracking low income student attendance progress. They will assist certificated staff with follow up services for chronically absent low income students. Health clerks will provide parents with current health information and the potential impact this information may have on low income students. Our health clerks will assist families in addressing their mental and physical health needs through outreach, referral and application assistance for health, social and community services. This action is being provided on an LEA-wide basis because all students can benefit from services and support that attendance clerks and health clerks provide.	The effectiveness of this action will be measured through a decrease in our chronic absenteeism rate for low income, English learners, and foster youth and all students. (Goal 3 Metric 2)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	received a yellow performance level on the chronic absenteeism indicator. There continues to be a need for students to receive support through health and attendance staff in overcoming barriers to regular school attendance. According to the 2024 California Dashboard, our district has been identified with a yellow performance rating in chronic absenteeism, with a current rate of 22% for all students and 21.8% for low income students. While this represents a positive 5.5% and a 5.7% decrease respectively from the previous year, the ongoing level of chronic absenteeism still remains a significant concern. Scope: LEA-wide		
3.3	Action: The Director of Student Support Services will provide and/or coordinate multiple services for low income students and foster youth Need: The District has identified an increasing number of low income students who are chronically absent. 27.5% of our students are chronically absent. Furthermore, the District has also identified that Foster youth are often transient and there is a need to support the smooth transition to school and classrooms for these students.	To address these needs, the District will continue to provide a Director of Student Support Services who will be partially funded to coordinate and provide district wide supports for foster youth and low income students who are chronically absent. Foster youth have received services both at the district and school levels in a timely manner due to the Director of Student Support Services. This administrator has developed community connections, and these services have been successfully coordinated with foster families and school staff to mitigate the challenges that foster youth experience. The Director of Student Support Services also coordinates services with school staff, including counselors, to address the causes	The effectiveness of this action will be measured by a decrease in our chronic absenteeism for low income, foster youth, and all students. (Goal 3 Metric 2)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	According to the 2024 California Dashboard, our district has been identified with a yellow performance rating in chronic absenteeism, with a current rate of 22% for all students and 21.8% for low income students. While this represents a positive 5.5% and a 5.7% decrease respectively from the previous year, there is a clear need for ongoing support to further reduce absenteeism and improve student outcomes. Scope: LEA-wide	of low income students who are chronically absent. This action is being provided on an LEA-wide basis because all students can benefit from the opportunity to increase their attendance rate and engagement while in school.	
3.4	Action: Provide students with safe passage to and from school Need: Due to the impact of the dense urban environment in which schools are located and a request from parents of low income parents that the district provide additional safe passage to and from school, the District has identified a need to ensure that low income students are able to get to and from school safely. Currently our attendance rate is 93% for all students which is 3% lower than pre-pandemic. Our attendance rate for English Learners is 93%, Special Ed. 92%, Low Income 93% and Foster Youth 91% Scope:	To address this need, the District will contract with Los Angeles County to provide additional crossing guards. This continuing action provides students with safe passage to and from school. Prior to the pandemic, the District identified less than five incidents related to students and safe passage. Additionally, the daily attendance in Lennox prior to the pandemic continued to improve at all schools. Although the safety of low income students is addressed while students are on campus, in a community such as Lennox, the partnership with LA County to provide safe passage to and from school increases student attendance. Crossing guards will be assigned to strategic locations in Lennox to provide safe passage for unduplicated students going to and from school. This action is being provided on an LEA-wide basis because all students can benefit from safe passage to and from school.	The effectiveness of this action will be measured through an increase in our attendance rate for low income and all students. (Goal 3 Metric 4)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	LEA-wide		
3.5	Action: Low income 5th grade students will participate in Outdoor School Need: Through feedback from parents of low income parents, the District learned that low income students are unable to participate in an outdoor education experience due to the cost. Parents strongly expressed a desire for students in Lennox to attend an outdoor education program with hands on learning experiences. Per our 2024 local indicators 5 out of 5 elementary schools in the District offer a STEM Engineering program, highlighting our dedication to providing students with meaningful opportunities in science, technology, engineering, and mathematics. However, feedback from parents of low-income students demonstrated a gap in access to outdoor education experiences due to financial barriers. During 2025 LCAP input sessions parents strongly voiced their desire for 5th grade students to participate in an Outdoor School program that provides experiential, hands-on learning aligned with our STEM focus. Furthermore, our attendance rate is 93% for all students which is 3% lower than pre-pandemic. Our attendance rate for English Learners is 93%, Special Ed. 92%, Low Income 93% and Foster Youth 91%	Lennox SD will provide all low income 5th grade students with the opportunity to attend Outdoor Education at the Pali Institute. Providing Outdoor Education for all 5th grade students at no cost to families will offer students with experiences that will allow them to apply their knowledge of the California Standards to "real life" situations. This continuing action has been successfully implemented in prior years. Virtually all 5th grade students participate in Outdoor School. Fifth grade teachers have connected 5th grade science and stem standards to the Outdoor School experience before students attend, while students are at Outdoor School and when students return from Outdoor School. Teachers report that these hands on learning experiences demonstrated a high level of comprehension of the related standards. This action is being provided on an LEA-wide basis because all students can benefit from participating in outdoor education and having the opportunity to apply their knowledge to the CA standards to real life.	The effectiveness of this action will be measured through Local indicator for Access to a Broad Course of Study (Goal 3 Metric 9) The effectiveness of this action will also be measured through an increase in our attendance rate for low income, and all students. (Goal 3 Metric 4)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Scope: LEA-wide		
3.6	Action: Provide frequent opportunities to celebrate and recognize students' achievements and growth Need: Based on feedback from teachers and parents, low-income students and families respond positively to celebrations and recognitions of learning achievements because these acknowledgments boost self-esteem, motivation, and a sense of belonging. These celebrations Highlight students' hard work and progress, fostering a positive school experience and encouraging continued academic effort. Additionally, recognizing achievements can strengthen family engagement and pride in their children's education. Parents expressed a strong desire for recognitions or celebrations such student of the month, perfect attendance and reclassification ceremonies to continue throughout this district. This need is highlighted by our high chronic absenteeism rate. 27.5% of low income and all students are chronically absent. Currently our attendance rate is 93% for all students which is 3% lower than pre-pandemic. Our attendance rate for English	This action will provide the necessary support to celebrate and recognize unduplicated students for a variety of accomplishments including reclassification celebrations, improved behavior and attendance as well as academic achievement. Low income students will benefit from an improved service of providing frequent opportunities for recognition and celebration in a variety of areas. This action is being provided on an LEA-wide basis because all students can benefit from participating in celebrations and recognitions highlighting their achievements.	The effectiveness of this action will be measured through increased connectedness as measured through student surveys. (Goal 3 Metric 7) The effectiveness of this action will be measured by a decrease in our chronic absenteeism for low income, and all students. (Goal 3 Metric 2)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Learners is 93%, Special Ed. 92%, Low Income 93% and Foster Youth 91% There is a need to continue creating a positive school climate that motivates and supports student success is essential to academic achievement and improved attendance. According to the District's LCAP survey, 91% of students agree that staff has high expectations of them, and 79% agree that students are encouraged by staff members. Additionally, the District has seen a 5.5% decrease in its chronic absenteeism rate, now at 22%, indicating that efforts to improve student engagement are making an impact. To build on this momentum, it is important to provide frequent opportunities to celebrate and recognize students' achievements and growth. Scope: LEA-wide		
3.11	Action: Implement Play Works at all schools Need: Based on feedback from our teachers and parents, low income and English learners students continue to demonstrate a need for behavior and social skills support both inside and outside of the classroom. Our community partners felt strongly that our students demonstrate a need in understanding how to play with other students, resolve conflicts and	To accomplish this action, the District will continue to contract with Play Works to provide the services for all schools. Play Works will train and coach district staff to establish the structured play activities. Low income, English learners, and foster youth will be provided with structured activities where students are able to learn the skills and rules associated with each game/sport/activity. Unduplicated Students will also be taught how to resolve conflicts and engage in problem-solving processes.	The effectiveness of this action will also be measured by a decrease in our suspension rate for low income and all students. (Goal 3 Metric 1)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	participate in positive decision-making and problem-solving. On the CA Dashboard, our low income and English learners received an orange performance level on the suspension rate indicator. There continues to be a need for a safe, structured, and inclusive recess environment that is essential to supporting the social-emotional development and overall well-being of all students, particularly our low-income, English learner, and foster youth populations. Input from teachers during 2024 LCAP input sessions highlighted the positive impact of the Playworks program on student behavior, peer interactions, and the overall school climate. Teachers reported fewer playground conflicts and improved student engagement as a result of the program's structured play activities and emphasis on conflict resolution. These observations are supported by a measurable decrease in the District's suspension rate. Suspension rates declined to 1.8% for all students, including reductions for English learners from 2.2% to 1.4% and low-income students from 2.7% to 1.8%. Despite these positive trends, chronic absenteeism and suspension rates remain disproportionately high among certain groups, including students with disabilities and African American students. Scope:	This action is being provided on an LEA-wide basis because all students can benefit from structured play activities and learning conflict resolution and problem-solving skills.	

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	LEA-wide		
3.13	Action: Reduce the health risks related to vaping Need: Foster care families and families of low income students at the middle school have expressed their concern for the amount of vaping students are engaged in and the consequences for vaping. Community partners recognized that students do not consistently receive the important information about the hazards of vaping and the short-term and long-term health issues associated with vaping. Vaping causes students to reduce their attendance in school, increase their office discipline referrals and suspensions and ultimately miss instructional time that impacts their achievement. This need is highlighted by our high chronic absenteeism and suspension rate. Chronic absentee rate for all student decreased from 27.5% to 22%. Low income students went from 28.5% to 21.8%, and Foster youth decreased form 24% to 8.7%.Furthermore, Lennox Middle School received a red performance level on the chronic absenteeism indicator and an orange performance level on the suspension indicator. 31% of low income and all middle school students were chronically absent and 7.6% of low income and all students were suspended at least one day.	To address these needs the District will provide an aggressive awareness program about vaping for students at Lennox Middle School, establish counseling groups with a focus on the challenges of vaping and provide a system to detect and monitor vaping. This action is being provided on an LEA-wide basis because all middle school students can benefit from an awareness program about the dangers associated with vaping.	The effectiveness of this action will be measured by a decrease in our chronic absenteeism for low income, and all students. (Goal 3 Metric 2) The effectiveness of this action will also be measured by a decrease in our suspension rate for low income and all students. (Goal 3 Metric 1)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	During the 2024-25 school year vaping continued to be a concern, impacting student behavior, attendance, and overall school climate. Although the District has seen recent improvements, including a decrease in both suspension rates from 2.7% to 1.8% for all students. English learners dropped from 2.2% to 1.4%, and foster students remained at 0%. The District recognizes the need to continue to implement targeted interventions to address the attendance and suspension issues. Scope: Schoolwide		
3.14	Action: Support for SEL and Academic Intervention Need: The Lennox School District is located in an area of high density and crime. Student safety is a high priority for all educational partners. Community partners such as parents expressed concerns that in the past several years there has been an increase in the amount of criminal activity that has caused our schools to have increased lock downs on a regular basis. Due to the conditions of poverty in this community there is frequent police/sheriff activity. This need is also highlighted by our high suspension rate of 2.7% of low income and all students being suspended at least one day.	To address the safety concern for low income students at all of our schools when they are participating in supplemental SEL and academic support groups, the District has determined that a system for providing immediate information on each students' whereabouts is critical. All schools will implement a system of being able to track students when they are not in the classroom and the frequency each student is out of the classroom. The system will report students' locations to the assistant principals who will monitor students' activity. When student(s) need to be seen by the behavior team or counselors, the assistant principal will ensure that students will be directed to the appropriate staff member for intervention. The impact of this action is to ensure that students are receiving the appropriate level of intervention or support they may need if they are both in and out of class. This will result in the decrease of incidents creating safety concerns	The effectiveness of this program will be measured through student and parent surveys (Goal 3 Metric 6) The effectiveness of this action will be measured by a decrease in the suspension rate of low income, and all students. (Goal 3 Metric 1)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	There continue to be a need to support SEL and Academic interventions. Supporting students' social-emotional learning (SEL) and academic needs is critical to fostering a safe, inclusive, and high-achieving school environment. Results from the 2025 LCAP survey show that 77% of students feel safe at school, and an overwhelming 95% of parents agree that their child's school is a safe place. Additionally, the District has achieved a reduction in the suspension rate, indicating progress in addressing student behavior through positive, proactive measures rather than punitive actions. This progress is due in part to the implementation of SEL supports and targeted academic interventions that address the root causes of student struggles, both behavioral and academic. Suspension rates declined to 1.8% for all students, including reductions for English learners from 2.2% to 1.4% and low-income students from 2.7% to 1.8%. This decline indicates that our programs are effective, but further support for SEL and academic interventions is still warranted. Scope: LEA-wide	outside of classrooms and an increase in classroom time. This action is being provided on an LEA-wide basis because all students can benefit from access to SEL and academic supports beyond the classroom.	
4.1	Action: Provide opportunities for Parent/Staff collaboration and for parents to assume leadership and decision-making roles in the District	Low income parents will continue to be active members of the District School Leadership Team. This committee provides parent input into the decision-making process and allows parents and staff to develop a shared vision for students'	The effectiveness of this action will be measured through parent surveys (Goal 4 Metric 1 & 2)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Need: Low income parents have voiced a continued desire to provide input into district and school policies and decisions. Research also shows that parent involvement is instrumental in student success. Our chronic absenteeism data underscores this need, with the CA Dashboard indicating that 27.5% of low-income and all students are chronically absent. There continues to be a need for parent/staff collaboration and for parents to assume leadership and decision-making roles. According to the 2025 LCAP survey, 95% of parents report being satisfied with the opportunities they have for involvement and decision-making in the District, and 85% state that they are actively involved at their child's school. These results highlight a solid foundation of parent engagement that must be sustained and expanded. Engaged parents are more likely to support their child's education, contribute to school improvement efforts, and advocate for the needs of their school community. Additionally, with a current chronic absenteeism rate of 22%, despite a 5.5% decrease from the previous year, it is critical to leverage strong parent-school partnerships to further reduce absenteeism. Scope:	success through the development of plans such as the LCAP and increases the likelihood of successful implementation of plans for improvement. As a result of implementing this action, low income parents' voices will continue to be heard, valued and influence decisions impacting unduplicated students, and therefore helping to ensure that the decisions that are made will reflect the needs and desires of the community. This action is being provided on an LEA-wide basis because all students can benefit from having parents participate in school leadership roles in the District.	The effectiveness of this action will also be measured by a decrease in the chronic absenteeism rate for low income and all student. (Goal 4 Metric 5)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	LEA-wide		
4.2	Action: Provide parent workshops and classes Need: Based on a survey of parents and feedback from low income, EL, and foster youth parents, providing workshops and classes are a high priority for parents and has been viewed as providing an important support for parents and students. Our chronic absenteeism data underscores this need, with the CA Dashboard indicating that 27.5% of low-income and all students are chronically absent. There continues to be a need to build the capacity of parents of unduplicated students. According to the 2025 LCAP survey, 95% of parents feel comfortable participating in school activities, and 96% believe that the school values and encourages their involvement. Providing parent workshops and classes will continue to empower families with the tools and knowledge they need to support their children's academic, social-emotional, and behavioral development. This is especially important as the District continues to address a chronic absenteeism rate of 22%. Engaged and well-informed parents are better equipped to help address attendance challenges and reinforce the importance of consistent school participation at home.	The District will continue the practice of providing parent workshops and classes that will build the capacity of parents of unduplicated students to have greater involvement in and understanding of important issues that influence their children's education. This action is being provided on an LEA-wide basis because all students can benefit from having parents with greater involvement in and understanding of important issues that influence their children's education.	The effectiveness of this action will be measured through parent surveys (Goal 4 Metric 3 & 4) The effectiveness of this action will also be measured by a decrease in the chronic absenteeism rate for low income, EL, and foster youth and all student. (Goal 4 Metric 5)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Scope: LEA-wide		
4.3	Action: Provide a Health Fair for parents and students Need: Community partners have shared that low income students in Lennox have increasing serious health issues including obesity, diabetes, vision problems and nutrition related health issues. Our community partners also expressed concern that many parents lack access to resources that address these health needs. Our chronic absenteeism data underscores this need, with the CA Dashboard indicating that 27.5% of low-income and all students are chronically absent. There continues to be a need to provide a yearly health fair for parents and students. Student health is a foundational element of academic success and regular school attendance. With a chronic absenteeism rate of 22%, as reported on the 2024 California Dashboard, it is clear that health-related challenges continue to be a significant barrier to consistent student participation in school. Scope:	The district will collaborate with UCLA in providing a Health Fair for the Lennox community. The health fair will provide the community with access to information and services that address the frequent health issues that face low income students and their families. Ensuring the health of our low income students is addressed, and will increase student attendance and their engagement in school. This action is being provided on an LEA-wide basis because all students can benefit from having increased access and resources to health services.	The effectiveness of this action will be measured by a decrease in the chronic absenteeism rate for low income and all student. (Goal 4 Metric 5)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	LEA-wide		
4.4	Action: Provide translating services to ensure non-English speaking parents are engaged in their children's schools Need: Based on the District's demographic data, many of the District's parents of low income students and English learners are not fluent English speakers and are predominantly Spanish speakers. Parents have expressed that they would be unable to participate in some school activities such as parent classes and workshops without increased translation services. Our chronic absenteeism data underscores this need, with the CA Dashboard indicating that 27.5% of low-income and all students are chronically absent. In a diverse district with many non-English speaking families, translation services play a vital role in ensuring that all parents can fully engage in their children's education. There continues to be a strong need to provide translating services. According to the 2025 LCAP survey, 95% of parents feel comfortable participating in school activities, and 96% believe that the school values and encourages their involvement. These high levels of parent confidence are directly supported by the District's commitment to providing translation	The District will provide translation services which will increase parents' opportunities to be involved in their students' educational program and services offered by the school. These translation services go beyond those services provided for parents such as the translation at Back to School Night or at promotion ceremonies. This continuing action has been successful in the past and has created an increase in parents' attendance in school activities such as parent workshops and classes both at the school and district levels providing access to parents to increase their opportunity to volunteer in school. This action is being provided on an LEA-wide basis because all students can benefit from having parents with greater involvement in school activities.	The effectiveness of this action will be measured through parent surveys (Goal 4 Metric 3 & 4) The effectiveness of this action will also be measured by a decrease in the chronic absenteeism rate for low income and all student. (Goal 4 Metric 5)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	services, which ensure that language is not a barrier to meaningful engagement. Continued support for translation services is also critical to addressing the District's chronic absenteeism rate, currently at 22%. Engaged and well informed parents are more likely to monitor attendance, communicate with school staff, and support consistent school participation. Scope: LEA-wide		
4.5	Action: Provide opportunities for parents to attend conferences Need: Parents expressed a strong desire to attend conferences. They shared that these conferences provide them with valuable information, which in turn gives them the background knowledge they need to fulfill a genuine leadership role. This role allows them to effectively represent parent concerns. Additionally, conferences better equip them to participate in decision-making processes. Parent leaders gain more confidence, not only in reporting the challenges students face but also in offering input on possible solutions. Our chronic absenteeism data underscores this need, with the CA Dashboard indicating that 27.5% of low-income and all students are chronically absent.	Parents will have the opportunity to attend conferences such as CAFE and safe schools. Parents, after attending these conferences, will be better equipped to participate in decision-making agenda items. Parent leaders will have more confidence to not only report on challenges students were experiencing but also to provide input on possible solutions. As a result of implementing this action, parent leaders will have an increased role in decision-making related to programs and services for low income students. This action is being provided on an LEA-wide basis because all students can benefit from having parents with increased decision making related to school programs and services.	The effectiveness of this action will be measured through parent surveys. (Goal 4 Metric 1 & 2) The effectiveness of this action will also be measured by a decrease in the chronic absenteeism rate for low income and all student. (Goal 4 Metric 5)

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	According to the 2025 LCAP survey, 95% of parents feel satisfied with the opportunities they have for involvement and decision-making in their child's education. Building on this strong foundation, the District recognizes the importance of offering parents opportunities to attend educational conferences that further develop their knowledge, leadership skills, and engagement in school initiatives. These conferences provide valuable information on topics such as academic support, student wellness, equity, and advocacy—equipping parents to be more effective partners in their children's education. Additionally, with a chronic absenteeism rate of 22%, increasing parent awareness and capacity through conference participation can help address attendance issues, as informed and engaged parents are better positioned to support consistent school attendance. Scope: LEA-wide		
4.6	Action: Provide School Site Parent Liaisons Need: Parents expressed a desire to have a parent liaison at each school to increase communication between parents of low income and English learner students and the	The District will provided a parent liaison at each school to coordinate parent activities and communication through Parent Centers at each school to increase the communication between home and school as well as to build the capacity of parents to participate in their students' education.	The effectiveness of this action will be measured through parent surveys (Goal 4 Metric 3 & 4) The effectiveness of this action will also be measured by a decrease

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	school and to coordinate services such as parent workshops at each school. According to our CA Dashboard 27.5% of all student are chronically absent. There is a strong need to continue providing parent liaisons at each school. During the 2025 LCAP input sessions this action was identified as a priority action. According to the 2025 LCAP survey, 95% of parents feel comfortable participating in school activities, and 96% report that their child's school values and encourages parent participation. These high levels of satisfaction are directly tied to the consistent outreach and support provided through school-based parent centers, which are operated by trained parent liaisons. In addition, the 2024 California Dashboard shows a chronic absenteeism rate of 22% for the District. Parent liaisons are instrumental in helping reduce this rate by building relationships with families, providing information about the importance of attendance, and connecting them to resources that address attendance barriers. Scope: LEA-wide	This action is being provided on an LEA-wide basis because all students can benefit from having parents participate in their students' education.	the chronic absenteeism rate for low income and all student. (Goal 4 Metric 5)

Limited Actions

For each action being solely provided to one or more unduplicated student group(s), provide an explanation of (1) the unique identified need(s) of the unduplicated student group(s) being served, (2) how the action is designed to address the identified need(s), and (3) how the effectiveness of the action in improving outcomes for the unduplicated student group(s) will be measured.

Goal and Action #	Identified Need(s)	How the Action(s) are Designed to Address Need(s)	Metric(s) to Monitor Effectiveness
1.6	Action: Provide Long Term English learners (LTELs) with an after school reclassification academy Need: The District has identified as a need for Long Term English Learners (LTEL) to receive additional support on specific skills needed for them to reclassify. This year we have reclassified 24% of our English learners but have 351 identified Long Term English Learners in need of being reclassified as fluent in English. Our DELAC has expressed a concern with the high number of LTEL's and requested extended time be provided with a focus on language instruction. A closer look at our data revealed that the writing domain on CAASPP is the greatest area of need. Through goal setting students also asked for additional support in the area of writing and vocabulary development in order to better complete grade level writing assignments. There is a clear need for an after-school reclassification academy to support Long-Term English Learners (LTELs). While LTELs are performing at the 'Yellow' level on the 2025 English Learner Progress Indicator of the California Dashboard, they continue to face significant challenges in meeting grade-level English Language Arts (ELA) standards, as	To address the needs of English learners who have not reclassified, the District will contract with a provider who offers extended learning time to provide a reclassification academy to target those skills students need to reclassify to fluent English speaker. This academy will be offered throughout the year.	We will monitor the effectiveness of of this action through our reclassification rate. (Goal 1 Metric 18)

Goal and Action #	Identified Need(s)	How the Action(s) are Designed to Address Need(s)	Metric(s) to Monitor Effectiveness
	reflected by a 'Red' rating—the lowest level—on the ELA Indicator. Scope: Limited to Unduplicated Student Group(s)		

For any limited action contributing to meeting the increased or improved services requirement that is associated with a Planned Percentage of Improved Services in the Contributing Summary Table rather than an expenditure of LCFF funds, describe the methodology that was used to determine the contribution of the action towards the proportional percentage, as applicable.

N/A

Additional Concentration Grant Funding

A description of the plan for how the additional concentration grant add-on funding identified above will be used to increase the number of staff providing direct services to students at schools that have a high concentration (above 55 percent) of foster youth, English learners, and low-income students, as applicable.

The District will provide the following additional staff to support unduplicated students: Parent Liaisons at each school, increased number of playground supervisors, (3) Teachers on Special Assignment to support the implementation of MTSS, middle school intervention and science (5) intervention teachers at each elementary school. (Actions 4.6 Parent Liaisons, Action 1.18 Teachers on Special Assignment, Action 2.1 Intervention teachers, Action 3.11 Play Works)

Playground supervisors will receive training in Play Works, a structured play program that will be implemented at each school. These playground supervisors will plan and set up specific games and activities during recess, nutrition (middle school) and lunch. They will provide direction to unduplicated students so that they are able to apply appropriate social skills and use conflict resolution strategies while interacting with their peers outside of the classroom. This service can be found in Goal 3, Action 3.11.

One of the teachers on special assignment will specifically be assigned to the middle school to ensure that unduplicated students receive interventions based on data and that these students are regularly evaluated to determine when students can exit intervention. With increased multi-tiered services available at the middle school, this TOSA will assist in ensuring interventions are meeting the needs of unduplicated students. The second teacher on special assignment will have the same responsibilities at the elementary level. These services can be found in Goal 1, Action 18

Parent liaisons will coordinate parent workshops and other parent activities targeted to parents of unduplicated students. Additionally these parent liaisons will support the communication between school staff and and parents of unduplicated students. This service can be found in Goal 4, Action 6.

Staff-to-student ratios by type of school and concentration of unduplicated students	Schools with a student concentration of 55 percent or less	Schools with a student concentration of greater than 55 percent
Staff-to-student ratio of classified staff providing direct services to students		There are no comparable schools.
Staff-to-student ratio of certificated staff providing direct services to students		There are no comparable schools.

[Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students](#)

For additional questions or technical assistance related to the completion of the Local Control and Accountability Plan (LCAP) template, please contact the local county office of education (COE), or the California Department of Education's (CDE's) Local Agency Systems Support Office, by phone at 916-319-0809 or by email at LCFF@cde.ca.gov.

Introduction and Instructions

The Local Control Funding Formula (LCFF) requires local educational agencies (LEAs) to engage their local educational partners in an annual planning process to evaluate their progress within eight state priority areas encompassing all statutory metrics (COEs have 10 state priorities). LEAs document the results of this planning process in the LCAP using the template adopted by the State Board of Education.

The LCAP development process serves three distinct, but related functions:

- **Comprehensive Strategic Planning:** The process of developing and annually updating the LCAP supports comprehensive strategic planning, particularly to address and reduce disparities in opportunities and outcomes between student groups indicated by the California School Dashboard (California Education Code [EC] Section 52064[e][1]). Strategic planning that is comprehensive connects budgetary decisions to teaching and learning performance data. LEAs should continually evaluate the hard choices they make about the use of limited resources to meet student and community needs to ensure opportunities and outcomes are improved for all students.
- **Meaningful Engagement of Educational Partners:** The LCAP development process should result in an LCAP that reflects decisions made through meaningful engagement (EC Section 52064[e][1]). Local educational partners possess valuable perspectives and insights about an LEA's programs and services. Effective strategic planning will incorporate these perspectives and insights in order to identify potential goals and actions to be included in the LCAP.
- **Accountability and Compliance:** The LCAP serves an important accountability function because the nature of some LCAP template sections require LEAs to show that they have complied with various requirements specified in the LCFF statutes and regulations, most notably:
 - Demonstrating that LEAs are increasing or improving services for foster youth, English learners, including long-term English learners, and low-income students in proportion to the amount of additional funding those students generate under LCFF (EC Section 52064[b][4-6]).
 - Establishing goals, supported by actions and related expenditures, that address the statutory priority areas and statutory metrics (EC sections 52064[b][1] and [2]).
 - **NOTE:** As specified in EC Section 62064(b)(1), the LCAP must provide a description of the annual goals, for all pupils and each subgroup of pupils identified pursuant to EC Section 52052, to be achieved for each of the state priorities. Beginning in 2023–24, EC

Section 52052 identifies long-term English learners as a separate and distinct pupil subgroup with a numerical significance at 15 students.

- Annually reviewing and updating the LCAP to reflect progress toward the goals (EC Section 52064[b][7]).
- Ensuring that all increases attributable to supplemental and concentration grant calculations, including concentration grant add-on funding and/or LCFF carryover, are reflected in the LCAP (EC sections 52064[b][6], [8], and [11]).

The LCAP template, like each LEA's final adopted LCAP, is a document, not a process. LEAs must use the template to memorialize the outcome of their LCAP development process, which must: (a) reflect comprehensive strategic planning, particularly to address and reduce disparities in opportunities and outcomes between student groups indicated by the California School Dashboard (Dashboard), (b) through meaningful engagement with educational partners that (c) meets legal requirements, as reflected in the final adopted LCAP. The sections included within the LCAP template do not and cannot reflect the full development process, just as the LCAP template itself is not intended as a tool for engaging educational partners.

If a county superintendent of schools has jurisdiction over a single school district, the county board of education and the governing board of the school district may adopt and file for review and approval a single LCAP consistent with the requirements in EC sections 52060, 52062, 52066, 52068, and 52070. The LCAP must clearly articulate to which entity's budget (school district or county superintendent of schools) all budgeted and actual expenditures are aligned.

The revised LCAP template for the 2024–25, 2025–26, and 2026–27 school years reflects statutory changes made through Senate Bill 114 (Committee on Budget and Fiscal Review), Chapter 48, Statutes of 2023 and Senate Bill 153, Chapter 38, Statutes of 2024.

At its most basic, the adopted LCAP should attempt to distill not just what the LEA is doing for students in transitional kindergarten through grade twelve (TK–12), but also allow educational partners to understand why, and whether those strategies are leading to improved opportunities and outcomes for students. LEAs are strongly encouraged to use language and a level of detail in their adopted LCAPs intended to be meaningful and accessible for the LEA's diverse educational partners and the broader public.

In developing and finalizing the LCAP for adoption, LEAs are encouraged to keep the following overarching frame at the forefront of the strategic planning and educational partner engagement functions:

Given present performance across the state priorities and on indicators in the Dashboard, how is the LEA using its budgetary resources to respond to TK–12 student and community needs, and address any performance gaps, including by meeting its obligation to increase or improve services for foster youth, English learners, and low-income students?

LEAs are encouraged to focus on a set of metrics and actions which, based on research, experience, and input gathered from educational partners, the LEA believes will have the biggest impact on behalf of its TK–12 students.

These instructions address the requirements for each section of the LCAP but may include information about effective practices when developing the LCAP and completing the LCAP document. Additionally, the beginning of each template section includes information emphasizing the purpose that section serves.

Plan Summary

Purpose

A well-developed Plan Summary section provides a meaningful context for the LCAP. This section provides information about an LEA's community as well as relevant information about student needs and performance. In order to present a meaningful context for the rest of the LCAP, the content of this section should be clearly and meaningfully related to the content included throughout each subsequent section of the LCAP.

Requirements and Instructions

General Information

A description of the LEA, its schools, and its students in grades transitional kindergarten–12, as applicable to the LEA. LEAs may also provide information about their strategic plan, vision, etc.

Briefly describe the LEA, its schools, and its students in grades TK–12, as applicable to the LEA.

- For example, information about an LEA in terms of geography, enrollment, employment, the number and size of specific schools, recent community challenges, and other such information the LEA may wish to include can enable a reader to more fully understand the LEA's LCAP.
- LEAs may also provide information about their strategic plan, vision, etc.
- As part of this response, identify all schools within the LEA receiving Equity Multiplier funding.

Reflections: Annual Performance

A reflection on annual performance based on a review of the California School Dashboard (Dashboard) and local data.

Reflect on the LEA's annual performance on the Dashboard and local data. This may include both successes and challenges identified by the LEA during the development process.

LEAs are encouraged to highlight how they are addressing the identified needs of student groups, and/or schools within the LCAP as part of this response.

As part of this response, the LEA must identify the following, which will remain unchanged during the three-year LCAP cycle:

- Any school within the LEA that received the lowest performance level on one or more state indicators on the 2023 Dashboard;
- Any student group within the LEA that received the lowest performance level on one or more state indicators on the 2023 Dashboard; and/or
- Any student group within a school within the LEA that received the lowest performance level on one or more state indicators on the 2023 Dashboard.

EC Section 52064.4 requires that an LEA that has unexpended Learning Recovery Emergency Block Grant (LREBG) funds must include one or more actions funded with LREBG funds within the 2025-26, 2026-27 and 2027-28 LCAPs, as applicable to the LEA. To implement the requirements of *EC* Section 52064.4, all LEAs must do the following:

- For the 2025–26, 2026–27, and 2027–28 LCAP years, identify whether or not the LEA has unexpended LREBG funds for the applicable LCAP year.
 - If the LEA has unexpended LREBG funds the LEA must provide the following:
 - The goal and action number for each action that will be funded, either in whole or in part, with LREBG funds; and
 - An explanation of the rationale for selecting each action funded with LREBG funds. This explanation must include:
 - An explanation of how the action is aligned with the allowable uses of funds identified in [EC Section 32526\(c\)\(2\)](#); and
 - An explanation of how the action is expected to address the area(s) of need of students and schools identified in the needs assessment required by [EC Section 32526\(d\)](#).
 - For information related to the allowable uses of funds and the required needs assessment, please see the Program Information tab on the [LREBG Program Information](#) web page.
 - Actions may be grouped together for purposes of these explanations.
 - The LEA may provide these explanations as part of the action description rather than as part of the Reflections: Annual Performance.
 - If the LEA does not have unexpended LREBG funds, the LEA is not required to conduct the needs assessment required by *EC* Section 32526(d), to provide the information identified above or to include actions funded with LREBG funds within the 2025-26, 2026-27 and 2027-28 LCAPs.

Reflections: Technical Assistance

As applicable, a summary of the work underway as part of technical assistance.

Annually identify the reason(s) the LEA is eligible for or has requested technical assistance consistent with *EC* sections 47607.3, 52071, 52071.5, 52072, or 52072.5, and provide a summary of the work underway as part of receiving technical assistance. The most common form of this technical assistance is frequently referred to as Differentiated Assistance, however this also includes LEAs that have requested technical assistance from their COE.

- If the LEA is not eligible for or receiving technical assistance, the LEA may respond to this prompt as “Not Applicable.”

Comprehensive Support and Improvement

An LEA with a school or schools identified for comprehensive support and improvement (CSI) under the Every Student Succeeds Act must respond to the following prompts:

Schools Identified

A list of the schools in the LEA that are eligible for comprehensive support and improvement.

- Identify the schools within the LEA that have been identified for CSI.

Support for Identified Schools

A description of how the LEA has or will support its eligible schools in developing comprehensive support and improvement plans.

- Describe how the LEA has or will support the identified schools in developing CSI plans that included a school-level needs assessment, evidence-based interventions, and the identification of any resource inequities to be addressed through the implementation of the CSI plan.

Monitoring and Evaluating Effectiveness

A description of how the LEA will monitor and evaluate the plan to support student and school improvement.

- Describe how the LEA will monitor and evaluate the implementation and effectiveness of the CSI plan to support student and school improvement.

Engaging Educational Partners

Purpose

Significant and purposeful engagement of parents, students, educators, and other educational partners, including those representing the student groups identified by LCFF, is critical to the development of the LCAP and the budget process. Consistent with statute, such engagement should support comprehensive strategic planning, particularly to address and reduce disparities in opportunities and outcomes between student groups indicated by the Dashboard, accountability, and improvement across the state priorities and locally identified priorities (EC Section 52064[e][1]). Engagement of educational partners is an ongoing, annual process.

This section is designed to reflect how the engagement of educational partners influenced the decisions reflected in the adopted LCAP. The goal is to allow educational partners that participated in the LCAP development process and the broader public to understand how the LEA engaged educational partners and the impact of that engagement. LEAs are encouraged to keep this goal in the forefront when completing this section.

Requirements

Requirements

School districts and COEs: [EC Section 52060\(q\)](#) and [EC Section 52066\(q\)](#) specify the educational partners that must be consulted when developing the LCAP:

- Teachers,

- Principals,
- Administrators,
- Other school personnel,
- Local bargaining units of the LEA,
- Parents, and
- Students

A school district or COE receiving Equity Multiplier funds must also consult with educational partners at schools generating Equity Multiplier funds in the development of the LCAP, specifically, in the development of the required focus goal for each applicable school.

Before adopting the LCAP, school districts and COEs must share it with the applicable committees, as identified below under Requirements and Instructions. The superintendent is required by statute to respond in writing to the comments received from these committees. School districts and COEs must also consult with the special education local plan area administrator(s) when developing the LCAP.

Charter schools: [EC Section 47606.5\(d\)](#) requires that the following educational partners be consulted with when developing the LCAP:

- Teachers,
- Principals,
- Administrators,
- Other school personnel,
- Parents, and
- Students

A charter school receiving Equity Multiplier funds must also consult with educational partners at the school generating Equity Multiplier funds in the development of the LCAP, specifically, in the development of the required focus goal for the school.

The LCAP should also be shared with, and LEAs should request input from, schoolsite-level advisory groups, as applicable (e.g., schoolsite councils, English Learner Advisory Councils, student advisory groups, etc.), to facilitate alignment between schoolsite and district-level goals. Information and resources that support effective engagement, define student consultation, and provide the requirements for advisory group composition, can be found under Resources on the [CDE's LCAP webpage](#).

Before the governing board/body of an LEA considers the adoption of the LCAP, the LEA must meet the following legal requirements:

- For school districts, see [Education Code Section 52062](#);
 - **Note:** Charter schools using the LCAP as the School Plan for Student Achievement must meet the requirements of *EC* Section 52062(a).
- For COEs, see [Education Code Section 52068](#); and
- For charter schools, see [Education Code Section 47606.5](#).

- **NOTE:** As a reminder, the superintendent of a school district or COE must respond, in writing, to comments received by the applicable committees identified in the *Education Code* sections listed above. This includes the parent advisory committee and may include the English learner parent advisory committee and, as of July 1, 2024, the student advisory committee, as applicable.

Instructions

Respond to the prompts as follows:

A summary of the process used to engage educational partners in the development of the LCAP.

School districts and county offices of education must, at a minimum, consult with teachers, principals, administrators, other school personnel, local bargaining units, parents, and students in the development of the LCAP.

Charter schools must, at a minimum, consult with teachers, principals, administrators, other school personnel, parents, and students in the development of the LCAP.

An LEA receiving Equity Multiplier funds must also consult with educational partners at schools generating Equity Multiplier funds in the development of the LCAP, specifically, in the development of the required focus goal for each applicable school.

Complete the table as follows:

Educational Partners

Identify the applicable educational partner(s) or group(s) that were engaged in the development of the LCAP.

Process for Engagement

Describe the engagement process used by the LEA to involve the identified educational partner(s) in the development of the LCAP. At a minimum, the LEA must describe how it met its obligation to consult with all statutorily required educational partners, as applicable to the type of LEA.

- A sufficient response to this prompt must include general information about the timeline of the process and meetings or other engagement strategies with educational partners. A response may also include information about an LEA's philosophical approach to engaging its educational partners.
- An LEA receiving Equity Multiplier funds must also include a summary of how it consulted with educational partners at schools generating Equity Multiplier funds in the development of the LCAP, specifically, in the development of the required focus goal for each applicable school.

A description of how the adopted LCAP was influenced by the feedback provided by educational partners.

Describe any goals, metrics, actions, or budgeted expenditures in the LCAP that were influenced by or developed in response to the educational partner feedback.

- A sufficient response to this prompt will provide educational partners and the public with clear, specific information about how the engagement process influenced the development of the LCAP. This may include a description of how the LEA prioritized requests of educational partners within the context of the budgetary resources available or otherwise prioritized areas of focus within the LCAP.
- An LEA receiving Equity Multiplier funds must include a description of how the consultation with educational partners at schools generating Equity Multiplier funds influenced the development of the adopted LCAP.
- For the purposes of this prompt, this may also include, but is not necessarily limited to:
 - Inclusion of a goal or decision to pursue a Focus Goal (as described below)
 - Inclusion of metrics other than the statutorily required metrics
 - Determination of the target outcome on one or more metrics
 - Inclusion of performance by one or more student groups in the Measuring and Reporting Results subsection
 - Inclusion of action(s) or a group of actions
 - Elimination of action(s) or group of actions
 - Changes to the level of proposed expenditures for one or more actions
 - Inclusion of action(s) as contributing to increased or improved services for unduplicated students
 - Analysis of effectiveness of the specific actions to achieve the goal
 - Analysis of material differences in expenditures
 - Analysis of changes made to a goal for the ensuing LCAP year based on the annual update process
 - Analysis of challenges or successes in the implementation of actions

Goals and Actions

Purpose

Well-developed goals will clearly communicate to educational partners what the LEA plans to accomplish, what the LEA plans to do in order to accomplish the goal, and how the LEA will know when it has accomplished the goal. A goal statement, associated metrics and expected outcomes, and the actions included in the goal must be in alignment. The explanation for why the LEA included a goal is an opportunity for LEAs to clearly communicate to educational partners and the public why, among the various strengths and areas for improvement highlighted by performance data and strategies and actions that could be pursued, the LEA decided to pursue this goal, and the related metrics, expected outcomes, actions, and expenditures.

A well-developed goal can be focused on the performance relative to a metric or metrics for all students, a specific student group(s), narrowing performance gaps, or implementing programs or strategies expected to impact outcomes. LEAs should assess the performance of their student groups when developing goals and the related actions to achieve such goals.

Requirements and Instructions

LEAs should prioritize the goals, specific actions, and related expenditures included within the LCAP within one or more state priorities. LEAs must consider performance on the state and local indicators, including their locally collected and reported data for the local indicators that are included in the Dashboard, in determining whether and how to prioritize its goals within the LCAP. As previously stated, strategic planning that

is comprehensive connects budgetary decisions to teaching and learning performance data. LEAs should continually evaluate the hard choices they make about the use of limited resources to meet student and community needs to ensure opportunities and outcomes are improved for all students, and to address and reduce disparities in opportunities and outcomes between student groups indicated by the Dashboard.

In order to support prioritization of goals, the LCAP template provides LEAs with the option of developing three different kinds of goals:

- **Focus Goal:** A Focus Goal is relatively more concentrated in scope and may focus on a fewer number of metrics to measure improvement. A Focus Goal statement will be time bound and make clear how the goal is to be measured.
 - All Equity Multiplier goals must be developed as focus goals. For additional information, see Required Focus Goal(s) for LEAs Receiving Equity Multiplier Funding below.
- **Broad Goal:** A Broad Goal is relatively less concentrated in its scope and may focus on improving performance across a wide range of metrics.
- **Maintenance of Progress Goal:** A Maintenance of Progress Goal includes actions that may be ongoing without significant changes and allows an LEA to track performance on any metrics not addressed in the other goals of the LCAP.

Requirement to Address the LCFF State Priorities

At a minimum, the LCAP must address all LCFF priorities and associated metrics articulated in *EC* sections 52060(d) and 52066(d), as applicable to the LEA. The [LCFF State Priorities Summary](#) provides a summary of *EC* sections 52060(d) and 52066(d) to aid in the development of the LCAP.

Respond to the following prompts, as applicable:

Focus Goal(s)

Description

The description provided for a Focus Goal must be specific, measurable, and time bound.

- An LEA develops a Focus Goal to address areas of need that may require or benefit from a more specific and data intensive approach.
- The Focus Goal can explicitly reference the metric(s) by which achievement of the goal will be measured and the time frame according to which the LEA expects to achieve the goal.

Type of Goal

Identify the type of goal being implemented as a Focus Goal.

State Priorities addressed by this goal.

Identify each of the state priorities that this goal is intended to address.

An explanation of why the LEA has developed this goal.

Explain why the LEA has chosen to prioritize this goal.

- An explanation must be based on Dashboard data or other locally collected data.
- LEAs must describe how the LEA identified this goal for focused attention, including relevant consultation with educational partners.
- LEAs are encouraged to promote transparency and understanding around the decision to pursue a focus goal.

Required Focus Goal(s) for LEAs Receiving Equity Multiplier Funding

Description

LEAs receiving Equity Multiplier funding must include one or more focus goals for each school generating Equity Multiplier funding. In addition to addressing the focus goal requirements described above, LEAs must adhere to the following requirements.

Focus goals for Equity Multiplier schoolsites must address the following:

- (A) All student groups that have the lowest performance level on one or more state indicators on the Dashboard, and
- (B) Any underlying issues in the credentialing, subject matter preparation, and retention of the school’s educators, if applicable.
- Focus Goals for each and every Equity Multiplier schoolsite must identify specific metrics for each identified student group, as applicable.
- An LEA may create a single goal for multiple Equity Multiplier schoolsites if those schoolsites have the same student group(s) performing at the lowest performance level on one or more state indicators on the Dashboard or, experience similar issues in the credentialing, subject matter preparation, and retention of the school’s educators.
 - When creating a single goal for multiple Equity Multiplier schoolsites, the goal must identify the student groups and the performance levels on the Dashboard that the Focus Goal is addressing; or,
 - The common issues the schoolsites are experiencing in credentialing, subject matter preparation, and retention of the school’s educators, if applicable.

Type of Goal

Identify the type of goal being implemented as an Equity Multiplier Focus Goal.

State Priorities addressed by this goal.

Identify each of the state priorities that this goal is intended to address.

An explanation of why the LEA has developed this goal.

Explain why the LEA has chosen to prioritize this goal.

- An explanation must be based on Dashboard data or other locally collected data.
- LEAs must describe how the LEA identified this goal for focused attention, including relevant consultation with educational partners.
- LEAs are encouraged to promote transparency and understanding around the decision to pursue a focus goal.
- In addition to this information, the LEA must also identify:
 - The school or schools to which the goal applies

LEAs are encouraged to approach an Equity Multiplier goal from a wholistic standpoint, considering how the goal might maximize student outcomes through the use of LCFF and other funding in addition to Equity Multiplier funds.

- Equity Multiplier funds must be used to supplement, not supplant, funding provided to Equity Multiplier schoolsites for purposes of the LCFF, the Expanded Learning Opportunities Program (ELO-P), the Literacy Coaches and Reading Specialists (LCRS) Grant Program, and/or the California Community Schools Partnership Program (CCSPP).
- This means that Equity Multiplier funds must not be used to replace funding that an Equity Multiplier schoolsite would otherwise receive to implement LEA-wide actions identified in the LCAP or that an Equity Multiplier schoolsite would otherwise receive to implement provisions of the ELO-P, the LCRS, and/or the CCSPP.

Note: [EC Section 42238.024\(b\)\(1\)](#) requires that Equity Multiplier funds be used for the provision of evidence-based services and supports for students. Evidence-based services and supports are based on objective evidence that has informed the design of the service or support and/or guides the modification of those services and supports. Evidence-based supports and strategies are most commonly based on educational research and/or metrics of LEA, school, and/or student performance.

Broad Goal

Description

Describe what the LEA plans to achieve through the actions included in the goal.

- The description of a broad goal will be clearly aligned with the expected measurable outcomes included for the goal.

- The goal description organizes the actions and expected outcomes in a cohesive and consistent manner.
- A goal description is specific enough to be measurable in either quantitative or qualitative terms. A broad goal is not as specific as a focus goal. While it is specific enough to be measurable, there are many different metrics for measuring progress toward the goal.

Type of Goal

Identify the type of goal being implemented as a Broad Goal.

State Priorities addressed by this goal.

Identify each of the state priorities that this goal is intended to address.

An explanation of why the LEA has developed this goal.

Explain why the LEA developed this goal and how the actions and metrics grouped together will help achieve the goal.

Maintenance of Progress Goal

Description

Describe how the LEA intends to maintain the progress made in the LCFF State Priorities not addressed by the other goals in the LCAP.

- Use this type of goal to address the state priorities and applicable metrics not addressed within the other goals in the LCAP.
- The state priorities and metrics to be addressed in this section are those for which the LEA, in consultation with educational partners, has determined to maintain actions and monitor progress while focusing implementation efforts on the actions covered by other goals in the LCAP.

Type of Goal

Identify the type of goal being implemented as a Maintenance of Progress Goal.

State Priorities addressed by this goal.

Identify each of the state priorities that this goal is intended to address.

An explanation of why the LEA has developed this goal.

Explain how the actions will sustain the progress exemplified by the related metrics.

Measuring and Reporting Results:

For each LCAP year, identify the metric(s) that the LEA will use to track progress toward the expected outcomes.

- LEAs must identify metrics for specific student groups, as appropriate, including expected outcomes that address and reduce disparities in outcomes between student groups.
- The metrics may be quantitative or qualitative; but at minimum, an LEA’s LCAP must include goals that are measured using all of the applicable metrics for the related state priorities, in each LCAP year, as applicable to the type of LEA.
- To the extent a state priority does not specify one or more metrics (e.g., implementation of state academic content and performance standards), the LEA must identify a metric to use within the LCAP. For these state priorities, LEAs are encouraged to use metrics based on or reported through the relevant local indicator self-reflection tools within the Dashboard.
- **Required metrics for LEA-wide actions:** For each action identified as 1) contributing towards the requirement to increase or improve services for foster youth, English learners, including long-term English learners, and low-income students and 2) being provided on an LEA-wide basis, the LEA must identify one or more metrics to monitor the effectiveness of the action and its budgeted expenditures.
 - These required metrics may be identified within the action description or the first prompt in the increased or improved services section, however the description must clearly identify the metric(s) being used to monitor the effectiveness of the action and the action(s) that the metric(s) apply to.
- **Required metrics for Equity Multiplier goals:** For each Equity Multiplier goal, the LEA must identify:
 - The specific metrics for each identified student group at each specific schoolsite, as applicable, to measure the progress toward the goal, and/or
 - The specific metrics used to measure progress in meeting the goal related to credentialing, subject matter preparation, or educator retention at each specific schoolsite.
- **Required metrics for actions supported by LREBG funds:** To implement the requirements of *EC* Section 52064.4, LEAs with unexpended LREBG funds must include at least one metric to monitor the impact of each action funded with LREBG funds included in the goal.
 - The metrics being used to monitor the impact of each action funded with LREBG funds are not required to be new metrics; they may be metrics that are already being used to measure progress towards goals and actions included in the LCAP.

Complete the table as follows:

Metric #
• Enter the metric number.
Metric

- Identify the standard of measure being used to determine progress towards the goal and/or to measure the effectiveness of one or more actions associated with the goal.

Baseline

- Enter the baseline when completing the LCAP for 2024–25.
 - Use the most recent data associated with the metric available at the time of adoption of the LCAP for the first year of the three-year plan. LEAs may use data as reported on the 2023 Dashboard for the baseline of a metric only if that data represents the most recent available data (e.g., high school graduation rate).
 - Using the most recent data available may involve reviewing data the LEA is preparing for submission to the California Longitudinal Pupil Achievement Data System (CALPADS) or data that the LEA has recently submitted to CALPADS.
 - Indicate the school year to which the baseline data applies.
 - The baseline data must remain unchanged throughout the three-year LCAP.
 - This requirement is not intended to prevent LEAs from revising the baseline data if it is necessary to do so. For example, if an LEA identifies that its data collection practices for a particular metric are leading to inaccurate data and revises its practice to obtain accurate data, it would also be appropriate for the LEA to revise the baseline data to align with the more accurate data process and report its results using the accurate data.
 - If an LEA chooses to revise its baseline data, then, at a minimum, it must clearly identify the change as part of its response to the description of changes prompt in the Goal Analysis for the goal. LEAs are also strongly encouraged to involve their educational partners in the decision of whether or not to revise a baseline and to communicate the proposed change to their educational partners.
 - Note for Charter Schools: Charter schools developing a one- or two-year LCAP may identify a new baseline each year, as applicable.

Year 1 Outcome

- When completing the LCAP for 2025–26, enter the most recent data available. Indicate the school year to which the data applies.
 - Note for Charter Schools: Charter schools developing a one-year LCAP may provide the Year 1 Outcome when completing the LCAP for both 2025–26 and 2026–27 or may provide the Year 1 Outcome for 2025–26 and provide the Year 2 Outcome for 2026–27.

Year 2 Outcome

- When completing the LCAP for 2026–27, enter the most recent data available. Indicate the school year to which the data applies.

- Note for Charter Schools: Charter schools developing a one-year LCAP may identify the Year 2 Outcome as not applicable when completing the LCAP for 2026–27 or may provide the Year 2 Outcome for 2026–27.

Target for Year 3 Outcome

- When completing the first year of the LCAP, enter the target outcome for the relevant metric the LEA expects to achieve by the end of the three-year LCAP cycle.
 - Note for Charter Schools: Charter schools developing a one- or two-year LCAP may identify a Target for Year 1 or Target for Year 2, as applicable.

Current Difference from Baseline

- When completing the LCAP for 2025–26 and 2026–27, enter the current difference between the baseline and the yearly outcome, as applicable.
 - Note for Charter Schools: Charter schools developing a one- or two-year LCAP will identify the current difference between the baseline and the yearly outcome for Year 1 and/or the current difference between the baseline and the yearly outcome for Year 2, as applicable.

Timeline for school districts and COEs for completing the “**Measuring and Reporting Results**” part of the Goal.

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Target for Year 3 Outcome	Current Difference from Baseline
Enter information in this box when completing the LCAP for 2024–25 or when adding a new metric.	Enter information in this box when completing the LCAP for 2024–25 or when adding a new metric.	Enter information in this box when completing the LCAP for 2025–26 . Leave blank until then.	Enter information in this box when completing the LCAP for 2026–27 . Leave blank until then.	Enter information in this box when completing the LCAP for 2024–25 or when adding a new metric.	Enter information in this box when completing the LCAP for 2025–26 and 2026–27 . Leave blank until then.

Goal Analysis:

Enter the LCAP Year.

Using actual annual measurable outcome data, including data from the Dashboard, analyze whether the planned actions were effective towards achieving the goal. “Effective” means the degree to which the planned actions were successful in producing the target result. Respond to the prompts as instructed.

Note: When completing the 2024–25 LCAP, use the 2023–24 Local Control and Accountability Plan Annual Update template to complete the Goal Analysis and identify the Goal Analysis prompts in the 2024–25 LCAP as “Not Applicable.”

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

- Describe the overall implementation of the actions to achieve the articulated goal, including relevant challenges and successes experienced with implementation.
 - Include a discussion of relevant challenges and successes experienced with the implementation process.
 - This discussion must include any instance where the LEA did not implement a planned action or implemented a planned action in a manner that differs substantively from how it was described in the adopted LCAP.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

- Explain material differences between Budgeted Expenditures and Estimated Actual Expenditures and between the Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services, as applicable. Minor variances in expenditures or percentages do not need to be addressed, and a dollar-for-dollar accounting is not required.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

- Describe the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal. “Effectiveness” means the degree to which the actions were successful in producing the target result and “ineffectiveness” means that the actions did not produce any significant or targeted result.
 - In some cases, not all actions in a goal will be intended to improve performance on all of the metrics associated with the goal.
 - When responding to this prompt, LEAs may assess the effectiveness of a single action or group of actions within the goal in the context of performance on a single metric or group of specific metrics within the goal that are applicable to the action(s). Grouping actions with metrics will allow for more robust analysis of whether the strategy the LEA is using to impact a specified set of metrics is working and increase transparency for educational partners. LEAs are encouraged to use such an approach when goals include multiple actions and metrics that are not closely associated.
 - Beginning with the development of the 2024–25 LCAP, the LEA must change actions that have not proven effective over a three-year period.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

- Describe any changes made to this goal, expected outcomes, metrics, or actions to achieve this goal as a result of this analysis and analysis of the data provided in the Dashboard or other local data, as applicable.
 - As noted above, beginning with the development of the 2024–25 LCAP, the LEA must change actions that have not proven effective over a three-year period. For actions that have been identified as ineffective, the LEA must identify the ineffective action and must include a description of the following:

- The reasons for the ineffectiveness, and
- How changes to the action will result in a new or strengthened approach.

Actions:

Complete the table as follows. Add additional rows as necessary.

Action

- Enter the action number.

Title

- Provide a short title for the action. This title will also appear in the action tables.

Description

- Provide a brief description of the action.
 - For actions that contribute to meeting the increased or improved services requirement, the LEA may include an explanation of how each action is principally directed towards and effective in meeting the LEA's goals for unduplicated students, as described in the instructions for the Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students section.
 - As previously noted, for each action identified as 1) contributing towards the requirement to increase or improve services for foster youth, English learners, including long-term English learners, and low-income students and 2) being provided on an LEA-wide basis, the LEA must identify one or more metrics to monitor the effectiveness of the action and its budgeted expenditures.
 - These required metrics may be identified within the action description or the first prompt in the increased or improved services section; however, the description must clearly identify the metric(s) being used to monitor the effectiveness of the action and the action(s) that the metric(s) apply to.

Total Funds

- Enter the total amount of expenditures associated with this action. Budgeted expenditures from specific fund sources will be provided in the action tables.

Contributing

- Indicate whether the action contributes to meeting the increased or improved services requirement as described in the Increased or Improved Services section using a “Y” for Yes or an “N” for No.
 - **Note:** for each such contributing action, the LEA will need to provide additional information in the Increased or Improved Services section to address the requirements in *California Code of Regulations*, Title 5 [5 CCR] Section 15496 in the Increased or Improved Services section of the LCAP.

Actions for Foster Youth: School districts, COEs, and charter schools that have a numerically significant foster youth student subgroup are encouraged to include specific actions in the LCAP designed to meet needs specific to foster youth students.

Required Actions

For English Learners and Long-Term English Learners

- LEAs with 30 or more English learners and/or 15 or more long-term English learners must include specific actions in the LCAP related to, at a minimum:
 - Language acquisition programs, as defined in *EC* Section 306, provided to students, and
 - Professional development for teachers.
 - If an LEA has both 30 or more English learners and 15 or more long-term English learners, the LEA must include actions for both English learners and long-term English learners.

For Technical Assistance

- LEAs eligible for technical assistance pursuant to *EC* sections 47607.3, 52071, 52071.5, 52072, or 52072.5, must include specific actions within the LCAP related to its implementation of the work underway as part of technical assistance. The most common form of this technical assistance is frequently referred to as Differentiated Assistance.

For Lowest Performing Dashboard Indicators

- LEAs that have Red Dashboard indicators for (1) a school within the LEA, (2) a student group within the LEA, and/or (3) a student group within any school within the LEA must include one or more specific actions within the LCAP:
 - The specific action(s) must be directed towards the identified student group(s) and/or school(s) and must address the identified state indicator(s) for which the student group or school received the lowest performance level on the 2023 Dashboard. Each student group and/or school that receives the lowest performance level on the 2023 Dashboard must be addressed by one or more actions.
 - These required actions will be effective for the three-year LCAP cycle.

For LEAs With Unexpended LREBG Funds

- To implement the requirements of *EC* Section 52064.4, LEAs with unexpended LREBG funds must include one or more actions supported with LREBG funds within the 2025–26, 2026–27, and 2027–28 LCAPs, as applicable to the LEA. Actions funded with LREBG funds must remain in the LCAP until the LEA has expended the remainder of its LREBG funds, after which time the actions may be removed from the LCAP.
 - Prior to identifying the actions included in the LCAP the LEA is required to conduct a needs assessment pursuant to [EC Section 32526\(d\)](#). For information related to the required needs assessment please see the Program Information tab on the [LREBG](#)

[Program Information](#) web page. Additional information about the needs assessment and evidence-based resources for the LREBG may be found on the [California Statewide System of Support LREBG Resources](#) web page. The required LREBG needs assessment may be part of the LEAs regular needs assessment for the LCAP if it meets the requirements of *EC* Section 32526(d).

- School districts receiving technical assistance and COEs providing technical assistance are encouraged to use the technical assistance process to support the school district in conducting the required needs assessment, the selection of actions funded by the LREBG and/or the evaluation of implementation of the actions required as part of the LCAP annual update process.
- As a reminder, LREBG funds must be used to implement one or more of the purposes articulated in [EC Section 32526\(c\)\(2\)](#).
- LEAs with unexpended LREBG funds must include one or more actions supported by LREBG funds within the LCAP. For each action supported by LREBG funding the action description must:
 - Identify the action as an LREBG action;
 - Include an explanation of how research supports the selected action;
 - Identify the metric(s) being used to monitor the impact of the action; and
 - Identify the amount of LREBG funds being used to support the action.

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students

Purpose

A well-written Increased or Improved Services section provides educational partners with a comprehensive description, within a single dedicated section, of how an LEA plans to increase or improve services for its unduplicated students as defined in *EC* Section 42238.02 in grades TK–12 as compared to all students in grades TK–12, as applicable, and how LEA-wide or schoolwide actions identified for this purpose meet regulatory requirements. Descriptions provided should include sufficient detail yet be sufficiently succinct to promote a broader understanding of educational partners to facilitate their ability to provide input. An LEA's description in this section must align with the actions included in the Goals and Actions section as contributing.

Please Note: For the purpose of meeting the Increased or Improved Services requirement and consistent with *EC* Section 42238.02, long-term English learners are included in the English learner student group.

Statutory Requirements

An LEA is required to demonstrate in its LCAP how it is increasing or improving services for its students who are foster youth, English learners, and/or low-income, collectively referred to as unduplicated students, as compared to the services provided to all students in proportion to the increase in funding it receives based on the number and concentration of unduplicated students in the LEA (*EC* Section 42238.07[a][1], *EC*

Section 52064[b][8][B]; 5 CCR Section 15496[a]). This proportionality percentage is also known as the “minimum proportionality percentage” or “MPP.” The manner in which an LEA demonstrates it is meeting its MPP is two-fold: (1) through the expenditure of LCFF funds or through the identification of a Planned Percentage of Improved Services as documented in the Contributing Actions Table, and (2) through the explanations provided in the Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students section.

To improve services means to grow services in quality and to increase services means to grow services in quantity. Services are increased or improved by those actions in the LCAP that are identified in the Goals and Actions section as contributing to the increased or improved services requirement, whether they are provided across the entire LEA (LEA-wide action), provided to an entire school (Schoolwide action), or solely provided to one or more unduplicated student group(s) (Limited action).

Therefore, for *any* action contributing to meet the increased or improved services requirement, the LEA must include an explanation of:

- How the action is increasing or improving services for the unduplicated student group(s) (Identified Needs and Action Design), and
- How the action meets the LEA's goals for its unduplicated pupils in the state and any local priority areas (Measurement of Effectiveness).

LEA-wide and Schoolwide Actions

In addition to the above required explanations, LEAs must provide a justification for why an LEA-wide or Schoolwide action is being provided to all students and how the action is intended to improve outcomes for unduplicated student group(s) as compared to all students.

- Conclusory statements that a service will help achieve an expected outcome for the goal, without an explicit connection or further explanation as to how, are not sufficient.
- Further, simply stating that an LEA has a high enrollment percentage of a specific student group or groups does not meet the increased or improved services standard because enrolling students is not the same as serving students.

For School Districts Only

Actions provided on an **LEA-wide** basis at **school districts with an unduplicated pupil percentage of less than 55 percent** must also include a description of how the actions are the most effective use of the funds to meet the district's goals for its unduplicated pupils in the state and any local priority areas. The description must provide the basis for this determination, including any alternatives considered, supporting research, experience, or educational theory.

Actions provided on a **Schoolwide** basis for **schools with less than 40 percent enrollment of unduplicated pupils** must also include a description of how these actions are the most effective use of the funds to meet the district's goals for its unduplicated pupils in the state and any local priority areas. The description must provide the basis for this determination, including any alternatives considered, supporting research, experience, or educational theory.

Requirements and Instructions

Complete the tables as follows:

- Specify the amount of LCFF supplemental and concentration grant funds the LEA estimates it will receive in the coming year based on the number and concentration of foster youth, English learner, and low-income students. This amount includes the Additional 15 percent LCFF Concentration Grant.

Projected Additional 15 percent LCFF Concentration Grant

- Specify the amount of additional LCFF concentration grant add-on funding, as described in *EC* Section 42238.02, that the LEA estimates it will receive in the coming year.

Projected Percentage to Increase or Improve Services for the Coming School Year

- Specify the estimated percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the LCAP year as calculated pursuant to 5 *CCR* Section 15496(a)(7).

LCFF Carryover — Percentage

- Specify the LCFF Carryover — Percentage identified in the LCFF Carryover Table. If a carryover percentage is not identified in the LCFF Carryover Table, specify a percentage of zero (0.00%).

LCFF Carryover — Dollar

- Specify the LCFF Carryover — Dollar amount identified in the LCFF Carryover Table. If a carryover amount is not identified in the LCFF Carryover Table, specify an amount of zero (\$0).

Total Percentage to Increase or Improve Services for the Coming School Year

- Add the Projected Percentage to Increase or Improve Services for the Coming School Year and the Proportional LCFF Required Carryover Percentage and specify the percentage. This is the LEA's percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the LCAP year, as calculated pursuant to 5 *CCR* Section 15496(a)(7).

Required Descriptions:

LEA-wide and Schoolwide Actions

For each action being provided to an entire LEA or school, provide an explanation of (1) the unique identified need(s) of the unduplicated student group(s) for whom the action is principally directed, (2) how the action is designed to address the identified need(s) and why it is being provided on an LEA or schoolwide basis, and (3) the metric(s) used to measure the effectiveness of the action in improving outcomes for the unduplicated student group(s).

If the LEA has provided this required description in the Action Descriptions, state as such within the table.

Complete the table as follows:

Identified Need(s)

Provide an explanation of the unique identified need(s) of the LEA's unduplicated student group(s) for whom the action is principally directed.

An LEA demonstrates how an action is principally directed towards an unduplicated student group(s) when the LEA explains the need(s), condition(s), or circumstance(s) of the unduplicated student group(s) identified through a needs assessment and how the action addresses them. A meaningful needs assessment includes, at a minimum, analysis of applicable student achievement data and educational partner feedback.

How the Action(s) are Designed to Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis

Provide an explanation of how the action as designed will address the unique identified need(s) of the LEA’s unduplicated student group(s) for whom the action is principally directed and the rationale for why the action is being provided on an LEA-wide or schoolwide basis.

- As stated above, conclusory statements that a service will help achieve an expected outcome for the goal, without an explicit connection or further explanation as to how, are not sufficient.
- Further, simply stating that an LEA has a high enrollment percentage of a specific student group or groups does not meet the increased or improved services standard because enrolling students is not the same as serving students.

Metric(s) to Monitor Effectiveness

Identify the metric(s) being used to measure the progress and effectiveness of the action(s).

Note for COEs and Charter Schools: In the case of COEs and charter schools, schoolwide and LEA-wide are considered to be synonymous.

Limited Actions

For each action being solely provided to one or more unduplicated student group(s), provide an explanation of (1) the unique identified need(s) of the unduplicated student group(s) being served, (2) how the action is designed to address the identified need(s), and (3) how the effectiveness of the action in improving outcomes for the unduplicated student group(s) will be measured.

If the LEA has provided the required descriptions in the Action Descriptions, state as such.

Complete the table as follows:

Identified Need(s)

Provide an explanation of the unique need(s) of the unduplicated student group(s) being served identified through the LEA’s needs assessment. A meaningful needs assessment includes, at a minimum, analysis of applicable student achievement data and educational partner feedback.

How the Action(s) are Designed to Address Need(s)

Provide an explanation of how the action is designed to address the unique identified need(s) of the unduplicated student group(s) being served.

Metric(s) to Monitor Effectiveness

Identify the metric(s) being used to measure the progress and effectiveness of the action(s).

For any limited action contributing to meeting the increased or improved services requirement that is associated with a Planned Percentage of Improved Services in the Contributing Summary Table rather than an expenditure of LCFF funds, describe the methodology that was used to determine the contribution of the action towards the proportional percentage, as applicable.

- For each action with an identified Planned Percentage of Improved Services, identify the goal and action number and describe the methodology that was used.
- When identifying a Planned Percentage of Improved Services, the LEA must describe the methodology that it used to determine the contribution of the action towards the proportional percentage. The percentage of improved services for an action corresponds to the amount of LCFF funding that the LEA estimates it would expend to implement the action if it were funded.
- For example, an LEA determines that there is a need to analyze data to ensure that instructional aides and expanded learning providers know what targeted supports to provide to students who are foster youth. The LEA could implement this action by hiring additional staff to collect and analyze data and to coordinate supports for students, which, based on the LEA's current pay scale, the LEA estimates would cost \$165,000. Instead, the LEA chooses to utilize a portion of existing staff time to analyze data relating to students who are foster youth. This analysis will then be shared with site principals who will use the data to coordinate services provided by instructional assistants and expanded learning providers to target support to students. In this example, the LEA would divide the estimated cost of \$165,000 by the amount of LCFF Funding identified in the Total Planned Expenditures Table and then convert the quotient to a percentage. This percentage is the Planned Percentage of Improved Services for the action.

Additional Concentration Grant Funding

A description of the plan for how the additional concentration grant add-on funding identified above will be used to increase the number of staff providing direct services to students at schools that have a high concentration (above 55 percent) of foster youth, English learners, and low-income students, as applicable.

An LEA that receives the additional concentration grant add-on described in *EC* Section 42238.02 is required to demonstrate how it is using these funds to increase the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is greater than 55 percent as compared to the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is equal to or less than 55 percent. The staff who provide direct services to students must be certificated staff and/or classified staff employed by the LEA; classified staff includes custodial staff.

Provide the following descriptions, as applicable to the LEA:

- An LEA that does not receive a concentration grant or the concentration grant add-on must indicate that a response to this prompt is not applicable.

- Identify the goal and action numbers of the actions in the LCAP that the LEA is implementing to meet the requirement to increase the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is greater than 55 percent.
- An LEA that does not have comparison schools from which to describe how it is using the concentration grant add-on funds, such as a single-school LEA or an LEA that only has schools with an enrollment of unduplicated students that is greater than 55 percent, must describe how it is using the funds to increase the number of credentialed staff, classified staff, or both, including custodial staff, who provide direct services to students at selected schools and the criteria used to determine which schools require additional staffing support.
- In the event that an additional concentration grant add-on is not sufficient to increase staff providing direct services to students at a school with an enrollment of unduplicated students that is greater than 55 percent, the LEA must describe how it is using the funds to retain staff providing direct services to students at a school with an enrollment of unduplicated students that is greater than 55 percent.

Complete the table as follows:

- Provide the staff-to-student ratio of classified staff providing direct services to students with a concentration of unduplicated students that is 55 percent or less and the staff-to-student ratio of classified staff providing direct services to students at schools with a concentration of unduplicated students that is greater than 55 percent, as applicable to the LEA.
 - The LEA may group its schools by grade span (Elementary, Middle/Junior High, and High Schools), as applicable to the LEA.
 - The staff-to-student ratio must be based on the number of full-time equivalent (FTE) staff and the number of enrolled students as counted on the first Wednesday in October of each year.
- Provide the staff-to-student ratio of certificated staff providing direct services to students at schools with a concentration of unduplicated students that is 55 percent or less and the staff-to-student ratio of certificated staff providing direct services to students at schools with a concentration of unduplicated students that is greater than 55 percent, as applicable to the LEA.
 - The LEA may group its schools by grade span (Elementary, Middle/Junior High, and High Schools), as applicable to the LEA.
 - The staff-to-student ratio must be based on the number of FTE staff and the number of enrolled students as counted on the first Wednesday in October of each year.

Action Tables

Complete the Total Planned Expenditures Table for each action in the LCAP. The information entered into this table will automatically populate the other Action Tables. Information is only entered into the Total Planned Expenditures Table, the Annual Update Table, the Contributing Actions Annual Update Table, and the LCFF Carryover Table. The word “input” has been added to column headers to aid in identifying the column(s) where information will be entered. Information is not entered on the remaining Action tables.

The following tables are required to be included as part of the LCAP adopted by the local governing board or governing body:

- Table 1: Total Planned Expenditures Table (for the coming LCAP Year)
- Table 2: Contributing Actions Table (for the coming LCAP Year)
- Table 3: Annual Update Table (for the current LCAP Year)
- Table 4: Contributing Actions Annual Update Table (for the current LCAP Year)
- Table 5: LCFF Carryover Table (for the current LCAP Year)

Note: The coming LCAP Year is the year that is being planned for, while the current LCAP year is the current year of implementation. For example, when developing the 2024–25 LCAP, 2024–25 will be the coming LCAP Year and 2023–24 will be the current LCAP Year.

Total Planned Expenditures Table

In the Total Planned Expenditures Table, input the following information for each action in the LCAP for that applicable LCAP year:

- **LCAP Year:** Identify the applicable LCAP Year.
- **1. Projected LCFF Base Grant:** Provide the total amount estimated LCFF entitlement for the coming school year, excluding the supplemental and concentration grants and the add-ons for the Targeted Instructional Improvement Block Grant program, the former Home-to-School Transportation program, and the Small School District Transportation program, pursuant to 5 CCR Section 15496(a)(8). Note that the LCFF Base Grant for purposes of the LCAP also includes the Necessary Small Schools and Economic Recovery Target allowances for school districts, and County Operations Grant for COEs.

See EC sections 2574 (for COEs) and 42238.02 (for school districts and charter schools), as applicable, for LCFF entitlement calculations.
- **2. Projected LCFF Supplemental and/or Concentration Grants:** Provide the total amount of LCFF supplemental and concentration grants estimated on the basis of the number and concentration of unduplicated students for the coming school year.
- **3. Projected Percentage to Increase or Improve Services for the Coming School Year:** This percentage will not be entered; it is calculated based on the Projected LCFF Base Grant and the Projected LCFF Supplemental and/or Concentration Grants, pursuant to 5 CCR Section 15496(a)(8). This is the percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the coming LCAP year.
- **LCFF Carryover — Percentage:** Specify the LCFF Carryover — Percentage identified in the LCFF Carryover Table from the prior LCAP year. If a carryover percentage is not identified in the LCFF Carryover Table, specify a percentage of zero (0.00%).
- **Total Percentage to Increase or Improve Services for the Coming School Year:** This percentage will not be entered; it is calculated based on the Projected Percentage to Increase or Improve Services for the Coming School Year and the LCFF Carryover —

Percentage. ***This is the percentage by which the LEA must increase or improve services for unduplicated pupils as compared to the services provided to all students in the coming LCAP year.***

- **Goal #:** Enter the LCAP Goal number for the action.
- **Action #:** Enter the action's number as indicated in the LCAP Goal.
- **Action Title:** Provide a title of the action.
- **Student Group(s):** Indicate the student group or groups who will be the primary beneficiary of the action by entering "All," or by entering a specific student group or groups.
- **Contributing to Increased or Improved Services?:** Type "Yes" if the action **is** included as contributing to meeting the increased or improved services requirement; OR, type "No" if the action is **not** included as contributing to meeting the increased or improved services requirement.
- If "Yes" is entered into the Contributing column, then complete the following columns:
 - **Scope:** The scope of an action may be LEA-wide (i.e., districtwide, countywide, or charterwide), schoolwide, or limited. An action that is LEA-wide in scope upgrades the entire educational program of the LEA. An action that is schoolwide in scope upgrades the entire educational program of a single school. An action that is limited in its scope is an action that serves only one or more unduplicated student groups.
 - **Unduplicated Student Group(s):** Regardless of scope, contributing actions serve one or more unduplicated student groups. Indicate one or more unduplicated student groups for whom services are being increased or improved as compared to what all students receive.
 - **Location:** Identify the location where the action will be provided. If the action is provided to all schools within the LEA, the LEA must indicate "All Schools." If the action is provided to specific schools within the LEA or specific grade spans only, the LEA must enter "Specific Schools" or "Specific Grade Spans." Identify the individual school or a subset of schools or grade spans (e.g., all high schools or grades transitional kindergarten through grade five), as appropriate.
- **Time Span:** Enter "ongoing" if the action will be implemented for an indeterminate period of time. Otherwise, indicate the span of time for which the action will be implemented. For example, an LEA might enter "1 Year," or "2 Years," or "6 Months."
- **Total Personnel:** Enter the total amount of personnel expenditures utilized to implement this action.
- **Total Non-Personnel:** This amount will be automatically calculated based on information provided in the Total Personnel column and the Total Funds column.

- **LCFF Funds:** Enter the total amount of LCFF funds utilized to implement this action, if any. LCFF funds include all funds that make up an LEA's total LCFF target (i.e., base grant, grade span adjustment, supplemental grant, concentration grant, Targeted Instructional Improvement Block Grant, and Home-To-School Transportation).
 - **Note:** For an action to contribute towards meeting the increased or improved services requirement, it must include some measure of LCFF funding. The action may also include funding from other sources, however the extent to which an action contributes to meeting the increased or improved services requirement is based on the LCFF funding being used to implement the action.
- **Other State Funds:** Enter the total amount of Other State Funds utilized to implement this action, if any.
 - **Note:** Equity Multiplier funds must be included in the "Other State Funds" category, not in the "LCFF Funds" category. As a reminder, Equity Multiplier funds must be used to supplement, not supplant, funding provided to Equity Multiplier schoolsites for purposes of the LCFF, the ELO-P, the LCRS, and/or the CCSPP. This means that Equity Multiplier funds must not be used to replace funding that an Equity Multiplier schoolsite would otherwise receive to implement LEA-wide actions identified in the LEA's LCAP or that an Equity Multiplier schoolsite would otherwise receive to implement provisions of the ELO-P, the LCRS, and/or the CCSPP.
- **Local Funds:** Enter the total amount of Local Funds utilized to implement this action, if any.
- **Federal Funds:** Enter the total amount of Federal Funds utilized to implement this action, if any.
- **Total Funds:** This amount is automatically calculated based on amounts entered in the previous four columns.
- **Planned Percentage of Improved Services:** For any action identified as contributing, being provided on a Limited basis to unduplicated students, and that does not have funding associated with the action, enter the planned quality improvement anticipated for the action as a percentage rounded to the nearest hundredth (0.00%). A limited action is an action that only serves foster youth, English learners, and/or low-income students.
 - As noted in the instructions for the Increased or Improved Services section, when identifying a Planned Percentage of Improved Services, the LEA must describe the methodology that it used to determine the contribution of the action towards the proportional percentage. The percentage of improved services for an action corresponds to the amount of LCFF funding that the LEA estimates it would expend to implement the action if it were funded.

For example, an LEA determines that there is a need to analyze data to ensure that instructional aides and expanded learning providers know what targeted supports to provide to students who are foster youth. The LEA could implement this action by hiring additional staff to collect and analyze data and to coordinate supports for students, which, based on the LEA's current pay scale, the LEA estimates would cost \$165,000. Instead, the LEA chooses to utilize a portion of existing staff time to analyze data relating to students who are foster youth. This analysis will then be shared with site principals who will use the data to coordinate services provided by instructional assistants and expanded learning providers to target support to students. In this example, the LEA would divide the estimated cost of \$165,000 by the amount of LCFF Funding identified in the Data Entry Table and then convert the quotient to a percentage. This percentage is the Planned Percentage of Improved Services for the action.

Contributing Actions Table

As noted above, information will not be entered in the Contributing Actions Table; however, the ‘Contributing to Increased or Improved Services?’ column will need to be checked to ensure that only actions with a “Yes” are displaying. If actions with a “No” are displayed or if actions that are contributing are not displaying in the column, use the drop-down menu in the column header to filter only the “Yes” responses.

Annual Update Table

In the Annual Update Table, provide the following information for each action in the LCAP for the relevant LCAP year:

- **Estimated Actual Expenditures:** Enter the total estimated actual expenditures to implement this action, if any.

Contributing Actions Annual Update Table

In the Contributing Actions Annual Update Table, check the ‘Contributing to Increased or Improved Services?’ column to ensure that only actions with a “Yes” are displaying. If actions with a “No” are displayed or if actions that are contributing are not displaying in the column, use the drop-down menu in the column header to filter only the “Yes” responses. Provide the following information for each contributing action in the LCAP for the relevant LCAP year:

- **6. Estimated Actual LCFF Supplemental and/or Concentration Grants:** Provide the total amount of LCFF supplemental and concentration grants estimated based on the number and concentration of unduplicated students in the current school year.
- **Estimated Actual Expenditures for Contributing Actions:** Enter the total estimated actual expenditure of LCFF funds used to implement this action, if any.
- **Estimated Actual Percentage of Improved Services:** For any action identified as contributing, being provided on a Limited basis only to unduplicated students, and that does not have funding associated with the action, enter the total estimated actual quality improvement anticipated for the action as a percentage rounded to the nearest hundredth (0.00%).
 - Building on the example provided above for calculating the Planned Percentage of Improved Services, the LEA in the example implements the action. As part of the annual update process, the LEA reviews implementation and student outcome data and determines that the action was implemented with fidelity and that outcomes for foster youth students improved. The LEA reviews the original estimated cost for the action and determines that had it hired additional staff to collect and analyze data and to coordinate supports for students that estimated actual cost would have been \$169,500 due to a cost of living adjustment. The LEA would divide the estimated actual cost of \$169,500 by the amount of LCFF Funding identified in the Data Entry Table and then convert the quotient to a percentage. This percentage is the Estimated Actual Percentage of Improved Services for the action.

LCFF Carryover Table

- **9. Estimated Actual LCFF Base Grant:** Provide the total amount of estimated LCFF Target Entitlement for the current school year, excluding the supplemental and concentration grants and the add-ons for the Targeted Instructional Improvement Block Grant program,

the former Home-to-School Transportation program, and the Small School District Transportation program, pursuant to 5 CCR Section 15496(a)(8). Note that the LCFF Base Grant for purposes of the LCAP also includes the Necessary Small Schools and Economic Recovery Target allowances for school districts, and County Operations Grant for COEs. See EC sections 2574 (for COEs) and 42238.02 (for school districts and charter schools), as applicable, for LCFF entitlement calculations.

- **10. Total Percentage to Increase or Improve Services for the Current School Year:** This percentage will not be entered. The percentage is calculated based on the amounts of the Estimated Actual LCFF Base Grant (9) and the Estimated Actual LCFF Supplemental and/or Concentration Grants (6), pursuant to 5 CCR Section 15496(a)(8), plus the LCFF Carryover – Percentage from the prior year. This is the percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the current LCAP year.

Calculations in the Action Tables

To reduce the duplication of effort of LEAs, the Action Tables include functionality such as pre-population of fields and cells based on the information provided in the Data Entry Table, the Annual Update Summary Table, and the Contributing Actions Table. For transparency, the functionality and calculations used are provided below.

Contributing Actions Table

- **4. Total Planned Contributing Expenditures (LCFF Funds)**
 - This amount is the total of the Planned Expenditures for Contributing Actions (LCFF Funds) column.
- **5. Total Planned Percentage of Improved Services**
 - This percentage is the total of the Planned Percentage of Improved Services column.
- **Planned Percentage to Increase or Improve Services for the coming school year (4 divided by 1, plus 5)**
 - This percentage is calculated by dividing the Total Planned Contributing Expenditures (4) by the Projected LCFF Base Grant (1), converting the quotient to a percentage, and adding it to the Total Planned Percentage of Improved Services (5).

Contributing Actions Annual Update Table

Pursuant to EC Section 42238.07(c)(2), if the Total Planned Contributing Expenditures (4) is less than the Estimated Actual LCFF Supplemental and Concentration Grants (6), the LEA is required to calculate the difference between the Total Planned Percentage of Improved Services (5) and the Total Estimated Actual Percentage of Improved Services (7). If the Total Planned Contributing Expenditures (4) is equal to or greater than the Estimated Actual LCFF Supplemental and Concentration Grants (6), the Difference Between Planned and Estimated Actual Percentage of Improved Services will display “Not Required.”

- **6. Estimated Actual LCFF Supplemental and Concentration Grants**

- This is the total amount of LCFF supplemental and concentration grants the LEA estimates it will actually receive based on the number and concentration of unduplicated students in the current school year.
- **4. Total Planned Contributing Expenditures (LCFF Funds)**
 - This amount is the total of the Last Year's Planned Expenditures for Contributing Actions (LCFF Funds).
- **7. Total Estimated Actual Expenditures for Contributing Actions**
 - This amount is the total of the Estimated Actual Expenditures for Contributing Actions (LCFF Funds).
- **Difference Between Planned and Estimated Actual Expenditures for Contributing Actions (Subtract 7 from 4)**
 - This amount is the Total Estimated Actual Expenditures for Contributing Actions (7) subtracted from the Total Planned Contributing Expenditures (4).
- **5. Total Planned Percentage of Improved Services (%)**
 - This amount is the total of the Planned Percentage of Improved Services column.
- **8. Total Estimated Actual Percentage of Improved Services (%)**
 - This amount is the total of the Estimated Actual Percentage of Improved Services column.
- **Difference Between Planned and Estimated Actual Percentage of Improved Services (Subtract 5 from 8)**
 - This amount is the Total Planned Percentage of Improved Services (5) subtracted from the Total Estimated Actual Percentage of Improved Services (8).

LCFF Carryover Table

- **10. Total Percentage to Increase or Improve Services for the Current School Year (6 divided by 9 plus Carryover %)**
 - This percentage is the Estimated Actual LCFF Supplemental and/or Concentration Grants (6) divided by the Estimated Actual LCFF Base Grant (9) plus the LCFF Carryover – Percentage from the prior year.
- **11. Estimated Actual Percentage of Increased or Improved Services (7 divided by 9, plus 8)**
 - This percentage is the Total Estimated Actual Expenditures for Contributing Actions (7) divided by the LCFF Funding (9), then converting the quotient to a percentage and adding the Total Estimated Actual Percentage of Improved Services (8).
- **12. LCFF Carryover — Dollar Amount LCFF Carryover (Subtract 11 from 10 and multiply by 9)**

- If the Estimated Actual Percentage of Increased or Improved Services (11) is less than the Estimated Actual Percentage to Increase or Improve Services (10), the LEA is required to carry over LCFF funds.

The amount of LCFF funds is calculated by subtracting the Estimated Actual Percentage to Increase or Improve Services (11) from the Estimated Actual Percentage of Increased or Improved Services (10) and then multiplying by the Estimated Actual LCFF Base Grant (9). This amount is the amount of LCFF funds that is required to be carried over to the coming year.

- **13. LCFF Carryover — Percentage (12 divided by 9)**

- This percentage is the unmet portion of the Percentage to Increase or Improve Services that the LEA must carry over into the coming LCAP year. The percentage is calculated by dividing the LCFF Carryover (12) by the LCFF Funding (9).
