

2026/2027

LCAP

LOCAL CONTROL AND ACCOUNTABILITY PLAN

ANNUAL UPDATE

Board of Trustees

Public Hearing: June 10, 2026

Approved: June 17, 2026

LCFF Budget Overview for Parents

Local Educational Agency (LEA) Name: Walnut Valley Unified School District

CDS Code: 19-73460-0000000

School Year: 2026-27

LEA contact information:

Dr. Jeanette J. Koh

Assistant Superintendent, Educational Services

jkoh@wvusd.org

(909) 595-1261

School districts receive funding from different sources: state funds under the Local Control Funding Formula (LCFF), other state funds, local funds, and federal funds. LCFF funds include a base level of funding for all LEAs and extra funding - called "supplemental and concentration" grants - to LEAs based on the enrollment of high needs students (Foster Youth, English learners, and low-income students).

Budget Overview for the 2026-27 School Year

This chart shows the total general purpose revenue Walnut Valley Unified School District expects to receive in the coming year from all sources.

The text description for the above chart is as follows: The total revenue projected for Walnut Valley Unified School District is \$234,544,293, of which \$181,418,150.00 is Local Control Funding Formula (LCFF), \$23,600,224.00 is other state funds, \$25,346,487.00 is local funds, and \$4,179,432.00 is federal funds. Of the \$181,418,150.00 in LCFF Funds, \$11,072,845.00 is generated based on the enrollment of high needs students (Foster Youth, English learner, and low-income students).

LCFF Budget Overview for Parents

The LCFF gives school districts more flexibility in deciding how to use state funds. In exchange, school districts must work with parents, educators, students, and the community to develop a Local Control and Accountability Plan (LCAP) that shows how they will use these funds to serve students.

This chart provides a quick summary of how much Walnut Valley Unified School District plans to spend for 2026-27. It shows how much of the total is tied to planned actions and services in the LCAP.

The text description of the above chart is as follows: Walnut Valley Unified School District plans to spend \$237,092,415.00 for the 2026-27 school year. Of that amount, \$224,634,868.00 is tied to actions/services in the LCAP and \$12,457,547 is not included in the LCAP. The budgeted expenditures that are not included in the LCAP will be used for the following:

Other expenditures above the LCAP, not included in the plan, include overhead expenditures such as water, electricity, gas waste management, and other operational and administrative costs.

Increased or Improved Services for High Needs Students in the LCAP for the 2026-27 School Year

In 2026-27, Walnut Valley Unified School District is projecting it will receive \$11,072,845.00 based on the enrollment of Foster Youth, English learner, and low-income students. Walnut Valley Unified School District must describe how it intends to increase or improve services for high needs students in the LCAP. Walnut Valley Unified School District plans to spend \$11,072,845.00 towards meeting this requirement, as described in the LCAP.

LCFF Budget Overview for Parents

Update on Increased or Improved Services for High Needs Students in 2025-26

Prior Year Expenditures: Increased or Improved Services for High Needs Students

This chart compares what Walnut Valley Unified School District budgeted last year in the LCAP for actions and services that contribute to increasing or improving services for high needs students with what Walnut Valley Unified School District estimates it has spent on actions and services that contribute to increasing or improving services for high needs students in the current year.

The text description of the above chart is as follows: In 2025-26, Walnut Valley Unified School District's LCAP budgeted \$10,634,943.00 for planned actions to increase or improve services for high needs students. Walnut Valley Unified School District actually spent \$10,793,891.00 for actions to increase or improve services for high needs students in 2025-26.

Local Control and Accountability Plan

The instructions for completing the Local Control and Accountability Plan (LCAP) follow the template.

Plan Summary [2026-27]

General Information

A description of the LEA, its schools, and its students in grades transitional kindergarten–12, as applicable to the LEA. LEAs may also provide information about their strategic plan, vision, etc.

The Walnut Valley Unified School District (District) is in the Walnut and Diamond Bar communities. The District is approximately 35 miles east of Los Angeles, between the Pomona Freeway and the San Gabriel Mountains. The District serves a predominantly middle- and upper-middle-class community, with professional, commercial, cultural, and athletic opportunities available to residents. Walnut Valley schools educate students in Preschool, Transitional Kindergarten, Kindergarten through 12th grade, and Adult Transition. The District houses nine elementary schools (four are Title 1 Targeted Assistance Schools), three middle schools, two comprehensive high schools, one continuation/alternative education high school, and a Special Education preschool. The California State Department of Education and the United States Department of Education have recognized Walnut Valley schools: numerous school sites are California Gold Ribbon, California Distinguished Schools, Schools to Watch, and National Blue Ribbon Schools. Five of the District's elementary schools (Collegewood, Evergreen, Maple Hill, Walnut Elementary, and Westhoff) have received the 2023 California Distinguished School Award, Chaparral Middle School received the 2024 California Distinguished School Award, Walnut Elementary School has received the 2025 California Distinguished School Award, and all middle schools and all high schools have received the 2026 California Distinguished School Award, all for exceptional student performance and Achievement Gap Closers. Diamond Bar High School received the 2022 National Blue Ribbon Award as an exemplary high-performing school. The District's schools are high-achieving and have risen to the challenge of educating every child. In June 2018, the District was recognized by the National Forum as a Schools to Watch District to Accelerate Middle-Grades Reform. The District was among only 17 school districts nationwide to earn this distinction. Additionally, the District continues to receive public accolades as a top-performing school district, including an A+ grade and a top 1 % ranking in the 2026 Niche.com report on Best School Districts in America. The District's impressive report card across numerous categories at the local, state, and national levels included a ranking in the top 6% of all

school districts in California. Niche, a leading research website, also ranked Diamond Bar and Walnut High Schools in the top 2% of 20,733 high schools nationwide and in the top 4% of California's best high schools.

The International Baccalaureate and Advanced Placement programs at both comprehensive high schools provide students with a challenging academic experience that prepares them for success in college and their careers. Both programs have been recognized for their excellence at the state, federal, and international levels. Two elementary schools offer the International Baccalaureate Primary Years Program (PYP). This international curriculum teaches children to be global thinkers through creative thought and inquiry. One elementary school offers the Mandarin Dual Language Immersion Program, and one middle school offers Mandarin Language as an elective for students in grades 6-8. The rigorous program develops students into bilingual, biliterate, and bicultural individuals.

The comprehensive high schools also offer rigorous and relevant Career Technical Education (CTE) courses organized into career pathways. Students enrolled in these CTE pathways benefit from courses that prepare them for college and careers in various industry sectors, including Engineering and Architecture, Health Science and Medical Technology, and Information and Communication Technologies. All three middle schools have been recognized and re-designated as Schools to Watch by the National Forum to Accelerate Middle-Grades Reform. Walnut Valley is one of 14 school districts in the nation in which all middle schools have been awarded this prestigious recognition. Each middle school offers a variety of programs, electives, and extracurricular activities, including award-winning music programs, intramural athletics, and after-school clubs.

All nine elementary schools have earned the 2025 California Positive Behavioral Interventions and Supports (PBIS) System of Recognition, reflecting excellence in implementing the core features of PBIS. All elementary schools practice PBIS protocols to ensure a safe and respectful learning environment. Each elementary school has received PBIS state recognition for fidelity to the practice and for implementation and sustainability success.

Walnut Valley serves a student population of approximately 14,490. The District takes pride in developing an appreciation for the cultural and ethnic diversity represented on every campus. The racial/ethnic demographics, as reported on the 2025 California Dashboard, are as follows: 64.8% Asian/Pacific Islander, 20.9% Hispanic/Latino, 3.5% Caucasian/White, 5.4% Filipino, and 1.0% Black/African American. The District serves about 1,065 students on an Individualized Education Plan (7.6%) and 1,973 English Learner students (14.1%). There are roughly 3,629 (25.9%) students in the Free/Reduced Price Lunch program. Finally, the District supports the needs of its nearly 17 foster youth students and 32 students experiencing homelessness. Walnut Valley students experience a rigorous academic program. Every student's progress is monitored, and various interventions are offered to learners needing additional assistance. Through personal attention and concerted efforts by the school team, students can meet their post-secondary goals.

Walnut Valley students have numerous opportunities to enrich their educational experience through various clubs, athletic teams, and student government. Walnut Valley recognizes the importance of educating the whole child and continues offering elementary and secondary students visual and performing arts programs. The District offers one of the nation's premier music programs. The District continues to focus on students' mental health and wellness. Several teams have convened over ten consecutive years to research and design support mechanisms for students' mental health, including the Social and Emotional Learning Council and the Crisis Response Team.

Walnut Valley is proud of its highly qualified staff. The District recognizes that professional excellence requires teachers to be lifelong learners who continually seek to improve their skills. This includes expanding one's repertoire of instructional strategies and becoming an

educational researcher using data to better serve every student's learning needs. A number of Walnut Valley teachers are National Board certified. Two exemplary middle school math teachers were named California Teachers of the Year in 2004 and 2007. This year, the District's Induction Program and Clear Administrative Services Credential Program (CASC) continued with an increased number of participants. Mentors supported their assigned induction candidates and met all program requirements. Newly hired teachers with a Preliminary Credential receive support and training from an exemplary Teacher Induction Program. This state-approved program allows teachers to earn their Professional Clear Credential.

Walnut Valley Unified School District's five focus areas, student achievement, strengthening relationships, fiscal stability and operational effectiveness, leadership development, and safety and wellness, serve as core beliefs and key targets to foster the success of all students. These five focus areas reflect what we stand for and aim to achieve. These focus areas align with California's State Priorities and Local Indicators outlined in our Local Control and Accountability Plan (LCAP). The LCAP reflects a commitment to serving all students in Walnut Valley. The LCAP describes specific actions, services, and expenditures that serve as a strategic plan to ensure the ongoing success of all students, particularly English Learner students, low-income students, and foster youth. As the Local Control Funding Formula (LCFF) has progressed, the LCAP has transitioned into a collaborative guidance plan for the Walnut Valley Unified School District. Building strong relationships, being fiscally stable, adopting a whole-child approach to student achievement, developing leaders within the organization, and ensuring the safety and wellness of all students and educational partners are the top five priorities set by the Board of Trustees and the Superintendent.

No schools in the District receive the Equity Multiplier funding.

Reflections: Annual Performance

A reflection on annual performance based on a review of the California School Dashboard (Dashboard) and local data.

Walnut Valley Unified School District believes that every story matters, emphasizing the importance of honoring the voices, experiences, and contributions of students and all educational partners in shaping a thriving and inclusive learning community. This is reflected in our motto for the 2025/2026 school year: "The Story Wins." The story of all students is especially embedded into the District's continued progress toward LCAP goals, whether it is continuing equitable access to rigorous coursework for all students, strengthening targeted support for English Learner students, Long-Term English Learner students, and students with disabilities, or focusing on wellness resources to support the social and emotional growth of all students. Meaningful input from all educational partners continues to remain a priority, ensuring that the stories of students, families, and staff are an integral part of the District's broader story and efforts towards continuous improvement.

In 2024/2025, all schools in the District remained Above Standard in English Language Arts and Math, and all schools achieved Blue or Green on the Dashboard for English Language Arts and/or Math. WVUSD students continue to achieve at the highest levels in the county of Los Angeles and in the State of California.

Spring 2025 CAASPP data demonstrates that 76.16% of students met or exceeded English Language Arts (ELA) standards in comparison to 76.04% in Spring 2024; 72.82% of students met or exceeded math standards in comparison to 72.17% in Spring 2024; and 61.00% of students met or exceeded science standards, with an increase from 59.82% in Spring 2024. WVUSD's 2025 CAASPP results in ELA, Math, and Science were significantly higher than the performance of students in Los Angeles County (50.50% in ELA and 39.25% in Math and

32.10% in Science) and the State of California (48.82% in ELA and 37.30% in Math and 32.66%). WVUSD continues to see consistent progress and improvements in ELA, Math, and Science.

English Learner students in WVUSD in Spring 2025 continued to surpass county and state levels, with 62.1% of students making progress towards English language proficiency, as measured by the summative English Language Proficiency Assessment for California (ELPAC). Although this was a decline of 2.8% from the previous year for English Learner students, Long-Term English Learner students demonstrated growth and achieved the highest performance status (Blue) with 67% of students making progress in 2025.

Schools within the District that received the lowest performance (Red) on one or more state indicators included the following sites and student groups:

Castle Rock Elementary School: students with disabilities in Math and Chronic Absenteeism;

Collegewood Elementary School: students with disabilities in Chronic Absenteeism;

Cyrus J. Morris Elementary School: socioeconomically disadvantaged students and Hispanic students in Chronic Absenteeism;

Diamond Bar High School: English language learners and students with disabilities in English Language Arts (ELA);

Suzanne Middle School: students with disabilities in English Language Arts (ELA) and Math;

Vejar Elementary School: students with disabilities in Chronic Absenteeism.

In addition, student groups in WVUSD who received the lowest performance (Red) on one or more state indicators in 2025 include foster youth in Suspension Rate and homeless youth and foster youth in Chronic Absenteeism. WVUSD, in partnership with Dr. Luis Cruz and Associates, continued to implement a series of professional development sessions in 2025/2026 on Professional Learning Communities. This professional development ensured that all schools are able to implement WVUSD's Foundational Commitments to Instruction to systematize Professional Learning Communities (PLC) districtwide to ensure all students are learning at high levels. The following foundational commitments ensure that every student receives the instruction, support, and opportunity they need to succeed: 1) We Are United for All Students: Every educator is part of a Professional Learning Community (PLC) and shares responsibility for the learning of all students; 2) We Teach What Matters Most: Every student has access to a guaranteed and viable curriculum. We are committed to teaching essential standards with clarity and purpose in every classroom; 3) We Monitor Learning Together: PLCs develop and use Common Formative Assessments (CFAs) to check for understanding, guide instruction, and ensure every student is progressing; 4) We Respond to Data: We use CFA results to identify who has learned and who needs more time or support, because every student deserves to succeed; and 5) We Intervene and Extend With Purpose: Our schools provide systematic time and support for both intervention and extension, ensuring students get what they need, when they need it. These foundational commitments will provide a system for all educators to respond to the needs of their students, whether academic, social-emotional, or behavioral, while allowing the story of each student to guide the instructional practices and interventions.

In 2023, the following student groups received a Red on the Dashboard: foster youth in English Language Arts (ELA), Math, and Suspension Rate; homeless youth in Math, Chronic Absenteeism, and Suspension Rate; and students with disabilities in Chronic Absenteeism. Schools within the District that received the lowest performance (Red) also include:

Castle Rock Elementary School: English Learner Progress; Hispanic students and students with disabilities in Chronic Absenteeism;

Collegewood Elementary School: Hispanic students and students with disabilities in Chronic Absenteeism;

Cyrus J. Morris Elementary School: socioeconomically disadvantaged students and Hispanic students in Chronic Absenteeism;

Diamond Bar High School: English language learners and students with disabilities in English Language Arts (ELA); and students with disabilities in Math;

Ron Hockwalt Academies: all students and Hispanic students in Suspension Rate;
South Pointe Middle School: students with disabilities in Math and Suspension Rate; Hispanic students in Suspension Rate; and students with disabilities, Hispanic students, and White students in Chronic Absenteeism;
Vejar Elementary School: socioeconomically disadvantaged students, Filipino students, and Hispanic students in Chronic Absenteeism;
Walnut Elementary School: students with disabilities in Chronic Absenteeism

The following actions address all student groups in red on English Language Arts at the District and school sites: Actions 2.1, 2.2, 2.3, 2.5, 2.6, 2.9, 2.11. The following actions address all student groups in red on Math at the District and school sites: Actions 2.1, 2.2, 2.3, 2.5, 2.9, 2.11. The following actions address all student groups in red on Suspensions at the District and school sites: Actions 1.6, 3.3, 3.4, 3.5, 3.6, 3.7, 3.8, 3.9, 3.10, 3.12, 3.13. The following actions address all student groups in red on Chronic Absenteeism at the District and school sites: Actions 1.1, 1.4, 1.6, 3.3, 3.6, 3.7, 3.8, 3.9, 3.10, 3.12, 3.13. The following actions address all student groups in red on the English Learner Progress Indicator at the District and school sites: Actions 2.6, 2.9, 2.11. The following actions address all student groups in red at the elementary sites: Actions 2.5, 2.6, 2.9, 2.10, 2.18, 3.3, 3.7. The following actions address all student groups in red at the high school sites: Actions 1.1, 2.1, 2.2, 2.3, 2.5, 2.6, 2.9, 2.15, 2.18, 3.3, 3.7.

Walnut Valley has unexpended Learning Recovery Emergency Block Grant funds in 2026/2027, which will be used in Actions 2.1, 2.2, 2.3, 2.11, 3.4, and 3.12:

Goal 2, Action 2.1 describes the use of partially-funded LREBG (\$300,000) to provide professional development to staff on the math and English Language Arts framework to identify essential standards, learning progression, and common assessments. This is allowable under Education Code 42356(b): Accelerating progress to close learning gaps through the implementation, expansion, or enhancement of learning supports. K-12 teachers will receive professional development on the updated Common Core math framework and standards to align with the math curriculum adoption. K-5 teachers will also receive professional development on the updated English Language Arts (ELA) curriculum. Based on the District's Needs Assessment, specific student groups, including students with disabilities and Long-Term English Learner students, demonstrate a need for support in ELA and Math, according to the 2025 CA Dashboard. Long-term English Learner students performed 38.1 points below standard in English Language Arts (Orange), and students with disabilities performed 80.6 points below standard in Math (Orange). The metrics used to measure this will be 2.6 and 2.7: Performance on statewide CAASPP English Language Arts (ELA) and math assessments. According to the research of John Hattie, collective teacher efficacy has the highest affect size on student achievement, with a value of 1.57, which directly correlates to teacher professional development. The effect size of professional development is 0.6, which, combined with collective teacher efficacy, will positively affect student achievement in the areas of math and ELA.

Goal 2, Action 2.2 describes using LREBG (\$425,000) to close the achievement gap by improving student outcomes for student groups through targeted professional development in ELD, ELA, and Math to identify essential standards, learning progression, and common assessments, and to use data to inform instruction to address learning gaps for particular students. Based on the District's Needs Assessment, specific student groups, including English Learner students, foster youth, and socioeconomically disadvantaged students, demonstrated a need for support in ELA and Math, according to the 2025 CA Dashboard. Long-term English Learner students performed 40.5 points below the standard in Math (Orange), and the achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting or exceeding standards on the CAASPP test in ELA increased 2.06% from the previous year (from 9.82% to 11.88%). Foster youth remains an area of need based on the District's designation of Differentiated Assistance and specifically, foster youth receiving a red status in Suspension Rate and Chronic Absenteeism. Although 2025 CAASPP data is suppressed in ELA and Math

because fewer than 11 students tested, research indicates that students who are chronically absent are much less likely to read at grade level by third grade, making students four times more likely to not graduate high school (U.S. Department of Education).

Goal 2, Action 2.3 describes using LREBG (\$216,000) to provide diagnostic progress monitoring to assess students frequently and intervene with targeted instruction to address learning gaps. Based on the District's Needs Assessment, the achievement gap for specific student groups continues to be an area of need. For example, the achievement gap between English-only students and English Learner students continues to increase from the past 3 years in ELA and Math on the CAASPP (from 43.67% to 51.51% over the past three years in ELA and from 13.79% to 17.14% over the past three years in Math). The same is true for the achievement gap between students with no reported disabilities and students with disabilities, which increased over the past three years in ELA and Math on the CAASPP (from 49.08% to 51.58% over the past three years in ELA and from 49.86% to 52.36% over the past three years in Math). Research indicates that data analysis of student achievement within Professional Learning Communities not only builds collective teacher efficacy but also increases student achievement.

Goal 2, Action 2.11 describes the use of a fully funded LREBG (\$230,000) to provide credit recovery to high school students throughout the school year and during summer sessions to close the achievement gap. This is allowable under Educational Code 42356 (a): Increasing the instructional days or minutes provided during the school year, providing summer school or intersessional instructional programs; and (d): Access to instruction for credit-deficient pupils to complete graduation or grade promotion requirements. High school students who are credit-deficient have the opportunity to enroll in Edgenuity, an online credit-recovery program, during the school year. In addition, high school students who are credit-deficient also receive the opportunity to attend summer school to make up missing credits. The District is also increasing the instructional minutes for K-12 students by offering intervention-based sessions before or after school. Based on the District's Needs Assessment, certain student groups, such as English Learner students, low-income students, and foster youth, demonstrated a need for support with credit recovery. Research indicates that early intervention can increase student achievement and engagement, leading to higher graduation rates. The metric used to measure this will be 2.3 (Implementation of State Standards), 2.6 and 2.7 (ELA and Math CAASPP), 2.13 (English Learner Progress), and 2.18 (High School Graduation Rate).

Goal 3, Action 3.4 describes the use of fully-funded LREBG (\$870,000) to provide Behavior Interventionists, Board Certified Behavior Analysts, and Staff Student Resource Advisors to support students' social and emotional well-being and to address barriers resulting from trauma and other needs. This is allowable under Educational Code 42356 (c): Integrating pupil supports to address other barriers to learning, and staff supports and training, such as the provision of health counseling, or mental health services, or programs to address pupil trauma and social-emotional learning, or referrals for support for family or pupil needs. Based on the District's Needs Assessment, students, particularly in grades K-5 at all elementary sites, exhibited an increase in extreme behaviors. Research indicates that early intervention is key to supporting students, particularly when teaching skills such as emotional self-regulation and coping strategies. The metrics used to measure this will be 3.2 (Suspension) and 3.4 (Locally administered SEL/Climate Survey).

Goal 3, Action 3.12 describes the use of partially-funded LREBG (\$287,000). This is allowable under Educational Code 42356 (c) use of funds for the Learning Recovery Emergency Block Grant for the District to partner with services to provide counseling and mental health services through services such as teletherapy, Marriage and Family Therapists (MFTs), and social workers to provide Tier 2 and Tier 3 supports for students experiencing increased mental health needs. Based on the District's Needs Assessment, due to a lack of resources for families and students, there are critical delays in students accessing essential support services, thereby highlighting a clear need for solutions like teletherapy, MFTs, and social workers to provide more immediate and timely care. Research consistently demonstrates that students' mental

health is foundational to their academic achievement and engagement, as well-being fosters the cognitive, emotional, and social capacities essential for learning and active participation in school. Research unequivocally demonstrates that positive mental health is foundational to student achievement and engagement, influencing their ability to learn, concentrate, manage stress, and build the healthy relationships essential for academic success. The metrics used to measure this will be 3.2 (Suspension) and 3.4 (Locally administered SEL/Climate Survey). LREBG Funds of \$287,000 will be allocated for partnerships with services that provide teletherapy, access to MFTs, and social workers.

Reflections: Technical Assistance

As applicable, a summary of the work underway as part of technical assistance.

For the 2025/2026 school year, WVUSD is receiving support from the Los Angeles County Office of Education (LACOE) as a result of the Differentiated Assistance designation based on the 2025 dashboard. WVUSD qualified for technical assistance for Differentiated Assistance due to foster youth’s red status in Suspension Rate and Chronic Absenteeism. The District continues to recognize areas of growth, particularly for foster youth. As a part of the work to address these areas of growth, WVUSD hired a Multi-Tiered Systems of Support (MTSS) Teacher on Special Assignment (TOSA) in 2025/2026 to provide training and coaching on Tier 1, Tier 2, and Tier 3 instructional strategies and MTSS, including social-emotional and behavioral support.

The following are specific actions related to implementing the work underway as part of Differentiated Assistance: Action 1.4 addresses foster youth’s red status in chronic absenteeism, and Actions 3.3 and 3.5 address foster youth students' red status in suspension rate.

Comprehensive Support and Improvement

An LEA with a school or schools eligible for comprehensive support and improvement must respond to the following prompts.

Schools Identified

A list of the schools in the LEA that are eligible for comprehensive support and improvement.

Not applicable

Support for Identified Schools

A description of how the LEA has or will support its eligible schools in developing comprehensive support and improvement plans.

Not applicable

Monitoring and Evaluating Effectiveness

A description of how the LEA will monitor and evaluate the plan to support student and school improvement.

Not applicable

Engaging Educational Partners

A summary of the process used to engage educational partners in the development of the LCAP.

School districts and county offices of education must, at a minimum, consult with teachers, principals, administrators, other school personnel, local bargaining units, parents, and students in the development of the LCAP.

Charter schools must, at a minimum, consult with teachers, principals, administrators, other school personnel, parents, and students in the development of the LCAP.

An LEA receiving Equity Multiplier funds must also consult with educational partners at schools generating Equity Multiplier funds in the development of the LCAP, specifically, in the development of the required focus goal for each applicable school.

Educational Partner(s)	Process for Engagement
Walnut Valley Unified School District LCAP Advisory Council	The District involved educational partners in the development of the 2026/2027 Local Control and Accountability Plan (LCAP) by engaging with and soliciting feedback from staff, parents, students, and the community. The LCAP Advisory Council meetings included all educational partners to meet compliance. Parents of English Learner students, guardians of foster youth, parents of students with disabilities, and certificated and classified staff members who support English Learner students and foster youth provided ongoing input. Also included were parents of socioeconomically disadvantaged students, representation from local bargaining units (including the teacher and classified unions as well as their members), classified employees, teachers, administrators, District staff, and high school students. Based on feedback from focus groups, parent meetings, surveys, and site principals, it has been determined that whole-child support, behavior support, social-emotional learning, and mental health support continue as top priorities. Parents have emphasized the need for home-school connections to support their students with academic rigor and expectations, especially in math; ongoing social-emotional learning; a proactive approach to connecting with students; parent education on social-emotional learning; and cultural proficiency to continue providing holistic support for children. The parent survey also provided valuable feedback on the need to maintain a safe, inclusive,

Educational Partner(s)	Process for Engagement
	and respectful learning environment. Additionally, with the implementation of the cell phone policy effective July 1, 2026, parents requested education on the appropriate use of technology, such as social media, and its impact on students' mental health and wellness. The LCAP Advisory Council sent its input to the Superintendent's Cabinet and all principals in April 2026. During this phase, all educational partners informed the Cabinet and principals of the process and recommendations. Following the Cabinet's work, a full presentation was made to the Board of Trustees on the process. The mid-year LCAP report and update were then presented to the Board at a public meeting on February 18, 2026. The presentation on the LCAP process, the 2026/2027 LCAP, and recommendations was held on June 10, 2026. Each Board member had the opportunity to provide comments and input. As required by the Education Code section 52062(b)(1), a Public Hearing was held on Wednesday, June 10, 2026, for the 2026/2027 LCAP. The LCAP Draft Plan proposal, the board agenda, and a Google Form to collect written comments were available to the public on the District website beginning on June 5, 2026, prior to the June 10, 2026, Board meeting. The public had opportunities to submit written comments regarding specific actions and expenditures in the LCAP. No comments were received during the Public Hearing. On June 17, 2026, the Local Performance Indicators were presented at the same meeting in which the 2026/2027 LCAP and the budget were adopted. Additionally, District representatives consulted with the East San Gabriel Valley SELPA Executive Director, Dr. Scott Turner, on February 20, 2026, to ensure that the LCAP included the needs of students with disabilities.
District English Learner Advisory Council (DELAC)	At the DELAC meeting on March 4, 2026, parents provided both commendations and recommendations on supporting English Learner students. Overall, the parents indicated that English Learner students are supported at their school sites through small-group instruction, supplemental support from bilingual instructional aides, and extra

Educational Partner(s)	Process for Engagement
	help, such as Imagine Learning, to provide access and support during school and at home. The parents recommended continuing the DELAC meetings, which provide timely communication, a format for parents of English Learner students to understand the resources available to help them, and time to ask questions. DELAC members also recommended continuing to offer ELD Summer School programs and ways for schools to provide additional materials for students and parents to use at home to continue learning English and to access the core curriculum.
Coordinating Council - Parent Advisory Committee (PAC)	To meet the Education Code requirements, meetings were held to share the progress of the 2026/2027 LCAP. The Coordinating Council consisted of parent representatives from all school sites. The Coordinating Council met monthly with the Superintendent and executive cabinet members to receive updates on District progress, including the LCAP, and to provide feedback on the goals and actions outlined in the LCAP. The Coordinating Council served as the Parent Advisory Council for the LCAP educational partner requirement. These parents also represented the District's low-income, foster youth, English Learner students, and students with disabilities. The Parent Advisory Council met on March 11, 2026, and the LCAP updates, including goals, actions, and preliminary expenditures, were presented. Feedback on the LCAP goals and progress was elicited and charted. The Parent Advisory Council provided written comments highlighting successes, challenges, and areas of focus for the 2026/2027 school year. The Superintendent's designee presented the LCAP information, and no questions were raised.
Students	The Superintendent's Student Advisory Council welcomed 20 new student members this school year. The Advisory Council, facilitated by the Superintendent, is intended to provide leadership development opportunities to students from all 15 schools. This format also provides a vehicle for two-way communication between the District and student leaders. Throughout the school year, the student members had an opportunity to provide feedback and input to the

Educational Partner(s)	Process for Engagement
	Superintendent and Cabinet on what was going well and what needed to be addressed. Cabinet members also facilitated a small group discussion on wellness and safety with the student group. The student members also provided their perspectives, input, and recommendations from reviewing the cell phone use survey data. Similarly, school leaders have now established student advisory groups and Student Think Tanks at their sites to receive feedback and input and put recommendations into action. All students in grades 5-12 are provided with an LCAP survey to gather feedback on the status of their successes and challenges in learning. On April 21, 2026, we invited parents and secondary students to a listening session titled "Let's Talk: A Conversation with Families and District Leaders." Secondary Students participated in a session: Your Voice, Your Schools: Conversations with Students and District Leaders. In a roundtable setting, students shared their insights, input, perspectives, and recommendations on topics such as homework, technology and cell phones, artificial intelligence, mental health, and the school experience. The qualitative data gathered from students informed the three LCAP Goals and metrics.
Teachers, Administrators and Other School Personnel	Engaging educational partners is crucial for the LCAP development process. To ensure comprehensive input, all teachers, administrators, and school personnel were invited to provide feedback through the spring 2026 LCAP survey, focusing on the implementation status of each LCAP goal. Furthermore, K-12 teachers actively participated in grade-level or content-specific Curriculum Council meetings twice a year, offering valuable insights into curriculum implementation and the use of data to refine instructional practices. Administrators engaged in focused discussions during small-group meetings with the Superintendent, sharing feedback on key areas, including student achievement, parent participation and engagement, student engagement, and overall school safety and wellness. Input from other

Educational Partner(s)	Process for Engagement
	essential school personnel was systematically gathered during job-alike meetings, such as the quarterly sessions for school administrative assistants with District staff. Additionally, representatives, including instructional aides, office staff, and school support staff, contributed their perspectives as members of the LCAP Advisory Council, ensuring diverse voices were incorporated into the planning process.

A description of how the adopted LCAP was influenced by the feedback provided by educational partners.

The LCAP for Walnut Valley has been significantly shaped by the direct, candid feedback of its educational partners. This input led to the formalization of targeted strategies designed to bridge achievement gaps and bolster student well-being. Below is a description of how this feedback influenced the specific actions within the plan:

Impact of the "Let's Talk" Outreach Event:
A cornerstone of this year’s feedback loop was the second annual "Let's Talk: A Conversation with Families and District Leaders" held on April 21, 2026. This event was intentionally designed to reach families who traditionally do not attend District functions. District leaders personally called 91 parents across 15 school sites to invite them to meet face-to-face for open-ended discussions. By providing dinner, childcare, and translation services for Mandarin- and Spanish-speaking parents, the District reached about 50 parents and 20 secondary students. Families shared personal accounts of barriers to success, social awareness needs, and the struggle to support students who lack resources. This qualitative data directly informed the LCAP’s focus on dismantling systemic barriers and ensuring every student feels a sense of belonging.

Response to Behavioral and Mental Health Needs:
Educational partners, particularly those participating in the Social Emotional Learning (SEL) Council (teachers, counselors, psychologists, classified staff, and administrators) and parent focus groups, identified a critical need for proactive, tiered support systems. In response to concerns regarding students' emotional and behavioral regulation, Goal 3, Action 3.4 was developed. This action uses LREBG funds to provide early intervention in prosocial skills, with a focus on emotion regulation and executive functioning. In response to concerns about student stress and trauma, Goal 3, Action 3.12 establishes a comprehensive, integrated support system. This ensures mental health services are not just reactive but are tiered to provide general wellness for all and intensive support for those in crisis.

Supporting Newcomers and English Learner Students:
Input from the District English Learner Advisory Council (DELAC) and ELD Coordinators from the secondary schools, ELD Liaisons from the elementary schools, and teachers from curriculum councils highlighted the unique barriers faced by 1,973+ English Learner students and recent newcomers.

To ensure these students are not sidelined in high-level coursework, Goal 2, Actions 2.1 and 2.2 were refined to focus on "integrated" English Language Development (ELD). This provides staff with professional development on frameworks that enable English Learner students to access rigorous Math and ELA content alongside language acquisition.

Feedback from Mandarin and Spanish-speaking families led to a dedicated commitment to native-language resources and enhanced translation services to ensure parents are full partners in the educational process.

Systematic Intervention through Professional Learning Teams:

A consistent theme from site instructional leaders and the LCAP Advisory Council was the need for a more uniform approach to academic intervention. The LCAP now codifies a systematic professional learning team process. Under Goal 2, Action 2.2 and 2.3, educators work in teams to identify essential standards, learning progressions, and common formative assessments. When data shows a student has not mastered content, the plan mandates a structured intervention process. This moves away from isolated teacher efforts toward a Districtwide "diagnostic progress monitoring" approach, ensuring no student's learning gap goes unaddressed. When students do not learn the content, the plan mandates a structured response. Goal 2, Action 2.3 provides diagnostic progress monitoring to assess students frequently and intervene with targeted instruction, ensuring that when students do not learn the content, immediate, data-driven support is put into action.

Targeted Support for Vulnerable Student Groups:

The "Let's Talk" event on April 21, 2026, provided qualitative data on the barriers faced by unduplicated pupils. While Walnut Valley maintains high overall achievement, the feedback emphasized the hidden struggles of low-income and foster youth. Beyond qualitative feedback, educational partners emphasized the need for tangible time dedicated to recovery for the most vulnerable students, including low-income and foster youth.

In response to the need for deeper academic support, the District has strategically increased instructional minutes for intervention services. This allows for extended learning time during the school day and through summer sessions to address specific learning gaps in ELA and Math. Goal 2, Action 2.11 was expanded to include year-round credit recovery to ensure students facing external hardships maintain their path toward A-G completion and college readiness. For foster youth and students experiencing homelessness, who statistically face higher rates of chronic absenteeism (often exceeding 15-20% in high-need demographics), the plan now prioritizes wraparound support and counselor check-ins to maintain academic continuity during extended absences.

By integrating these specific partner recommendations, the LCAP shifts from a general framework to a precise roadmap for equitable student success.

Goals and Actions

Goal

Goal #	Description	Type of Goal
1	Engagement: Student Voice and Connectedness to School and Community Walnut Valley Unified School District will ensure access and equity for all students' engagement with the school and community by increasing student efficacy, students' voices, and active participation so that all students will graduate from high school as college and career-ready.	Broad Goal

State Priorities addressed by this goal.

Priority 3: Parental Involvement (Engagement)
 Priority 5: Pupil Engagement (Engagement)
 Priority 6: School Climate (Engagement)
 Priority 8: Other Pupil Outcomes (Pupil Outcomes)

An explanation of why the LEA has developed this goal.

The District believes in its motto, "Kids First, Every Student, Every Day." This aligns with the District's focus on student engagement as a priority. The 2023 California Dashboard reports the District's chronic absenteeism as Yellow, where 8.1% of Walnut Valley's students have been chronically absent during the 2022/2023 school year, compared to the State rate of 24.3% chronically absent. The District's targeted student groups included students experiencing homelessness (33.3% chronically absent) and students with disabilities (20.7% chronically absent), who were in the red for chronic absenteeism as well the following student groups who were identified as orange: African American students (20% chronically absent), Filipino students (7.1% chronically absent), Hispanic students (19.7% chronically absent), Two or More Races (10.3% chronically absent), Socioeconomically Disadvantaged students (11.8% chronically absent), and White students (13.4% chronically absent). Walnut Valley's foster youth students were also identified in the Yellow for Chronic Absenteeism at a rate of 18.2%.

Additional data that supports the District's focused attention on student engagement includes dropout rates and local survey data. The middle school dropout rate of 0% for 2022/2023 and 1.1% for high school demonstrates that Walnut Valley's students are successfully pursuing graduation. The spring 2024 student survey indicates that 92.1% of the respondents agree or strongly agree that the school encourages student feedback and participation. 93.5% of the student respondents agree or strongly agree that the school provides many opportunities for students to actively participate in learning. 95.9% of the student respondents agree or strongly agree that the school provides many opportunities for students to participate in activities and school events. 86.7% feel connected or very well connected to their peers at their school right now. 83.9% of the students feel connected or very well connected to the adults at their school right now, and 86.3% of the students feel like they belong or completely belong at their school.

Consultation with the District's educational partners further contributed to the development of this goal, including LCAP Advisory Council meetings, where the District shared relevant Dashboard data related to chronic absenteeism, attendance rates, middle and high school dropout rates, and graduation rates. Although Walnut Valley's chronic absenteeism rate has not significantly increased since 2022, the

District remains focused on implementing research-based interventions in order to address and increase student engagement. This is supported by feedback from educational partners, who provided input such as “Could we capture qualitative data from school student groups?” “We need more outlets to provide students’ voice,” “What are the root causes of chronic absenteeism?” and “High schoolers equate connectedness with extracurricular activities.” Carnegie Foundation’s research in Improvement Science indicates that by first understanding the problem and the system that produces it, the District can then focus its collective efforts and generate ideas for change. Walnut Valley believes this can only be done in partnership with its educational partners, including the community, families, and site leaders, with students always at the center. Therefore, student engagement begins with a framework of access and equity that provides meaningful access to all educational partners.

Measuring and Reporting Results

Metric #	Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Target for Year 3 Outcome	Current Difference from Baseline
1.1	Attendance Rate	The Districtwide attendance rate is 93% as reported on AERIES for the 2023/2024 school year.	The Districtwide attendance rate is 96.55%, as reported on AERIES for the 2024/2025 school year.	The Districtwide attendance rate is 96.72%, as reported on AERIES for the 2025/2026 school year. Goal Analysis [2025-26]

An analysis of how this goal was carried out in the previous year.

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

During the 2025-2026 school year, out of 6 action items in Goal #1, 3 were fully implemented, and 3 were partially implemented. The fully implemented actions focused on student voice, connectedness through technology, and family and educational partners involvement. The partially implemented actions related to attendance and engagement, diversity training, and attendance support for unduplicated pupils.

Action Item 1.1 - Attendance and Engagement - Partially Implemented

Successes: Counselors, Student Staff Resource Advisors, and Grade Level Coordinators continued to work closely with site and District administration and office staff to monitor students. The Districtwide attendance rate improved to 96.72%, up 3.72% from the 2023-2024 school year. The middle school dropout rate remained at 0% for a third consecutive year. Chronic absenteeism for socioeconomically disadvantaged students decreased by 3.2%, and decreased by 2.7% for all students overall.

Challenges: The District high school dropout rate increased by 0.3%, from 0.8% to 1.4%, though it remains below the District's goal of 2%. Chronic absenteeism among the most vulnerable populations worsened significantly, with homeless youth increasing by 3.1% from baseline and foster youth increasing by 16.8% from baseline. The hiring of a new Child Welfare and Attendance Technician for the 2026-2027 school year is intended to better focus efforts on unduplicated populations and improve family engagement strategies.

Action Item 1.2 - Student Voice - Fully Implemented

Successes: Principal-led student advisory groups continued to be organized across all WVUSD schools, with leadership using student feedback to assess and improve school climate. The Superintendent's Student Advisory Council provided opportunities for student leaders to develop leadership skills and contribute input on district initiatives. A new Let's Talk Student Voice section was added this school year, gathering student feedback across the District on homework, connection, mental health, cell phones, and AI. Spring 2026 survey data showed strong results: 97.9% of students agreed schools highly encourage feedback and participation (up 5.8% from baseline), 97.6% agreed schools provide many opportunities to participate in learning (up 4.1%), 96.7% agreed schools provide many opportunities to participate in activities and school events (up 0.8%), 95.7% reported feeling connected to their peers (up 9% from baseline), and 95.5% reported a sense of belonging (up 9.2% from baseline).

Challenges: Ensuring consistent representation across all student demographics continues to require intentional outreach, and balancing student-generated ideas with administrative constraints remains an ongoing consideration.

Action Item 1.3 - Diversity Training - Partially Implemented

Successes: The District held 10 Professional Development meetings with Guiding Coalitions made up of teachers and administrators across all 15 sites, focused on identifying barriers to student learning. The District is revamping its instructional focus around equitable learning outcomes through the PLC process, shifting toward a collective "our students" approach and building intentional intervention strategies during the school day. The Districtwide suspension rate decreased by 0.9% from baseline, with meaningful reductions for vulnerable populations: foster youth suspension rates decreased by 8.2%, and homeless youth suspension rates decreased by 10.9%. Socioeconomically disadvantaged students increased 3.8 points in Math on the California Dashboard.

Challenges: Academic outcomes for some subgroups showed a decline. EL students maintained -2.2 points in Math and declined 7.4 points in ELA. Homeless students, while gaining 7.9 points in Math, declined 46.3 points in ELA, which is a significant area of concern. The Guiding Coalitions work will shift to site-focused implementation next school year, which may help address inconsistent application of equitable practices across classrooms and sites.

Action Item 1.4 - Attendance Support for Unduplicated Pupils - Partially Implemented

Successes: Some attendance support and resources were available for low-income and homeless students. Chronic absenteeism for socioeconomically disadvantaged students decreased by 3.2% and decreased by 2.7% for all students overall, reflecting some positive progress in the broader population.

Challenges: The Child Welfare and Attendance Technician job description does not currently include foster youth support and unduplicated students, creating a structural misalignment with the intended implementation plan. As a result, the District is rewriting the position's job description for the 2026-2027 school year to explicitly focus on foster and community parent support as well as unduplicated students.

Chronic absenteeism for homeless youth increased by 3.1% and for foster youth increased by 16.8% from baseline, indicating that the most vulnerable populations are not receiving adequate targeted support under the current structure.

Barriers: The misalignment in the Child Welfare and Attendance Technician's role continues to limit the District's ability to provide targeted attendance support for foster youth. Without a clearly defined role and dedicated staffing for unduplicated populations, these students remain at elevated risk of chronic absenteeism.

Action Item 1.5 - Connectedness Through Technology - Fully Implemented

Successes: Google Meet continued to be used for families unable to attend in-person meetings, and live streaming was used for important parent meetings at both District and school sites. Spring 2026 parent survey data showed that 97.3% of parents agreed the District and schools use a variety of methods to communicate (phone calls, emails, social media), and 93.3% agreed schools provide access to parent meetings via virtual platforms and recorded meetings.

Challenges: Ensuring equitable access to technology and internet connectivity for all families continues to require additional support, and ongoing staff training on virtual meeting platforms remains a need.

Action Item 1.6 - Family and Educational Partners Involvement - Fully Implemented

Successes: A Public Information Specialist was hired this school year, bringing consistency to communication protocols across all 15 sites. Let's Talk communication platform continued to be used daily for parent involvement and input. WVUSD hosted its second annual "Let's Talk" event, bringing together parents from all 15 school sites for an evening of dialogue with district leaders. This year's event also included a student voice component. Spring 2026 parent survey data showed that 97.8% of parents agreed that schools provide meaningful opportunities for parent involvement.

Challenges: The extended vacancy in the Public Information Specialist position in the prior year had created communication gaps, but the successful hire this year addressed those concerns and improved consistency Districtwide going forward.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

There were material differences of 10% or more between the Budgeted Expenditures and the Estimated Actual Expenditures for the following action:

Action 1.4: The difference is primarily attributable to compensation increases for certificated, classified, and management employees that were implemented retroactively to July 1, 2025, resulting in higher personnel costs than originally budgeted. In addition, transportation expenditures exceeded projections due to increased costs associated with replenishing HopSkipDrive services through the trust fund that supports the program for the school year.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

Out of the 6 actions implemented for Goal #1, 3 actions were found to be effective, and 3 were partially effective based on the collected data and evidence.

Effective Actions (3):

Action 1.2: Student Voice - This action has been effective as evidenced by significant improvements in student engagement metrics. Spring 2026 survey data shows 97.9% of students agree that schools highly encourage feedback and participation (up 5.8% from baseline), 97.6% agree schools provide many opportunities to participate in learning (up 4.1%), and 96.7% agree schools offer many opportunities to participate in activities and school events (up 0.8%). Most notably, student connectedness to peers increased by 9% to 95.7%, and sense of belonging improved by 9.2% to 95.5%.

Action 1.5: Connectedness Through Technology - The Educational Technology division's initiative has effectively strengthened family-school connections. Spring 2026 parent survey data indicates 97.3% of parents agree that the District and schools use a variety of methods to communicate, and 93.3% agree that schools provide access to parent meetings through virtual platforms and recorded meetings, enabling involvement for parents who cannot attend in-person events.

Action 1.6: Family and Educational Partners Involvement - This action has been effective following the successful hiring of a Public Information Specialist this school year. The position brought consistency to communication protocols across all 15 sites, and Let's Talk continued to be utilized daily for parent input. Spring 2026 parent survey data shows 97.8% of parents agree that schools provide meaningful opportunities for involvement. WVUSD also hosted its second annual "Let's Talk" event, expanding on last year's effort by adding a student voice component.

Partially Effective Actions (3):

Action 1.1: Attendance and Engagement - While showing some improvements, this action has been partially effective. The Districtwide attendance rate improved to 96.72% (up 3.72% from the 2023-2024 school year), the middle school dropout rate remained at 0% for a third consecutive year, and chronic absenteeism decreased by 3.2% for socioeconomically disadvantaged students and by 2.7% for all students overall. However, the high school dropout rate increased by 0.3%, from 0.8% to 1.4%. Chronic absenteeism also worsened significantly among the most vulnerable populations, with homeless youth increasing by 3.1% from baseline and foster youth increasing by 16.8% from baseline.

Action 1.3: Diversity Training - This action has been partially effective. The Districtwide suspension rate decreased by 0.9% from baseline, and suspension rates improved for vulnerable populations, with foster youth decreasing by 8.2% and homeless youth decreasing by 10.9%. Socioeconomically disadvantaged students increased 3.8 points in Math per the California Dashboard. However, several subgroups showed academic decline: EL students maintained -2.2 points in Math and declined 7.4 points in ELA, and homeless students, while gaining 7.9 points in Math, declined 46.3 points in ELA. These mixed results reflect that the shift toward equitable learning outcomes through the Guiding Coalitions and PLC process is still in early stages, with site-focused implementation planned for the next school year.

Action 1.4: Attendance Support for Unduplicated Pupils - Attendance support for unduplicated pupils has been partially effective. While chronic absenteeism decreased for socioeconomically disadvantaged students (down 3.2%) and all students overall (down 2.7%), it increased significantly for the most vulnerable populations: homeless youth increased by 3.1% and foster youth increased by 16.8% from baseline. These outcomes reflect the ongoing structural misalignment of the Child Welfare and Attendance Technician role, which does not currently cover foster youth support. The District rewrote the job description for 2026-2027 to address this gap.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

Action 1.4, the increase in planned expenditures is due to addition of transportation cost and salary and benefits of Child Welfare and Attendance Technician.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Actions

Action #	Title	Description	Total Funds	Contributing
1.1	Attendance and Engagement	Develop and implement a comprehensive program aimed at enhancing student engagement, fostering positive attendance habits, and decreasing the dropout rate. Collaborate with counselors, Student Staff Resource Advisors, and Grade Level Coordinators to implement a range of support strategies targeting engagement and attendance, with a specific focus on improving attendance among historically underserved students. Ensure that attendance office staff are proactive in monitoring and providing assistance to students with attendance concerns.	\$5,063,916.00	No
1.2	Student Voice	District and site administration will actively engage with students through a variety of processes and platforms to gather their input and ideas on enhancing their school and community engagement. This will involve encouraging student participation in representing diverse student groups and demographics, thereby increasing student voice and overall engagement.	\$0.00	No
1.3	Diversity Training	Educational Services will collaborate with the Arbingner Institute to offer training sessions focused on cultivating a positive mindset. Additional training will focus staff on identifying systemic barriers that create an inequitable learning experience for students, as well as creating restorative practices within the school site. The goal is to enhance culturally responsive teaching and learning practices that promote inclusivity, respect, and relevance for both staff and high school students.	\$0.00	No

Action #	Title	Description	Total Funds	Contributing
1.4	Attendance Support for Unduplicated Pupils	The Child Welfare and Attendance Technician will offer assistance and resources to students and families who are foster youth, homeless, or low-income, ensuring these students have the necessary support to attend school regularly. Additional support will be garnered from the District Foster Youth Liaison, as well as County support for unduplicated student populations.	\$182,204.00	Yes
1.5	Connectedness Through Technology	The Educational Technology division will facilitate the use of technology by students and staff to enable them to share learning experiences with parents who cannot attend events or meetings. This initiative aims to enhance student engagement and strengthen connections between students and their families.	\$0.00	No
1.6	Family and Educational Partners Involvement	Educational Services will continue to ensure parent involvement and input from educational partners through the school and District websites and platforms such as Let's Talk. The Public Information Specialist will collaborate with the District and school sites to ensure accurate, relevant, and timely communication to all educational partners.	\$31,800.00	No

Goals and Actions

Goal

Goal #	Description	Type of Goal
2	Achievement: Access, Student Achievement, College and Career-Readiness Walnut Valley Unified School District will ensure that all students are academically prepared and empowered to be college and career-ready by providing access to a rich and rigorous curriculum that increases student achievement, critical thinking skills, digital citizenship, and creativity in all subject areas.	Broad Goal

State Priorities addressed by this goal.

Priority 1: Basic (Conditions of Learning)
 Priority 2: State Standards (Conditions of Learning)
 Priority 3: Parental Involvement (Engagement)
 Priority 4: Pupil Achievement (Pupil Outcomes)
 Priority 5: Pupil Engagement (Engagement)
 Priority 7: Course Access (Conditions of Learning)
 Priority 8: Other Pupil Outcomes (Pupil Outcomes)

An explanation of why the LEA has developed this goal.

The District believes that all students should have access to a rich and rigorous learning environment and instructional program TK-12, which ultimately prepares students to be thoughtful and contributing citizens in a global and digital society. The District continues to maintain high levels of student achievement, as measured by the 2023 CAASPP performance data, 2023 AP exam participation and passing rate, and a high percentage of high school graduation. 76.02% of all students in grades 3-8 and 11 met or exceeded the standards on the English Language Arts (ELA) CAASPP assessment in 2023, and 70.86% of all students in grades 3-8 and 11 met or exceeded the standards on the Math CAASPP assessment in Spring 2023. 87.54% of Walnut Valley's students passed at least one AP exam with a score of 3 or higher in 2023. The achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP ELA assessment decreased from 44.06% to 44.05%, moving closer to the goal of decreasing the achievement gap from 38% to 37% on the CAASPP ELA assessment and from 2% to 1% on the CAASPP Math assessment. Access to tiered intervention has contributed to the achievement of socio-economically disadvantaged students, who demonstrated content mastery, with 67.21% meeting or exceeding standards in ELA and 62.70% meeting or exceeding standards in Math. Socioeconomically disadvantaged students responded to interventions and supports provided, as evidenced in local and state assessments. With access to small group intervention, summer remediation, and strong partnerships between home and school through family education, 67.21% met or exceeded standards in ELA, and 62.70% met or exceeded the standards in Math, inching closer to the intended goal of 77% and 75%, respectively. After the barriers to student learning due to COVID-19, Walnut Valley's students' achievement has continued to improve or remain the same.

Meaningful consultation with the District's educational partners further contributed to the development of this goal, including input from the community, families, site leaders, and students. Recommendations and input from LCAP meetings included comments such as “recommend possibly integrating different levels of students, such as Pre-AP classes at the high school level,” and “provide more support for students for vocational programs,” and “we are hoping to see an increase in A-G course completion rates.” Based on this quantitative and qualitative data, the District will continue to pursue a focused goal of student achievement while maintaining meaningful involvement with all educational partners.

Measuring and Reporting Results

Metric #	Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Target for Year 3 Outcome	Current Difference from Baseline
2.1	Fully Credentialed and Appropriately Assigned Teachers (Local Human Resources Data, LACOE Reports, and AERIES)	Out of the fully credentialed teachers, 99% of teachers are fully credentialed, and 99.8% are appropriately assigned for the 2023/2024 school year. One health teacher does not have a health credential, three teachers are on intern credentials, and one teacher has a short-term staff permit.	Out of the fully credentialed teachers, 99.5% of teachers are fully credentialed, and 97% are appropriately assigned for the 2024/2025 school year. Two teachers have intern credentials, and one teacher has a short-term staff permit.	Out of the fully credentialed teachers, 99.37% of teachers are fully credentialed, and 100% are appropriately assigned for the 2025/2026 school year. Three teachers have intern credentials, and one teacher has a short-term staff permit.	100% of teachers will be fully credentialed and appropriately assigned.	Difference from the baseline for 2025 is +0.37% for teachers who are fully credentialed and +0.2% for teachers who are appropriately assigned.

Goal Analysis [2025-26]

An analysis of how this goal was carried out in the previous year.

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

Overall Implementation:

During the 2025/2026 school year, Goal 2 was implemented with fidelity across the District: 17 of the 18 actions were implemented fully: one of the actions was implemented partially (Action 2.17), and 0 of 18 actions were minimally or not implemented.

This goal focused on ensuring that all students are academically prepared and empowered to be college and career-ready. Key elements included a continued partnership with Dr. Luis Cruz and Associates and providing professional development on the Districtwide initiative to implement Professional Learning Communities (PLC) with fidelity across all school sites.

Substantive Differences Between Planned and Actual Implementation:

Action 2.17 was partially implemented: Parent engagement remained an area of focus in 2025/2026, and events such as Let's Talk continued for the second year in a row. Parents from all 15 school sites were invited to this event to meet with District leadership and the Board of Trustees to share their thoughts and feedback regarding their students' educational experiences. Although this parent engagement was successful, this goal was partially implemented because the event was not recorded and shared virtually. Translation was provided at the event, but because it was not recorded, closed captions were not available.

Successes:

Action 2.2: Professional development to close the achievement gap was implemented with fidelity, including the series on PLCs and transformational leadership with Dr. Cruz for all school sites. All fifteen schools attended a series of professional development on PLCs with their Guiding Coalitions, which consisted of site administration, teachers, and other site leaders such as Assistant Principals, Instructional Deans, Elementary Learning Specialists, and Title I Specialists. This diverse group of participants ensured that the learning and leadership were shared through collective responsibility and that the implementation going forward would be sustainable.

Action 2.6: The District continued to provide support for English Language Development, including training in 2025/2026 for elementary teachers on Integrated and Designated ELD curriculum through Elementary Curriculum Council. The Bilingual Instructional Aides continued to provide support or increased support at the middle and high schools, where they supported English Learner students and Long-term English Learner students in gaining language proficiency, with the ultimate goal of reclassification.

Challenges:

Action 2.13: Highly qualified teachers, administrators, and support staff. The District continued in 2025/2026 to work with intentionality to provide basic conditions of learning to support high levels of student achievement. Human Resources ensured that teachers were appropriately assigned so that our students received instruction from highly-qualified teachers. While the percentage of highly qualified staff increased, the District worked with an outside agency to ensure adequate substitute coverage. Human Resources held multiple job fairs to expedite the hiring process as the demands of staffing increased with the addition of Instructional Aides for Special Education.

Action 2.14: A challenge encountered during implementation was the delay in the release of state-approved Mathematics instructional materials. Because the approved materials were not available until late November, the District was unable to complete the review, pilot, and stakeholder input processes within the planned timeline. As a result, the Mathematics textbook adoption process was postponed and will be completed during the following school year.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

There were material differences of 10% or more between the Budgeted Expenditures and the Estimated Actual Expenditures for the following actions:

Actions 2.3, 2.4, 2.6, and 2.7

The differences were primarily due to compensation increases for certificated, classified, and management employees that were implemented retroactively to July 1, 2025. These increases resulted in higher personnel costs than originally budgeted, including increased stipends, extra-duty pay, and hourly compensation for staff providing services beyond their regular work schedules.

For Action 2.3, the difference was primarily due to compensation increases for certificated, classified, and management employees that were implemented retroactively to July 1, 2025, resulting in higher salary and benefit costs than originally budgeted. In addition, the District

increased its focus on PLCs, data analysis, and targeted interventions during the school year, which led to higher participation rates among staff. As a result, expenditures for release days, substitute coverage, and extra-duty compensation exceeded initial projections.

For Action 2.6, higher-than-anticipated student enrollment and growth in the English Learner student population required additional staffing support, resulting in increased expenditures for extra salary support and extra-duty assignments to meet student needs.

For Action 2.7, expenditures exceeded budgeted amounts due to the use of Proposition 28 carryover funds and the continued expansion of Visual and Performing Arts programs across the District.

For Action 2.11, expenditures were lower than originally anticipated because the cost of instructional aides and substitute teachers was lower than expected.

For Action 2.14, expenditures were lower than originally anticipated because the planned Mathematics instructional materials adoption was postponed. The state-approved Mathematics instructional materials were not released until late November, leading the District to defer the adoption process to the following school year.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

Out of the 18 actions implemented for Goal #2, 7 actions were found to be effective, and 11 were partially effective based on the collected data and evidence.

Effective Actions (7):

Action 2.4: Infrastructure and Instructional Technology Support - This action was effective as evidenced by improvements in CAASPP ELA and Math performance for all students. 76.16% grades 3-8 and 11) met/exceeded standards on the ELA 2025 CAASPP (up 1.98% from the baseline) and 72.82% (grades 3-8 and 11) met/exceeded standards on the Math 2025 CAASPP (up 1.96% from the baseline).

Actions 2.7 and 2.8: Visual and Performing Arts and Broad Range of Course Study - Chronic absenteeism has decreased every year from the baseline (5.4% in 2024/2025, a 2.7% decrease from the baseline) and although some programs at the elementary level have seen a decline, overall, the programs to support a broad range of course study such as Dual Language Immersion, foreign language, Project Lead the Way in middle and high school, Design-Based Learning, and Brahma Tech have all seen an increase in student enrollment from the baseline (students enrolled in middle school VAPA: +639; Students enrolled in honors classes: +841; students enrolled in Brahma Tech: +214). In addition, local survey data demonstrates that 84.5% of parents agree that their students have access to a variety of elective and extracurricular programs at their students' schools.

Action 2.12: Induction Program - The Induction program continues to support beginning teachers and administrators and provide training on the updated California Standards for the Teaching Profession (CSTPs).

Action 2.14: Access to standards aligned instructional materials - All schools receive instructional materials and supplies necessary to support state curriculum standards and frameworks, as measured by students' enrollment in programs such as Dual Language Immersion, foreign language, Brahma Tech, AP and IB courses, and honors classes, all of which have increased from the baseline (Dual Language Immersion: +3, foreign language: +26, Brahma Tech: +214, honors classes: +841).

Action 2.17: Parent Education and Parent Meetings - The District has increased parent participation in parent awareness and education nights, as well as the decision-making process and resources to build relationships. In 2024/2025, Walnut Valley hosted a Districtwide family engagement event ("Let's Talk") where families from across the District met with District staff to share about their experiences and provide input and feedback. Families and educational partners reported that this night was informative and helpful.

Action 2.18: Outreach to Parents of English Learner Students - Access for families of English learners continues to remain a priority for the District through translation services as well as the support of Bilingual Instructional Aides, as evidenced by an increase in English Learner students increasing language proficiency and reclassifying.

Partially Effective Actions (11):

Action 2.1: Professional Development and Academic Support Focused on the Whole Child - Professional Development was provided in order to address the whole child, but Culturally Responsive Pedagogy was not a topic in 2025/2026. However, this action was still partially effective as demonstrated by performance on the ELA and Math CAASPP. All students increased in ELA by +1.98% and in Math by +1.96% from the baseline.

Action 2.2: Academic Professional Development to Close the Achievement Gap - Professional development provided in partnership with Dr. Luis Cruz and Associates was provided in 2025/2026 for all 15 school sites and their Guiding Coalitions. This series of ten professional development sessions laid the foundational understanding of how to implement Professional Learning Communities with the goal of improving student outcomes and closing the achievement gap for specific student groups, including English learners and foster youth. The achievement gap for foster youth is not available due to the data being suppressed to protect student privacy; however, 68% of foster youth students made growth in 2025/2026 or from 2024/2025 to 2025/2026 on the CAASPP or other local assessments. The achievement gap for socioeconomically disadvantaged students on the ELA and Math CAASPP has decreased incrementally by -0.31% in ELA and -0.79% in Math. English Learner students remain an area of focus as the achievement gap on the ELA and Math CAASPP has increased by 7.84% in ELA and by 3.35% from the baseline.

Action 2.3: Districtwide Data Sessions - Teachers at all levels met through structured collaboration time, but the achievement gap among specific student groups remains an area of need. For example, the achievement gap between English Only students and English Learner students has increased over the past 3 years in ELA and Math on the CAASPP (from 43.67% to 51.51% in ELA and from 13.79% to 17.14% in Math). The same is true for the achievement gap between Students with No Reported Disabilities and Students with Disabilities, which increased over the past three years in ELA and Math on the CAASPP (from 49.08% to 51.58% over the past three years in ELA and from 49.86% to 52.36% over the past three years in Math).

Action 2.5: Equity and Access - The District continues to use the dedicated teacher time described in Action 2.3 to analyze student data in order to increase the participation of unduplicated students (English Learner students, foster youth, and low-income students) in higher-level courses such as Advanced Placement classes. Diversity Think Tank continues to seek input from parents, local educational partners, and staff members. The committee, in partnership with the District, implemented a Districtwide family engagement event ("Let's Talk") where families from across the District met with District staff to share about their experiences and provide input and feedback. Although performance for all students has increased on the Math and ELA CAASPP from the baseline, and the percentage of English Learner students making progress toward English proficiency has increased by 2.1% from the baseline, the achievement gap for English Learners and students with disabilities remains an area of focus. In addition, the difference from the baseline for socioeconomically disadvantaged students meeting or exceeding the standard on the ELA CAASPP has increased by +0.27%, and it has increased by +2.47% for the Math CAASPP. Foster Youth who are EAP college-ready based on the ELA CAASPP has decreased by -25% from the baseline, and the difference from the baseline for foster youth who are EAP college-ready based on the Math CAASPP is 0% and who are conditionally ready is 0%.

Action 2.6: English Language Development (ELD) Support - Training for teachers in integrated and designated ELD was provided for teachers in elementary and secondary, and Bilingual Instructional Aides were provided to all nine elementary schools, three middle schools, and two comprehensive high schools. The aides continue to support English Learner students and Long-Term English Learner students in gaining language proficiency and accessing core curriculum. The percentage of English Learner students who made progress toward English proficiency and the English Learner reclassification rate have both increased from the baseline: the difference from the baseline for English Learner students making progress toward English Proficiency in 2025 is +2.1%, and the difference from the baseline for English Learner students' reclassification in 2025 is +0.9%. However, the achievement gap between English Only students and English Learner students has increased over the past 3 years in ELA and Math on the CAASPP (from 43.67% to 51.51% in ELA and from 13.79% to 17.14% in Math) and continues to remain an area of need.

Action 2.9: TK-12 Collaboration - Teachers received professional development, and the collaboration and time for teachers to analyze student data were partially effective as Professional Learning Communities continue to develop and strengthen at Walnut Valley. 68% of foster youth students made growth in 2025/2026 or from 2024/2025 to 2025/2026 on the CAASPP or other local assessments. However, the achievement gap for English Learner students on the ELA and Math CAASPP has increased by 7.84% in ELA and by 3.35% from the baseline. In addition, 67.48% of socioeconomically disadvantaged students met/exceeded standards on the ELA 2025 CAASPP and 65.17% of socioeconomically disadvantaged students met/exceeded standards on the Math 2025 CAASPP, as compared to 79.36% of not socioeconomically disadvantaged students meeting/exceeding standards on the ELA 2025 CAASPP and 75.66% on the Math 2025 CAASPP.

Action 2.10: Elementary Support - Elementary Learning Specialists were provided to all nine elementary schools and as evidenced by an increase in the percentage of English Learner students who made progress toward English proficiency and the English Learner reclassification rate: the difference from the baseline for English Learner students making progress toward English Proficiency in 2025 is +2.1% and the difference from the baseline for English Learner students' reclassification in 2025 is +0.9%. However, the achievement gap between English-only students and English Learner students has increased over the past 3 years in ELA and Math on the CAASPP (from 43.67% to 51.51% in ELA and from 13.79% to 17.14% in Math) and continues to remain an area of need. In addition, the difference from the baseline for socioeconomically disadvantaged students meeting or exceeding the standard on the ELA CAASPP has increased by +0.27% and it has increased by +2.47% for the Math CAASPP and the achievement gap for foster youth is not available due to the data being

suppressed to protect student privacy; however, 68% of foster youth students made growth in 2025/2026 or from 2024/2025 to 2025/2026 on the CAASPP or other local assessments.

Action 2.11: Intervention Services - Targeted intervention services through before or after-school intervention or District-adopted curriculum and/or software programs were provided with fidelity, and intervention counselors at the high schools also provided counseling and support for unduplicated students. This action was partially effective, as evidenced by an increase in English Learner students who made progress toward English proficiency (+2.1% increase from the baseline) and an increase of +0.9% for English Learner students reclassifying as Fluent English proficient, although the achievement gap between English Only students and English Learner students continues to increase from the baseline and remains an area of focus. In addition, the difference from the baseline for socioeconomically disadvantaged students meeting or exceeding the standard on the ELA CAASPP has increased by +0.27%, and it has increased by +2.47% for the Math CAASPP. Foster Youth who are EAP college-ready based on the ELA CAASPP has decreased by -25% from the baseline, and the difference from the baseline for foster youth who are EAP college-ready based on the Math CAASPP is 0%, and who are conditionally ready is 0%.

Action 2.13: Highly Qualified Teachers, Administrators, and Support Staff - The District continued in 2025/2026 to work with intentionality to provide basic conditions of learning to support high levels of student achievement. Human Resources ensured that teachers were appropriately assigned so that our students received instruction from highly-qualified teachers. While the percentage of highly qualified staff increased, the District worked with an outside agency to ensure adequate substitute coverage. Human Resources held multiple job fairs to expedite the hiring process as the demands of staffing increased with the addition of Instructional Aides for Special Education.

Action 2.15: High School Support - The instructional deans at the high schools support unduplicated students' academic and social-emotional needs and provide increased access to rigorous courses, such as AP courses. The AP pass rate for students has increased from the baseline by 3.29% (90.83% of students passed at least 1 AP exam with a core of 3 or higher in 2025) but the achievement gap for English Learner students on the ELA and Math CAASPP remains an area of need. The 2025 achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in ELA is 51.51% (English Only 74.98% / English Learner students 23.47%). The achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in Math is 17.14% (English Only 64.92% / English Learner students 47.78%). In addition, the difference from the baseline for socioeconomically disadvantaged students meeting or exceeding the standard on the ELA CAASPP has increased by +0.27%, and it has increased by +2.47% for the Math CAASPP. Foster Youth who are EAP college-ready based on the ELA CAASPP has decreased by -25% from the baseline, and the difference from the baseline for foster youth who are EAP college-ready based on the Math CAASPP is 0%, and who are conditionally ready is 0%.

Action 2.16: Student Support for IEP Goals - Ed Services continued to provide Speech-Language Pathologists and support students with IEPs by providing various support staff. However, the achievement gap between Students with Disabilities and Students with No Reported Disabilities has increased in the Math and ELA CAASPP by +2.50% and continues to remain an area of focus.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

Metric 2.3: The District Benchmark math assessment was changed from STAR to District Common Assessments (however, the two assessments measure the same standards), based on the teacher input on the accuracy of student Math achievement data and the upcoming Math textbook adoption.

Action 2.1: The LREBG amount increased to \$300,000 from \$100,000. This action is partially funded by LREBG funds, and the increased amount is due to the cost of professional development (consultants, substitute coverage, conference costs, and extra duty pay for teachers working outside their contracted hours to attend professional development).

Action 2.2: This action is now partially funded by LREBG funds.

Action 2.3: This action is now partially funded by LREBG funds.

Action 2.6: This action includes funding for additional staff who provide supplemental support to ELD teachers.

Action 2.11: The LREBG amount decreased from \$400,000 to \$230,000. The increase is due to salary increases for intervention counselors, extra duty pay, supplemental program costs, and an increase in summer school staff for students in grades K-8.

Action 2.18: Contracted services have been added to the description.

A report of the Total Estimated Actual Expenditures for last year’s actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year’s actions may be found in the Contributing Actions Annual Update Table.

Actions

Action #	Title	Description	Total Funds	Contributing
2.1	Professional Development and Academic Support Focused on the Whole Child	LREBG Action The Educational Services Division, alongside school site administration and District support staff, aims to deliver continuous professional development and academic support centered on fostering whole-child development. This professional development and academic support will include training in Culturally Responsive Pedagogy, Trauma-Informed Practices, restorative practices, and Multi-Tiered Levels of Support for both certificated and classified staff members. Collaboratively, the Assistant Superintendent and other Educational Services Directors will work with School Principals to establish short-term and long-term training objectives for staff. These training sessions will be conducted during designated staff development days, supplemented by ongoing coaching support during monthly data days. Targeted participants include classroom teachers, Instructional Aides, Guidance Counselors, Elementary Counselors, Elementary Learning Specialists, Psychologists, and school administration teams.	\$22,695,101.00	No

Action #	Title	Description	Total Funds	Contributing
		Under the allowable use of funds for the Learning Recovery Emergency Block Grant (\$300,000), K-12 teachers will receive professional development on the Math and English Language Arts frameworks to identify essential standards, learning progressions, and common assessments. This is allowable under Education Code 42356(b): Accelerating progress to close learning gaps through the implementation, expansion, or enhancement of learning supports. K-12 teachers will receive professional development on the updated Common Core Math framework and standards to align with the adoption of the Math curriculum. K-5 teachers will also receive professional development on the updated English Language Arts (ELA) curriculum. Based on the District's Needs Assessment, specific student groups, including students with disabilities and long-term English Learner students, demonstrate a need for support in ELA and Math, according to the 2025 California Dashboard. Long-term English Learner students performed 38.1 points below standard in English Language Arts (Orange), and students with disabilities performed 80.6 points below standard in Math (Orange). The metrics used to measure this will be 2.6 and 2.7: Performance on statewide CAASPP English Language Arts (ELA) and Math assessments. According to the research of John Hattie, collective teacher efficacy has the highest effect size on student achievement, with a value of 1.57, which directly correlates to teacher professional development. The effect size of professional development is 0.6, which combined with collective teacher efficacy, will positively affect student achievement in the areas of Math and ELA.		
2.2	Academic Professional Development to Close the Achievement Gap	LREBG Action Under the allowable use of funds for the Learning Recovery Emergency Block Grant (\$425,000), K-12 teachers and staff will receive targeted professional development in ELD, ELA, and Math to identify essential standards, learning progression, and common assessments, and to use data to inform instruction to address learning gaps for particular students to close the achievement gap by improving student outcomes for student groups. Based on the District's Needs Assessment, specific student groups, including English Learner students, foster youth, and	\$929,943.00	Yes

Action #	Title	Description	Total Funds	Contributing
		socioeconomically disadvantaged students, demonstrated a need for support in ELA and Math, according to the 2025 California Dashboard. Long-term English Learner students performed 40.5 points below the standard in Math (Orange), and the achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting or exceeding standards on the CAASPP test in ELA increased 2.06% from the previous year (from 9.82% to 11.88%). Although 2025 CAASPP data is suppressed in ELA and Math because fewer than 11 foster youth students tested, foster youth remains an area of need based on the District's designation of Differentiated Assistance and specifically, foster youth receiving a red status in Suspension Rate and Chronic Absenteeism. Research indicates that providing teachers with professional development focused on closing the achievement gap and the root causes of chronic absenteeism significantly improves chronic absenteeism by equipping educators with collaborative strategies to foster a more engaging, supportive, and equitable school environment. The metric used to measure this will be 2.9: The achievement gap percentage of students meeting or exceeding standards on the CAASPP Math and ELA exams. The metric used to measure this will be 2.9: the achievement gap percentage of students meeting or exceeding standards on the CAASPP Math and ELA exams. Educational Services will continue to provide professional development for TK-12 educators in the following focus areas: Literacy, Science, Mathematics, and English Language Development with a focus on the following goals: (1) decrease the achievement gap among unduplicated students, including English Learner students, Long Term English learners (LTELs), foster youth, and those from low-income backgrounds; (2) continue to integrate literacy instruction across subject areas. The Educational Services Team will offer tailored training sessions utilizing District-approved curriculum resources, including ELA and Math essential standards, the ELA/ELD Framework, EL Roadmap, Next Generation Science Standards, and Social Studies Standards. Educators will be empowered to deliver targeted and effective instruction through comprehensive training for all TK-12 teachers, focusing on narrowing achievement disparities and embedding literacy instruction across disciplines to ELs, LTELs, foster youth, and low-income students to close the achievement gap.		

Action #	Title	Description	Total Funds	Contributing
2.3	Districtwide Data Sessions	LREBG Action Under the allowable use of funds for the Learning Recovery Emergency Block Grant (\$216,000), diagnostic progress-monitoring resources will be provided to assess students frequently and to intervene with targeted instruction to address learning gaps. Based on the District's Needs Assessment, the achievement gap among specific student groups remains an area of need. For example, the achievement gap between English Only students and English Learner students has increased over the past 3 years in ELA and Math on the CAASPP (from 43.67% to 51.51% in ELA and from 13.79% to 17.14% in Math). The same is true for the achievement gap between Students with No Reported Disabilities and Students with Disabilities, which increased over the past three years in ELA and Math on the CAASPP (from 49.08% to 51.58% over the past three years in ELA and from 49.86% to 52.36% over the past three years in Math). Research indicates that data analysis of student achievement within Professional Learning Communities not only builds collective teacher efficacy but also increases student achievement. The metric used to measure this will be 2.9: the achievement gap percentage of students meeting or exceeding standards on the CAASPP Math and ELA exams. Teachers at all levels will continue to meet through structured collaboration in professional learning communities to analyze student achievement and data. This will ensure that grade-level teams at the elementary sites and departments at the middle and high school sites engage in the cycle of continuous improvement. School teams will identify essential outcomes, align curriculum, develop common assessments, and analyze grade-level and student data to identify characteristics of best first instruction and modify and adapt their instruction. At the elementary level, all nine school sites will continue to provide classroom teachers with dedicated time to analyze student data to inform instructional practices, including creating flexible groups for instruction, and analyzing and monitoring students in need of intervention. This time is intended to serve as collaborative working sessions and is not limited to	\$883,078.00	No

Action #	Title	Description	Total Funds	Contributing
		academic data; the time will continue to be used to identify strategies for increasing student engagement and motivation through positive relationship-building and personal connections. Elementary Principals and Elementary Learning Specialists will coordinate focused data sessions with each grade level. At the secondary level, all three middle schools and both comprehensive high schools will continue to provide teachers in their respective subject areas. Secondary teachers will use CAASPP Interim Assessments or locally created assessments in Illuminate to demonstrate progress, identify students who need additional support, and continue to move their instructional practices using a systematic approach to ensure students are engaged in their learning. Data Days at the secondary level will provide teachers the opportunity to analyze formative assessment data to decrease the D/F rates before the semester ends. School Administration, department chairs, and Instructional Deans will continue to coordinate focused data days at the secondary level.		
2.4	Infrastructure and Instructional Technology Support	Increase resources in technology to support all students' access to curriculum with a focus on academic rigor, innovation, and engagement. The Information Technology Department will provide a 3-4 year cycle of a device refresh (i.e., Chromebooks, iPads, laptops) to all 15 school sites. Schools will continue to be provided with upgrades in Bandwidth to ensure the fastest access to technology without interruption to instruction. Educational Services will continue to invest in educational software programs to supplement classroom instruction, including but not limited to: Think Central, ALEKS, and Imagine Learning. Educational Services will continue to provide instructional technology support through the use of instructional technology coaches to all 15 school sites. Tech Coaches will continue to provide support, model lessons, co-teach with classroom teachers, and assist with creating common assessments online. This coaching model provides teachers with tools, resources, and supports to create innovative classroom environments integrated with technology to uncover different ways to think critically and problem solve.	\$3,905,499.00	No

Action #	Title	Description	Total Funds	Contributing
2.5	Equity and Access	Ensure access for all students to a rich and rigorous learning environment by removing systemic barriers, increasing parent partnerships and involvement with educational partners, and providing professional development to all staff with a focus on equity and access. Educational Services will continue to combine the Culturally Responsive Pedagogy training described in Action 2.1 and the dedicated teacher time described in Action 2.3 to analyze student data and criteria in order to increase the participation of unduplicated students (English Learner students, foster youth, and low-income students) in higher-level courses such as Advanced Placement classes. Educational Services will continue to investigate innovative ways to increase participation in higher-level courses by working collaboratively with guidance counselors, instructional deans, department chairs, and classroom teachers through the use of task forces and Curriculum Council at the elementary and secondary level. Educational Services will continue to seek input from parents, local educational partners, and staff members through the use of the District's Diversity Think Tank (DTT). Using an equity lens, DTT will continue to analyze practices and data to provide resources to schools to bring a sense of community, cultural respect, and inclusion. Both comprehensive high schools and all three middle schools will continue to provide "Boot Camps" geared to help unduplicated students in areas such as Math, Reading, and Advanced Placement. Both comprehensive high schools will work collaboratively with the school administration team, instructional deans, guidance counselors, and classroom teachers to create master schedules to increase opportunities for unduplicated students to take higher-level courses and the standard curriculum that meets A-G requirements and Advanced Placement accessibility. All nine elementary schools will host a parent night to promote college and career readiness. All secondary schools will continue to provide parent	\$1,078,355.00	Yes

Action #	Title	Description	Total Funds	Contributing
		nights with a focus on pathways, such as Career and Technical Education (CTE), International Baccalaureate (IB), Advanced Placement courses, and Dual Enrollment opportunities. Parent nights will be recorded and translated to accommodate working parents and parents who speak English as a second language. Educational Technology Coaches will continue to assist with ELD Progress Monitoring for all teachers to ensure English Learner students are learning English and accessing the core curriculum. The coaches will also continue to provide targeted support to low-income and foster youth students to ensure they have the resources to participate in STEM classes and activities.		
2.6	English Language Development (ELD) Support	Educational Services will continue to work with the county offices of education to provide training for TK-12 teachers on instructional practices geared for English Learner students and Long-Term English Learners (LTELs), such as Project GLAD, Thinking Maps, and Sheltered Instruction Observation Protocol (SIOP). The strategies provide extra support for students learning English as a second language and extra instructional strategies for teachers teaching English Learner students and LTELs. Educational Services and District-adopted textbook publishers will provide ongoing training for structured lessons during designated and integrated English Language Development (ELD) time. The structured ELD time and training will provide sheltered instruction for English Learner students to increase their English language proficiency, which will ultimately help them redesignate and become fluent in English. Two Bilingual Instructional Aides will be provided to all nine elementary schools, three to all three middle schools, and four to the two comprehensive high schools. The Bilingual Instructional Aides will support English Learner students and LTELs in gaining language proficiency and accessing the core curriculum. All nine elementary schools will use a combination of teachers and Bilingual Aides to provide before- or after-school tutoring for English Learner students and LTELs using the Imagine Learning Software	\$593,093.00	Yes

Action #	Title	Description	Total Funds	Contributing
		Program. Imagine Learning is an adaptive learning program that accelerates reading and language proficiency by providing instruction and practice in all four domains of literacy: reading, writing, listening, and speaking.		
2.7	Visual and Performing Arts	Visual and Performing Arts instruction will be expanded at elementary, middle, and high school sites for all students. K-3 grade VAPA instruction will continue to be uniformly taught through a partnership with the LA County Arts Ed Collective. All nine elementary schools will coordinate a 10-week course using instructors from the LA County Arts Collective to teach music, theater arts, or dance, interweaving science or social studies to all students in Kindergarten-3rd grade. Educational Services will expand the music instruction to all 4th and 5th grade students through a once-a-week structured music program focused on choir and band. At the middle schools, all students have the opportunity to participate in instrumental music, choir, and the arts. The District's high schools will continue to provide courses, electives, and after-school organizations that promote visual and performing arts such as dance, band, theater, and choir. Walnut Valley continues to provide exceptionally high instruction in the area of Visual and Performing Arts and continues to receive numerous State and National awards. The District's commitment to the arts will continue, with a focus on ensuring access and equity to all students, particularly among underrepresented student groups at the middle and high school level.	\$2,406,466.00	No
2.8	Broad Range of Course Study	All schools will provide a broad range of course studies for students in grades TK-12. Educational Services and site administration will ensure elementary students have courses in visual and performing arts (K-5), language art classes, and physical education. All three middle schools will continue to provide pathways in Project Lead the Way, Visual and	\$127,050,981.00	No

Action #	Title	Description	Total Funds	Contributing
		Performing Arts, publications, and video production, and will work with Educational Services to enhance the range of course offerings. Both comprehensive high schools, Diamond Bar and Walnut High School, will continue to expand their broad range of courses through the use of the Career and Technical Education Program (CTE), partnership with ROP, and dual enrollment opportunities through local colleges. The instructional deans and the Director of Student Services will continue to offer pathways in Engineering and Architectural Design, Health Science and Medical Technology/Patient Care, Public Services/Public Safety, and Education/Child Development. Through the existing partnership with the East San Gabriel Valley Regional Occupational Program (ROP), Educational Services will continue to explore opportunities to provide guidance and support to ensure the District's pathways meet industry standards. Educational Services and Instructional Deans from both comprehensive high schools will collaborate with local colleges to articulate coursework to guarantee students receive both high school and college credit when completing courses that satisfy the dual enrollment requirements. Both comprehensive high schools will continue to expand access to serve unduplicated students (English Learner students, foster youth, and low-income) by providing access to various electives and co-curricular programs that support life skill development, including arts and world languages. The District will continue to seek input from parent groups, think tanks, and planning groups to support unduplicated students. This includes but is not limited to District English Learner Advisory Committees, Coordinating Councils, Diversity Think Tank, and Curriculum Councils. The goal is to focus on considerations to master schedules for unduplicated and underserved students and ensure they have access to the standard curriculum that meets A-G requirements and AP accessibility.		

Action #	Title	Description	Total Funds	Contributing
2.9	TK-12 Collaboration	Facilitate and coordinate collaboration among TK-12 staff to analyze academic instruction and social-emotional learning through an equity lens. Ensure educational equity by providing timely access to resources and rigor for English Learner students, foster youth, and low-income students. The continued focus will be on narrowing the achievement and opportunity gap for unduplicated students, including English Learner students, foster youth, and low-income students. Teachers will receive professional development and sub days to have time to collaborate and analyze student data to close the achievement gap for English Learner students, foster youth, and low-income students.	\$50,233.00	Yes
2.10	Elementary Support	All nine elementary schools will be provided with an Elementary Learning Specialist to provide targeted intervention for English Learner students, low-income students, and foster youth. School Principals will work with the Elementary Learning Specialist to create a flexible schedule so that the Elementary Learning Specialist can push into classrooms and pull out small groups of students to provide targeted academic intervention. The Elementary Learning Specialist will continue to serve as the school's English Language Development Liaison and work closely with Educational Services to facilitate parent meetings and teacher training and monitor student progress.	\$1,622,153.00	Yes
2.11	Intervention Services	LREBG Action Targeted intervention services will be provided at all schools to support unduplicated students (English Learner students, low-income students, and foster youth). Both credentialed teachers and Instructional Aides will provide before or after-school intervention. Programs are not limited to District-adopted curriculum and/or software programs such as Imagine Learning.	\$3,061,630.00	Yes

Action #	Title	Description	Total Funds	Contributing
		Intervention Counselors at the high school level will provide academic counseling and support for unduplicated students. Counselors will meet with students individually to create a plan with a focus on removing barriers and creating access to alternative plans of opportunity. Intervention counselors will meet with parents to create parent awareness and work on a personalized plan of study to increase student achievement and develop a well-rounded student. Under the allowable use of funds for Learning Recovery Emergency Block Grant (\$230,000), high school students who are credit-deficient have the opportunity to enroll in Edgenuity, an online credit-recovery program, during the school year. In addition, high school students who are credit-deficient also receive the opportunity to attend summer school to make up missing credits. The District is also increasing the instructional minutes for K-12 students by offering intervention-based sessions before or after school. Based on the District's Needs Assessment, certain student groups, such as English Learner students, low-income students, and foster youth, demonstrated a need for support with credit recovery. Research indicates that early intervention can increase student achievement and engagement, leading to higher graduation rates. The metric used to measure this will be 2.3 (Implementation of State Standards), 2.6 and 2.7 (ELA and Math CAASPP), 2.13 (English Learner Progress), and 2.18 (High School Graduation Rate).		
2.12	Induction Program	The Induction Program for new teachers and administrators will partner mentors with beginning teachers and beginning administrators to ensure continual support in teaching, learning, and leading. The Induction program will continue to support beginning teachers and beginning administrators in the necessary process to clear their credentials while building up their capacity to craft their skills to impact student achievement.	\$2,723,122.00	No
2.13	Highly qualified teachers,	The District will recruit and retain highly qualified teachers, administrators, and support staff to provide rigorous curriculum and instruction with access to a variety of programs to increase student achievement that includes	\$795,331.00	No

Action #	Title	Description	Total Funds	Contributing
	administrators, and support staff	critical thinking skills, academic rigor, and digital literacy in all subject areas to prepare them to be college and career-ready. The Human Resources Division, in collaboration with District leadership and site administration, will take the lead in identifying potential candidates to meet a variety of assignments, including several hard-to-fill assignments (i.e., Special Education, Dual Language Immersion, etc.)		
2.14	Access to standards aligned instructional materials	Educational Services will facilitate and oversee the textbook adoption process and calibrate the inventory of Board-adopted textbooks to ensure all students receive standards-aligned instructional materials. All schools will receive instructional materials and supplies necessary to support state curriculum and frameworks. The Librarian Media Technician from every school site will account for and distribute all textbooks and instructional materials to students at the site.	\$3,529,579.00	No
2.15	High School Support	The Instructional Deans at both comprehensive high schools will coordinate various programs and multi-tiered levels of support for unduplicated students (English Learner students, foster youth, and low-income students). Instructional Deans will continue to be staffed at each comprehensive high school site, whose responsibilities will be to ensure that English Learner students, foster youth, and low-income students' progress is being monitored, interventions are designed and implemented, and professional development is being created and led. The Instructional Dean is an identified school leader whose major goal is to support unduplicated students' academic and social-emotional outcomes and provide increased access to rigorous courses such as Advanced Placement (AP) classes. Creating opportunities for unduplicated students to attend AP boot camps, receive academic counseling, and Advanced Placement fee waivers for unduplicated students all work towards eliminating barriers for success among the unduplicated students.	\$482,744.00	Yes

Action #	Title	Description	Total Funds	Contributing
2.16	Student Support for IEP Goals	Educational Services, in collaboration with Special Education, will allocate Speech-Language Pathologists to provide services to meet language and speech goals identified in Individualized Education Plans (IEP). Special Education will also allocate various student support staff to support students with IEPs.	\$3,536,324.00	No
2.17	Parent Education and Parent Meetings	District and site administration will build upon successful virtual practices to engage parents who are unable to attend in-person meetings/training/events. District and site administration will ensure that all parents have access to all information provided (e.g., tech stations at school sites, information rack at the office, etc.). District and site administration will increase parent participation in parent awareness and education nights, decision-making organizations, connections between parents, and community resources to build relationships (e.g., video streaming online, various times, summary available in print/online, childcare, translators, refreshments, etc.). Meetings will also be provided virtually and recorded for later viewing to increase access to parents of unduplicated students. The recorded meetings provide translation through closed captioning of the audio content. The translation services in languages beyond the required Mandarin are above and beyond what is required by Education Code section 48985, which requires the translation of school documents for families of students who don't speak English when the count of students speaking a particular language reaches fifteen percent (15%) within the school's population. Parent education and meetings address topics such as college and career readiness, A-G requirements, cultural attunement, culturally relevant teaching, social and emotional wellness, and school safety.	\$10,210.00	No
2.18	Outreach to Parents of English Learner Students	Bilingual Instructional Aides and contracted services will be utilized to provide translation services beyond what is required for parent conferences, school events, and community outreach beyond their work	\$65,173.00	Yes

Action #	Title	Description	Total Funds	Contributing
		hours. District and site administration, in coordination with counselors, Student Staff Resource Advisors, Grade Level Coordinators, and Elementary Learning Specialists, will ensure participation and access to parent meetings and education events through multiple means of communication, technology aid, translation, childcare, and other means to increase participation and attendance from parents of English Learner students.		

Goals and Actions

Goal

Goal #	Description	Type of Goal
3	Safety and Wellness: The District is committed to cultivating a safe, respectful, equitable, and inclusive learning environment, recognizing its paramount importance to student achievement. The District endeavors to nurture a culture that prioritizes the emotional well-being, physical safety, and overall wellness of its students, staff, and families. Through proactive measures and ongoing collaboration with staff, students, and parents/guardians, Walnut Valley strives to ensure that every member of the educational community feels supported, valued, and empowered to thrive academically, socially, and emotionally.	Broad Goal

State Priorities addressed by this goal.

- Priority 1: Basic (Conditions of Learning)
- Priority 3: Parental Involvement (Engagement)
- Priority 5: Pupil Engagement (Engagement)
- Priority 6: School Climate (Engagement)
- Priority 8: Other Pupil Outcomes (Pupil Outcomes)

An explanation of why the LEA has developed this goal.

The safety and wellness goals of Walnut Valley are designed to create an environment where every individual—students, staff, and parents—feels secure, respected, valued, and supported. The 2023 suspension rate of 1.5% and zero expulsions validate the goal of ensuring a safe, respectful, and inclusive learning environment. To prioritize the goal of safety and wellness, the District extensively analyzed Dashboard data and engaged in consultations with various educational partners. The decision stemmed from a thorough examination of key metrics related to student well-being and safety within the District.

Analysis of Dashboard suspension data revealed concerning disproportionality with two of the student groups, foster and homeless youth suspension rates at 22.90% and 12.80%, respectively. These metrics indicated a need for root cause analysis for the high rates of suspension among foster and homeless youth and collective solutions to prevent out-of-school-time disciplinary actions.

Furthermore, consultations with educational partners, including teachers, counselors, administrators, and parents, highlighted consistent concerns regarding student safety and well-being. These discussions underscored the importance of proactively addressing issues such as bullying, substance abuse, and mental health support to ensure that all students feel safe, supported, and able to thrive academically and personally.

In promoting transparency and understanding around this decision, the District has communicated extensively with educational partners through various channels, including focused group meetings, surveys, and informational sessions. The District has shared data insights and

solicited feedback to ensure that the approach to prioritizing safety and wellness aligns with the needs and perspectives of the school community.

Measuring and Reporting Results

Metric #	Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Target for Year 3 Outcome	Current Difference from Baseline
3.1	School Facilities in “Good Repair” as measured by the Facilities Inspection Tool.	All 15 schools are at or above Good Repair (85%-97.99%) as measured by the Facilities Inspection Tool. No complaints filed in Fall 2023.	All 15 schools are at or above Good Repair (85%-97.99%) as measured by the Facilities Inspection Tool. No complaints filed in Fall 2024.	12 schools are at or above Good Repair (90% - 98.99%) as measured by the Facilities Inspection Tool. 1 complaint filed in Fall 2025 under Williams Act.	Maintain all 15 schools at or above Good Repair. No complaints filed under Williams Act.	Difference from the baseline is -3 schools and +1 complaint.

Goal Analysis [2025-26]

An analysis of how this goal was carried out in the previous year.

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

During the 2025/2026 school year, out of 13 action items in Goal #3, 10 were fully implemented, and 3 were partially implemented. Fully implemented actions included comprehensive school safety plans, progressive discipline, social-emotional supports, increased counseling services, mental health training, SEL professional development, crisis response, school climate, mental health partnerships, and communication platforms. Partially implemented actions included school facilities, counseling services, and wellness centers.

Action Item 3.1 - School Facilities - Partially Implemented

Successes: 12 out of 15 schools are at or above Good Repair standards (90%-98.99%) as measured by the Facilities Inspection Tool. Maintenance and operations procedures continue to support clean and safe learning environments across the District.

Challenges: Three schools fell below the Good Repair threshold this year, and one complaint was filed in Fall 2025 under the Williams Act. A key factor in this shift was the CDE raising the Good Repair standard from 85% to 90%, which resulted in additional schools no longer meeting the updated benchmark despite maintaining similar facility conditions as prior years.

Barriers: The updated CDE standard created a higher compliance threshold that the District was not fully positioned to meet across all 15 sites simultaneously. Continued preventive maintenance and facility investment will be needed to bring all remaining schools into compliance.

Action Item 3.2 - Comprehensive School Safety Plans - Fully Implemented

Successes: All 15 schools submitted comprehensive school safety plans, representing 100% completion. School sites regularly review and refine safety procedures through annual updates developed in collaboration with public health agencies and community partners. Partnerships with the Diamond Bar and Walnut Sheriff's Stations provided valuable feedback to help school teams assess and strengthen active threat protocols. The District also implemented clear guidelines for extreme weather conditions, including the use of the Wet Bulb Globe Temperature (WBGT) chart to evaluate the safety of outdoor activities and protect student health during periods of extreme heat.

Challenges: The District must continue monitoring evolving state legislation and public health recommendations to maintain compliance and safety standards going forward.

Action Item 3.3 - Counseling Services - Partially Implemented

Successes: All elementary and secondary schools continue to have full-time counselors providing support for behavior and academic intervention. This year, the District hired a full-time Bilingual Psychologist, a Social Worker, and an MTSS TOSA to provide stronger supports for unduplicated students. The District is also revamping SST protocols and multi-tiered systems of support (MTSS) to move toward more proactive strategies.

Challenges: Due to increased on-campus demand, counselors were not able to attend all conferences originally planned, including the California Foster Youth Education Summit, California Title 1 Conference, and conferences on restorative and trauma-informed practices.

Additionally, this being the first year with the new bilingual psychologist, social worker, and MTSS TOSA, training staff on how and when to utilize these roles presented a learning curve. Finding dedicated time for counselor professional development and conference attendance is identified as a priority area for the next school year.

Barriers: High on-campus student need required counselors to prioritize direct services over external professional development opportunities. The newness of the expanded support roles created an adjustment period that limited their full impact in year one.

Action Item 3.4 - Progressive Discipline - Fully Implemented

Successes: The Alternative to Suspension (ATS) program is now in its second year across three middle schools and two high schools. In 2025/2026, 106 students benefited from the program, saving a total of 201 school days that would have otherwise been served as out-of-school suspensions. Restorative practices are being embedded into progressive discipline moving forward, with a focus on re-entry support for students. Each site developed restorative means of correction and progressive discipline policies to ensure an equitable climate. The Districtwide suspension rate decreased 0.9% from baseline, with foster youth suspension rates decreasing 8.2% and homeless youth suspension rates decreasing 10.9%. Additionally, 41 BCBA referrals were made to observe students with extreme behavior incidents and provide consultation and support for teachers.

Challenges: Continued training and evaluation will be needed to ensure consistent application of restorative practices across all sites as the program scales and deepens.

Action Item 3.5 - Social Emotional Supports - Fully Implemented

Successes: Comprehensive staffing continued across all levels, including intervention counselors and Grade Level Coordinators at high schools, Elementary Learning Specialists and counselors at elementary schools, and Student Staff Resource Advisors at middle schools. The District SEL Council received professional development on research-based strategies for social-emotional learning, executive functioning, and data-informed decision making. The Districtwide suspension rate decreased 0.9% from baseline, foster youth suspension rates decreased 8.2%, and homeless youth suspension rates decreased 10.9%. The ATS program benefited 106 students, saving 201 school days.

Challenges: Continued use of data to evaluate impact and guide future SEL efforts will be essential to sustaining and expanding these positive outcomes across the District.

Action Item 3.6 - Wellness - Partially Implemented

Successes: 73% of school sites have a dedicated physical room or space to promote wellness, emotion regulation, and student support. Wellness centers continue to be staffed by school personnel and peer counselors. Spring 2026 student survey data shows 94.2% of students agree schools support their social and emotional well-being (up 9.6% from baseline), and 91.4% agree they receive support and help from counselors (up 4.1%).

Challenges: Four schools have yet to implement a wellness center, and wellness centers are not yet fully staffed during all school hours. Reaching 100% implementation will be difficult given space, capacity, and staffing constraints, particularly as enrollment increases and available campus space becomes more limited. For campuses with limited indoor space, the District is exploring outdoor wellness areas as alternative options.

Barriers: Physical space limitations and growing enrollment make it difficult to dedicate indoor rooms to wellness at all sites. Staffing capacity also limits full-day coverage in existing wellness centers.

Action Item 3.7 - Increased Counseling Services - Fully Implemented

Successes: The District developed a District Behavior Team consisting of two Board Certified Behavior Analysts (BCBAs) and five Behavior Interventionists to support students who require higher levels of behavioral support, as determined through the SST process. The District also hired a full-time Bilingual Psychologist, a Social Worker, and an MTSS TOSA to strengthen supports for unduplicated students. Spring 2026 data shows 96.6% of parents agree schools support the social-emotional well-being of all students (up 4.9% from baseline), 94.2% of students agree schools support their social and emotional well-being (up 9.6%), and 91.4% of students agree they receive support and help from counselors (up 4.1%).

Challenges: With multiple new positions added this year, defining roles and training staff on how and when to utilize these new team members was an ongoing learning process. The District will look to maximize the impact of these positions in the coming school year.

Action Item 3.8 - Training to Support Mental Health, PBIS, and Trauma-Informed Practices - Fully Implemented

Successes: The two BCBAs provided support across three key areas: behavior consultations, classroom observations, and training and coaching on behavior strategies. The District hired five Behavior Interventionists dedicated to supporting students with behavioral needs. All nine elementary schools received recognition from the LACOE PBIS team for their phenomenal implementation of PBIS at various levels, reflecting a significant Districtwide achievement. Spring 2026 staff survey data shows 89.9% of staff agree that the tiered system of support is effectively implemented to meet the diverse needs of students.

Challenges: While tiered support implementation is strong, 60.6% of teachers and school staff still express concern about students' social-emotional well-being, a decrease of 2.4% from baseline. While the trend is moving in the right direction, having more than half of staff still expressing concern indicates that ongoing training and layered supports remain a critical need.

Action Item 3.9 - SEL Professional Development - Fully Implemented

Successes: Ongoing SEL training was provided to staff, students, and parents throughout the year to build safe, respectful, inclusive, and equitable learning environments. Spring 2026 data shows strong outcomes: 94.2% of students agree schools support their social-emotional well-being (up 9.6% from baseline), 97.4% agree schools promote safe, respectful, equitable, and inclusive learning (up 2.8%), 94.5% feel they belong at their school (up 7.9%), 96.6% of parents agree schools support the social-emotional well-being of all students (up 4.9%), and 97.9% of staff believe developing social-emotional skills is important for student success.

Challenges: Alignment in training outcomes and consistent implementation across all school sites should continue to be monitored to ensure no sites fall behind.

Action Item 3.10 - Crisis Response Team - Fully Implemented

Successes: 20 staff members were trained on the PREPaRE curriculum, a comprehensive crisis prevention and intervention program. Now in its second year, the systematic approach to threat and risk assessments was further strengthened through a streamlined District process

and comprehensive training for each school site's assessment team. As of May 2026, the District has documented 100 risk assessments and 83 threat assessments, with this data being used to identify patterns and provide targeted supports.

Challenges: Regular drills and ongoing protocol reviews will remain necessary to keep teams prepared and responsive as crisis response practices continue to evolve.

Action Item 3.11 - School Climate - Fully Implemented

Successes: Principals, assistant principals, and counselors received training on new legislation requiring enhanced support services for victims of bullying and harassment. Spring 2026 student survey data reflect strong school climate indicators: 87.8% of students can go to an adult for help (up 3.8% from baseline), 94.7% feel connected to their peers (up 8%), 83.5% feel connected to adults at school (up 3.2%), and 94.5% feel a sense of belonging (up 7.9%). Additionally, 95.1% of parents agree their child feels connected to school with a strong sense of belonging (up 1.6% from baseline).

Challenges: Developing a comprehensive system for reporting misconduct, including bullying, discrimination, harassment, and safety concerns, is identified as a goal for the next school year. Guidance around Artificial Intelligence for students and staff is also identified as a next step.

Action Item 3.12 - Mental Health Services and Interventions - Fully Implemented

Successes: Hazel Health completed its second year as an additional teletherapy support, conducting 720 sessions for 118 students. Students accessed services both at school (21%) and from home (79%), demonstrating the flexibility and accessibility of the program. Care Solace supported 93 cases and facilitated 55 appointments as of April 2026, with childhood trauma, anxiety, and depression as the top three concerns addressed. Pacific Clinics also continued to be available across all sites.

Challenges: Careful coordination across multiple mental health providers will remain important to ensure service integration and avoid gaps in support.

Action Item 3.13 - Communication Platforms - Fully Implemented

Successes: The District hired a Public Information Specialist this school year, bringing consistency and streamlined protocols to communication across all 15 school sites. The Let's Talk platform continues to be used daily to facilitate timely responses to parents, staff, and community members. Spring 2026 parent survey data shows 97.3% of parents agree the District and schools use a variety of methods to communicate.

Challenges: The prior year's vacancy in the Public Information Specialist role had created communication gaps, but the successful hire this year addressed those concerns. Sustaining consistent communication standards across all sites will remain an ongoing priority.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

There are no material differences.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

Out of the 13 actions implemented for Goal #3, 10 actions were found to be effective, and 3 were partially effective based on the collected data and evidence.

Effective Actions (10):

Action 3.2: Comprehensive School Safety Plans - This action has been effective, with 100% of schools (all 15) submitting comprehensive school safety plans. Active partnerships with local law enforcement and implementation of weather safety protocols reflect a well-coordinated and thorough approach to school safety.

Action 3.4: Progressive Discipline - This action has been effective in addressing disciplinary inequities. The Districtwide suspension rate decreased to 0.9% from baseline, foster youth suspension rates decreased to 8.2%, and homeless youth suspension rates decreased to 10.9%. In 2025/2026, 106 students benefited from the Alternative to Suspension program, saving 201 school days, and 41 BCBA referrals were made to support teachers in addressing extreme behavior incidents.

Action 3.5: Social Emotional Supports - This action has been effective across multiple indicators. The Districtwide suspension rate decreased to 0.9% from baseline, foster youth suspension rates decreased to 8.2%, and homeless youth suspension rates decreased to 10.9%. For socioeconomically disadvantaged students, 0.9% were suspended at least one day, reflecting a decline of 0.5% from baseline. The ATS program continued to divert students from out-of-school suspension, saving 201 school days while providing restorative support in its place.

Action 3.7: Increased Counseling Services - This action has been effective. Spring 2026 data shows 96.6% of parents agree schools support the social-emotional well-being of all students (up 4.9% from baseline), 94.2% of students agree schools support their social and emotional well-being (up 9.6%), and 91.4% of students agree they receive support and help from counselors (up 4.1%).

Action 3.8: Training to Support Mental Health, PBIS, and Trauma-Informed Practices - This action has been effective. Spring 2026 staff survey data shows 89.9% of staff agree the multi-tiered system of support is effectively implemented to meet diverse student needs. All nine elementary schools received recognition from the LACOE PBIS team for outstanding implementation. While 60.6% of staff still express concern about students' social-emotional well-being, this represents a decrease of 2.4% from baseline, reflecting a positive trend.

Action 3.9: SEL Professional Development - This action has been effective based on strong outcome data across all educational partner groups. Student agreement that schools support social-emotional well-being reached 94.2% (up 9.6% from baseline), agreement that schools promote safe and inclusive learning reached 97.4% (up 2.8%), and sense of belonging reached 94.5% (up 7.9%). Parent agreement that schools support social-emotional well-being reached 96.6% (up 4.9%), and 97.9% of staff believe developing social-emotional skills is important for student success.

Action 3.10: Crisis Response Team - This action has been effective. As of May 2026, the District documented 100 risk assessments and 83 threat assessments, with findings used to identify patterns and inform targeted supports. Now in its second year, the streamlined District process and training infrastructure reflect a mature and well-functioning crisis response system.

Action 3.11: School Climate - This action has been effective, with notable improvements across all key school climate indicators. Student agreement that they can go to an adult for help reached 87.8% (up 3.8% from baseline), peer connectedness reached 94.7% (up 8%), adult connectedness reached 83.5% (up 3.2%), and sense of belonging reached 94.5% (up 7.9%). Parent agreement that their child feels connected to school reached 95.1% (up 1.6% from baseline).

Action 3.12: Mental Health Services and Interventions - This action has been effective. Care Solace supported 93 cases and facilitated 55 appointments focused on childhood trauma, anxiety, and depression. Hazel Health completed 720 teletherapy sessions for 118 students in its second year, with services accessed from both school and home, demonstrating broad reach and flexibility.

Action 3.13: Communication Platforms - This action has been effective following the successful hire of a Public Information Specialist who streamlined communication protocols across all 15 sites. Spring 2026 parent survey data shows 97.3% of parents agree the District and schools use a variety of methods to communicate, reflecting strong satisfaction with District communication efforts.

Partially Effective Actions (3):

Action 3.1: School Facilities - This action has been partially effective. While 12 of 15 schools are at or above the Good Repair standard (90%-98.99%), three schools fell below the updated threshold following the CDE's decision to raise the standard from 85% to 90%. One complaint was also filed under the Williams Act in Fall 2025. The change in state standards is the primary factor behind this shift, and the District will need to continue prioritizing facility upkeep to bring all remaining schools into compliance.

Action 3.3: Counseling Services - This action has been partially effective. All schools have full-time counselors in place, and suspension rates decreased across all measured student groups. The Districtwide suspension rate decreased 0.9% from baseline, foster youth suspension rates decreased 8.2%, and homeless youth suspension rates decreased 10.9%. For socioeconomically disadvantaged students, 0.9% were suspended at least one day, reflecting a decline of 0.5% from baseline. However, counselors were unable to attend all planned professional development conferences due to high on-campus demand. Additionally, this being the first year for the newly hired Bilingual Psychologist, Social Worker, and MTSS TOSA, staff training on how to access and leverage these roles was a limiting factor. SST protocols and MTSS are being revamped for the next school year to shift toward more proactive strategies.

Action 3.6: Wellness - This action has been partially effective. While 73% of school sites have a dedicated wellness space and student well-being survey data is trending positively (94.2% of students agree schools support their social-emotional well-being, up 9.6%), four schools have yet to implement a wellness center and existing centers are not fully staffed during school hours. Physical space limitations, enrollment growth, and staffing constraints continue to be barriers to full implementation across all 15 sites.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

Action 3.1- The increase is due to liability insurance, a rise in routine maintenance costs, salary increase, and a rise in utility costs.

Action 3.4 - LREBG funds decreased to \$870,000 from \$1,500,000. This action is partially funded by LREBG funds.

Action 3.12- LREBG funds increased to \$287,000 from \$150,000. This action is partially funded by LREBG funds.

Actions 3.2 and 3.13- Actions will be carried out by district personnel instead of outside agencies.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Actions

Action #	Title	Description	Total Funds	Contributing
3.1	School Facilities	MOTF Division (Maintenance, Operations, Transportation, and Facilities) will coordinate services with school custodial and administration for consistent maintenance of providing clean, safe, environmentally responsible, and well-maintained facilities to support student learning.	\$27,228,265.00	No
3.2	Comprehensive School Safety Plans	School administration, in collaboration with Educational Services, parent community, student body, public health agencies, and community partnerships, will establish and implement safety protocols, including protocols adhering to Public Health guidelines and latest state legislation, to ensure safe, conducive learning environments.	\$0.00	No
3.3	Counseling Services	All elementary and secondary schools will have full-time counselors to provide training for classroom teachers focusing on unduplicated students (English Learner students, foster youth, and low-income) to aid in behavioral and academic intervention. Counselors will work with the school administration team to provide intervention for unduplicated student groups to make connections, monitor progress, and receive additional support or counseling services as needed. Counselors will continue expanding their repertoire by attending training such as the California Foster Youth Education Summit, the California Title 1 Conference, and conferences on restorative and trauma-informed practices. Suspension metric 3.2 - Decrease the suspension rate for foster and homeless youth.	\$3,528,870.00	Yes

Action #	Title	Description	Total Funds	Contributing
3.4	Progressive Discipline / Behavior Support	LREBG Action The site administration and counselors, and GLCs, with the Director of Student Services, will continue to address possible inequities in discipline among student groups, addressing the disproportionate number of foster and homeless students suspended as disciplinary actions. Restorative practices and interventions for students with behavioral issues (other means of correction) and other proactive measures as well, positive reinforcement will be utilized to create an equitable school climate. Under the allowable use of funds for the Learning Recovery Emergency Block Grant, schools will receive Behavior Interventionists and Board Certified Behavior Analysts to support students' social and emotional well-being and to address barriers resulting from trauma and other needs. The Student Staff Resource Advisors at each of the middle schools will be partially funded from LREBG to address progressive discipline and students' social and emotional learning. Based on the District's Needs Assessment, students, particularly in grades K-5 at all elementary sites, exhibited an increase in extreme behaviors. The needs assessment also showed a need for proactive, progressive discipline support that equips middle school students with skills to navigate conflict and trauma. Research indicates that early intervention is key to supporting students, particularly when teaching skills such as emotional self-regulation and coping strategies. The metrics used to measure this will be 3.2 (Suspension) and 3.4 (Locally administered SEL/Climate Survey). LREBG Funds of \$870,000 will be allocated for staffing Behavior Interventionists and Board Certified Behavior Analysts, and for partially funding Student Staff Resource Advisors at each of the middle schools to support behavior and social and emotional learning.	\$870,000.00	No
3.5	Social Emotional Supports	Educational Services will continue to provide staffing, training, and ongoing communication to identify the needs and interventions supporting unduplicated students and their families' social and emotional needs.	\$133,447.00	Yes

Action #	Title	Description	Total Funds	Contributing
		Staffing will include Intervention Counselors and Grade-Level Coordinators at the high schools, Elementary Learning Specialists and Counselors at the elementary schools, and Student Staff Resource Advisors at the middle schools. The District Social and Emotional Learning (SEL) Council will continue to provide training on evidence-based strategies to promote SEL from Collaborative for Academic, Social, and Emotional Learning (CASEL) to advance SEL as a lever for equity and excellence. Other training will include multi-tiered systems of support, restorative practices, trauma-informed practices, executive functioning, and other research-based consultants to work with the District and school sites to provide additional training for SEL. Suspension metric 3.2 - Decrease the suspension rate for foster and homeless youth.		
3.6	Wellness	Educational Services with site administration will provide opportunities for all students to access sources of wellness and support (i.e., wellness center, peer counseling, health office, etc.) to bolster all students' emotional safety and well-being. All secondary schools and elementary schools have dedicated a physical room or space to promote wellness, emotion regulation, and resources to provide a safe, supportive space for students to develop healthy strategies for personal management, improve school climate, and promote academic success. The Wellness Center is staffed by school personnel and/or peer counselors to support students who visit the center. Schools also have Health Clerks and District School Nurses to promote health and hygiene among all students.	\$2,302,470.00	No
3.7	Increased Counseling Services	The District administration will provide staffing for student support at all levels while increasing the percentage of counseling and behavior interventions in grades TK-12 to provide prevention, intervention, and postvention strategies.	\$4,875,411.00	No

Action #	Title	Description	Total Funds	Contributing
3.8	Training to Support Mental Health, PBIS, and Trauma Informed Practices	Educational Services will continue to provide training, education, and strategies for staff regarding student mental health, including Positive Behavior Intervention Support (PBIS) for K-12, restorative practices, and trauma-informed practices to re-engage students and provide layers of support.	\$0.00	No
3.9	Professional Development for Social and Emotional Learning	Educational Services and site administration will provide ongoing SEL training to staff, students, and parents to create a safe, respectful, inclusive, and equitable learning environment where students feel safe, supported, and engaged.	\$0.00	No
3.10	Crisis Response Team	The District administration will coordinate the efforts of District personnel with those in mental health and medical professionals to address the emotional responses that evolve from traumatic and critical situations. The District will establish and streamline a process with a centralized Crisis Response Team that supports School Principals and school staff with responding to crises that occur at their school site.	\$0.00	No
3.11	School Climate	The School administration team will increase the quality and character of school life based on patterns of students', parents', and school personnel's experiences. School climate includes but is not limited to norms, goals, values, interpersonal relationships, teaching and learning practices, and organizational structures. It can also include school safety in areas such as bullying, cyber safety, and digital citizenship.	\$0.00	No
3.12	Mental Health Services and Interventions	LREBG Action The District will implement practices and partner with community resources such as Pacific Clinic, Hazel Health, CareSolace, and other resources to	\$4,999,470.00	No

Action #	Title	Description	Total Funds	Contributing
		support mental health across the District's school sites to address student needs with trauma, adverse experiences, and other forms of severe needs. Under the allowable use of funds for the Learning Recovery Emergency Block Grant, the District will partner with services to provide counseling and mental health services through services such as teletherapy, Marriage and Family Therapists (MFTs), and social workers to provide Tier 2 and Tier 3 supports for students experiencing increased mental health needs. Based on the District's Needs Assessment, due to a lack of resources for families and students, there are critical delays in students accessing essential support services, thereby highlighting a clear need for solutions like teletherapy, MFTs, and social workers to provide more immediate and timely care. Research consistently demonstrates that students' mental health is foundational to their academic achievement and engagement, as well-being fosters the cognitive, emotional, and social capacities essential for learning and active participation in school. Research unequivocally demonstrates that positive mental health is foundational to student achievement and engagement, influencing their ability to learn, concentrate, manage stress, and build the healthy relationships essential for academic success. The metrics used to measure this will be 3.2 (Suspension) and 3.4 (Locally administered SEL/Climate Survey). LREBG Funds of \$287,000 will be allocated for partnerships with services that provide teletherapy, access to MFTs, and social workers.		
3.13	Communication Platforms	District and site administration and the Public Information Specialist will update and maintain school and District websites and social media platforms for parents and community educational partners to access current District and school events/news. To provide timely responses to parents, community, staff, and students, the District administration utilizes the Let's Talk communication tool to respond to submissions.	\$0.00	No

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students [2026-27]

The Budgeted Expenditures for Actions identified as Contributing may be found in the Contributing Actions Table.

Required Descriptions

LEA-wide and Schoolwide Actions

For each action being provided to an entire LEA or school, provide an explanation of (1) the unique identified need(s) of the unduplicated student group(s) for whom the action is principally directed, (2) how the action is designed to address the identified need(s) and why it is being provided on an LEA or schoolwide basis, and (3) the metric(s) used to measure the effectiveness of the action in improving outcomes for the unduplicated student group(s).

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
1.4	Action: Attendance Support for Unduplicated Pupils Need: The 2023 California Dashboard reports that the District's chronic absenteeism among homeless youth students is very high (33.3%), and foster youth is high at 18.20%, while all students are at a medium (8.10%) chronic	While the action directly benefits homeless and foster youth, implementing it on an LEA-wide basis offers advantages for everyone, including Hispanic students, students with disabilities, low-income students, Filipino students, and White students, who received the lowest performance on the state indicator for Chronic Absenteeism. This is provided on an LEA-wide basis to maximize the impact of the importance of regular school attendance.	1.2 Chronic Absenteeism Rate

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	absenteeism level. Looking closely at the data, 11 out of 33 homeless students and 4 out of 22 foster youth have been identified as chronically absent during the 2022/2023 school year. Based on the District's needs assessment, the following needs have been identified for homeless/low-income student groups: stable housing, transportation, and support personnel at school. Scope: LEA-wide	Reduced absenteeism creates a more stable learning environment for all students. Fewer disruptions and consistent attendance can foster better focus and a stronger sense of student engagement. Attendance support programs can identify students struggling with attendance issues before they become chronically absent. This allows for early intervention and support. A Districtwide program allows for a centralized team of professionals with expertise in addressing chronic absenteeism. This team can then share resources and best practices with all schools, benefiting all students. Focusing attendance support on unduplicated students offers a targeted approach to addressing chronic absenteeism among homeless/low-income students. Homelessness often comes with challenges that contribute to absenteeism, like unstable housing, lack of transportation, or difficulty focusing on school. Support programs can address these issues directly, providing resources for finding shelter, transportation assistance, or even on-site support services. Implementing this action Districtwide creates a ripple effect, fostering a more positive school climate, providing early intervention for at-risk students, and ultimately benefiting all students in the District. This is the most effective use of funds because research has shown that positive interventions and support systems foster engagement and connectedness, especially among homeless/low-income students and foster youth, thereby increasing student attendance (Tejada-Gillardo et al., 2020).	

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
2.2	Action: Academic Professional Development to Close the Achievement Gap Need: The 2023 achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in ELA is 43.67% (English Only 73.55% / English Learner students 29.88%). The achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in Math is 13.79% (English Only 61.98% / English Learner students 48.19%). The achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting or exceeding standards on the CAASPP test in ELA is 12.19% (Not Economically Disadvantaged 79.40% / Economically Disadvantaged 67.21%). The achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting or exceeding standards on the CAASPP test in Math is 11.28% (Not Economically Disadvantaged 73.98% / Economically Disadvantaged 62.70%). The achievement gap between not foster youth and foster youth students meeting or	When school Districts invest in academic and professional development focused on closing the achievement gap, they create a positive learning environment for all students, especially unduplicated students, who often face unique challenges (language barriers, poverty, lack of stable housing). The District provides academic professional development on an LEA-wide basis to maximize the impact of closing the achievement gap and to make it readily available to all students. Professional development programs equip educators with research-based strategies to address the specific needs of unduplicated students. This could include differentiated instruction techniques, culturally responsive teaching methods, or interventions for overcoming learning obstacles. Educators may develop unconscious biases that can affect their interactions with students. Professional development can help them recognize and dismantle these biases, ensuring all students receive equal learning opportunities and success. Stronger teacher-student relationships are crucial for student success. Professional development programs can emphasize building rapport and fostering trust with unduplicated students who may have experienced educational disruptions or instability. Implementing professional development to close the achievement gap benefits all students Districtwide. Teachers sharing best practices and strategies learned during professional development fosters a collaborative school culture, which benefits all students as teachers learn from each other and implement effective strategies	2.9 The achievement gap percentage of students meeting or exceeding standards on the CAASPP Math and ELA exams.

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	exceeding standards on the CAASPP test in ELA is 51.11% (not foster youth 76.11% / foster youth 25.00%). The achievement gap between not foster youth and foster youth students meeting or exceeding standards on the CAASPP test in Math is 52.76% (not foster youth 70.94% / foster youth 18.18%). Based on the District's needs assessment, the following needs have been identified for low-income, foster youth, and English Learner student groups. These student groups need teachers who are well-prepared to address their learning gaps. Scope: LEA-wide	across classrooms. Focusing on closing the achievement gap encourages high expectations for all students, regardless of background. This creates a more rigorous learning environment that motivates all students to reach their full potential. Addressing the achievement gap moves schools closer to educational equity. This creates a stronger overall learning environment where all students have the tools and support they need to excel. Professional development focused on closing the achievement gap helps unduplicated students and creates a more effective and equitable learning environment for all students. It equips educators with the necessary skills to address student needs, fosters collaboration, and raises expectations, ultimately leading to a Districtwide culture of academic excellence. This is the most effective use of funds because qualitative data on feedback from staff who participate in academic professional development describe the impact of positive academic outcomes, as evidenced by the decreasing achievement gap among student groups.	
2.5	Action: Equity and Access Need: The 2023 achievement gap between English Only students and English Learner students meeting or exceeding standards on the	The more opportunities foster youth, low-income, and English Learner students have at the school sites, the greater the learning opportunities to ensure equitable outcomes. The research behind educational equity defines equity as the assurance that unduplicated students have the support and resources they need to be successful. Educational equity is about putting systems in place to ensure	2.6 Performance on statewide CAASPP ELA assessments 2.7 Performance on statewide CAASPP Math assessments

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	CAASPP test in ELA is 43.67% (English Only 73.55% / English Learner students 29.88%). The achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in Math is 13.79% (English Only 61.98% / English Learner students 48.19%). The achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting or exceeding standards on the CAASPP test in ELA is 12.19% (Not Economically Disadvantaged 79.40% / Economically Disadvantaged 67.21%). The achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting or exceeding standards on the CAASPP test in Math is 11.28% (Not Economically Disadvantaged 73.98% / Economically Disadvantaged 62.70%). The achievement gap between not foster youth and foster youth students meeting or exceeding standards on the CAASPP test in ELA is 51.11% (not foster youth 76.11% / foster youth 25.00%). The achievement gap between not foster youth and foster youth students meeting or exceeding standards on the CAASPP test in Math is 52.76% (not foster youth 70.94% / foster youth 18.18%).	every unduplicated student has an equal chance for success. This requires the District and schools to understand the unique challenges and barriers (lack of stability at home, language barriers, lack of resources) faced by unduplicated students and to provide support during the school day to help them overcome them. TK-12 teachers and support staff have been addressing educational equity for unduplicated student groups through professional learning in improvement science to define the problem of practice and develop solutions that are viable for these groups. In conjunction with professional learning on improvement science, school teams have been streamlining the Student Success Team process to provide consistent Tier 1 best-first instruction for all students, Tier 2 targeted support for students needing support academically, behaviorally, or socially-emotionally, and Tier 3 intensive, individualized support from specialized staff. These actions will increase opportunities during the school day to ensure that foster youth, low-income, and English Learner students have the resources and support to attain academic success. This is provided on an LEA-wide basis to maximize the impact in increasing academic success for all students. This is the most effective use of funds for the District's foster youth, low-income, and English Learner students because past experience and observation have shown that a systemic, sustainable approach to whole-child support is the	2.9 The achievement gap percentage of students meeting or exceeding standards on the CAASPP Math and ELA exams. 2.13 Percentage of English Learner students who made progress toward English Proficiency measured by ELPAC

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	29.88% of English Learner students (grades 3-8 and 11) met/exceeded standards on the ELA 2023 CAASPP. 67.21% of socioeconomically disadvantaged students (grades 3-8 and 11) met/exceeded standards on the ELA 2023 CAASPP. 25% of foster youth (grades 3-8 and 11) met/exceeded standards on the ELA 2023 CAASPP. 48.19% of English Learner students (grades 3-8 and 11) met/exceeded standards on the Math 2023 CAASPP. 62.70% of socioeconomically disadvantaged students (grades 3-8 and 11) met/exceeded standards on the Math 2023 CAASPP. 18.18% of foster youth (grades 3-8 and 11) met/exceeded standards on the Math 2023 CAASPP. 60% of ELs making progress toward English Proficiency, 2023, as measured by the Summative ELPAC. Based on the District's needs assessment, the following needs have been identified for low-income, foster youth, and English Learner student groups. These student groups need teachers and support staff who are well-prepared to	most successful in closing achievement gaps among Walnut Valley's student groups.	

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	address their learning gaps and increase learning opportunities within the school day. Scope: LEA-wide		
2.9	Action: TK-12 Collaboration Need: The 2023 achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in ELA is 43.67% (English Only 73.55% / English Learner students 29.88%). The achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in Math is 13.79% (English Only 61.98% /English Learner students48.19%). The achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting or exceeding standards on the CAASPP test in ELA is 12.19% (Not Economically Disadvantaged 79.40%/ Economically Disadvantaged 67.21 %). The achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting or exceeding standards on the CAASPP test in	Strong collaboration among staff across all grade levels (TK-12) is a powerful tool for improving the educational experience for unduplicated students facing unique challenges and barriers (e.g., lack of stability at home, language barriers, lack of resources). Effective TK-12 collaboration ensures a smoother transition for unduplicated students entering new schools or grade levels. Staff can share information about students' strengths, weaknesses, and past experiences, enabling a more personalized approach to learning. Collaboration creates a comprehensive support system for unduplicated students. Teachers, Counselors, Instructional Aides, and other staff can work together to address academic, social, and emotional needs, ensuring a more holistic approach to their well-being. Sharing observations and experiences across grade levels can lead to earlier identification of potential learning difficulties or other issues faced by unduplicated students. This allows for earlier intervention and support, maximizing their chances of success.	2.6 Performance on statewide CAASPP ELA assessments 2.7 Performance on statewide CAASPP Math assessments 2.9 The achievement gap percentage of students meeting or exceeding standards on the CAASPP Math and ELA exams.

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Math is 11.28% (Not Economically Disadvantaged 73.98% / Economically Disadvantaged 62.70%). The achievement gap between not foster youth and foster youth students meeting or exceeding standards on the CAASPP test in ELA is 51.11% (not foster youth 76.11% /foster youth 25.00%). The achievement gap between not foster youth and foster youth students meeting or exceeding standards on the CAASPP test in Math is 52.76% (not foster youth 70.94% /foster youth 18.18%). 29.88% of English Learner students (grades 3-8 and 11) met/exceeded standards on the ELA 2023 CAASPP. 67.21% of socioeconomically disadvantaged students (grades 3-8 and 11) met/exceeded standards on the ELA 2023 CAASPP. 25% of foster youth (grades 3-8 and 11) met/exceeded standards on the ELA 2023 CAASPP. 48.19% of English Learner students (grades 3-8 and 11) met/exceeded standards on the Math 2023 CAASPP. 62.70% of socioeconomically disadvantaged students (grades 3-8 and 11) met/exceeded standards on the Math 2023 CAASPP.	Implementing TK-12 collaboration Districtwide benefits all students in several ways: Collaboration allows staff to align curriculum and expectations across grade levels. This creates a more cohesive learning experience for all students, ensuring they build upon existing knowledge as they progress through the school system. Staff from different grade levels can share best practices and teaching strategies. This fosters a culture of continuous improvement, ultimately benefiting all students with more effective instruction. Collaboration creates a unified school culture where all staff members feel responsible for the success of all students. This fosters a sense of community and shared purpose, leading to a more positive learning environment for everyone. TK-12 staff collaboration is about supporting unduplicated students and creating a stronger and more effective learning environment for all students. Through knowledge sharing, a focus on transitions, and a more holistic support system, collaboration empowers educators to address individual needs and foster a culture of continuous improvement that benefits all. These actions will create consistent learning experiences for foster youth, low-income, and English Learner students to attain academic success. This is provided on an LEA-wide basis to maximize the impact of increasing academic success for all students.	

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	18.18% of foster youth (grades 3-8 and 11) met/exceeded standards on the Math 2023 CAASPP. Based on the District's needs assessment, the following needs (e.g., language barriers, lack of resources, or instability of home status) have been identified for low-income, foster youth, and English Learner student groups: Ensure students receive high expectations and rigorous instruction from teachers consistent throughout the school and District. Scope: LEA-wide	This is the most effective use of funds because research on teacher collaboration points to positive effects for teachers, which improved self-efficacy (cf. Puchner and Taylor, 2006), increased teaching effectiveness (cf. Graham, 2007), and improved instructional quality for unduplicated student groups (cf. Jackson and Bruegmann, 2009; Hochweber et al., 2012). These positive effects will improve their quality as professionals, and, as Hattie (2003) suggests, teacher quality alone accounts for 30% of the variance in student performance, including increases in student achievement for unduplicated student groups.	
2.10	Action: Elementary Support Need: The 2023 achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in ELA is 43.67% (English Only 73.55% / English Learner students 29.88%). The achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in Math is 13.79% (English Only 61.98% /English Learner students 48.19%).	The role of Elementary Learning Specialists (ELS) plays a crucial role in promoting student success, particularly for unduplicated students, and offers significant advantages when implemented schoolwide. Providing ELS at every elementary school maximizes the impact of closing the achievement gap readily available to all students. ELSs are available to offer direct academic, social, and emotional support to unduplicated student groups at each elementary school. The ELS collaborates with teachers and staff to provide universal support for effective classroom practices and personalized support for unduplicated students who require additional academic, social, and emotional assistance. ELS contributes to an overall rise in academic achievement across the school. ELSs are valuable assets for supporting unduplicated students and fostering a successful learning environment for all students. Their	2.9 The achievement gap percentage of students meeting or exceeding standards on the CAASPP Math and ELA exams. 2.13 Percentage of English Learner students who made progress toward English Proficiency measured by ELPAC. 2.14 English Learner Reclassification Rate

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	The achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting or exceeding standards on the CAASPP test in ELA is 12.19% (Not Economically Disadvantaged 79.40%/ Economically Disadvantaged 67.21 %) The achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting or exceeding standards on the CAASPP test in Math is 11.28% (Not Economically Disadvantaged 73.98% / Economically Disadvantaged 62.70%). The achievement gap between not foster youth and foster youth students meeting or exceeding standards on the CAASPP test in ELA is 51.11% (not foster youth 76.11% /foster youth 25.00%). The achievement gap between not foster youth and foster youth students meeting or exceeding standards on the CAASPP test in Math is 52.76% (not foster youth 70.94% /foster youth 18.18%). 60% of ELs making progress toward English Proficiency, 2023, as measured by the Summative ELPAC. Based on the District's needs assessment, the following needs have been identified for low-income, foster youth, and English Learner student groups: Ensure students receive	expertise in early intervention, personalized learning plans, and collaboration with teachers strengthens the entire educational system, leading to a schoolwide culture of academic achievement and individual growth. The District expects this action to significantly improve the academic achievement and student engagement of foster youth, low-income, and English Learner students. This action is being provided on a schoolwide basis to maximize the impact of increasing overall student achievement rates. This is the most effective use of funds because observation of the ELSs providing direct support to unduplicated students and instructional coaching to teachers directly impacts student achievement among foster youth, low-income, and English Learner students.	

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	small-group instruction and teachers receive additional support for targeted instruction. Scope: Schoolwide		
2.11	Action: Intervention Services Need: The 2023 achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in ELA is 43.67% (English Only 73.55% / English Learner students 29.88%). The achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in Math is 13.79% (English Only 61.98% /English Learner students 48.19%). The achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting or exceeding standards on the CAASPP test in ELA is 12.19% (Not Economically Disadvantaged 79.40%/ Economically Disadvantaged 67.21 %). The achievement gap between Not Economically Disadvantaged and Economically Disadvantaged students meeting	When unduplicated student groups have access to intervention services, it fosters a culture of support and collaboration within the school community. Intervention services for academic support are valuable for all students, especially unduplicated students. This is provided on a LEA-wide basis to ensure equitable access to resources, promote academic success for everyone, and strengthen the school community. Targeted intervention services will be provided at all schools to support English Learner students, low-income students, and foster youth. Both credentialed teachers and instructional assistants will provide before, during, or after-school intervention to unduplicated students. Unduplicated student groups struggle due to limited home support and access to resources outside the home. Thus, academic interventions are critical to the success of unduplicated student groups to close the opportunity and achievement gaps. Intervention Counselors at the high school level will provide academic counseling and support for unduplicated students performing at six months or below grade level. Counselors will meet with students individually to create a plan to remove barriers and create access to alternative plans of opportunity. Intervention counselors will meet with	2.9 The achievement gap percentage of students meeting or exceeding standards on the CAASPP Math and ELA exams. 2.13 Percentage of English Learner students who made progress toward English Proficiency measured by ELPAC. 2.14 English Learner Reclassification Rate.

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	or exceeding standards on the CAASPP test in Math is 11.28% (Not Economically Disadvantaged 73.98% / Economically Disadvantaged 62.70%). The achievement gap between not foster youth and foster youth students meeting or exceeding standards on the CAASPP test in ELA is 51.11% (not foster Youth 76.11% /foster youth 25.00%). The achievement gap between not foster youth and foster youth students meeting or exceeding standards on the CAASPP test in Math is 52.76% (not foster youth 70.94% /foster youth 18.18%). 60% of ELs making progress toward English Proficiency, 2023, as measured by the Summative ELPAC Based on the District's needs assessment, the following needs have been identified for low-income, foster youth, and English Learner student groups: Ensure students receive small-group instruction and teachers receive additional support for targeted instruction. Scope: LEA-wide	parents to create parent awareness and work on a personalized plan of study to increase student achievement and develop a well-rounded student. Intervention services can identify early academic struggles. This allows targeted support to address specific gaps and provide resources and opportunities during the school day to address specific struggles. Unduplicated students can still have areas where they need extra help. Intervention services provide personalized instruction to fill those gaps and ensure they reach their full academic potential. Struggling in certain subjects can be discouraging. Intervention services can help unduplicated students overcome challenges, improve their grades, and build confidence in their academic abilities. By offering intervention services across the District, all students have equal access to support, promoting a more level playing field for academic success. Implementing a Districtwide program is often more efficient than having individual programs for each student group. Resources can be pooled and shared, maximizing their impact. This is the most effective use of funds because observation and data show a decrease in the achievement gap among student groups due to the intervention services.	
2.15	Action: High School Support	Research on instructional leadership emphasizes that the leader's priority on instruction and	2.9 The achievement gap percentage of students

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Need: 71% of graduating seniors met A-G requirements in Spring 2023. 24% of English Learner students met A-G (50 EL grads, 12 completed A-G) in Spring 2023. 63% of low-income students met A-G (316 grads, 200 completed A-G) in Spring 2023. 33% of foster youth met A-G (6 grads, 2 completed A-G) in Spring 2023. Early Assessment Program (EAP) college preparedness rate (as measured by 11th grade CAASPP scores indicating standard exceeded (Ready), or standard met (Conditionally Ready) in ELA. 49.2% of students are EAP college-ready (exceeded), and 28.6% are conditionally ready (met) in 2023 in ELA. 0% of English Learner students are EAP college-ready (exceeded), and 5.8% are conditionally ready (met). 42.2% of low-income students are EAP college-ready (exceeded), and 27.5% are conditionally ready (met). 25% of foster youth are EAP college-ready (exceeded), and 0% are conditionally ready (met).	continuous learning are the core work of the school to ensure student learning for all (Fullan, 2013). According to Robinson, Lloyd, and Rowe (2008), the greatest influence on student achievement is strongest when leaders promote and participate in teacher learning and development. To that end, the District has outlined school leadership to improve unduplicated pupils' college and career-ready outcomes as a high priority. At every comprehensive high school site, instructional deans will monitor the progress of English Learner students, foster youth, and low-income students. The deans will also design and implement interventions and lead professional development sessions. The instructional deans are designated school leaders focused on improving unduplicated students' academic and social-emotional outcomes. Both comprehensive high schools implement a leadership structure that includes instructional deans. Instructional deans play a crucial role in supporting student success, particularly for unduplicated students, and the benefits extend to the entire student body. Instructional deans oversee specific academic departments. This allows them to focus on the specific needs of unduplicated students, who might otherwise get lost in the shuffle. They can advocate for these students, ensuring they have access to appropriate resources and academic programs. Instructional deans often liaise between different academic programs (e.g., pathways, advanced courses, and mainstream classes). This is particularly helpful for unduplicated students	meeting or exceeding standards on the CAASPP Math and ELA exams. 2.10 A-G Completion Rates: Percentage of students meeting the UC/CSU 'A-G' requirements. 2.13 Percentage of English Learner students who made progress toward English Proficiency measured by ELPAC. 2.14 English Learner Reclassification Rate. 2.16 Early Assessment Program (EAP) college preparedness rate (as measured by 11th grade CAASPP scores indicating standard exceeded (Ready) or standard met (Conditionally Ready) in ELA. 2.17 Early Assessment Program (EAP) college preparedness rate (as measured by 11th grade CAASPP scores indicating standard exceeded (Ready) or standard met

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Early Assessment Program (EAP) college preparedness rate (as measured by 11th grade CAASPP scores indicating standard exceeded (Ready), or standard met (Conditionally Ready) in Math. In 2023, 40.1% of students in Math are EAP college-ready (exceeded), and 24.3% are conditionally ready (met). 13.2% of English Learner students are EAP college-ready (exceeded), and 24.5% are conditionally ready (met). 34.9% of low-income students are EAP college-ready (exceeded), and 24.1% are conditionally ready (met). 0% of foster youth are EAP college-ready (exceeded), and 0% are conditionally ready (met). Based on the District's needs assessment, the following needs have been identified for low-income, foster youth, and English Learner student groups: High School Instructional Deans ensure that access and readiness for college or career are provided to the student groups through their direct leadership and oversight of teachers in providing consistent student learning experience with scaffolds to support students meet college and career readiness standards.	receiving services from multiple programs. The deans can ensure smooth communication and collaboration between these programs to support the student's academic journey. Instructional deans monitor student progress and identify areas where unduplicated students might struggle. They can then work with teachers and counselors to develop personalized intervention plans to get them back on track. Instructional deans can foster a strong academic culture and network across the District's high schools for unduplicated students. Collaborating and sharing ideas and best practices can help create a unified vision for student success that benefits unduplicated students. Implementing this structure schoolwide ensures consistent support, promotes best practices, and fosters a strong academic culture for both comprehensive high schools. This is the most effective use of funds because research on school leadership proves that school leadership was second only to classroom instruction in school-related impacts on student learning among foster youth, low-income, and English Learner students.	(Conditionally Ready) in Math.

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Scope: Schoolwide		
3.3	Action: Counseling Services Need: The Districtwide suspension rate is 1.5% in 2022/2023. The suspension rate for foster youth is 22.90% in 2022/2023. The suspension rate for homeless youth is 12.80% in 2022/2023. Based on the needs assessment, foster youth and homeless students need caring adults at school who can provide them with guidance and connection. Scope: LEA-wide	School counseling services play a vital role in supporting students' overall well-being, and homeless/low-income students and foster youth can reap significant benefits from them. Providing additional full-time counseling services on an LEA-wide basis maximizes the impact of decreasing suspension for all students, including Hispanic students and students with disabilities, who received the lowest performance on the state indicator of Suspension Rate. Despite excelling in certain areas, homeless/low-income students and foster youth student groups might face challenges like social anxiety, test stress, or difficulty managing time between academics and extracurricular activities. Counselors can provide a safe space to discuss these issues, develop coping mechanisms, and promote emotional well-being, positively impacting academic performance. Homeless/low-income students and foster youth student groups might feel isolated due to their unique academic placement. Counselors can connect them with peers with similar interests or academic goals, fostering a sense of belonging and reducing feelings of isolation. Homeless/low-income students and foster youth student groups often have complex academic paths. Counselors can help them navigate course selection, explore potential college majors, and	3.2 Suspension Metric

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
		even start thinking about career options. This personalized guidance ensures they make informed decisions that align with their strengths and aspirations. Counseling services go beyond academics. Counselors can equip students with valuable life skills like communication, stress management, and conflict resolution. These skills benefit homeless/low-income and foster youth students in all aspects of their lives, both inside and outside school. Having counselors readily available allows for early identification of potential issues, enabling proactive intervention before problems escalate and potentially impact academic progress. Counselors play a crucial role in promoting a positive and supportive school climate. They can provide resources and training for teachers and staff to better understand and address student mental health needs, creating a more well-rounded educational environment for all. Having access to additional school counselors is a strategic investment in student well-being for homeless/low-income students and foster youth. Implementing counseling services Districtwide ensures equitable access to emotional support, promotes early intervention, and fosters a healthy and supportive learning environment that benefits all students. This is the most effective use of funds because research shows that school-based counseling services have the advantage of explicitly targeting behaviors and symptoms that affect school	

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
		functioning. Thus, they improve academic outcomes for homeless/low-income students and foster youth students (Lyon, Borntrager, Nakamura, & Higs-McMillan, 2013) and decrease suspensions for homeless/low-income students and foster youth students (Sheryl, Stephanie, Herrenkohl, Toumbourou, & Catalano, 2014).	
3.5	Action: Social Emotional Supports Need: The Districtwide suspension rate is 1.5% in 2022/2023. The suspension rate for foster youth is 22.90% in 2022/2023. The suspension rate for homeless youth is 12.80% in 2022/2023. Based on the needs assessment, foster youth and homeless/low-income student groups need caring adults at school who can provide them with guidance and connection. When facing challenges such as a lack of stability and resources in a home environment, they have an equal opportunity to succeed. The District recognizes that unduplicated students may face specific social and emotional difficulties, such as adjusting to new school environments.	Social-emotional supports are crucial for homeless/low-income students and foster youth student groups, who might face challenges like anxiety or navigating complex academic paths. Social-emotional supports and coordinated programs provide a safe space to address these concerns, develop coping mechanisms, and connect with peers. A Districtwide approach ensures all students have access to this vital support, promoting emotional well-being and creating a level playing field for academic success. Providing social-emotional support on an LEA-wide basis maximizes the impact of the services readily available to all students. The District has outlined specific actions under Goal 3 to promote a safe, respectful, equitable, and inclusive learning environment crucial for student success. The actions describe the District providing personnel and material resources to support homeless/low-income and foster youth students' social and emotional needs. One example of support is providing access to mental health counselors for homeless/low-income students and foster youth students with home/school connections.	3.2 Suspension metric

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Scope: LEA-wide	Based on observations from previous years, the District believes continuing targeted support for social and emotional learning for homeless/low-income students and foster youth students will be most effective in addressing the opportunity gap and advancing equity and excellence through SEL.	

Limited Actions

For each action being solely provided to one or more unduplicated student group(s), provide an explanation of (1) the unique identified need(s) of the unduplicated student group(s) being served, (2) how the action is designed to address the identified need(s), and (3) how the effectiveness of the action in improving outcomes for the unduplicated student group(s) will be measured.

Goal and Action #	Identified Need(s)	How the Action(s) are Designed to Address Need(s)	Metric(s) to Monitor Effectiveness
2.6	Action: English Language Development (ELD) Support Need: The 2023 achievement gap between English Only students and English Learner students meeting or exceeding standards on the CAASPP test in ELA is 44.06% (English Only 73.55% / English Learner students 29.49%). 76% of all students (grades 3-8 and 11) met or exceeded. The achievement gap between English Only students and English Learner students meeting or exceeding standards on the	The District's English Language Development (ELD) Specialist and ELD Coordinators provide ongoing professional learning opportunities to TK-12 certificated and classified staff to ensure that English Learner students learn English and access the core curriculum through Designated and Integrated ELD instruction. The District's ELD Specialist provides professional development to TK-12th grade teachers and Bilingual Instructional Aides on the English Language Development standards to ensure that teachers and support staff implement the standards consistently. The ELD Specialist and Educational Services will support teachers as they implement the updated ELA textbook, which includes explicit Designated ELD lessons, resources to support newcomers, and access to tiered phonics instruction to support English Learner students acquire the English	2.9 The achievement gap percentage of students meeting or exceeding standards on the CAASPP Math and ELA exams. 2.13 Percentage of English Learner students who made progress toward English Proficiency measured by ELPAC. 2.14 English Learner Reclassification Rate.

Goal and Action #	Identified Need(s)	How the Action(s) are Designed to Address Need(s)	Metric(s) to Monitor Effectiveness
	CAASPP test in Math is 16.6% (English Only 62.55% / English Learner students 45.95%). 70% of all students (grades 3-8 and 11) met or exceeded. Based on our needs assessment and input from EL parents, the following needs have been identified for our English Learner student group. This student group needs teachers who are better prepared to teach language acquisition and academic language across the curriculum. Scope: Limited to Unduplicated Student Group(s)	Language. Both certificated and classified staff receive support in utilizing the board-adopted textbooks to meet the English Learner students' needs. The ELD Specialist and the ELD Coordinators provide ongoing support to teachers by providing ELD instruction that addresses the student's English proficiency level. Continuous professional learning on research-based strategies that scaffold the different proficiency levels will continue as the District supports teachers using Project GLAD (Guided Language Acquisition Design), Thinking Maps, and Sheltered Instruction Observation Protocol (SIOP) strategies. These actions will create targeted support to ensure Designated ELD instruction for English Learner students and high levels of student learning since TK-12th grade teachers are provided training and support in integrated ELD that supports all students accessing the core curriculum. This action ensures language acquisition for English Learner students to maximize learning academic language across the curriculum. This is the most effective use of funds because research says English Learner students thrive in schools where their education is the responsibility of the whole staff and not only of language specialists (Coady et al., 2008); and d) professional development is effective when it is coherent (Garet, Porter, Desimone, Birman, & Yoon, 2001), and language development standards can contribute to this coherence.	
2.18	Action:	Bilingual instructional aides and contracted services will be utilized to provide translation	2.10 A-G Completion Rates: Percentage of

Goal and Action #	Identified Need(s)	How the Action(s) are Designed to Address Need(s)	Metric(s) to Monitor Effectiveness
	Outreach to Parents of English Learner Students Need: 71% of graduating seniors met A-G requirements in Spring 2023. 24% of English Learner students meeting A-G (50 EL grads, 12 completed A-G) in Spring 2023. Early Assessment Program (EAP) college preparedness rate (as measured by 11th grade CAASPP scores indicating standard exceeded (Ready), or standard met (Conditionally Ready) in ELA. 49.2% of students are EAP college-ready (exceeded), and 28.6% are conditionally ready (met) in 2023 in ELA. 0% of English Learner students are EAP college-ready (exceeded), and 5.8% are conditionally ready (met). Early Assessment Program (EAP) college preparedness rate (as measured by 11th grade CAASPP scores indicating standard exceeded (Ready), or standard met (Conditionally Ready) in Math. In 2023, 40.1% of students in Math are EAP college-ready (exceeded), and 24.3% are conditionally ready (met).	services beyond what is required for parent conferences, school events, and community outreach beyond their work hours. Outreach initiatives designed to connect with parents of English Learner students are powerful tools for boosting student success, and a Districtwide approach maximizes its impact. Strategic outreach bridges the school-home gap, empowering parents to better support their child's learning by understanding curriculum, culture, and expectations. Encouraged parental participation through outreach (events, volunteering, discussions) reinforces learning and highlights the value of home support. Effective outreach enhances educators' cultural sensitivity, enabling tailored teaching strategies for EL students. Research confirms that strong parental involvement boosts academic performance for all students, especially EL students, fostering engagement and motivation. A Districtwide commitment to accessible outreach for EL families, including exceeding required translation services, ensures equitable access regardless of background and promotes a level playing field. Outreach fosters community and belonging, making EL families feel valued and more engaged partners. Investing in Districtwide outreach to EL parents is a strategic move for student success, ensuring equitable support, improving communication, and	students meeting the UC/CSU 'A-G' requirements. 2.13 Percentage of English Learner students who made progress toward English Proficiency measured by ELPAC. 2.14 English Learner Reclassification Rate. 2.16 Early Assessment Program (EAP) college preparedness rate (as measured by 11th grade CAASPP scores indicating standard exceeded (Ready), or standard met (Conditionally Ready) in ELA. 2.17 Early Assessment Program (EAP) college preparedness rate (as measured by 11th grade CAASPP scores indicating standard exceeded (Ready), or standard met (Conditionally Ready) in Math.

Goal and Action #	Identified Need(s)	How the Action(s) are Designed to Address Need(s)	Metric(s) to Monitor Effectiveness
	13.2% of English Learner students are EAP college-ready (exceeded), and 24.5% are conditionally ready (met). Based on the District's needs assessment and input from EL parents, the following needs have been identified for English Learner student group: Ensure parents/families of English Learner students receive information, parent education opportunities, and home/school connections to bridge student success with parent/family engagement and partnership. Scope: Limited to Unduplicated Student Group(s)	building a strong, inclusive school community that benefits everyone. This is the most effective use of funds because research shows that parental involvement can improve English Learner students' academic and linguistic success (El Nokali, 2010).	

For any limited action contributing to meeting the increased or improved services requirement that is associated with a Planned Percentage of Improved Services in the Contributing Summary Table rather than an expenditure of LCFF funds, describe the methodology that was used to determine the contribution of the action towards the proportional percentage, as applicable.

Local Control and Accountability Plan Instructions

[Plan Summary](#)

[Engaging Educational Partners](#)

[Goals and Actions](#)

[Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students](#)

For additional questions or technical assistance related to the completion of the Local Control and Accountability Plan (LCAP) template, please contact the local county office of education (COE), or the California Department of Education's (CDE's) Local Agency Systems Support Office, by phone at 916-319-0809 or by email at LCFF@cde.ca.gov.

Introduction and Instructions

The Local Control Funding Formula (LCFF) requires local educational agencies (LEAs) to engage their local educational partners in an annual planning process to evaluate their progress within eight state priority areas encompassing all statutory metrics (COEs have 10 state priorities). LEAs document the results of this planning process in the LCAP using the template adopted by the State Board of Education.

The LCAP development process serves three distinct, but related functions:

- **Comprehensive Strategic Planning:** The process of developing and annually updating the LCAP supports comprehensive strategic planning, particularly to address and reduce disparities in opportunities and outcomes between student groups indicated by the California School Dashboard (California Education Code [EC] Section 52064[e][1]). Strategic planning that is comprehensive connects budgetary decisions to teaching and learning performance data. LEAs should continually evaluate the hard choices they make about the use of limited resources to meet student and community needs to ensure opportunities and outcomes are improved for all students.
- **Meaningful Engagement of Educational Partners:** The LCAP development process should result in an LCAP that reflects decisions made through meaningful engagement (EC Section 52064[e][1]). Local educational partners possess valuable perspectives and insights about an LEA's programs and services. Effective strategic planning will incorporate these perspectives and insights in order to identify potential goals and actions to be included in the LCAP.
- **Accountability and Compliance:** The LCAP serves an important accountability function because the nature of some LCAP template sections require LEAs to show that they have complied with various requirements specified in the LCFF statutes and regulations, most notably:
 - Demonstrating that LEAs are increasing or improving services for foster youth, English learners, including long-term English learners, and low-income students in proportion to the amount of additional funding those students generate under LCFF (EC Section 52064[b][4-6]).
 - Establishing goals, supported by actions and related expenditures, that address the statutory priority areas and statutory metrics (EC sections 52064[b][1] and [2]).
 - **NOTE:** As specified in EC Section 62064(b)(1), the LCAP must provide a description of the annual goals, for all pupils and each subgroup of pupils identified pursuant to EC Section 52052, to be achieved for each of the state priorities. Beginning in 2023–24, EC

Section 52052 identifies long-term English learners as a separate and distinct pupil subgroup with a numerical significance at 15 students.

- Annually reviewing and updating the LCAP to reflect progress toward the goals (EC Section 52064[b][7]).
- Ensuring that all increases attributable to supplemental and concentration grant calculations, including concentration grant add-on funding and/or LCFF carryover, are reflected in the LCAP (EC sections 52064[b][6], [8], and [11]).

The LCAP template, like each LEA's final adopted LCAP, is a document, not a process. LEAs must use the template to memorialize the outcome of their LCAP development process, which must: (a) reflect comprehensive strategic planning, particularly to address and reduce disparities in opportunities and outcomes between student groups indicated by the California School Dashboard (Dashboard), (b) through meaningful engagement with educational partners that (c) meets legal requirements, as reflected in the final adopted LCAP. The sections included within the LCAP template do not and cannot reflect the full development process, just as the LCAP template itself is not intended as a tool for engaging educational partners.

If a county superintendent of schools has jurisdiction over a single school district, the county board of education and the governing board of the school district may adopt and file for review and approval a single LCAP consistent with the requirements in EC sections 52060, 52062, 52066, 52068, and 52070. The LCAP must clearly articulate to which entity's budget (school district or county superintendent of schools) all budgeted and actual expenditures are aligned.

The revised LCAP template for the 2024–25, 2025–26, and 2026–27 school years reflects statutory changes made through Senate Bill 114 (Committee on Budget and Fiscal Review), Chapter 48, Statutes of 2023 and Senate Bill 153, Chapter 38, Statutes of 2024.

At its most basic, the adopted LCAP should attempt to distill not just what the LEA is doing for students in transitional kindergarten through grade twelve (TK–12), but also allow educational partners to understand why, and whether those strategies are leading to improved opportunities and outcomes for students. LEAs are strongly encouraged to use language and a level of detail in their adopted LCAPs intended to be meaningful and accessible for the LEA's diverse educational partners and the broader public.

In developing and finalizing the LCAP for adoption, LEAs are encouraged to keep the following overarching frame at the forefront of the strategic planning and educational partner engagement functions:

Given present performance across the state priorities and on indicators in the Dashboard, how is the LEA using its budgetary resources to respond to TK–12 student and community needs, and address any performance gaps, including by meeting its obligation to increase or improve services for foster youth, English learners, and low-income students?

LEAs are encouraged to focus on a set of metrics and actions which, based on research, experience, and input gathered from educational partners, the LEA believes will have the biggest impact on behalf of its TK–12 students.

These instructions address the requirements for each section of the LCAP but may include information about effective practices when developing the LCAP and completing the LCAP document. Additionally, the beginning of each template section includes information emphasizing the purpose that section serves.

Plan Summary

Purpose

A well-developed Plan Summary section provides a meaningful context for the LCAP. This section provides information about an LEA's community as well as relevant information about student needs and performance. In order to present a meaningful context for the rest of the LCAP, the content of this section should be clearly and meaningfully related to the content included throughout each subsequent section of the LCAP.

Requirements and Instructions

General Information

A description of the LEA, its schools, and its students in grades transitional kindergarten–12, as applicable to the LEA. LEAs may also provide information about their strategic plan, vision, etc.

Briefly describe the LEA, its schools, and its students in grades TK–12, as applicable to the LEA.

- For example, information about an LEA in terms of geography, enrollment, employment, the number and size of specific schools, recent community challenges, and other such information the LEA may wish to include can enable a reader to more fully understand the LEA's LCAP.
- LEAs may also provide information about their strategic plan, vision, etc.
- As part of this response, identify all schools within the LEA receiving Equity Multiplier funding.

Reflections: Annual Performance

A reflection on annual performance based on a review of the California School Dashboard (Dashboard) and local data.

Reflect on the LEA's annual performance on the Dashboard and local data. This may include both successes and challenges identified by the LEA during the development process.

LEAs are encouraged to highlight how they are addressing the identified needs of student groups, and/or schools within the LCAP as part of this response.

As part of this response, the LEA must identify the following, which will remain unchanged during the three-year LCAP cycle:

- Any school within the LEA that received the lowest performance level on one or more state indicators on the 2023 Dashboard;
- Any student group within the LEA that received the lowest performance level on one or more state indicators on the 2023 Dashboard; and/or
- Any student group within a school within the LEA that received the lowest performance level on one or more state indicators on the 2023 Dashboard.

EC Section 52064.4 requires that an LEA that has unexpended Learning Recovery Emergency Block Grant (LREBG) funds must include one or more actions funded with LREBG funds within the 2026-27, 2026-27 and 2027-28 LCAPs, as applicable to the LEA. To implement the requirements of *EC* Section 52064.4, all LEAs must do the following:

- For the 2025–26, 2026–27, and 2027–28 LCAP years, identify whether or not the LEA has unexpended LREBG funds for the applicable LCAP year.
 - If the LEA has unexpended LREBG funds the LEA must provide the following:
 - The goal and action number for each action that will be funded, either in whole or in part, with LREBG funds; and
 - An explanation of the rationale for selecting each action funded with LREBG funds. This explanation must include:
 - An explanation of how the action is aligned with the allowable uses of funds identified in [EC Section 32526\(c\)\(2\)](#); and
 - An explanation of how the action is expected to address the area(s) of need of students and schools identified in the needs assessment required by [EC Section 32526\(d\)](#).
 - For information related to the allowable uses of funds and the required needs assessment, please see the Program Information tab on the [LREBG Program Information](#) web page.
 - Actions may be grouped together for purposes of these explanations.
 - The LEA may provide these explanations as part of the action description rather than as part of the Reflections: Annual Performance.
 - If the LEA does not have unexpended LREBG funds, the LEA is not required to conduct the needs assessment required by *EC* Section 32627(d), to provide the information identified above or to include actions funded with LREBG funds within the 2026-27, 2026-27 and 2027-28 LCAPs.

Reflections: Technical Assistance

As applicable, a summary of the work underway as part of technical assistance.

Annually identify the reason(s) the LEA is eligible for or has requested technical assistance consistent with *EC* sections 47607.3, 52071, 52071.5, 52072, or 52072.5, and provide a summary of the work underway as part of receiving technical assistance. The most common form of this technical assistance is frequently referred to as Differentiated Assistance, however this also includes LEAs that have requested technical assistance from their COE.

- If the LEA is not eligible for or receiving technical assistance, the LEA may respond to this prompt as “Not Applicable.”

Comprehensive Support and Improvement

An LEA with a school or schools identified for comprehensive support and improvement (CSI) under the Every Student Succeeds Act must respond to the following prompts:

Schools Identified

A list of the schools in the LEA that are eligible for comprehensive support and improvement.

- Identify the schools within the LEA that have been identified for CSI.

Support for Identified Schools

A description of how the LEA has or will support its eligible schools in developing comprehensive support and improvement plans.

- Describe how the LEA has or will support the identified schools in developing CSI plans that included a school-level needs assessment, evidence-based interventions, and the identification of any resource inequities to be addressed through the implementation of the CSI plan.

Monitoring and Evaluating Effectiveness

A description of how the LEA will monitor and evaluate the plan to support student and school improvement.

- Describe how the LEA will monitor and evaluate the implementation and effectiveness of the CSI plan to support student and school improvement.

Engaging Educational Partners

Purpose

Significant and purposeful engagement of parents, students, educators, and other educational partners, including those representing the student groups identified by LCFF, is critical to the development of the LCAP and the budget process. Consistent with statute, such engagement should support comprehensive strategic planning, particularly to address and reduce disparities in opportunities and outcomes between student groups indicated by the Dashboard, accountability, and improvement across the state priorities and locally identified priorities (EC Section 52064[e][1]). Engagement of educational partners is an ongoing, annual process.

This section is designed to reflect how the engagement of educational partners influenced the decisions reflected in the adopted LCAP. The goal is to allow educational partners that participated in the LCAP development process and the broader public to understand how the LEA engaged educational partners and the impact of that engagement. LEAs are encouraged to keep this goal in the forefront when completing this section.

Requirements

Requirements

School districts and COEs: [EC Section 52060\(g\)](#) and [EC Section 52066\(g\)](#) specify the educational partners that must be consulted when developing the LCAP:

- Teachers,

- Principals,
- Administrators,
- Other school personnel,
- Local bargaining units of the LEA,
- Parents, and
- Students

A school district or COE receiving Equity Multiplier funds must also consult with educational partners at schools generating Equity Multiplier funds in the development of the LCAP, specifically, in the development of the required focus goal for each applicable school.

Before adopting the LCAP, school districts and COEs must share it with the applicable committees, as identified below under Requirements and Instructions. The superintendent is required by statute to respond in writing to the comments received from these committees. School districts and COEs must also consult with the special education local plan area administrator(s) when developing the LCAP.

Charter schools: [EC Section 47606.5\(d\)](#) requires that the following educational partners be consulted with when developing the LCAP:

- Teachers,
- Principals,
- Administrators,
- Other school personnel,
- Parents, and
- Students

A charter school receiving Equity Multiplier funds must also consult with educational partners at the school generating Equity Multiplier funds in the development of the LCAP, specifically, in the development of the required focus goal for the school.

The LCAP should also be shared with, and LEAs should request input from, schoolsite-level advisory groups, as applicable (e.g., schoolsite councils, English Learner Advisory Councils, student advisory groups, etc.), to facilitate alignment between schoolsite and district-level goals. Information and resources that support effective engagement, define student consultation, and provide the requirements for advisory group composition, can be found under Resources on the [CDE's LCAP webpage](#).

Before the governing board/body of an LEA considers the adoption of the LCAP, the LEA must meet the following legal requirements:

- For school districts, see [Education Code Section 52062](#);
 - **Note:** Charter schools using the LCAP as the School Plan for Student Achievement must meet the requirements of *EC* Section 52062(a).
- For COEs, see [Education Code Section 52068](#); and
- For charter schools, see [Education Code Section 47606.5](#).

- **NOTE:** As a reminder, the superintendent of a school district or COE must respond, in writing, to comments received by the applicable committees identified in the *Education Code* sections listed above. This includes the parent advisory committee and may include the English learner parent advisory committee and, as of July 1, 2024, the student advisory committee, as applicable.

Instructions

Respond to the prompts as follows:

A summary of the process used to engage educational partners in the development of the LCAP.

School districts and county offices of education must, at a minimum, consult with teachers, principals, administrators, other school personnel, local bargaining units, parents, and students in the development of the LCAP.

Charter schools must, at a minimum, consult with teachers, principals, administrators, other school personnel, parents, and students in the development of the LCAP.

An LEA receiving Equity Multiplier funds must also consult with educational partners at schools generating Equity Multiplier funds in the development of the LCAP, specifically, in the development of the required focus goal for each applicable school.

Complete the table as follows:

Educational Partners

Identify the applicable educational partner(s) or group(s) that were engaged in the development of the LCAP.

Process for Engagement

Describe the engagement process used by the LEA to involve the identified educational partner(s) in the development of the LCAP. At a minimum, the LEA must describe how it met its obligation to consult with all statutorily required educational partners, as applicable to the type of LEA.

- A sufficient response to this prompt must include general information about the timeline of the process and meetings or other engagement strategies with educational partners. A response may also include information about an LEA's philosophical approach to engaging its educational partners.
- An LEA receiving Equity Multiplier funds must also include a summary of how it consulted with educational partners at schools generating Equity Multiplier funds in the development of the LCAP, specifically, in the development of the required focus goal for each applicable school.

A description of how the adopted LCAP was influenced by the feedback provided by educational partners.

Describe any goals, metrics, actions, or budgeted expenditures in the LCAP that were influenced by or developed in response to the educational partner feedback.

- A sufficient response to this prompt will provide educational partners and the public with clear, specific information about how the engagement process influenced the development of the LCAP. This may include a description of how the LEA prioritized requests of educational partners within the context of the budgetary resources available or otherwise prioritized areas of focus within the LCAP.
- An LEA receiving Equity Multiplier funds must include a description of how the consultation with educational partners at schools generating Equity Multiplier funds influenced the development of the adopted LCAP.
- For the purposes of this prompt, this may also include, but is not necessarily limited to:
 - Inclusion of a goal or decision to pursue a Focus Goal (as described below)
 - Inclusion of metrics other than the statutorily required metrics
 - Determination of the target outcome on one or more metrics
 - Inclusion of performance by one or more student groups in the Measuring and Reporting Results subsection
 - Inclusion of action(s) or a group of actions
 - Elimination of action(s) or group of actions
 - Changes to the level of proposed expenditures for one or more actions
 - Inclusion of action(s) as contributing to increased or improved services for unduplicated students
 - Analysis of effectiveness of the specific actions to achieve the goal
 - Analysis of material differences in expenditures
 - Analysis of changes made to a goal for the ensuing LCAP year based on the annual update process
 - Analysis of challenges or successes in the implementation of actions

Goals and Actions

Purpose

Well-developed goals will clearly communicate to educational partners what the LEA plans to accomplish, what the LEA plans to do in order to accomplish the goal, and how the LEA will know when it has accomplished the goal. A goal statement, associated metrics and expected outcomes, and the actions included in the goal must be in alignment. The explanation for why the LEA included a goal is an opportunity for LEAs to clearly communicate to educational partners and the public why, among the various strengths and areas for improvement highlighted by performance data and strategies and actions that could be pursued, the LEA decided to pursue this goal, and the related metrics, expected outcomes, actions, and expenditures.

A well-developed goal can be focused on the performance relative to a metric or metrics for all students, a specific student group(s), narrowing performance gaps, or implementing programs or strategies expected to impact outcomes. LEAs should assess the performance of their student groups when developing goals and the related actions to achieve such goals.

Requirements and Instructions

LEAs should prioritize the goals, specific actions, and related expenditures included within the LCAP within one or more state priorities. LEAs must consider performance on the state and local indicators, including their locally collected and reported data for the local indicators that are included in the Dashboard, in determining whether and how to prioritize its goals within the LCAP. As previously stated, strategic planning that

is comprehensive connects budgetary decisions to teaching and learning performance data. LEAs should continually evaluate the hard choices they make about the use of limited resources to meet student and community needs to ensure opportunities and outcomes are improved for all students, and to address and reduce disparities in opportunities and outcomes between student groups indicated by the Dashboard.

In order to support prioritization of goals, the LCAP template provides LEAs with the option of developing three different kinds of goals:

- **Focus Goal:** A Focus Goal is relatively more concentrated in scope and may focus on a fewer number of metrics to measure improvement. A Focus Goal statement will be time bound and make clear how the goal is to be measured.
 - All Equity Multiplier goals must be developed as focus goals. For additional information, see Required Focus Goal(s) for LEAs Receiving Equity Multiplier Funding below.
- **Broad Goal:** A Broad Goal is relatively less concentrated in its scope and may focus on improving performance across a wide range of metrics.
- **Maintenance of Progress Goal:** A Maintenance of Progress Goal includes actions that may be ongoing without significant changes and allows an LEA to track performance on any metrics not addressed in the other goals of the LCAP.

Requirement to Address the LCFF State Priorities

At a minimum, the LCAP must address all LCFF priorities and associated metrics articulated in *EC* sections 52060(d) and 52066(d), as applicable to the LEA. The [LCFF State Priorities Summary](#) provides a summary of *EC* sections 52060(d) and 52066(d) to aid in the development of the LCAP.

Respond to the following prompts, as applicable:

Focus Goal(s)

Description

The description provided for a Focus Goal must be specific, measurable, and time bound.

- An LEA develops a Focus Goal to address areas of need that may require or benefit from a more specific and data intensive approach.
- The Focus Goal can explicitly reference the metric(s) by which achievement of the goal will be measured and the time frame according to which the LEA expects to achieve the goal.

Type of Goal

Identify the type of goal being implemented as a Focus Goal.

State Priorities addressed by this goal.

Identify each of the state priorities that this goal is intended to address.

An explanation of why the LEA has developed this goal.

Explain why the LEA has chosen to prioritize this goal.

- An explanation must be based on Dashboard data or other locally collected data.
- LEAs must describe how the LEA identified this goal for focused attention, including relevant consultation with educational partners.
- LEAs are encouraged to promote transparency and understanding around the decision to pursue a focus goal.

Required Focus Goal(s) for LEAs Receiving Equity Multiplier Funding

Description

LEAs receiving Equity Multiplier funding must include one or more focus goals for each school generating Equity Multiplier funding. In addition to addressing the focus goal requirements described above, LEAs must adhere to the following requirements.

Focus goals for Equity Multiplier schoolsites must address the following:

- (A) All student groups that have the lowest performance level on one or more state indicators on the Dashboard, and
- (B) Any underlying issues in the credentialing, subject matter preparation, and retention of the school’s educators, if applicable.
- Focus Goals for each and every Equity Multiplier schoolsite must identify specific metrics for each identified student group, as applicable.
- An LEA may create a single goal for multiple Equity Multiplier schoolsites if those schoolsites have the same student group(s) performing at the lowest performance level on one or more state indicators on the Dashboard or, experience similar issues in the credentialing, subject matter preparation, and retention of the school’s educators.
 - When creating a single goal for multiple Equity Multiplier schoolsites, the goal must identify the student groups and the performance levels on the Dashboard that the Focus Goal is addressing; or,
 - The common issues the schoolsites are experiencing in credentialing, subject matter preparation, and retention of the school’s educators, if applicable.

Type of Goal

Identify the type of goal being implemented as an Equity Multiplier Focus Goal.

State Priorities addressed by this goal.

Identify each of the state priorities that this goal is intended to address.

An explanation of why the LEA has developed this goal.

Explain why the LEA has chosen to prioritize this goal.

- An explanation must be based on Dashboard data or other locally collected data.
- LEAs must describe how the LEA identified this goal for focused attention, including relevant consultation with educational partners.
- LEAs are encouraged to promote transparency and understanding around the decision to pursue a focus goal.
- In addition to this information, the LEA must also identify:
 - The school or schools to which the goal applies

LEAs are encouraged to approach an Equity Multiplier goal from a wholistic standpoint, considering how the goal might maximize student outcomes through the use of LCFF and other funding in addition to Equity Multiplier funds.

- Equity Multiplier funds must be used to supplement, not supplant, funding provided to Equity Multiplier schoolsites for purposes of the LCFF, the Expanded Learning Opportunities Program (ELO-P), the Literacy Coaches and Reading Specialists (LCRS) Grant Program, and/or the California Community Schools Partnership Program (CCSPP).
- This means that Equity Multiplier funds must not be used to replace funding that an Equity Multiplier schoolsite would otherwise receive to implement LEA-wide actions identified in the LCAP or that an Equity Multiplier schoolsite would otherwise receive to implement provisions of the ELO-P, the LCRS, and/or the CCSPP.

Note: [EC Section 42238.024\(b\)\(1\)](#) requires that Equity Multiplier funds be used for the provision of evidence-based services and supports for students. Evidence-based services and supports are based on objective evidence that has informed the design of the service or support and/or guides the modification of those services and supports. Evidence-based supports and strategies are most commonly based on educational research and/or metrics of LEA, school, and/or student performance.

Broad Goal

Description

Describe what the LEA plans to achieve through the actions included in the goal.

- The description of a broad goal will be clearly aligned with the expected measurable outcomes included for the goal.

- The goal description organizes the actions and expected outcomes in a cohesive and consistent manner.
- A goal description is specific enough to be measurable in either quantitative or qualitative terms. A broad goal is not as specific as a focus goal. While it is specific enough to be measurable, there are many different metrics for measuring progress toward the goal.

Type of Goal

Identify the type of goal being implemented as a Broad Goal.

State Priorities addressed by this goal.

Identify each of the state priorities that this goal is intended to address.

An explanation of why the LEA has developed this goal.

Explain why the LEA developed this goal and how the actions and metrics grouped together will help achieve the goal.

Maintenance of Progress Goal

Description

Describe how the LEA intends to maintain the progress made in the LCFF State Priorities not addressed by the other goals in the LCAP.

- Use this type of goal to address the state priorities and applicable metrics not addressed within the other goals in the LCAP.
- The state priorities and metrics to be addressed in this section are those for which the LEA, in consultation with educational partners, has determined to maintain actions and monitor progress while focusing implementation efforts on the actions covered by other goals in the LCAP.

Type of Goal

Identify the type of goal being implemented as a Maintenance of Progress Goal.

State Priorities addressed by this goal.

Identify each of the state priorities that this goal is intended to address.

An explanation of why the LEA has developed this goal.

Explain how the actions will sustain the progress exemplified by the related metrics.

Measuring and Reporting Results:

For each LCAP year, identify the metric(s) that the LEA will use to track progress toward the expected outcomes.

- LEAs must identify metrics for specific student groups, as appropriate, including expected outcomes that address and reduce disparities in outcomes between student groups.
- The metrics may be quantitative or qualitative; but at minimum, an LEA’s LCAP must include goals that are measured using all of the applicable metrics for the related state priorities, in each LCAP year, as applicable to the type of LEA.
- To the extent a state priority does not specify one or more metrics (e.g., implementation of state academic content and performance standards), the LEA must identify a metric to use within the LCAP. For these state priorities, LEAs are encouraged to use metrics based on or reported through the relevant local indicator self-reflection tools within the Dashboard.
- **Required metrics for LEA-wide actions:** For each action identified as 1) contributing towards the requirement to increase or improve services for foster youth, English learners, including long-term English learners, and low-income students and 2) being provided on an LEA-wide basis, the LEA must identify one or more metrics to monitor the effectiveness of the action and its budgeted expenditures.
 - These required metrics may be identified within the action description or the first prompt in the increased or improved services section, however the description must clearly identify the metric(s) being used to monitor the effectiveness of the action and the action(s) that the metric(s) apply to.
- **Required metrics for Equity Multiplier goals:** For each Equity Multiplier goal, the LEA must identify:
 - The specific metrics for each identified student group at each specific schoolsite, as applicable, to measure the progress toward the goal, and/or
 - The specific metrics used to measure progress in meeting the goal related to credentialing, subject matter preparation, or educator retention at each specific schoolsite.
- **Required metrics for actions supported by LREBG funds:** To implement the requirements of *EC* Section 52064.4, LEAs with unexpended LREBG funds must include at least one metric to monitor the impact of each action funded with LREBG funds included in the goal.
 - The metrics being used to monitor the impact of each action funded with LREBG funds are not required to be new metrics; they may be metrics that are already being used to measure progress towards goals and actions included in the LCAP.

Complete the table as follows:

Metric #
• Enter the metric number.
Metric

- Identify the standard of measure being used to determine progress towards the goal and/or to measure the effectiveness of one or more actions associated with the goal.

Baseline

- Enter the baseline when completing the LCAP for 2024–25.
 - Use the most recent data associated with the metric available at the time of adoption of the LCAP for the first year of the three-year plan. LEAs may use data as reported on the 2023 Dashboard for the baseline of a metric only if that data represents the most recent available data (e.g., high school graduation rate).
 - Using the most recent data available may involve reviewing data the LEA is preparing for submission to the California Longitudinal Pupil Achievement Data System (CALPADS) or data that the LEA has recently submitted to CALPADS.
 - Indicate the school year to which the baseline data applies.
 - The baseline data must remain unchanged throughout the three-year LCAP.
 - This requirement is not intended to prevent LEAs from revising the baseline data if it is necessary to do so. For example, if an LEA identifies that its data collection practices for a particular metric are leading to inaccurate data and revises its practice to obtain accurate data, it would also be appropriate for the LEA to revise the baseline data to align with the more accurate data process and report its results using the accurate data.
 - If an LEA chooses to revise its baseline data, then, at a minimum, it must clearly identify the change as part of its response to the description of changes prompt in the Goal Analysis for the goal. LEAs are also strongly encouraged to involve their educational partners in the decision of whether or not to revise a baseline and to communicate the proposed change to their educational partners.
 - Note for Charter Schools: Charter schools developing a one- or two-year LCAP may identify a new baseline each year, as applicable.

Year 1 Outcome

- When completing the LCAP for 2025–26, enter the most recent data available. Indicate the school year to which the data applies.
 - Note for Charter Schools: Charter schools developing a one-year LCAP may provide the Year 1 Outcome when completing the LCAP for both 2025–26 and 2026–27 or may provide the Year 1 Outcome for 2025–26 and provide the Year 2 Outcome for 2026–27.

Year 2 Outcome

- When completing the LCAP for 2026–27, enter the most recent data available. Indicate the school year to which the data applies.

- Note for Charter Schools: Charter schools developing a one-year LCAP may identify the Year 2 Outcome as not applicable when completing the LCAP for 2026–27 or may provide the Year 2 Outcome for 2026–27.

Target for Year 3 Outcome

- When completing the first year of the LCAP, enter the target outcome for the relevant metric the LEA expects to achieve by the end of the three-year LCAP cycle.
 - Note for Charter Schools: Charter schools developing a one- or two-year LCAP may identify a Target for Year 1 or Target for Year 2, as applicable.

Current Difference from Baseline

- When completing the LCAP for 2025–26 and 2026–27, enter the current difference between the baseline and the yearly outcome, as applicable.
 - Note for Charter Schools: Charter schools developing a one- or two-year LCAP will identify the current difference between the baseline and the yearly outcome for Year 1 and/or the current difference between the baseline and the yearly outcome for Year 2, as applicable.

Timeline for school districts and COEs for completing the “**Measuring and Reporting Results**” part of the Goal.

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Target for Year 3 Outcome	Current Difference from Baseline
Enter information in this box when completing the LCAP for 2024–25 or when adding a new metric.	Enter information in this box when completing the LCAP for 2024–25 or when adding a new metric.	Enter information in this box when completing the LCAP for 2025–26 . Leave blank until then.	Enter information in this box when completing the LCAP for 2026–27 . Leave blank until then.	Enter information in this box when completing the LCAP for 2024–25 or when adding a new metric.	Enter information in this box when completing the LCAP for 2025–26 and 2026–27 . Leave blank until then.

Goal Analysis:

Enter the LCAP Year.

Using actual annual measurable outcome data, including data from the Dashboard, analyze whether the planned actions were effective towards achieving the goal. “Effective” means the degree to which the planned actions were successful in producing the target result. Respond to the prompts as instructed.

Note: When completing the 2024–25 LCAP, use the 2023–24 Local Control and Accountability Plan Annual Update template to complete the Goal Analysis and identify the Goal Analysis prompts in the 2024–25 LCAP as “Not Applicable.”

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

- Describe the overall implementation of the actions to achieve the articulated goal, including relevant challenges and successes experienced with implementation.
 - Include a discussion of relevant challenges and successes experienced with the implementation process.
 - This discussion must include any instance where the LEA did not implement a planned action or implemented a planned action in a manner that differs substantively from how it was described in the adopted LCAP.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

- Explain material differences between Budgeted Expenditures and Estimated Actual Expenditures and between the Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services, as applicable. Minor variances in expenditures or percentages do not need to be addressed, and a dollar-for-dollar accounting is not required.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

- Describe the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal. “Effectiveness” means the degree to which the actions were successful in producing the target result and “ineffectiveness” means that the actions did not produce any significant or targeted result.
 - In some cases, not all actions in a goal will be intended to improve performance on all of the metrics associated with the goal.
 - When responding to this prompt, LEAs may assess the effectiveness of a single action or group of actions within the goal in the context of performance on a single metric or group of specific metrics within the goal that are applicable to the action(s). Grouping actions with metrics will allow for more robust analysis of whether the strategy the LEA is using to impact a specified set of metrics is working and increase transparency for educational partners. LEAs are encouraged to use such an approach when goals include multiple actions and metrics that are not closely associated.
 - Beginning with the development of the 2024–25 LCAP, the LEA must change actions that have not proven effective over a three-year period.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

- Describe any changes made to this goal, expected outcomes, metrics, or actions to achieve this goal as a result of this analysis and analysis of the data provided in the Dashboard or other local data, as applicable.
 - As noted above, beginning with the development of the 2024–25 LCAP, the LEA must change actions that have not proven effective over a three-year period. For actions that have been identified as ineffective, the LEA must identify the ineffective action and must include a description of the following:

- The reasons for the ineffectiveness, and
- How changes to the action will result in a new or strengthened approach.

Actions:

Complete the table as follows. Add additional rows as necessary.

Action

- Enter the action number.

Title

- Provide a short title for the action. This title will also appear in the action tables.

Description

- Provide a brief description of the action.
 - For actions that contribute to meeting the increased or improved services requirement, the LEA may include an explanation of how each action is principally directed towards and effective in meeting the LEA's goals for unduplicated students, as described in the instructions for the Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students section.
 - As previously noted, for each action identified as 1) contributing towards the requirement to increase or improve services for foster youth, English learners, including long-term English learners, and low-income students and 2) being provided on an LEA-wide basis, the LEA must identify one or more metrics to monitor the effectiveness of the action and its budgeted expenditures.
 - These required metrics may be identified within the action description or the first prompt in the increased or improved services section; however, the description must clearly identify the metric(s) being used to monitor the effectiveness of the action and the action(s) that the metric(s) apply to.

Total Funds

- Enter the total amount of expenditures associated with this action. Budgeted expenditures from specific fund sources will be provided in the action tables.

Contributing

- Indicate whether the action contributes to meeting the increased or improved services requirement as described in the Increased or Improved Services section using a “Y” for Yes or an “N” for No.
 - **Note:** for each such contributing action, the LEA will need to provide additional information in the Increased or Improved Services section to address the requirements in *California Code of Regulations*, Title 5 [5 CCR] Section 15496 in the Increased or Improved Services section of the LCAP.

Actions for Foster Youth: School districts, COEs, and charter schools that have a numerically significant foster youth student subgroup are encouraged to include specific actions in the LCAP designed to meet needs specific to foster youth students.

Required Actions

For English Learners and Long-Term English Learners

- LEAs with 30 or more English learners and/or 15 or more long-term English learners must include specific actions in the LCAP related to, at a minimum:
 - Language acquisition programs, as defined in *EC* Section 306, provided to students, and
 - Professional development for teachers.
 - If an LEA has both 30 or more English learners and 15 or more long-term English learners, the LEA must include actions for both English learners and long-term English learners.

For Technical Assistance

- LEAs eligible for technical assistance pursuant to *EC* sections 47607.3, 52071, 52071.5, 52072, or 52072.5, must include specific actions within the LCAP related to its implementation of the work underway as part of technical assistance. The most common form of this technical assistance is frequently referred to as Differentiated Assistance.

For Lowest Performing Dashboard Indicators

- LEAs that have Red Dashboard indicators for (1) a school within the LEA, (2) a student group within the LEA, and/or (3) a student group within any school within the LEA must include one or more specific actions within the LCAP:
 - The specific action(s) must be directed towards the identified student group(s) and/or school(s) and must address the identified state indicator(s) for which the student group or school received the lowest performance level on the 2023 Dashboard. Each student group and/or school that receives the lowest performance level on the 2023 Dashboard must be addressed by one or more actions.
 - These required actions will be effective for the three-year LCAP cycle.

For LEAs With Unexpended LREBG Funds

- To implement the requirements of *EC* Section 52064.4, LEAs with unexpended LREBG funds must include one or more actions supported with LREBG funds within the 2025–26, 2026–27, and 2027–28 LCAPs, as applicable to the LEA. Actions funded with LREBG funds must remain in the LCAP until the LEA has expended the remainder of its LREBG funds, after which time the actions may be removed from the LCAP.
 - Prior to identifying the actions included in the LCAP the LEA is required to conduct a needs assessment pursuant to [EC Section 32526\(d\)](#). For information related to the required needs assessment please see the Program Information tab on the [LREBG](#)

[Program Information](#) web page. Additional information about the needs assessment and evidence-based resources for the LREBG may be found on the [California Statewide System of Support LREBG Resources](#) web page. The required LREBG needs assessment may be part of the LEAs regular needs assessment for the LCAP if it meets the requirements of *EC* Section 32627(d).

- School districts receiving technical assistance and COEs providing technical assistance are encouraged to use the technical assistance process to support the school district in conducting the required needs assessment, the selection of actions funded by the LREBG and/or the evaluation of implementation of the actions required as part of the LCAP annual update process.
- As a reminder, LREBG funds must be used to implement one or more of the purposes articulated in [EC Section 32526\(c\)\(2\)](#).
- LEAs with unexpended LREBG funds must include one or more actions supported by LREBG funds within the LCAP. For each action supported by LREBG funding the action description must:
 - Identify the action as an LREBG action;
 - Include an explanation of how research supports the selected action;
 - Identify the metric(s) being used to monitor the impact of the action; and
 - Identify the amount of LREBG funds being used to support the action.

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students

Purpose

A well-written Increased or Improved Services section provides educational partners with a comprehensive description, within a single dedicated section, of how an LEA plans to increase or improve services for its unduplicated students as defined in *EC* Section 42238.02 in grades TK–12 as compared to all students in grades TK–12, as applicable, and how LEA-wide or schoolwide actions identified for this purpose meet regulatory requirements. Descriptions provided should include sufficient detail yet be sufficiently succinct to promote a broader understanding of educational partners to facilitate their ability to provide input. An LEA’s description in this section must align with the actions included in the Goals and Actions section as contributing.

Please Note: For the purpose of meeting the Increased or Improved Services requirement and consistent with *EC* Section 42238.02, long-term English learners are included in the English learner student group.

Statutory Requirements

An LEA is required to demonstrate in its LCAP how it is increasing or improving services for its students who are foster youth, English learners, and/or low-income, collectively referred to as unduplicated students, as compared to the services provided to all students in proportion to the increase in funding it receives based on the number and concentration of unduplicated students in the LEA (*EC* Section 42238.07[a][1], *EC*

Section 52064[b][8][B]; 5 CCR Section 15496[a]). This proportionality percentage is also known as the “minimum proportionality percentage” or “MPP.” The manner in which an LEA demonstrates it is meeting its MPP is two-fold: (1) through the expenditure of LCFF funds or through the identification of a Planned Percentage of Improved Services as documented in the Contributing Actions Table, and (2) through the explanations provided in the Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students section.

To improve services means to grow services in quality and to increase services means to grow services in quantity. Services are increased or improved by those actions in the LCAP that are identified in the Goals and Actions section as contributing to the increased or improved services requirement, whether they are provided across the entire LEA (LEA-wide action), provided to an entire school (Schoolwide action), or solely provided to one or more unduplicated student group(s) (Limited action).

Therefore, for *any* action contributing to meet the increased or improved services requirement, the LEA must include an explanation of:

- How the action is increasing or improving services for the unduplicated student group(s) (Identified Needs and Action Design), and
- How the action meets the LEA's goals for its unduplicated pupils in the state and any local priority areas (Measurement of Effectiveness).

LEA-wide and Schoolwide Actions

In addition to the above required explanations, LEAs must provide a justification for why an LEA-wide or Schoolwide action is being provided to all students and how the action is intended to improve outcomes for unduplicated student group(s) as compared to all students.

- Conclusory statements that a service will help achieve an expected outcome for the goal, without an explicit connection or further explanation as to how, are not sufficient.
- Further, simply stating that an LEA has a high enrollment percentage of a specific student group or groups does not meet the increased or improved services standard because enrolling students is not the same as serving students.

For School Districts Only

Actions provided on an **LEA-wide** basis at **school districts with an unduplicated pupil percentage of less than 55 percent** must also include a description of how the actions are the most effective use of the funds to meet the district's goals for its unduplicated pupils in the state and any local priority areas. The description must provide the basis for this determination, including any alternatives considered, supporting research, experience, or educational theory.

Actions provided on a **Schoolwide** basis for **schools with less than 40 percent enrollment of unduplicated pupils** must also include a description of how these actions are the most effective use of the funds to meet the district's goals for its unduplicated pupils in the state and any local priority areas. The description must provide the basis for this determination, including any alternatives considered, supporting research, experience, or educational theory.

Requirements and Instructions

Complete the tables as follows:

- Specify the amount of LCFF supplemental and concentration grant funds the LEA estimates it will receive in the coming year based on the number and concentration of foster youth, English learner, and low-income students. This amount includes the Additional 15 percent LCFF Concentration Grant.

Projected Additional 15 percent LCFF Concentration Grant

- Specify the amount of additional LCFF concentration grant add-on funding, as described in *EC* Section 42238.02, that the LEA estimates it will receive in the coming year.

Projected Percentage to Increase or Improve Services for the Coming School Year

- Specify the estimated percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the LCAP year as calculated pursuant to 5 *CCR* Section 15496(a)(7).

LCFF Carryover — Percentage

- Specify the LCFF Carryover — Percentage identified in the LCFF Carryover Table. If a carryover percentage is not identified in the LCFF Carryover Table, specify a percentage of zero (0.00%).

LCFF Carryover — Dollar

- Specify the LCFF Carryover — Dollar amount identified in the LCFF Carryover Table. If a carryover amount is not identified in the LCFF Carryover Table, specify an amount of zero (\$0).

Total Percentage to Increase or Improve Services for the Coming School Year

- Add the Projected Percentage to Increase or Improve Services for the Coming School Year and the Proportional LCFF Required Carryover Percentage and specify the percentage. This is the LEA's percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the LCAP year, as calculated pursuant to 5 *CCR* Section 15496(a)(7).

Required Descriptions:

LEA-wide and Schoolwide Actions

For each action being provided to an entire LEA or school, provide an explanation of (1) the unique identified need(s) of the unduplicated student group(s) for whom the action is principally directed, (2) how the action is designed to address the identified need(s) and why it is being provided on an LEA or schoolwide basis, and (3) the metric(s) used to measure the effectiveness of the action in improving outcomes for the unduplicated student group(s).

If the LEA has provided this required description in the Action Descriptions, state as such within the table.

Complete the table as follows:

Identified Need(s)

Provide an explanation of the unique identified need(s) of the LEA's unduplicated student group(s) for whom the action is principally directed.

An LEA demonstrates how an action is principally directed towards an unduplicated student group(s) when the LEA explains the need(s), condition(s), or circumstance(s) of the unduplicated student group(s) identified through a needs assessment and how the action addresses them. A meaningful needs assessment includes, at a minimum, analysis of applicable student achievement data and educational partner feedback.

How the Action(s) are Designed to Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis

Provide an explanation of how the action as designed will address the unique identified need(s) of the LEA’s unduplicated student group(s) for whom the action is principally directed and the rationale for why the action is being provided on an LEA-wide or schoolwide basis.

- As stated above, conclusory statements that a service will help achieve an expected outcome for the goal, without an explicit connection or further explanation as to how, are not sufficient.
- Further, simply stating that an LEA has a high enrollment percentage of a specific student group or groups does not meet the increased or improved services standard because enrolling students is not the same as serving students.

Metric(s) to Monitor Effectiveness

Identify the metric(s) being used to measure the progress and effectiveness of the action(s).

Note for COEs and Charter Schools: In the case of COEs and charter schools, schoolwide and LEA-wide are considered to be synonymous.

Limited Actions

For each action being solely provided to one or more unduplicated student group(s), provide an explanation of (1) the unique identified need(s) of the unduplicated student group(s) being served, (2) how the action is designed to address the identified need(s), and (3) how the effectiveness of the action in improving outcomes for the unduplicated student group(s) will be measured.

If the LEA has provided the required descriptions in the Action Descriptions, state as such.

Complete the table as follows:

Identified Need(s)

Provide an explanation of the unique need(s) of the unduplicated student group(s) being served identified through the LEA’s needs assessment. A meaningful needs assessment includes, at a minimum, analysis of applicable student achievement data and educational partner feedback.

How the Action(s) are Designed to Address Need(s)

Provide an explanation of how the action is designed to address the unique identified need(s) of the unduplicated student group(s) being served.

Metric(s) to Monitor Effectiveness

Identify the metric(s) being used to measure the progress and effectiveness of the action(s).

For any limited action contributing to meeting the increased or improved services requirement that is associated with a Planned Percentage of Improved Services in the Contributing Summary Table rather than an expenditure of LCFF funds, describe the methodology that was used to determine the contribution of the action towards the proportional percentage, as applicable.

- For each action with an identified Planned Percentage of Improved Services, identify the goal and action number and describe the methodology that was used.
- When identifying a Planned Percentage of Improved Services, the LEA must describe the methodology that it used to determine the contribution of the action towards the proportional percentage. The percentage of improved services for an action corresponds to the amount of LCFF funding that the LEA estimates it would expend to implement the action if it were funded.
- For example, an LEA determines that there is a need to analyze data to ensure that instructional aides and expanded learning providers know what targeted supports to provide to students who are foster youth. The LEA could implement this action by hiring additional staff to collect and analyze data and to coordinate supports for students, which, based on the LEA's current pay scale, the LEA estimates would cost \$165,000. Instead, the LEA chooses to utilize a portion of existing staff time to analyze data relating to students who are foster youth. This analysis will then be shared with site principals who will use the data to coordinate services provided by instructional assistants and expanded learning providers to target support to students. In this example, the LEA would divide the estimated cost of \$165,000 by the amount of LCFF Funding identified in the Total Planned Expenditures Table and then convert the quotient to a percentage. This percentage is the Planned Percentage of Improved Services for the action.

Additional Concentration Grant Funding

A description of the plan for how the additional concentration grant add-on funding identified above will be used to increase the number of staff providing direct services to students at schools that have a high concentration (above 55 percent) of foster youth, English learners, and low-income students, as applicable.

An LEA that receives the additional concentration grant add-on described in *EC* Section 42238.02 is required to demonstrate how it is using these funds to increase the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is greater than 55 percent as compared to the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is equal to or less than 55 percent. The staff who provide direct services to students must be certificated staff and/or classified staff employed by the LEA; classified staff includes custodial staff.

Provide the following descriptions, as applicable to the LEA:

- An LEA that does not receive a concentration grant or the concentration grant add-on must indicate that a response to this prompt is not applicable.

- Identify the goal and action numbers of the actions in the LCAP that the LEA is implementing to meet the requirement to increase the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is greater than 55 percent.
- An LEA that does not have comparison schools from which to describe how it is using the concentration grant add-on funds, such as a single-school LEA or an LEA that only has schools with an enrollment of unduplicated students that is greater than 55 percent, must describe how it is using the funds to increase the number of credentialed staff, classified staff, or both, including custodial staff, who provide direct services to students at selected schools and the criteria used to determine which schools require additional staffing support.
- In the event that an additional concentration grant add-on is not sufficient to increase staff providing direct services to students at a school with an enrollment of unduplicated students that is greater than 55 percent, the LEA must describe how it is using the funds to retain staff providing direct services to students at a school with an enrollment of unduplicated students that is greater than 55 percent.

Complete the table as follows:

- Provide the staff-to-student ratio of classified staff providing direct services to students with a concentration of unduplicated students that is 55 percent or less and the staff-to-student ratio of classified staff providing direct services to students at schools with a concentration of unduplicated students that is greater than 55 percent, as applicable to the LEA.
 - The LEA may group its schools by grade span (Elementary, Middle/Junior High, and High Schools), as applicable to the LEA.
 - The staff-to-student ratio must be based on the number of full-time equivalent (FTE) staff and the number of enrolled students as counted on the first Wednesday in October of each year.
- Provide the staff-to-student ratio of certificated staff providing direct services to students at schools with a concentration of unduplicated students that is 55 percent or less and the staff-to-student ratio of certificated staff providing direct services to students at schools with a concentration of unduplicated students that is greater than 55 percent, as applicable to the LEA.
 - The LEA may group its schools by grade span (Elementary, Middle/Junior High, and High Schools), as applicable to the LEA.
 - The staff-to-student ratio must be based on the number of FTE staff and the number of enrolled students as counted on the first Wednesday in October of each year.

Action Tables

Complete the Total Planned Expenditures Table for each action in the LCAP. The information entered into this table will automatically populate the other Action Tables. Information is only entered into the Total Planned Expenditures Table, the Annual Update Table, the Contributing Actions Annual Update Table, and the LCFF Carryover Table. The word “input” has been added to column headers to aid in identifying the column(s) where information will be entered. Information is not entered on the remaining Action tables.

The following tables are required to be included as part of the LCAP adopted by the local governing board or governing body:

- Table 1: Total Planned Expenditures Table (for the coming LCAP Year)
- Table 2: Contributing Actions Table (for the coming LCAP Year)
- Table 3: Annual Update Table (for the current LCAP Year)
- Table 4: Contributing Actions Annual Update Table (for the current LCAP Year)
- Table 5: LCFF Carryover Table (for the current LCAP Year)

Note: The coming LCAP Year is the year that is being planned for, while the current LCAP year is the current year of implementation. For example, when developing the 2024–25 LCAP, 2024–25 will be the coming LCAP Year and 2023–24 will be the current LCAP Year.

Total Planned Expenditures Table

In the Total Planned Expenditures Table, input the following information for each action in the LCAP for that applicable LCAP year:

- **LCAP Year:** Identify the applicable LCAP Year.
- **1. Projected LCFF Base Grant:** Provide the total amount estimated LCFF entitlement for the coming school year, excluding the supplemental and concentration grants and the add-ons for the Targeted Instructional Improvement Block Grant program, the former Home-to-School Transportation program, and the Small School District Transportation program, pursuant to 5 CCR Section 15496(a)(8). Note that the LCFF Base Grant for purposes of the LCAP also includes the Necessary Small Schools and Economic Recovery Target allowances for school districts, and County Operations Grant for COEs.

See EC sections 2574 (for COEs) and 42238.02 (for school districts and charter schools), as applicable, for LCFF entitlement calculations.
- **2. Projected LCFF Supplemental and/or Concentration Grants:** Provide the total amount of LCFF supplemental and concentration grants estimated on the basis of the number and concentration of unduplicated students for the coming school year.
- **3. Projected Percentage to Increase or Improve Services for the Coming School Year:** This percentage will not be entered; it is calculated based on the Projected LCFF Base Grant and the Projected LCFF Supplemental and/or Concentration Grants, pursuant to 5 CCR Section 15496(a)(8). This is the percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the coming LCAP year.
- **LCFF Carryover — Percentage:** Specify the LCFF Carryover — Percentage identified in the LCFF Carryover Table from the prior LCAP year. If a carryover percentage is not identified in the LCFF Carryover Table, specify a percentage of zero (0.00%).
- **Total Percentage to Increase or Improve Services for the Coming School Year:** This percentage will not be entered; it is calculated based on the Projected Percentage to Increase or Improve Services for the Coming School Year and the LCFF Carryover —

Percentage. ***This is the percentage by which the LEA must increase or improve services for unduplicated pupils as compared to the services provided to all students in the coming LCAP year.***

- **Goal #:** Enter the LCAP Goal number for the action.
- **Action #:** Enter the action's number as indicated in the LCAP Goal.
- **Action Title:** Provide a title of the action.
- **Student Group(s):** Indicate the student group or groups who will be the primary beneficiary of the action by entering "All," or by entering a specific student group or groups.
- **Contributing to Increased or Improved Services?:** Type "Yes" if the action **is** included as contributing to meeting the increased or improved services requirement; OR, type "No" if the action is **not** included as contributing to meeting the increased or improved services requirement.
- If "Yes" is entered into the Contributing column, then complete the following columns:
 - **Scope:** The scope of an action may be LEA-wide (i.e., districtwide, countywide, or charterwide), schoolwide, or limited. An action that is LEA-wide in scope upgrades the entire educational program of the LEA. An action that is schoolwide in scope upgrades the entire educational program of a single school. An action that is limited in its scope is an action that serves only one or more unduplicated student groups.
 - **Unduplicated Student Group(s):** Regardless of scope, contributing actions serve one or more unduplicated student groups. Indicate one or more unduplicated student groups for whom services are being increased or improved as compared to what all students receive.
 - **Location:** Identify the location where the action will be provided. If the action is provided to all schools within the LEA, the LEA must indicate "All Schools." If the action is provided to specific schools within the LEA or specific grade spans only, the LEA must enter "Specific Schools" or "Specific Grade Spans." Identify the individual school or a subset of schools or grade spans (e.g., all high schools or grades transitional kindergarten through grade five), as appropriate.
- **Time Span:** Enter "ongoing" if the action will be implemented for an indeterminate period of time. Otherwise, indicate the span of time for which the action will be implemented. For example, an LEA might enter "1 Year," or "2 Years," or "6 Months."
- **Total Personnel:** Enter the total amount of personnel expenditures utilized to implement this action.
- **Total Non-Personnel:** This amount will be automatically calculated based on information provided in the Total Personnel column and the Total Funds column.

- **LCFF Funds:** Enter the total amount of LCFF funds utilized to implement this action, if any. LCFF funds include all funds that make up an LEA's total LCFF target (i.e., base grant, grade span adjustment, supplemental grant, concentration grant, Targeted Instructional Improvement Block Grant, and Home-To-School Transportation).
 - **Note:** For an action to contribute towards meeting the increased or improved services requirement, it must include some measure of LCFF funding. The action may also include funding from other sources, however the extent to which an action contributes to meeting the increased or improved services requirement is based on the LCFF funding being used to implement the action.
- **Other State Funds:** Enter the total amount of Other State Funds utilized to implement this action, if any.
 - **Note:** Equity Multiplier funds must be included in the "Other State Funds" category, not in the "LCFF Funds" category. As a reminder, Equity Multiplier funds must be used to supplement, not supplant, funding provided to Equity Multiplier schoolsites for purposes of the LCFF, the ELO-P, the LCRS, and/or the CCSPP. This means that Equity Multiplier funds must not be used to replace funding that an Equity Multiplier schoolsite would otherwise receive to implement LEA-wide actions identified in the LEA's LCAP or that an Equity Multiplier schoolsite would otherwise receive to implement provisions of the ELO-P, the LCRS, and/or the CCSPP.
- **Local Funds:** Enter the total amount of Local Funds utilized to implement this action, if any.
- **Federal Funds:** Enter the total amount of Federal Funds utilized to implement this action, if any.
- **Total Funds:** This amount is automatically calculated based on amounts entered in the previous four columns.
- **Planned Percentage of Improved Services:** For any action identified as contributing, being provided on a Limited basis to unduplicated students, and that does not have funding associated with the action, enter the planned quality improvement anticipated for the action as a percentage rounded to the nearest hundredth (0.00%). A limited action is an action that only serves foster youth, English learners, and/or low-income students.
 - As noted in the instructions for the Increased or Improved Services section, when identifying a Planned Percentage of Improved Services, the LEA must describe the methodology that it used to determine the contribution of the action towards the proportional percentage. The percentage of improved services for an action corresponds to the amount of LCFF funding that the LEA estimates it would expend to implement the action if it were funded.

For example, an LEA determines that there is a need to analyze data to ensure that instructional aides and expanded learning providers know what targeted supports to provide to students who are foster youth. The LEA could implement this action by hiring additional staff to collect and analyze data and to coordinate supports for students, which, based on the LEA's current pay scale, the LEA estimates would cost \$165,000. Instead, the LEA chooses to utilize a portion of existing staff time to analyze data relating to students who are foster youth. This analysis will then be shared with site principals who will use the data to coordinate services provided by instructional assistants and expanded learning providers to target support to students. In this example, the LEA would divide the estimated cost of \$165,000 by the amount of LCFF Funding identified in the Data Entry Table and then convert the quotient to a percentage. This percentage is the Planned Percentage of Improved Services for the action.

Contributing Actions Table

As noted above, information will not be entered in the Contributing Actions Table; however, the ‘Contributing to Increased or Improved Services?’ column will need to be checked to ensure that only actions with a “Yes” are displaying. If actions with a “No” are displayed or if actions that are contributing are not displaying in the column, use the drop-down menu in the column header to filter only the “Yes” responses.

Annual Update Table

In the Annual Update Table, provide the following information for each action in the LCAP for the relevant LCAP year:

- **Estimated Actual Expenditures:** Enter the total estimated actual expenditures to implement this action, if any.

Contributing Actions Annual Update Table

In the Contributing Actions Annual Update Table, check the ‘Contributing to Increased or Improved Services?’ column to ensure that only actions with a “Yes” are displaying. If actions with a “No” are displayed or if actions that are contributing are not displaying in the column, use the drop-down menu in the column header to filter only the “Yes” responses. Provide the following information for each contributing action in the LCAP for the relevant LCAP year:

- **6. Estimated Actual LCFF Supplemental and/or Concentration Grants:** Provide the total amount of LCFF supplemental and concentration grants estimated based on the number and concentration of unduplicated students in the current school year.
- **Estimated Actual Expenditures for Contributing Actions:** Enter the total estimated actual expenditure of LCFF funds used to implement this action, if any.
- **Estimated Actual Percentage of Improved Services:** For any action identified as contributing, being provided on a Limited basis only to unduplicated students, and that does not have funding associated with the action, enter the total estimated actual quality improvement anticipated for the action as a percentage rounded to the nearest hundredth (0.00%).
 - Building on the example provided above for calculating the Planned Percentage of Improved Services, the LEA in the example implements the action. As part of the annual update process, the LEA reviews implementation and student outcome data and determines that the action was implemented with fidelity and that outcomes for foster youth students improved. The LEA reviews the original estimated cost for the action and determines that had it hired additional staff to collect and analyze data and to coordinate supports for students that estimated actual cost would have been \$169,500 due to a cost of living adjustment. The LEA would divide the estimated actual cost of \$169,500 by the amount of LCFF Funding identified in the Data Entry Table and then convert the quotient to a percentage. This percentage is the Estimated Actual Percentage of Improved Services for the action.

LCFF Carryover Table

- **9. Estimated Actual LCFF Base Grant:** Provide the total amount of estimated LCFF Target Entitlement for the current school year, excluding the supplemental and concentration grants and the add-ons for the Targeted Instructional Improvement Block Grant program,

the former Home-to-School Transportation program, and the Small School District Transportation program, pursuant to 5 CCR Section 15496(a)(8). Note that the LCFF Base Grant for purposes of the LCAP also includes the Necessary Small Schools and Economic Recovery Target allowances for school districts, and County Operations Grant for COEs. See EC sections 2574 (for COEs) and 42238.02 (for school districts and charter schools), as applicable, for LCFF entitlement calculations.

- **10. Total Percentage to Increase or Improve Services for the Current School Year:** This percentage will not be entered. The percentage is calculated based on the amounts of the Estimated Actual LCFF Base Grant (9) and the Estimated Actual LCFF Supplemental and/or Concentration Grants (6), pursuant to 5 CCR Section 15496(a)(8), plus the LCFF Carryover – Percentage from the prior year. This is the percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the current LCAP year.

Calculations in the Action Tables

To reduce the duplication of effort of LEAs, the Action Tables include functionality such as pre-population of fields and cells based on the information provided in the Data Entry Table, the Annual Update Summary Table, and the Contributing Actions Table. For transparency, the functionality and calculations used are provided below.

Contributing Actions Table

- **4. Total Planned Contributing Expenditures (LCFF Funds)**
 - This amount is the total of the Planned Expenditures for Contributing Actions (LCFF Funds) column.
- **5. Total Planned Percentage of Improved Services**
 - This percentage is the total of the Planned Percentage of Improved Services column.
- **Planned Percentage to Increase or Improve Services for the coming school year (4 divided by 1, plus 5)**
 - This percentage is calculated by dividing the Total Planned Contributing Expenditures (4) by the Projected LCFF Base Grant (1), converting the quotient to a percentage, and adding it to the Total Planned Percentage of Improved Services (5).

Contributing Actions Annual Update Table

Pursuant to EC Section 42238.07(c)(2), if the Total Planned Contributing Expenditures (4) is less than the Estimated Actual LCFF Supplemental and Concentration Grants (6), the LEA is required to calculate the difference between the Total Planned Percentage of Improved Services (5) and the Total Estimated Actual Percentage of Improved Services (7). If the Total Planned Contributing Expenditures (4) is equal to or greater than the Estimated Actual LCFF Supplemental and Concentration Grants (6), the Difference Between Planned and Estimated Actual Percentage of Improved Services will display “Not Required.”

- **6. Estimated Actual LCFF Supplemental and Concentration Grants**

- This is the total amount of LCFF supplemental and concentration grants the LEA estimates it will actually receive based on the number and concentration of unduplicated students in the current school year.
- **4. Total Planned Contributing Expenditures (LCFF Funds)**
 - This amount is the total of the Last Year's Planned Expenditures for Contributing Actions (LCFF Funds).
- **7. Total Estimated Actual Expenditures for Contributing Actions**
 - This amount is the total of the Estimated Actual Expenditures for Contributing Actions (LCFF Funds).
- **Difference Between Planned and Estimated Actual Expenditures for Contributing Actions (Subtract 7 from 4)**
 - This amount is the Total Estimated Actual Expenditures for Contributing Actions (7) subtracted from the Total Planned Contributing Expenditures (4).
- **5. Total Planned Percentage of Improved Services (%)**
 - This amount is the total of the Planned Percentage of Improved Services column.
- **8. Total Estimated Actual Percentage of Improved Services (%)**
 - This amount is the total of the Estimated Actual Percentage of Improved Services column.
- **Difference Between Planned and Estimated Actual Percentage of Improved Services (Subtract 5 from 8)**
 - This amount is the Total Planned Percentage of Improved Services (5) subtracted from the Total Estimated Actual Percentage of Improved Services (8).

LCFF Carryover Table

- **10. Total Percentage to Increase or Improve Services for the Current School Year (6 divided by 9 plus Carryover %)**
 - This percentage is the Estimated Actual LCFF Supplemental and/or Concentration Grants (6) divided by the Estimated Actual LCFF Base Grant (9) plus the LCFF Carryover – Percentage from the prior year.
- **11. Estimated Actual Percentage of Increased or Improved Services (7 divided by 9, plus 8)**
 - This percentage is the Total Estimated Actual Expenditures for Contributing Actions (7) divided by the LCFF Funding (9), then converting the quotient to a percentage and adding the Total Estimated Actual Percentage of Improved Services (8).
- **12. LCFF Carryover — Dollar Amount LCFF Carryover (Subtract 11 from 10 and multiply by 9)**

- If the Estimated Actual Percentage of Increased or Improved Services (11) is less than the Estimated Actual Percentage to Increase or Improve Services (10), the LEA is required to carry over LCFF funds.

The amount of LCFF funds is calculated by subtracting the Estimated Actual Percentage to Increase or Improve Services (11) from the Estimated Actual Percentage of Increased or Improved Services (10) and then multiplying by the Estimated Actual LCFF Base Grant (9). This amount is the amount of LCFF funds that is required to be carried over to the coming year.

- **13. LCFF Carryover — Percentage (12 divided by 9)**

- This percentage is the unmet portion of the Percentage to Increase or Improve Services that the LEA must carry over into the coming LCAP year. The percentage is calculated by dividing the LCFF Carryover (12) by the LCFF Funding (9).

California Department of Education
November 2024
